Be the Earliest with the Latest "Universal" Holiday Goods

SOON the spirit of Christmas will swell in the heart of mankind and touch all with its potent tenderness. Again the problem of what gifts to give will ruffle the serenity of holiday shoppers. The problem has a solution in your store—or should have.

GIFT buyers are always looking for something new, different, distinctive. Above all, they are looking for things they can afford to buy. Prices work two ways these days—they either scare trade away or coax it in. You cannot have a better trade coaxer this year than the reduced prices on "Universal" Electric Toasters, Percolators, Grills, Irons, Heating Pads and all other "Universal" Home needs.

FOR those who are looking for something new sell them the **newest.** And be the first to do it. Better be a month early than a day late in featuring the new "Universal" Grecian Coffee Urn, Reversible Toaster, Snap Switch Grill and other products of special appeal to gift buyers.

Write for bulletin showing new "Universal" Holiday Goods.

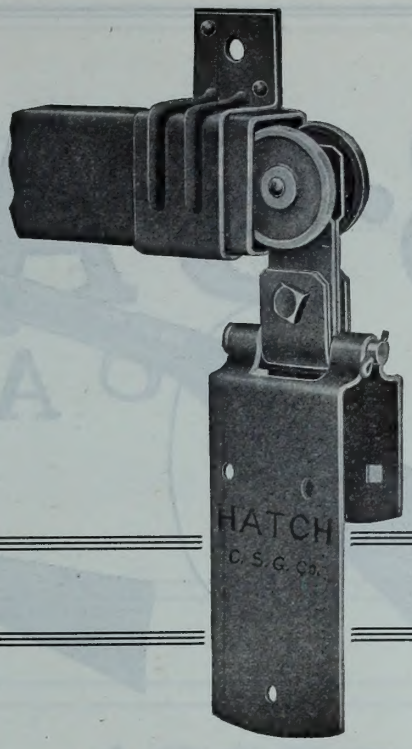
An Old Friend of the Trade

The Hatch

Trolley Hanger



Moderate Price -- Quick Turnover

This perfect-action hanger sells extraordinarily well because it might be said to be "made to measure for the Canadian trade."

The Hatch Hanger is the result of a thorough investigation of the requirements of the hanger-users and the trade in general, and the hanger fills exactly the wants of the trade and consumers. This accounts for its splendid sales.

A smooth, easy-running hanger with apron 6 inches long and 3 inches wide. It moves with perfect action on roller bearings. Packed for shipment one pair in a box complete with bolts and end caps for track; 12 pairs in a case. Weight per dozen pairs, 85 lbs.

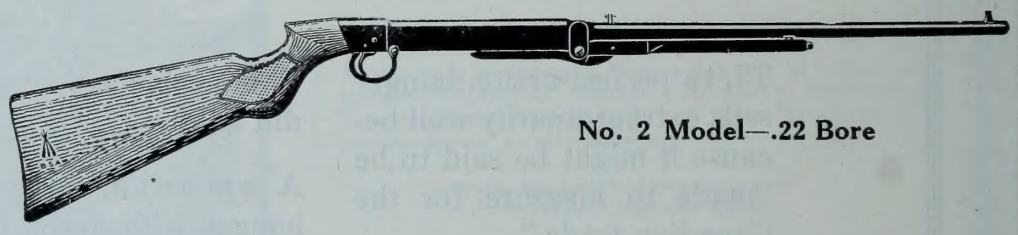
B·S·A

AIR RIFLES

No. 1 Model—. 177 Bore

The Method of Cocking the b. S.A. Air Rifle is here illustrated. The patent form of lever mechanism is used, instead of the barrel as in other systems.



No. 2 Model—.22 Bore

A Useful, Accurate Rifle—Not a Toy

This is a good proposition for the merchant. There is a well-defined need and demand for air rifles in this country—particularly for a practical, useful rifle like these B.S.A. types. They are powerful, yet short ranged; accurate and safe.

Here are the principal features of the B.S.A. air rifle summarized for busy buyers' attention:

It has no breech joint through which compressed air can escape; it has an accurately fitting, airtight, breech plug, which forms the pellet chamber; "the rotating breech plug has many important advantages, chief among which is the great uniformity of result from round to round"

Arms and Explosives. The patent, separate lever is used instead of the barrel as a spring-compressing lever; it has improved forms of back and front sights; an aperture or peep backsight can be properly fitted and used on it (by reason of the rigidity between barrel and cylinder); the barrel is rifled with greatest engineering skill, especially to deal with the specially shaped B.S.A. pellets; every part is interchangeable; the piston (or main) spring is very easily replaced; the highest class of steel only is used. The life of the rifle is thus practically everlasting.

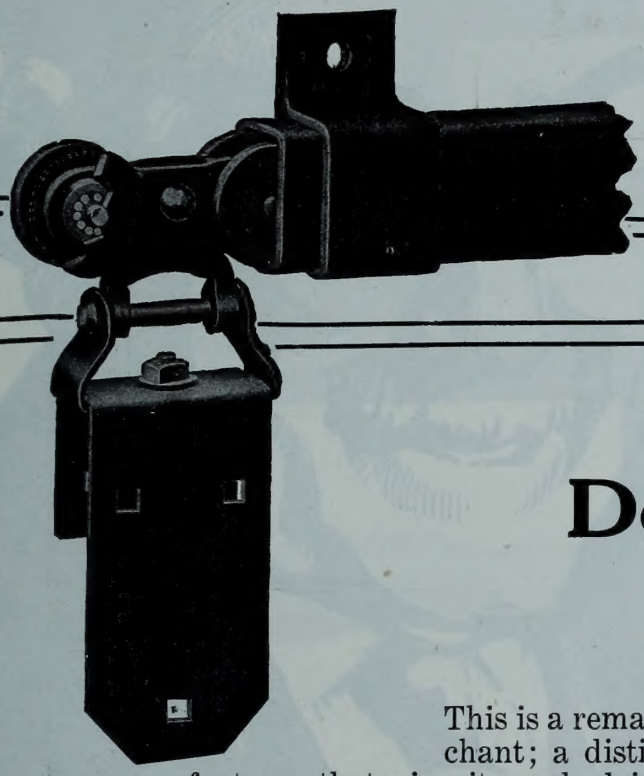
And Your Best Advertisement



1915 Door Hangers and Track

This is a remarkably interesting proposition to the merchant; a distinctive Door Hanger with pulling, sales-features that give it marked individuality. Observe the oiling device, the bearings, the enclosed carriage, in its weather proof track, and the flexible joint that allows the door to swing.

It is Easy to Sell S-B Door Hangers

because of their superior selling points. The 1915 Hangers are packed one pair in a carton, complete with bolts and special oiling track support; 1915 Track and 1915 Brackets.

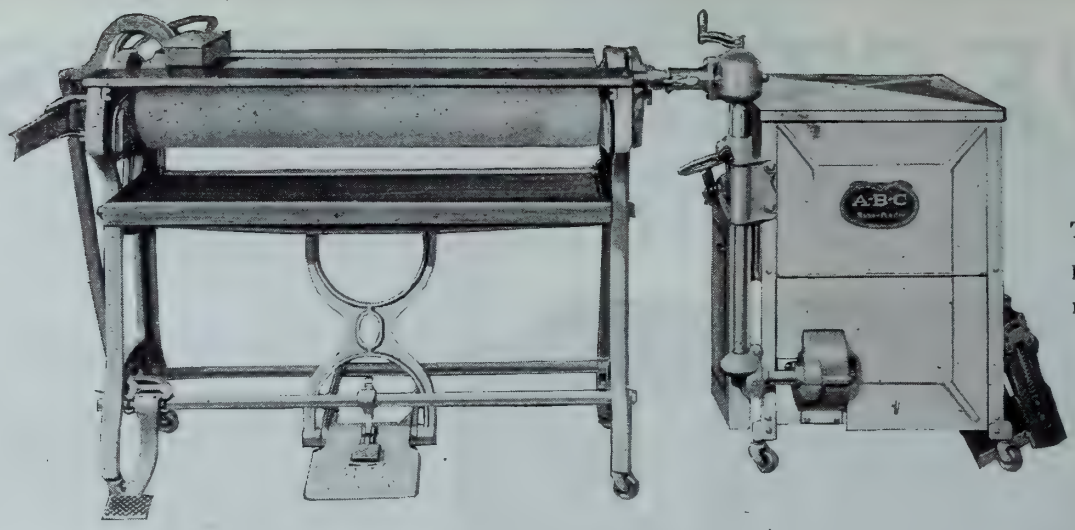
The famous ABC Electric Ironer



The new improved 1922 model ABC

A Home Laundry Team Without an Equal

This A B C Electric Laundress unit that washes, wrings and irons, using the motor on the washer to operate the ironer and saving the purchaser the cost of an extra motor, has broken all sales records.

Although any model A B C washer—an "Alco" single tub, "Alco" double tub, Semi-cabinet (galvanized or copper tub) or Full Cabinet (galvanized or copper tub) washer—will drive the A B C ironer, the supreme combination is the ironer with the new A B C 1922 model No. 66, the "serviceproof" washer.

There is nothing to compete with it. The A B C dealer has the field to himself with something different, something unusual, to capture business.

The A B C Ironer may also be sold separately, with motor, where another make of washer is in use.

Why don't you look into the A B C exclusive dealer proposition? The line is complete, with washers in every price class. The line is perfected—the result of 13 years' experience. The company behind the line is big, strong and in business to stay. The name A B C is well and favorably known. You receive real sales, advertising and service co-operation.

This A B C proposition has interested many of the highest class dealers in Canada. Certainly, then, it is also worth **your** consideration.

Pilot—The Original Pipeless Furnace

Pilot was the original, safe guide among the rocks and shoals of early exploration in the Pipeless Furnace field, years ago.

This early career benefited the Pilot Pipeless Furnace by the adoption of all improvements and discoveries, as this branch of heating developed. This success in safely piloting the way into the channels of profit, and, finally, into the snug harbor that provides a comfortable berth for the Hall Zryd dealer, is too well-known to require comment.

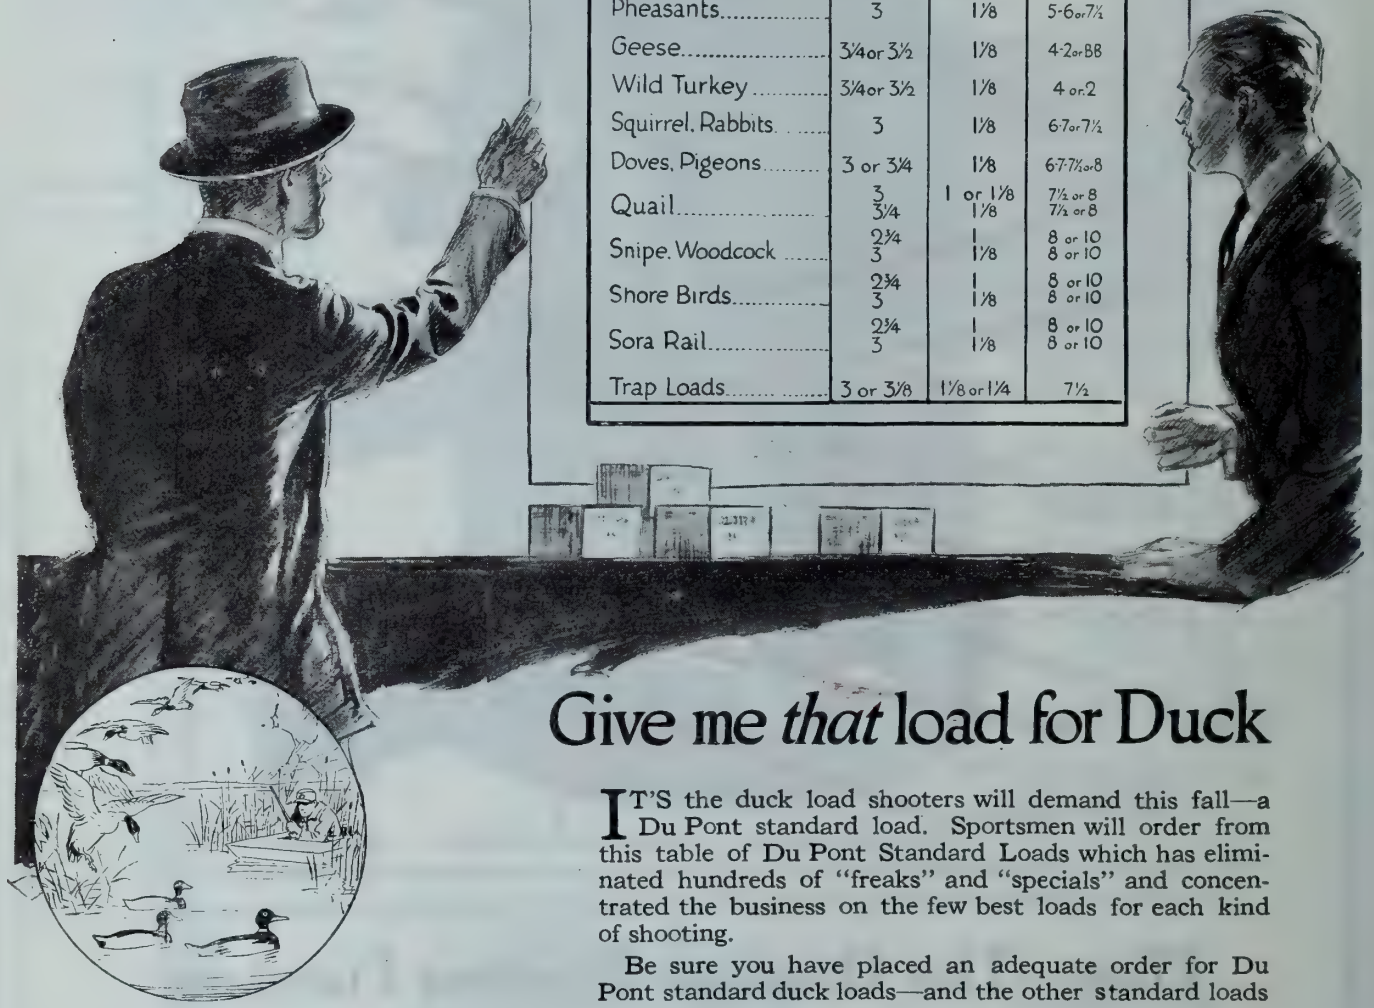
"WHEN I crack down on old Blue Wing Teal coming down the wind like a rifle bullet I know I've got to stop him and stop him hard. That's why I always buy a standard duck load of 'Du Pont.' I know it's *right*—right in shot size and weight and specially right as to the powder. I always select my loads from this table of proved standards and know I can't go wrong."

DU PONT STANDARD 12 GAUGE LOADS

	DU PONT SMOKELESS Drams	OUNCES Shot	SIZE Shot
Large Ducks	3¼ or 3½	1⅛ or 1¼	4-5 or 6
Small and Medium Ducks	3 3¼	1⅛ 1⅛ or 1¼	5-6 or 7½ 5-6 or 7½
Grouse, Partridge, Prairie Chicken	3 or 3¼	1⅛	6 or 7½
Pheasants	3	1⅛	5-6 or 7½
Geese	3¼ or 3½	1⅛	4-2 or BB
Wild Turkey	3¼ or 3½	1⅛	4 or 2
Squirrel, Rabbits	3	1⅛	6-7 or 7½
Doves, Pigeons	3 or 3¼	1⅛	6-7-7½ or 8
Quail	3 3¼	1 or 1⅛ 1⅛	7½ or 8 7½ or 8
Snipe, Woodcock	2¾ 3	1 1⅛	8 or 10 8 or 10
Shore Birds	2¾ 3	1 1⅛	8 or 10 8 or 10
Sora Rail	2¾ 3	1 1⅛	8 or 10 8 or 10
Trap Loads	3 or 3⅛	1⅛ or 1¼	7½



Standard Duck Loads:

Du Pont, 3, 3¼ or 3½ drs.

Shot: Ounces, 1⅛ or 1¼
Numbers: 4, 5, 6 or 7½

Give me *that* load for Duck

IT'S the duck load shooters will demand this fall—a Du Pont standard load. Sportsmen will order from this table of Du Pont Standard Loads which has eliminated hundreds of "freaks" and "specials" and concentrated the business on the few best loads for each kind of shooting.

Be sure you have placed an adequate order for Du Pont standard duck loads—and the other standard loads in the table.

We are telling every shooter it is possible to reach through the sporting magazines to buy from this list—so order from it yourself and be ready to meet the demand. It means no shelf warmers, quicker turnover and greater profits.

We are furnishing a counter display and a steel bound card (for use by your clerks) featuring the Du Pont table of standard loads. If you have not received yours, write.

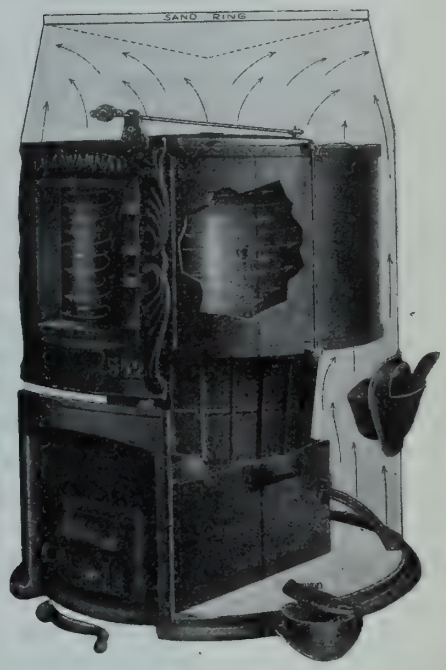
More Heat---Less Trouble!

THAT is what you are guaranteeing your customers when you sell them one of the famous Maple Leaf heat makers. You have the double satisfaction of knowing that your customer will be more than satisfied and that you have made a handsome profit.

Business of this kind is nice, clean and satisfying. And it is the kind that the dealer is always sure of in stoves, ranges and heaters when the goods handled are the famous Maple Leaf brand.

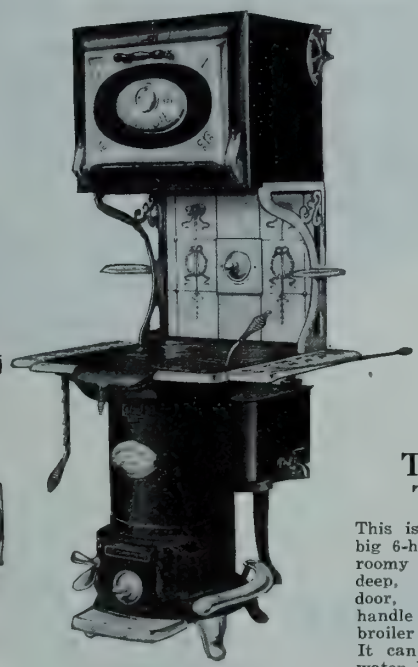
Get in line with this gratifying business! If you are handling Maple Leaf—push them to the limit. If you are not handling Maple Leaf—decide now to do so.
Write to us for terms and full particulars.

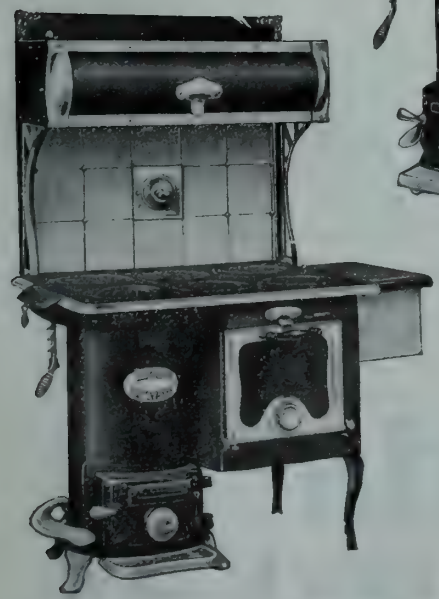


A DANDY TRIO of HEATERS

Maple Leaf Dealers

all over the country are making good range and stove money. If you want to join this crowd of satisfied merchants—let us send you full particulars, prices and catalogues of the Maple Leaf line.





The Maple Leaf Lackawanna Furnace

This is a perfect heating plant for a building of any size, ranging from 9,000 to 70,000 cubic feet in space. It creates quantities of heat and places it where you want it. A perfected flue system, a generous radiating service and many modern improvements and attachments all combine towards making an efficient and economical heating system which cannot be beaten. One Lackawanna furnace installed in your section will sell many others.

P.S.—If you want special furnace information to fit unusual conditions—do not hesitate to request same from us.

Two unusual Quebec heaters, that are also perfect cooking and baking ranges:

The Maple Leaf Thatsit Range

This is a side oven Quebec with a big 6-hole range top. It has a large roomy oven, 13¼ x 11½ x 20 inches deep, balanced spring type drop door, friction catch, non-heating handle and thermometer. It has a broiler lift and a pouch feed door. It can be fitted with either a hot water boiler or copper reservoir and is sold with or without a warming closet.

The Maple Leaf Composite Range

A range which occupies small space and which produces big results. It's unique in construction—standing alone because of its patented flue system which makes the high oven possible. It utilizes the well known Quebec principle of combustion, giving extraordinary results with any and all kinds of fuel. As a heat maker, as a cooking and baking implement, no other range equals it and none excel it.

Either of these Two Quebec Ranges will give genuine satisfaction !

Made Entirely of Metal —and Sells for $150!

The Sunnysuds (the first standard size cabinet electric washer to retail at $150) is built of steel, copper and aluminum. Wood is used only where good engineering dictates—the cross member on which the motor is mounted.

All other parts are built for enduring service—out of metal. The enamelled cabinet is constructed of rugged, rigid pressed steel. Copper is used throughout the six sheet oscillating tub—even in the hood of the sediment zone and the baffle plates. The reversible 4-position wringer is light aluminum. The deep waterboard is also metal. There are no belts, the ¼h.p. motor being shafted to the enclosed driving mechanism.

Unusual dealer interest was created by the first announcement of this remarkable washer selling at a remarkable price. The Sunnysuds sales organization is being slowly and carefully expanded. Dealers who appreciate the profit possibilities in selling a standard size satisfaction-giving electric washer for $150 are urged to write at once for complete information as to discounts, etc.

If interested tear out this page and place with letters to be answered.

Sectional view

ALLIANCE

The Latest Combination Stove For Coal and Wood

We boast of being the first manufacturers, in the year 1908, to have fitted the Quebec Heater with a steel oven and marketed it. Since then, this business has grown up by leaps and bounds. We have had many clever imitators and most of the Stove Founders are making it to-day.

But we have always been careful to keep up the lead we had over our competitors, and there is ample proof of this in the design of the STOVE "ALLIANCE" shown herewith which is well protected by patents.

The sectional view shows that the operating principle is exactly the same as that of the Quebec Heater, while the outside appearance is that of a range. Thus, it retains all the good qualities of the former but has, beside, all the conveniences of the latter, combining in one the utility and economy of both.

Any person conversant with the stove business will agree with us that the STOVE "ALLIANCE" is an improvement, as well as an advanced step, over the Quebec Heater with oven. If you add to this a close competition in prices, there is every advantage in handling the "ALLIANCE" instead of the Quebec Heater.

It will Pay You to Investigate, Mr. Dealer !

This self-fluxing solder has modernized soldering

ONE operation used to require more time, more skill and cause more trouble than all the other operations connected with soldering combined—the application of flux. Shops of every kind are doing away with this nuisance—are doing better soldering in half the time formerly required—simply by using this self-fluxing solder.

And that is the reason for the ever increasing demand for—

KESTER ACID CORE WIRE SOLDER

FLUX IN POCKETS

The flux is in pockets in the hollow core of the genuine tin-and-lead solder wire. It flows out on the job just before the solder is melted. Just enough flux is released to produce a hold-fast bond.

In Great Demand

Solder users everywhere demand this self-fluxing solder because it does better work, because it saves half of the time formerly required, and because it enables the novice to do expert soldering. It is widely advertised; we have sent out thousands of samples.

Try it yourself. Send the coupon below for a sample—it's free.

Kester Acid-Core Wire Solder is sold in easily stocked one pound cartons and on one, five and ten pound spools.

TWEED SANITARY CLOSETS will find a ready sale

Our No. 1 Tweed Sanitary Closet with mahogany finished seat and lid with nickel-plated hinges. Every Tweed is built on similar lines and guaranteed to give satisfactory service.

These Tweed Sanitary Closets will find ready customers among farmers, suburban dwellers, or any class of people who live in a locality without city conveniences and it is among these people that you can do a profitable business.

The Tweed is simple to install, absolutely dependable, sanitary and inoffensive, and can be used in any room in the house. The Special Tweed Chemical used in connection with the closet destroys all trace of odor. No plumbing of any description is needed. The Tweed solves the problem of putting city conveniences into country houses at a fraction of the cost.

Let us tell you more about the Tweed as a selling proposition. Write us for price lists and literature describing Tweed Sanitary Closets, Tweed Baths and other home conveniences manufactured by us.

That's What They All Say!

At a big Electric Shop in one of our largest cities they sell a great many lines of appliances. Just as a test we asked them which was the most popular electric heater. "The Majestic," was the reply.

"Why?"

"Because it is a medium priced heater, gives just as much heat and is guaranteed for one year."

You'll find other retailers say the same.

Push the Majestic Heater. Now's the time. September morn is chilly and so is September eve, but its too early to keep the fires going night and day. They need Majestic Electric Heaters.

Make a display of Majestic Heaters in your window and in your store. Talk Majestically, think Majestically, plan Majestically. The chances are good for Majestic business.

Weights Inspector Remiss In Duties

Spring Weighing Scale Denied to Hardware Trade Still Offered for Sale in Toronto Departmental Store—Should Not Be Exposed for Sale According to Regulations—Inspector Should Have It Sealed Up, Confiscated and Destroyed, But it Still Remains as an "Ornament" Offered For Sale at $33.00

MUCH comment has been heard in hardware circles over the apparent discrimination evident in the case of the spring weighing machine with capacity of 25 lbs., details of which were given in August 27 issue of Hardware and Metal. It was shown in this article that a Toronto departmental store was allowed to display and offer for sale a spring scale of this type whereas such a privilege was denied to one desirous of importing such scales for distribution through the Canadian hardware trade. Chief Inpector McConvey of the Weight's Inspection Department, in Toronto, was advised of the details before the appearance of the editorial, and after its appearance the article in print was drawn to his special attention and an opportunity afforded him of making known the reason why a departmental store should be allowed to offer for sale an article which the hardware trade is unable to import for distribution.

With the publication of this issue of Hardware and Metal, four weeks have elapsed since the original editorial appeared and no reply has been forthcoming from the Inspector although he asked for, and was supplied with copies of the article. In the meantime the scale in question is still on display in a silent salesman in the departmental store, and the salespeople are still offering it for sale to any customer at the price of $33.00. The scale in question is practically identical in finish with the scale which was denied admittance for distribution through the hardware trade, and the spring principle of weighing is used, this being the objectionable feature from the standpoint of the Customs Department.

Says "Unable to Purchase Machine"

In discussing the matter with Hardware and Metal, Inspector McConvey stated in defence that he had sent a number of his inspectors to purchase the scale and had also sent some women on the same errand but they had been unable to buy it. On the other hand, representatives of Hardware and Metal visited the store and offered to buy the machine on three occasions and experienced no difficulty whatever, the sales person in each case quoting the price, pointing out the features of the machine and using all logical methods to make a sale. The mere fact that the machine was not purchased is looked upon by the Inspector as evidence that it could not be purchased, but Hardware and Metal has witnesses that the absence of an actual sale was not the fault of the sales persons of the store in question but solely due to the fact that it was not considered necessary to make the actual sale to prove that the machine was other than an "ornament" as was claimed by the Inspector.

Furthermore, Hardware and Metal has made it quite clear that the machine was "offered for sale," in which stage the store in question is still responsible for its ownership. Had Hardware and Metal purchased the machine it could have been seized according to Inspector McConvey, who only refrained from seizing the sample scale submitted to him some weeks ago in view of a promise that it would be returned to its makers within two days. This being the case all evidence necessary to prove that the scale in the departmental store is being "offered for sale" has been produced, and the question remains: "Why can the departmental store offer for sale an article which is denied the hardware trade, or, furthermore, why is the departmental store allowed to keep, even as an 'ornament,' an article which was threatened with seizure when in the hands of other parties?"

The latest regulations of the Department of Weights and Measures have been secured by Hardware and Metal, and from a perusal of these regulations it appears to be illegal for the spring scale in the departmental store to remain even as an "ornament" without being sealed up in such a way as to render it useless.

Section 9 of Regulation 7, Weights and Measures Act and Regulation states: "No spring scale of the Dead Load type and no Spring Scale of the Combined Lever and Spring Scale type, except such as are constructed upon the correct knife-edge principle and approved by the Department of Inland Revenue, shall be manufactured in or imported into Canada except as herein otherwise provided for, but all such scales now in use and duly inspected and stamped according to the Weights and Measures regulations may continue to be used and periodically inspected and stamped as required by law until found incorrect and incapable of being made correct without the renewal of some fundamental part of their mechanism."

Exceptions of an ice spring scale, sportsman's spring balance, photographer's scale, farmers' milk scale are made. This regulation denies admittance to a scale of the type in question.

Regulation 16, Section 2, says: "If any weight, measure, weighing or measuring machine be found incorrect and incapable of being made correct it shall be seized and confiscated or destroyed." This does not permit such a scale being retained as an "ornament," to say nothing of being offered for sale.

Section 7 of the same regulation says: "When weights, measures, weighing or measuring machines, subject to original verification, are found to be of a type not included in Regulation 1 and not otherwise admitted by the Department, the same shall be sealed up by the inspecting officer with the rejection label and seal and full information at once reported to the Department."

(Continued on page 36.)

Price-The Big Factor in Fall Trade

The Consuming Public Will Be on a Shopping Expedition, and Will be Open to The "Price" Argument—Farmer Believes He Is Paying Too Long a Price And Accepting Too Short A One—Unemployment And Conservatism—

IT IS becoming increasingly evident that " price" will be the outstanding factor in fall merchandising. It is an exact reversal of conditions of two years ago when price was immaterial, when "the-higher-the-price-the-better-we-like-it" motto was on everyone's lips—buyer and seller alike, when salesmanship consisted of handing goods over the counter and taking money for it. New times and conditions require new methods. The retailer who sits back and says to himself, "Well, I bought goods at high prices and the public will pay the shot or go without" is living in a fool's paradise—the public will neither "pay the shot" nor "go without"—necessaries will be bought and some luxuries indulged in no matter the times. If you, Mr. Merchant, do not meet competition either local or out-of-town competition, you will be the sufferer, not the public.

Growth of Shopping Habit

Some few months ago it was noticeable that the consuming public had retrenched from the 1919-20 habit of buying on sight. People began to "shop," to "look around." The idea that prices were too high had taken its first lodgement; the consumer wanted to find out if by a little extra effort a certain article could be bought at a lower price "somewhere else." That was the beginning of the "shopping habit." From that very moment aggressive merchants began to figure on lower overhead expenses, a narrower margin of profit and better salesmanship on the part of their staff. Every day that these three important factors in merchandising were put off meant loss of business—to somebody else—because there is always somebody else who is a keen competitor either in or out of your town.

The shopping habit has grown apace and will be more noticeable this fall than it has been for some years. There are additional reasons why it should be, reasons that have developed during the past few months. It is well for merchants in all parts of the country to realize these conditions and face them.

Price of Farm Products

The basis of Canadian prosperity is the farm. Whenever the sun smiles on the country it likewise smiles on the city. In other words, when prices for farm products bring a fair return for the amount of capital invested and the labor involved industry reflects that condition accurately. Manufacturers are kept busy; retail trade is good; there is the normal demand for necessaries and luxuries alike. But when the price of farm products falls to such an extent that retrenchment begins with the great farming community, depression is noticeable. The farmer may have the money but he won't spend it till prices suit him. And today, prices do not suit the farmer.

What Two Farmers Said

Some time ago the writer was in conversation with two farmers. He put to each the same question. "Is there anything you want that you could and would buy if prices suited you." One said he wanted a disc harrow; the other wanted to build a new home for himself. "If prices of the things you require should come down 25 per cent during the next month would you buy your disc harrow and would you build your house?" was the next question. The answer in both cases was in the affirmative.

The farmer believes that he is still paying too long a price and accepting too short a price. In other words, he is accepting pre-war prices for his commodities and is asked to pay prices for other commodities which he thinks are too high. The appeal to this man has got to be convincing and satisfying. The great farming community which is the backbone of business for hundreds and thousands of retail men in this country must be appealed to with a price argument that convinces them that fall prices are within reason and truly reflect the readjustment period as far as it has gone. The farmer may be looking for lower prices than will be offered this fall—he may expect prices that are impossible taking into consideration the cost of production— but he is open to sound argument. The merchant's argument must be made through his advertising, by window display and by expert salesmanship. The "price" note should never be silent; it will be watched for this fall and winter as it has not been watched for some years.

The outlook for the city retailer is much the same, perhaps not quite so good. The farmer has the money and will spend it if convinced that prices are right. There are many in the cities who may be unable to spend even if so disposed. The unemployment situation is pressing. Unless labor does its share in solving the problems of the readjustment period by meeting reasonable demands for lower wages, the unemployment situation may not improve. Unemployment affects more than the unemployed; it has an influence on all and creates a tendency to conserve, to buy only the bare neccessities, to retrench generally.

It is an absolute certainty that "shopping" will be popular in the large centres of population. Necessity will drive many to it; the desire to conserve will drive others. The "price" appeal must be made powerful, irresitible. People are going to look for values in all they buy. They know they can get it in another store if you haven't it—something that retailers who are inclined to skimp their stocks should bear in mind. They are not going to be met with the plea "Oh, we can't get it; it is not to be had"—at least, they will not be satisfied with it. They will go "shopping" and, ultimately, will get what they want and at the price they want it.

WEIGHTS INSPECTOR REMISS IN DUTIES

(Continued from page 35)

Therefore interpreting this regulation as meaning that the scale in the possession of the departmental store should at least be sealed up by the inspector, the following regulation shows that the store is under penalty for exposing it for sale.

Section 69, as amended by Act of July 7, 1919, says: "Every person who knowingly uses, sells, utters, or exposes for sale any weight, measure or weighing or measuring machine increased, diminished, falsified or tampered with or who wilfully breaks or removes the official seal or mark of rejection from any weight, measure, or weighing or measuring machine sealed against use for any cause whatsoever, except to repair and adjust the same for presentation for inspection, verification and stamping, shall incur a penalty for the first offence not exceeding fifty dollars and not less than twenty-five dollars, and for each subsequent offence a penalty of one hundred dollars and such weight, measure or weighing or measuring machine shall be forfeited to His Majesty and shall be destroyed or otherwise disposed of as the Minister may direct."

As before stated, Hardware and Metal is interested in this matter solely from the standpoint of having justice done in equal portion to all alike. It is obviously unfair to the hardware trade to be denied the right of selling an article which a departmental store is allowed to offer for sale, and a review of the regulations outlined would seem to indicate that the Inspector is remiss in his duties for not immediately sealing up the machine in question to render it useless, and to confiscate or destroy it as provided in the Act. Some weeks ago Inspector McConvey boasted about his fearlessness in the execution of his public duties. Is it possible that he was bluffing, and is now afraid to act?

Securing "Live" Stove Prospects

Fall Fair is Good Opportunity of Boosting Stove Sales and of Securing Good List of Interested Parties—Show Cards Convey Pointed Messages Concerning Stoves and Ranges—Catering to Various Types of Prospects in Stove Selling

An illustration of the fall store exhibit of the hardware firm of J. Smiley & Son, Woodstock, Ont., at the local fair, which is reported to have obtained splendidd results.

AN EXCELLENT method of boosting sales of stoves in the fall and of obtaining a "live" list of real prospects for new stoves and ranges is to have an exhibit at the local fair. J. W. Smiley and Son, of Woodstock, Ont., have obtained splendid results in this way and as may be seen from the accompanying illustration they take considerable pains to see that their exhibit is a very attractive one.

"It pays to do this," said Mr. Smiley, to Hardware and Metal. "Women are the real buyers of stoves and ranges and they are always interested in a nice display. An array of stoves and ranges all polished up and shining creates a favorable mental attitude to begin with and the stove salesman who knows his business can follow this up to splendid advantage."

Many Sales Made

Mr. Smiley states that many sales are made right at the exhibit. Others are made later. The exhibit at the fall fair however, he regards as one of the best advertisements he can get. It puts him into direct personal touch with thousands of people at a time when they are out to see and find out about all that is latest and best. Many of them have come many miles with the express object of going closely over the exhibits and sizing up what is best in the way of things they are going to purchase. These people are interested and by meeting them personally and giving them valuable information Mr. Smiley believes he is establishing a good will contract that will make for business sooner or later. This has been amply borne out he says by the results he has obtained.

Keep It Attractive

Mr. Smiley says it costs but little to arrange a very attractive display of stoves at a fair. A really large space is not essential but room should be allowed for prospective buyers to get in around the stoves and open the doors and investigate generally. The use of show cards he finds has a very definite value in impressing distinctive points he wishes to emphasize and also in keeping the firm's name firmly impressed upon the people.

It pays well he says to make a careful study of the needs of the people in the district and then show stoves that will carry the broadest appeal to all. In a farming district for instance buyers are especially interested in the stove or range that will burn both wood and coal. This is a point that can be driven home by the use of show cards and also in the sales talk. Convenience of operation is another important matter which can be impressed upon the visitor to the exhibit in the same manner and also by actual demonstration. Mr. Smiley not only shows the men and women who call at his display booth how easily and simply the stoves are to operate but he urges them to operate the various devices themselves; in this way they get an added interest in the working of the stove.

Special Show Room

Back in his store Mr. Smiley has a special stove show room at the rear of the store away altogether from other sections. An invitation to all fair visitors to visit this department is extended and is taken advantage of by large numbers. One of the important things about selling stoves Mr. Smiley says is

Continued on page 42

Open Seasons For Game in 1921

THE OPEN SEASONS HERE SHOWN ARE INCLUSIVE OF BOTH DATES. When the season is closed for a fixed period the date terminating the closed season is given.

The term "rabbit" includes hare; "quail," the bird known as "partridge" in the South; "grouse" includes Canada grouse, sharp-tailed grouse, ruffed grouse (known as "partridge" in the North and "pheasant" in the South); and all other members of the family except prairie chickens, ptarmigan, and sage hens; "introduced pheasant" is restricted to the Old World pheasants.

PERSONS ARE ADVISED to secure from provincial game departments full text of game laws in provinces where hunting is contemplated, as provisions of minor importance are omitted from this poster.

OTHER GAME—(Season closed in provinces not mentioned)—**Bear**—(Unprotected in other provinces); Quebec, Aug. 20—June 30. **BIG GAME—Antelope**; Manitoba, Dec. 1—Dec. 10 b.—**Sheep and Goats**—Alberta, Sept. 1—Oct. 31 b; Br. Columbia*,; Northwest Ter., Sept. 1—April 1†; Yukon, Aug. 1—Mar. 1 b. **DAYS EXCEPTED**—All hunting prohibited on—**Sundays.**—In all provinces east of the 105th meridian, except Quebec.

*Laws of 1921 not received. † Local exceptions. ‡ Certain species. b Males only.

** Under the regulations for the protection of migratory birds the season is closed on band-tailed pigeon, swan, wood duck, eider duck, auk, auklet, bittern, crane, fulmar, gannet, grebe, guillemot, gull, heron, jaeger, loon, murre, petrel, puffin, shearwater, tern, and all shore birds (except woodcock, Wilson snipe or jacksnipe, black-bellied and golden plovers, and yellow-legs) in the United States and Canada.

Alberta.—All game must have horns at least 4 inches long. Hungarian Partridge Oct. 1—Oct. 31.

British Columbia.—Open season on big game and upland game fixed annually by Order-in-Council, which may be obtained from Secretary, Game Conservation Board, Vancouver, B. C. **Waterfowl, rail, Wilson snipe, black-breasted and golden plovers, yellow-legs**, in Northern and Eastern Districts, Sept. 3—Dec. 18, and in Western District, north of 51st parallel, Sept. 10—Dec. 25; **goose, brant,** Western District, south 51st parallel, Nov. 12—Feb. 27. **Other migratory game birds,** south of 51st parallel, Oct. 15—Jan. 30. **Northern District** includes Atlin Electoral District, and north of main line of Grand Trunk Pacific Railway and east Summit Cascades. **Eastern District,** east summit Cascades and south Grand Trunk Pacific Railway. **Western District,** west summit Cascades and south Atlin Electoral District.

New Brunswick.—Deer, on Grand Manan, Campobello, and Deer Islands, no open season.

Northwest Territories.—Additional season on **Caribou** and **sheep,** Aug. 1—Oct. 1. Also Dec. 1—April 1. **Female, Caribou mountain sheep** or **mountain goat** with young at foot, and their young at foot, no open season. Governor General in Council, may by regulation, alter seasons.

Nova Scotia.—Big game, on Cape Breton Island, no open season. **Caribou** (male), in Inverness and Victoria Counties only. **Rabbit,** on Cape Breton Island, Dec. 1—Feb. 28.

Ontario.—Moose, reindeer, caribou (males), **deer,** north of French and Mattawa Rivers, Oct. 25—Nov. 30; south, Nov. 5—Nov. 20. **Hares, also** Dec. 23—Jan. 2.

Quebec—Bull Moose, in Pontiac and Temiskaming, Sept. 10—Dec. 31.

Saskatchewan.—Deer, moose (males only), **caribou,** north of Township 34, Nov. 15—Dec. 14; south of Township 35, no open season.

Newfoundland.—Caribou, also Aug. 1—Sept. 30. **Goose,** unprotected.

One of the best ways to secure the interest of hunters during the early Fall season is to use such window displays as the one shown herewith. Hunting supplies always lend themselves to very realistic treatment in display and they make the most effective arrangements. In this one, arranged by a hardware merchant, the head of "big game" is seen protruding through the pine branches. On the right is a model hut constructed of logs and many of the hunter's accoutrements are seen in their usual positions. In the foreground are displayed rifles and ammunition. Belts for the latter are also shown along with other equipment necessary to the successful hunting expedition.

Preparing for the Hunting Season

Hardware Merchants Can Stimulate Interest in Fall Hunting—Hardware Has Many Lines Required by Hunters Before They Make Annual Visit to Backwoods Haunts—Giving Information About Equipment, Game Seasons, Etc.

THE training which many of Canada's young men had during the war, in the use of rifles and other weapons, has had the effect of stimulating interest in hunting during the Fall months of years since the Armistice. This and other factors combine to make the predictions that the approaching Fall should be productive of much business for the hardware merchant in the sale of rifles and ammunition. Fortunately the restraining regulations imposed some time ago by the Government on the sale of weapons, have been much relaxed in the case of British subjects and this line of sport will therefore suffer no handicap in this regard during the present season.

Getting An Early Start

Already plans are being made by hunting enthusiasts for a trip to the backwoods haunts in the various parts of Canada in which splendid hunting facilities abound. By making definite efforts to secure the interest and attention of these sporting men, the local hardware merchant may greatly stimulate business in this department of his trade. The hunting party requires a great number of articles commonly found in the hardware store such as weapons of various kinds and ammunition, knives, camping kits, tents, canoes, fishing accessories, etc., and very often it is only the suggestion that is needed to interest a number of local sporting men in such an adventure. Very often it is only necessary for someone in the community to take the lead in order to interest many men in the arranging of a hunting expedition, and who is better fitted than the local hardware men to take this lead?

Must Have Detailed Information

In order to successfully initiate such a movement however, the hardware merchant must be in position to give much of the information which will be required. This information will take the form of pointers as to the requirements for the hunting trip in order to insure comfort for the sportsmen and also pointers as to the weapons and am-

Continued on page 42

HARDWARE MERCHANTS TO ISSUE LICENSES

In Manitoba the Government has extended to hardware merchants the authority for issuing hunting licenses. This action was taken to facilitate the securing of licenses by hunters, who are now enabled to secure licenses as well as equipmnet for the hunting trip at the hardware store.

"How's Business?"

THE question, "How's Business?" is being asked hundreds of times daily. Interviews by HARDWARE AND METAL representatives with prominent retailers, wholesalers and manufacturers across Canada, indicate that so far as the hardware business is concerned there has been a decided improvement since August 1. The hardware business is on the up-grade. It is true that buying is being carried on cautiously, and that stocks are still very light. Reductions, in prices, guarantees against further declines on many lines before next spring, have stimulated buying to a very great extent. A great many retailers have also come to a full realization of the fact, that through starving their stock they have on many lines lost a great deal more business and profit, than they could possibly make in waiting for reduced prices. Losses sustained by wholesalers and retailers through lost sales on account of "stock starving," have reached phenomenal figures. The trade has at last realized that it pays to carry a fair stock and that aggressive selling methods are the order of the day.

A manufacturer is quoted as having said recently, "If in prosperous times. manufacturers were to curtail their advertising and sales efforts, as many are wont to do in periods of depression, how long would prosperity continue?" In the last analysis, isn't the difference between prosperity and depression only in effort?

"When times are good, business men work hard, push their propositions, promote their ideas and hustle for more orders, no matter how easy they are to get. During depressions too many business men sit around and wait for something to happen. That is what makes the depression. Reverse the process and what was a slump would automatically become prosperity."

There is good business now for those who will go after it. 1921 business requires solicitation, and now is the time to build for 1922.

* * * * *

Price Trend Affects Business

THE vital connection that exists between the prevailing trend and the current volume of business has recently been more than clearly defined. The steady, although necessarily slow return to normal trade activity, is being developed principally among those industries which experienced more or less drastic downward revision of prices during recent months; while in lines that are not yet fully liquidated, readjustment is still necessary.

Another important factor affecting retail trade activity, is the reduced purchasing power of the consumer, and in this connection it is noticeable that in spite of prevailing unemployment and other contributory financial conditions, the public demand for goods has been generally sustained. And while the volume of public purchasing may have experienced restrictions, the important fact to remember lies in the degree of trade activity and market demand that exists at present price levels. Therefore, it is not prejudicial to anticipate that the lowering of quotations that should result from the replacement of high-priced stocks—and these are now being rapidly depleted—by goods produced at easier cost levels, should not only stimulate the public desire to buy, but result in reviving increased production and distribution all through the trade.

* * * * *

Unwarranted Stigma on Retailers

THERE is much talk these days of the trend of prices and in some quarters it has frequently been suggested that the retailer is not playing his part in connection with the deflation process. There may truly be odd cases where retailers are able to maintain prices in the face of declines noted in manufacturers' and wholesalers' quotations, but competition for business to-day is keener than for some years past and it is doubtful if many retailers can afford to follow such a policy for very long. Articles appearing in Hardware and Metal from time to time have shown definite instances of where valuable customers have left hardware firms which follow the policy of maintaining prices for a certain period after declines have been made, and gone to other firms which give the customer the advantage of such declines.

Those critics who hold that retail prices should decline in proportion to wholesale prices and who state that retailers by not so doing are hindering liquidation and increasing the problems of business, overlook a very important factor. The assumption that retail prices should decline in an exact ratio with wholesale prices, under present conditions of labor, transportation and general overhead, is erroneous and leads to conclusions which are unfair to merchants. The truth of the matter is that as commodities progress from raw materials to the ultimate finished product, placed in the hands of the consumer, through the various stages of manufacture and distribution, the percentage of labor and service charge becomes proportionately greater.

It is no reflection on the manufacturer that he has not been able to lower his selling price proportionately with his buying price. His overhead prevents it. The same is true of the retailer, and it is much to be regretted in connection with this subject, that many false impressions are being conveyed to a critical public by men who are looked upon as business authorities.

* * * * *

FARMERS of a number of Ontario townships into which electric power is now being introduced for the first time, are said to be pricing electric ranges, vacuum cleaners, washing machines and other such appliances. Farmers owe these benefits to their wives and daughters and with a little coaching they will readily see that such electrical appliances will be of equal help in the house as the modern implements are in the fields.

* * * * *

ANNOUNCEMENT has been made by the Manitoba Minister of Agriculture that game licenses will be issued through hardware and ammunition stores throughout the province, to facilitate the efforts of hunters in securing licenses by enabling them to procure licenses along with other necessary hunting equipment at the same store. This is a plan which might well be followed by other provinces and it gives definite recognition of the importance of hardware stores in the outfitting of Fall hunting parties.

Events in the Trade

NEW FIRMS.

The Smyth Hardware store is a new entrant in the field in Halifax, N. S., having located on Gottingen Street. Mr. Smyth was previously a traveller for a local company.

GLASS FACTORY AT OSHAWA.

It is reported that the Feldspar Glass Co., Ltd., are arranging for the erection of a factory at Oshawa, Ont., to manufacture glass and glass products. A site of several acres has been secured, and it is understood that preliminary construction will be shortly commenced. The new plant is expected to be in operation within a few months.

FALL FAIR BRINGS GOOD BUSINESS TO LONDON

London, Ont.—Local hardware merchants report a splendid volume of fall business. Buying has been continuous, and while people generally are not buying extensively, they are buying for most of their requirements. This is especially so in the case of the farmers, many of whom are undertaking fall repairs to homes and buildings and making other improvements in their property.

During fair week there was a record attendance, and ideal weather brought in motor parties for 100 miles. Many of these people stayed for several days and made a number of purchases.

A noticeable feature in connection with most of the window displays of local hardware stores during fair week was the appeal made to farmers' wives. Such lines as cut glass, cutlery, silverware, kitchen utensils, electrical goods, washing machines, cleaning materials and aluminum ware, were prominently displayed and merchants report that good business resulted. The Cowan Hardware Co. had in a fine window of tools, the various articles being priced plainly. In an adjoining window was a display of table lamps, cutlery and glass and silverware.

J. A. Brownlee featured enamelware in one window and in another displayed paints.

J. G. Steele had a mixed window containing various household articles of special interest to women.

The Purdom Hardware Co. featured household articles in both windows.

PERSONALS

F. A. Shackell, formerly with Geo. F. Foss Machinery and Supply Co., Ltd., will represent The Glidden Co. in the industrial field for the Province of Quebec.

* * *

Major J. W. Barre is now representing Canadian Explosives in the City of Montreal. Before leaving Caverhill, Learmont and Co. he was presented with a handsome travelling bag by members of the staff.

* * *

C. R. Standley, Pres. Standley Skid Chain Co-Boone, Iowa has spent the past week visiting Campbell Agencies and has succeeded in completing arrangements to have The Standley Luggage Carrier made in Toronto. It is expected that the Factory will commence production inside thirty days.

* * *

OBITUARY.

London, Ont.—Following a long illness the death recenty occurred at London of Mrs. Effie J. Dochstader, wife of Thomas G. Dochstader of the D. H. Howden Hardware Co.

GROWTH OF AUTO INDUSTRY IN CANADA

Ottawa, Ont.,—Speaking at a directors' luncheon at the Central Canada Exhibition in Ottawa, Ex-mayor Joseph Duffus of Peterboro, who is also president of the Automotive Section of the Retail Merchants' Association of Canada, quoted some amazing figures concerning the growth of the automobile industry in this country and in the United States.

He said the total value of all automobile products in Canada in 1920, was $101,196,706. The total investment in automobile plants now stood at $34,949,-739; in automotive supply plants at $8,-364,991; in automotive repair plants, at $13,628,288, making a total investment of $56,943,018.

The total number of people employed in these plants at the beginning of June, 1921, was 12,139, representing a total annual pay roll of $15,389,724. This was made up as follows: automobile plants, 6,776 employes with pay roll of $9,712,788; automotive supply plants, 1,744 employes with pay roll of $1,948,-000; automotive repair plants, 3,629 employes, with pay roll of $3,728,000.

"Ten years ago," said Mr. Duffus, "there were only 21,680 automobiles in Ontario, whereas today there are 451,-000."

BRITISH STEEL MAGNATES ALSO VISIT CANADA.

With the objective of investigating the Canadian steel situation and promoting methods by which the steel trade between Canada and Great Britain may be stimulated, a party of steel manufacturers from Sheffield, England, have recently been visiting Ottawa and Montreal. The British trade representatives also visited Washington, where they lodged a protest against some of the regulations affecting high-speed steel contained in the American Fordney tariff. Members of the group included: Arthur Balfour, of Arthur Balfour and Co., Ltd., Sheffield; J. C. Ward, of Edgar Allen and Co., Ltd., Sheffield; P. MacGregor, of Sanderson Bros. and Newbould, Ltd., Sheffield, and Sydney Jessop Robinson, of W. Jessop and Sons, Ltd., Sheffield.

CANADIAN SAMPLE TRAIN TO VISIT FRANCE.

It has been announced by the Trade and Commerce department that preliminary steps are being undertaken to suitably arrange for the visit of a Canadian trade sample train to France next year. In this connection the Government of France has offered the following practical assistance:

1—Free transportation of the sample goods, both ways across the ocean.

2—Free warehousing of the Canadian sample goods in the docks of the French port selected.

3—Gratuitous use of the railways and other equipment required for a complete exhibition train, and its circulation throughout the principal cities of France.

4—Use of the best theatres in practically every city visited by the Canadian train, with the net proceeds of the entrance receipts for theatrical displays of films and other devices demonstrating the natural resources, industrial development and natural beauties of Canada.

5—Free use for a period of six months of the most suitable building in the City of Paris, presumably the Petit Palais, on the Champs Elysees, for a fixed exhibition of the Canadian sample goods.

The privileges granted by the French Government are an exact replica of those which Canada granted to the French exhibition train, but it must not be overlooked that in such an exchange of facilities Canada will be more largely benefited.

News of Western Canada

WESTERN CANADA NOTES

The hardware store of Connell and Grigg, Edmonton, Alta., was badly damaged by fire. The lower floor of the store did not suffer as much as the upper storey but the stock was badly damaged throughout. The firm is opening new quarters on Jasper Avenue as soon as possible.

****

The Northern Hardware Company of Edmonton is now settled in its new store on 101st Street and has what is said to be one of the best sites in the city. The motto which the firm has adopted is "The Best in Hardware at Lowest Prices plus Good Service."

Mr. M. McLachlan has joined the staff of the Whyte and Orr hardware store at Hardisty, Alberta.

****

The Watt Hardware Company, Innisfail, Alberta, is putting on an extensive removal sale. They are moving into larger premises in Innisfail about October first.

* * * *

Romeo Rivest has been added to the staff of Rossell's hardware at Stony Plain, Alberta.

* * * *

James Bracegirdle, who is employed by W. E. Washburn, hardware merchant at Wainright, Alberta, was accidentally shot through the right lung. Mr. Bracegirdle and several others were shooting gophers near town when the rifle in the hands of one of the party discharged causing the bullet to enter his chest. He was sent to Edmonton for treatment and is progressing nicely.

FIRE DAMAGE

An outbreak of fire on the morning of September 14, in the basement of the Manitoba Hardware Co.'s store at Reston, Manitoba, resulted in damage to an estimated extent of $60,000. This total included other business enterprises occupying the same building.

The fire is reported to have originated in the basement, and with the ignition of the gasoline tank, the building was quickly eveloped in flames. John Harvey, manager, sustained slight burns in his efforts to mitigate the damage, but within an hour the building was a total loss. It is understood that the hardware store was fully covered by insurance.

PREPARING FOR THE HUNTING SEASON

Continued from page 39

munition required to deal with the various types of game. Many hardware merchants will have such knowledge from personal experiences, and in other cases it should be possible to secure many helpful details from conversation with someone who has had such experiences.

Open Season Regulations

Another point on which much information will be asked is in regard to the game regulations prevailing in various parts of the country. In order to facilitate the efforts of the hardware merchants in this direction HARDWARE AND METAL has secured a table which puts forth this information as it affects the various provinces, in a concise manner handy for reference. It is suggested that the opposite page be removed and affixed to a sheet of cardboard or other similar material with stiff backing, and kept in a handy place for the reference of the merchant and customers. Possibly the information contained therein might be used by some merchants in connection with their local advertisements or suggestions conveyed personally over the counter. For instance an advertisement might be prepared for insertion a week or two prior to the opening of the season for certain game with the suggestion that other details as to the open seasons can be secured at the store. Do not overlook enumerating a list of the hunter's requirements pointing out that these too can be secured at the hardware store.

The hunter, whether he is a veteran or a beginner, is always anxious to discuss hunting matters with others interested in the subject and if he knows that the hardware merchant can give him some valuable pointers on the subject he will not hesitate to transfer his trade to the more congenial surroundings which he will find where his interests are in common with others.

SECURING "LIVE" STOVE PROSPECTS

Continued from page 37

to thoroughly know just what they will do. The salesman who knows this can talk convincingly to prospects about various points and meet their arguments and overcome objections in a way that the man who only partially knows about stoves cannot. One big thing to keep in mind he says is to never knock another make of stove. Frequently customers ask what he thinks of this or that make of stove. He invariably tells them it is a good stove and proceeds to show where the one he is handling excels it. Several times people have told him after he has closed a sale that one of the things they liked about his method of selling was that he did not run down a competitor.

List of Fall Fair dates throughout Canada and other exhibit suggestions appeared in August 20 issue of Hardware and Metal.

Publishing Under Strike Conditions

Since the issue of June 4, Hardware and Metal has been published under strike conditions. The printers and allied trades demanded a decrease of 4 hours working time per week and an increase of 15 per cent. in wages. Such demands are obviously ridiculous under present circumstances, and upon the publishers failing to comply with such requirements the printers were ordered by the headquarters of the International Typographical Union in Indianapolis, Indiana, U.S.A., to go on strike, and so the strike is on.

Under such circumstances Hardware and Metal is doing its utmost to provide its readers with as complete a service as possible. The regular features including news, trade suggestions, market reports, etc., are being continued as usual.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

PRICE readjustment in the hardware field continues to attract noticeable attention. Many revisions to a lower level are again evident, these changes covering such lines as corrugated sheets; steel and wool block pulleys; the Victor line of hack saw blades; cement, in bags; ship augers; Trimo wrenches; wrought-brass butts; harness and leather goods; hammers of various make; rubber lawn hose; the Puritan line of oil stoves, cabinets, ovens and wicks; wooden clothes pins; felt weather strip, and rope halters.

Slight price advances are noted on coal oils; and also on jersey cotton and canvass gloves, these goods falling into line with recent higher prices on other manufactured cotton products. A firm undertone continues in the cotton waste markets also, but no adjustment in quotations has yet been made. The size and attractiveness of the prospective order evidently governs the current prices on boiler tubes. Scrap brass has sagged another 25 cents, and the sluggish condition in the waste material markets still continues. General depression governs the ingot metals, but a more optimistic view point is developing in production circles that these have now reached the bottom of stagnation.

Trade activity has commenced to revive with the increasing demand that has recently appeared in many lines. Many reports indicate a marked improvement over the dull summer months, and the Fall period is being looked upon as an opportunity for trade expansion and business development.

MONTREAL MARKETS

MONTREAL, Sept. 21—Revision of prices in the hardware markets are, with the exception of seine twine, all to lower levels. Seine twine, in line with other cotton goods, shows an advance in price. Featuring the market are the new lower prices on wire nails and corrugated sheets. The new base price of wire nails is $4.00, while the new lower list is now announced on all gauges of corrugated sheets. Another important reduction is on lawn mowers, new lower list prices being announced on practically all kinds

Pulley blocks, both steel and wood, ship augers, Trimo wrenches and Victor hack saw blades all have reduced prices. Cement quotations are slightly reduced in less than car load lots, car lots remaining unchanged. Iron and steel prices are this week given with a range as in some quarters slightly lower quotations are announced. Business in hardware jobbing circles continues fairly active, Fall goods now being shipped, while the bookings for the later months of Winter are also fair.

NEW LOWER LIST PRICES ON LAWN MOWERS.

Montreal.

List prices on lawn mowers of Taylor-Forbes make have again been revised to lower levels with the exception of the "Daisy" mower. This makes the second revision in recent weeks. Discount remains unchanged at 20 per cent. off list prices. Following are list prices and discounts:

LAWN MOWERS—	
Daisy—	
12 inch	$8 65
14 inch	9 00
16 inch	9 20
Star—	
12 inch	9 70
14 inch	10 40

WIRE NAILS $4.00 BASE.

Montreal.

A further reduction is announced this week in the price of wire nails and the base price is now revised to $4.00. Cut nails remain unchanged at $4.85 The movement of nails has been of a steady nature during the summer months and showing a slight improvement in the past two weeks.

BRASS AND COPPER HOLD AT RECENT DECLINE

Montreal

There is no further announcement of a change in prices of copper or brass sheets, rods or tubing since the decline in prices two weeks ago. Metals in the primary markets fail to show any improvement, and if this continues, further recessions in these finished products would not be surprising. Following are present prices:

BRASS—	Base.
Sheets, base	0 25
Rods, base ½ to 1 in., round	0 23
Tubing, seamless, base	0 32
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 30
Soft sheets, plain, 16 oz. and heavier lb.	0 30
Plain tinned, 16 oz. and heavier, lb	0 37
Polished and tinned, 16 oz. and heavier, lb.	0 42
Tubing, lb.	0 34

Above prices are full sheets and bars. Cut sheets and bars are 5c per lb. higher.

BOILER TUBE PRICES UNCHANGED

Montreal.

With prices on the various sizes of both seamless and lapweld boiler tubes holding unchanged, there seems to be an improvement in the market through inquiries continuing to come to hand. While these have not as yet developed to any extent into actual sales, they enable dealers to believe that a fair amount of business will be done during the following fall months, at least an improvement over the quiet summer months. Unchanged prices are as follows:

BOILER TUBES—	Seamless.	Lapweld.
1 inch	25 00	....
1¼ inch	26 00	....
1½ inch	25 00	....
1¾ inch	28 25	27 00
2 inch	27 80	23 00
2¼ inch	31 35	26 00
2* inch	39 65	28 00
3 inch	46 80	33 00
3½ inch	60 35	41 00
4 inch	81 00	51 75

STEEL AND WOOD BLOCKS ARE REDUCED

Montreal

A reduction of approximately 10 per cent. is recorded in the prices on all

sizes of steel, common wood with japanned sheale and the patent roller galvanized sheale block pulleys.

CORRUGATED SHEETS AT LOWER PRICES

Montreal.

The new lower prices, stated in recent issues of Hardware and Metal, as quite probable, are now announced on corrugated sheets. The reduction is between 10 and 12½ per cent. on the different gauges. Plain galvanized sheets have for some time past been selling on an easy market with reductions from time to time quoted, and corrugated sheets have not recorded the same amount of price decline thus lower prices are announced in keeping with present levels of the plain sheets. It is doubtful whether the new prices will act as a stimulus to trade, but it is believed they will have a settling effect on the market as these sheets have been very unsettled in the past weeks. Following are the revised list prices and discount:

Corugated.—	
No. 28 gauge	7 00
No. 26 gauge	7 50
No. 24 gauge	10 50
No. 22 gauge	12 50
No. 20 gauge	14 00
No. 18 gauge	18 50

Less 7 ½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

VICTOR HACK SAW BLADES AT LOWER PRICES

Montreal.

Victor hack saw blades will now sell for less, a reduction of between 10 and 12½ per cent. having been made on all lengths.

FAIR DEMAND FOR SHEETS; NO PRICE CHANGES

Montreal.

Sheet prices are unchanged, the many lines holding at the recent reductions. Black and galvanized sheets still show the range in quotations, covering the variation among the different jobbing houses, and while slight reductions are announced in some quarters they are covered by the following prices:

Tin plates, Canada plates and Terne plates are moving quite satisfactory at present, the fall requirements in stove and furnace work requiring supplies. Following are the prevailing prices:

BLACK SHEETS—	
10 gauge	4 40 to 4 65
12 gauge	4 50 4 75
14 gauge	4 60 4 85
16 gauge	4 70 4 95
18-20 gauge	4 95 5 20
22-24 gauge	5 10 5 35
26 gauge	5 15 5 40
28 gauge	5 25 5 50

Sheets 36 in. wide, 20c per 100 lbs. extra.

GALVANIZED SHEETS—	
U.S. Standard.	
10¾ oz.	7 25 7 75
28 gauge	6 85 7 35
26 gauge	6 45 7 00
22-24 gauge	6 25 6 75
20 gauge	6 10 6 60
18 gauge	6 00 6 50
16 gauge	6 00 6 50
14 gauge	6 00 6 50
12 gauge	6 00 6 50
10 gauge	6 00 6 50

	Queen's Head.	Fleur-de-lis

18 x 24 x 60s	8 50

IRON AND STEEL NOW QUOTED WITH A RANGE

Montreal.

Iron and steel prices are generally reduced in some quarters, while other jobbing houses are maintaining the former higher quotations. The reduction is, however, slight in all cases and principally due to dealers being anxious to further reduce stocks in preparation to any further development at the mills, although in this connection there is said to be little expected until productive costs are lowered.

Higher grades of steel, such as mining tooth and black diamond tools steel are generally reduced one cent per pound and are now quoted at 22 cents. Business is only fair, with orders being of a small character, but with little construction work now under way, little improvement can hardly be expected. Following are the prices with the range:

Common bar iron, 100 lbs.	3 00	3 25
Refined iron	4 00	4 90
Iron finished machinery steel		3 45
Mild steel	3 00	3 40
Band steel	3 00	3 40
Single reeled machinery steel	5 00	5 25
Spring steel	5 50	6 00
Sleighshoe steel	3 00	3 40
Tire steel	3 00	3 60
Toe calk steel	4 00	4 30
Harrow tooth steel		3 55
Mining tool steel, per lb.		0 22
Black Diamond tool and cast steel		0 22

NOTE—Refined iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

HIGHER PRICES ON SEINE TWINE

Montreal.

Following the advance in prices of other cotton goods, seine twine is quoted at higher prices this week. With these new prices now given, it is stated that a further advance would not be surprising in the next week or so as the cotton market has apparently not yet settled on a steady basis. Following are the revised quotations:

SEINE TWINE—	Per lb.
No. 9	0 66
No. 12	0 62
No. 15 to 96	0 58

CEMENT REDUCED IN SMALLER QUANTITIES

Montreal.

Quotations on cement, in less than car lots, show a slight reduction and $1.09 per bag f.o.b. yard is now quoted, the former price being $1.12. Car load lots remain unchanged. The feeling existant among the trade that lower cement prices should be given as a stimulus to building operations is slowly becoming realized, the reduction being of a minor nature up to the present. There is a steady volume of business recorded, building requiring a fair amount at this time. Following are the revised quotations:

CEMENT—	
Car load lots—400 to 1000 bag cars.	
Per bag, f.o.b. cars	0 98
Per bag, delivered	1 05
Less car lots—	
Per bag, f.o.b., yard	1 09
Per bag, delivered	1 19

Less 5 per cent.

Rebate 20 cents for empty sacks.

SHIP AUGERS PLUS 17½ PER CENT

Montreal.

Ship augers will now cost less. They are now quoted at plus 17½ per cent., formerly being plus 25 per cent.

NO CHANGE IN RANGE BOILERS.

No change is recorded either in price or market conditions on range boilers. Quotations are held at prices announced some weeks ago by manufacturers with the exception of the 30 gallon boiler which has been reduced generally to $7.50. Following and present selling prices:

RANGE BOILERS—	Standard.	Ex. heavy.
30 gallon	7 50	11 25
35 gallon	11 25	....
40 gallon	13 50	16 00
52 gallon	20 00	....
66 gallon	28 00	....
82 gallon	35 00	....
100 gallon	45 00	....
120 gallon	54 00	....

TRIMO WRENCHES 42½ PER CENT OFF.

Montreal

The discount on Trimo pipe wrenches has been revised to 42½ per cent. off list prices. Formerly they were quoted less 40 per cent.

FITTINGS HELD AT RECENT ADVANCES

Montreal

Discounts on the various lines of pipe fittings are holding unchanged since the advance in malleable fittings two weeks ago. Sales are still of a small and sorting character but very numerous. Following are the prevailing discounts:

FITTINGS—	
Cast iron fittings	20 per cent.
Bushings, cast	30 per cent.
Do., malleable	25 per cent.
Flanges	27 per cent.
Plugs	25 per cent.
Flange unions	20 per cent.
Malleable unions	40 per cent.
Dart unions, black	29 per cent.
Do., galvanized	8 per cent.
Nipples, ⅛ to 4 in close and short	45 per cent.
Do., long	55 per cent.
Do., 4½ to 8" close and short	35 per cent.
Do., long	45 per cent.
Couplings, 4" and under	25 per cent.
Do., 4" inch and longer	5 per cent.

POUND GOODS—	Black.	Galv.
Class A.	0 58	0 78
Class B	0 24	0 34
Class C	0 16	0 24

BRASS BUTTS ARE REDUCED IN P[illegible]

Montreal.

Wrought brass butts are now quoted lower in price. New quotations are list plus 10 per cent., formerly being list plus 20 per cent.

STEADY SALES OF LEAD GOODS

Montreal.

All lines of lead and zinc products are unchanged in price with a steady volume of business reported by dealers. With the improvement noted in metals on the primary markets a few weeks ago, the undertone of the finished products was also more promising but with these metals again falling to easier prices lead goods are not in as healthy a state. Following are present prices:

LEAD PIPE—

Lead pipe	0 12½
Lead waste	0 13½

Note.—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10 per cent. off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Do., 3 to 3½ lbs., sq. ft., lb.	0 10¼
Do., 4 to 8 lbs.	0 09½

Cut sheets ¼c lb extra and cut sheets to size, ¾c lb. extra.

Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 35
Zinc, sheets, casks	0 11½
Do., broken lots	0 12

INGOT METALS DO NOT HOLD GAINS.

Montreal.

With the exception of spelter, the ingot metals have again settled in a more or less easy state with a slack demand in most cases. Spelter has regained the decline earlier in the week and promises a fairly steady market. While the recent interest shown was only temporary, it may be that the present slackness is not for long standing, and an improvement would not be surprising in some metals.

TIN—Last week's easier tone on tin continued practically all this week. Tin plate manufacturers have eased off in their buying, which caused the flurry of two weeks ago, and at present the market is dull at 34 cents.

COPPER—The copper market is in a rather uncertain state, both buyers and sellers evidently fearing a change and holding off. There is really nothing new to report in the market and prices locally are unchanged at 17½ cents for electro, and 17 cents for casting.

LEAD—The business offering in lead seems to have fallen off to an extent recently, but certain markets are expected to open in the near future that will bring about a decided improvement. Local quotation is unchanged at 6½ cents.

SPELTER—Spelter had a further slight decline early in the week but prices have since stiffened, and this metal looks much better. There is a demand from the galvanized sheet and tube trade and if this continues, higher prices may be looked for. Quotations locally are holding at 7 1-2 cents.

ANTIMONY—The situation on antimony is very little changed. The demand is quiet with price holding unchanged at 7½ cents for Chinese, 8½ cents for high grade English.

ALUMINUM—Quotation of 30 cents still holds on aluminum, with the market continuing dull and unchanged.

TORONTO MARKETS

TORONTO, September 22—Numerous price reductions on various hardware lines again feature the current market reports. There has been a substantial lowering in quotations on corrugated sheets in all gauges; and a new list of prices on range boilers has been announced in the hope of stabilizing this market. Revised lower quotations are given on the Puritan line of oil stoves, cabinets, ovens and wicks; while reductions have also occurred on harness and leather goods, various lines of hammers, clothes pins of wooden manufacture, rope halters, and rubber garden hose.

Price increases are slight, affecting two lines only. One of these, Jersey cotton and canvas gloves has been slighly advanced, following the general price trend of manufactured cotton goods. The other is a 1-cent per gallon increase in the quotations on coal oils.

Distributors of rope and cordage now guarantee prices against decline until April 1, 1922. The recent price lowering has stimulated Fall trade in building papers and roofings. There remains a firm undertone to the cotton waste market, but no price adjustments have been announced. The moderate broadening in steel consumption is mainly looked upon as seasonable, and prices on bar iron and steel, also sheets and plates, remain practically steady. Scrap brass prices have sagged another 25 cents, and these waste material markets continue in their sluggish condition. The general depression is still evident in ingot metals.

DISTRIBUTORS GUARANTEE ROPE PRICES UNTIL SPRING

Toronto.

Distributors of rope and cordage now announce that prices at present prevailing on these products are guaranteed against decline until April 1, 1922. This offer is to induce the placing of spring orders for rope and cordage earlier in the season. Prices on these goods remain at the quotations recently announced.

NEW LIST PRICES ON RANGE BOILERS

Toronto.

The unsettlement that has recently prevailed in the markets on range boilers, has now been minimized to some extent through the announcement of an established uniform price on these products. The revised quotations are slightly higher on the 30 and 35 gallon sizes, which are the two most popular ranges this season; while some downward revision from the previous list prices is shown on sizes 40 gallon and larger. Following are the new quotations:

RANGE BOILERS—

	Standard	Ex. Heavy
30 gallon	$ 8 75	11 25
35 gallon	11 25	13 50
40 gallon	13 50	16 00
52 gallon	20 00	24 50
66 gallon	28 00	34 00
82 gallon	35 00	46 50
100 gallon	45 00	55 00
120 gallon	54 00	63 25
144 gallon		78 00

REVISED QUOTATIONS ON PURITAN LINE OF OIL STOVES

Toronto.

A new lower range of prices has been announced by the manufacturers on the Puritan line of oil burning stoves. The revised quotations are as follows:

PURITAN OIL STOVES—

No. 22, each	$21 50
No. 23, each	26 00
No. 24, each	34 00

SUBSTANTIAL DECLINE IN QUOTATIONS ON CORRUGATED SHEETS

Toronto.

Another drastic downward revision is shown in quotations on the galvanized corrugated sheets. The fall market for these products is stated to be somewhat below the average expectations, and when compared with the prevailing prices on flat sheets, the previous list registered a fairly large spread. This has now been changed, and the new level affects all gauges. The current discount remains as heretofore. Following are the new list prices on corrugated sheets:

No. 28 gauge	$7 00
No. 26 gauge	7 50
No. 24 gauge	10 50
No. 22 gauge	12 50
No. 20 gauge	14 00
No. 18 gauge	18 50

Less 7½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

LOWER PRICES ON HARNESS AND LEATHER GOODS.

Toronto.

New price lists giving lower quotations on many lines and showing substantial reductions on harness and leather goods, are now being distributed by the Hugh Carson Co., Ltd. In announcing these price changes, the manufacturers state that the new quotations have been figured on the lowest cost of leather, and are of the opinion t these new prices will be maintained some time.

This applies to such lines as harness, collars, blankets, miscellaneous hardware, sweat pads, trunks, bags and suitcases.

QUOTATIONS ON HAMMERS LOWERED FROM 5 TO 10 PER CENT

Toronto.

Reductions in the prices on various makes of hammers are announced by the manufacturers. Canada Foundries and Forgings Limited. The decline s

effective September 20, and covers a 10 per cent. reduction on Diamond G hammers, and a 5 per cent. lowering in prices on the Thousand Island line of hammers. Quotations are also reduced to the extent of 10 per cent. on sledge and striking hammers.

SUBSTANTIAL REDUCTIONS IN LAWN HOSE PRICES

Toronto.

Reductions of fairly substantial volume are now announced in prices of rubber garden hose, for spring booking. The revised quotations on corrugated, also 3 ply and 4 ply, are as follows:

GARDEN HOSE—		Per 100 ft.
Corrugated	½ inch	$16 00
do.	⅝ inch	18 00
do.	¾ inch	21 00
3-ply	½ inch	9 75
do.	⅝ inch	12 00
do.	¾ inch	13 00
4-ply	½ inch	11 00
do.	⅝ inch	13 75
do.	¾ inch	14 50

Corrugated—less 5 per cent for full reels of 500 feet.

COTTON GLOVES HIGHER.

Toronto.

A slight advance has been announced in the prices on jersey cotton and canvas gloves. This increase is attributed to the higher price of cotton on the raw material markets, and coincides with recent advanced quotations given on other lines of manufactured cotton goods.

ROPE HALTER PRICES ON LOWER LEVEL

Toronto.

A downward revision has now been made in prices on rope halters. This applies to the sisal and jute products, and the new quotations are as follows:

ROPE HALTERS—		Per gross.
Sisal	7-16 in.	$21 00
do.	9-16 in.	33 00
Jute	7-16 in.	19 00
do.	9-16 in.	28 50
No. 27, each		81 50
Discount 30 per cent.		
Cabinets—		
No. 32, each		$7 00
No. 33, each		8 50
No. 34, each		10 50
Discount 30 per cent.		
Ovens—		
No. 41, each		$6 25
Discount 30 per cent.		
Puritan Wicks—		
Per dozen		$3 40
Net—		

COAL OIL PRICES HIGHER.

Toronto.

Among the current market changes to higher levels is noticed the increase of 1 cent per gallon in the price of coal oils. This revision affects both the Royalite and Palacine grades, and the new quotations are 18½ cents and 21½ cents per gallon respectively.

CLOTHES PIN PRICES LOWER

Toronto.

Following on the recent reductions in various lines of wooden-ware manufacture, a lower quotation is now shown on clothes pins. These have been reduced in price 25c. per case in the 4-in. sizes. Following are the revised quotations:

CLOTHES PINS—	Per case.
5 gross, 4-inch, lose	2 00
4 gross, 4-inch, cartons	2 00
2 gross, spring, box	1 90

PRICE REDUCTIONS STIMULATE TRADE IN BUILDING PAPERS AND ROOFINGS

Toronto

Manufacturers and distributors of roofings, building papers and similar products state that the current demand for these lines is good. Some dealers are of the opinion that the present movement is better than was expected, and the proportion of fall building has reflected a marked improvement in activity over the previous summer months. The various reductions in prices on these commodities that have been recently announced, has also had a contributory effect towards increased business during the current season.

SOME AMERICAN MILLS REDUCE PRICES ON SHEETS

Toronto

The recent announcement by some of the smaller producing mills in the United States of higher quotations on black and galvanized shees, has naturally attracted a certain amount of interest in local trade circles. Whether this move would indicate that prices on sheets and plates have almost reached bottom, and that this increase is the commencement of the turn in the tide, is yet too early to determine. It is noticeable in this connection that a watchful waiting policy has been generally adopted by other producers.

Local quotations are generally unchanged this week, and the announcement that lower freight rates are withheld pending the final settlement of wage arbitration proceedings, has now produced the feeling that lower prices on sheets and plates cannot be expected from the source of reduced transportation charges for some few months.

BLUE ANNEALED—		
10 gauge, base	4 00	4 50
12 gauge	4 05	4 55
14 gauge	4 10	4 60
16 gauge	4 15	4 65
BLACK—		
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 10

FIRM UNDERTONE IN COTTON WASTES

Toronto.

While cotton waste markets have recently registered a gain in strength owing to the sudden rise in raw cotton prices, fluctations on the cotton markets have kept the price situation on cotton wastes a little uncertain. Local dealers, in some cases, are looking for an advance in waste prices, but the increase is not yet applied owing to the stocks on hand. It is noticeable that large manufacturers are not purchasing heavily at the present level of raw cotton, and that stocks of cotton goods have only reflected this inflation in cost of raw materials to a moderate extent. On the basis of higher prices for raw cotton, some revision in quotations on wastes are not considered unlikely, but local prices are at present unchanged, pending the activity of primary markets.

LEAD MARKETS REGISTER GAIN IN STRENGTH

Toronto.

While local quotations on lead and zinc goods remain unaltered, at present, it is noticeable that lead is now one of the strongest metals on the primary market centres. The trend of metals chiefly used in the production of solder is also being carefully watched, and upon future gain or loss in this direction rests the possibility of readjustments in solder prices. The prevailing quotations follow:

LEAD AND ZINC GOODS—	
Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subjected to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 29
Do., strictly, lb.	0 22
Do., commercial, lb.	0 20
Do., guaranteed, lb.	0 24
Do., wiping, lb.	0 20
Zinc sheets, per lb.	0 13

MODERATE EXPANSION IN STEEL CONSUMPTION

Toronto.

Current reports on bar iron and steel indicate a little better activity, but this improvement is stated as only to be expected at this season of the year. There are dealers who look upon the present volume of inquiries and the resultant slightly higher percentage of orders, as the usual flurry before trade opportunities in this industry are again practically closed by winter's annual dullness.

Signs of a moderate broadening in iron and steel consumption is also reported from southern primary markets. Producers have experienced an improvement in demand, and mills have consequently increased their output. Prices are practically unchanged, however, and this condition is reflected locally, the following table containing a clear indication of the average market quotations on bar iron and steel:

IRON & STEEL—		
Mild Steel bars, base	3 25	3 50
Mild steel bands, 3-16 in. base	3 75	4 00
Bar iron, base	3 25	3 50
Angle iron, base	3 35	3 60
Horseshoe iron	....	4 10
Tire steel	4 70	5 95
Spring steel	9 50	.11 50
Crucible cast sheet steel	30 00	.35 00
Mining drill steel	20 00	23 00
Cast tool steel, medium	....	13 50
Cast tool steel, high grade	30 00	36 00
Sleigh shoe steel	4 10	4 50
Norway iron	....	15 00
Toe caulk iron	5 40	6 40
Hoop steel	4 50	4 75

SIZE OF ORDER GOVERNS BOILER TUBE PRICES

Toronto

A slight seasonable increase in business is reported by dealers in boiler tubes, this applying particularly to the smaller sizes. The uncertainty as to local market prices still continues, however, the quotation being made to fit the prospective order, wherever possible. Price shading in order to secure business, has been one of the features of the markets in steel products for the past few months. The following is a conservative list of prices quoted by various distributors of boiler tubes:

BOILER TUBES—	Seamless.	Lapweld.
1 inch	26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	25 00
2 inch	28 00	22 00
2¼ inch	32 00	25 00
2½ inch	40 00	27 00
3 inch	44 00	35 00
3½ inch	60 00	40 00
4 inch	75 00	50 25

SCRAP BRASS PRICES SAG ANOTHER 25 CENTS

Toronto.

While the waste markets generally continue in their sluggish condition, hopes for some little improvement are now entertained. A few inquiries are reported to have filtered through, and as a consequence, a little more business has been consumated. In spite of this however, there is no real demand, the current purchases consisting of small lots for immediate needs only. The only change in price this week is another drop of 25 cents in yellow brass.

The following is the average of dealers buying prices for fairly large quantities.

WASTE MATERIALS—		
No. 2 busheling	.....	11 00
Heavy melting steel, gross ton	9 50	10 00
R. Rd. wrought iron, No. 1, gr. ton	10 25	11 25
Scrap pipe, gr. ton	6 00	7 00
Stove plate, net ton	11 00	12 00
No. 1 machinery cast, net ton	15 00	16 00
Heavy lead	3 75	4 00
Tea lead	2 00	2.50
Red brass	....	9 00
Yellow brass	5 00	6 00
Light brass	3 00	3 50
Heavy copper	9 25	10 00
Scrap zinc	3 00	3 50
Old rubbers, boots and shoes	2 00	2 50
Lumberman's rubber boots	1 25	1 75
Auto tires	0 50	1 00
Solid tires	0 75	1 25

REPORT METALS TURN CORNER OF TRADE DEPRESSION

Toronto.

There is still general depression evident in the metal markets. While slight variations in the different metal quotations have taken place from time to time, there still remains almost limitless room for improvement in the direction of stability and strengthened tone to these markets. The general lack of demand and the consequently existing conditions in the trade, has forced many producers to discontinue operations, but in spite of this fact, present stocks are said to be well able to care for prevailing consumption which has shown little or no signs of increasing.

However, a more optimistic viewpoint is now developing in southern production circles that metals generally have turned the corner of trade depression. Whether this feeling is premature, or not, the general consensus of opinion seems to be that if such a situation does not develop in the near future, the foundations of the industry may be threatened through a continuation of conditions which have prevailed during the past few months.

LONDON MARKETS

LONDON, September 22.—New prices went into effect during the past week on a number of hardware lines. The wire nail base price is now down to $4.15, and sash weight quotations have also been revised to a lower basis. Felt weather strip will cost less this season as a result of recent reductions. A new lower list of lawn mowers has been issued for the 1922 season, and reduced prices on rubber garden hose are also given for early spring booking. The discount on compression bibbs has been revised and is now quoted at 43 per cent. off. Horse shoe prices are lower by 50 cents per keg, and easier quotations also appear on Kiddie Kars.

The paint markets attract attention, price revisions being announced on both white lead in oil, and putty. Turpentine is shown with another 5 cent advance in price. Other increases are noted in certain manufactured cotton goods, such as sash cord, which is 5 cents per lb. higher, and wrapping twines.

Collections continue good, and recent reports show a satisfactory volume of business in seasonable lines. Stoves and ranges are beginning to register a fair movement.

TURPENTINE PRICE AGAIN HIGHER

London, Ont.

Revised quotations on turpentine are now in effect, this change bringing local prices 5 cents per gallon higher than the increased level of last week. The prevailing price is now as follows:

TURPENTINE—	Imp. gal.
1 barrel lots	1 10
2 to 4 barrel lots	1 09
5 gallon lots	1 25

REVISED QUOTATIONS ON WHITE LEAD IN OIL

London, Ont.

Prices on white lead in oil are also revised again this week, and the new quotations are as follows:

	Tons	Less Tons
	Per 100 lbs.	
Pure	13.30	13.65
Elephant	13.80	14.15

PUTTY QUOTATIONS REDUCED

London, Ont.

Revised lower prices are announced on putty. The new quotations show a reduction of approximately 18 per cent. on the previous level. Following are new local prices on both standard and pure putty:

PUTTY—	Per 100 lbs.
Standard, 100 lb. drums	20
Do., 25-lb. drums	6 45
Pure, 100-lb. drums	7 70
Do., 25-lb. drums	7 95

HORSE SHOE PRICES LOWER

London, Ont.

Horse shoes are now 50 cents per keg lower in price. The revised quotations follow:

	Keg.
Iron, No. 2 and larger	$7.75
Iron, No. 1 and smaller	8.00
Steel, No. 2 and larger	8.20
Steel, No. 1 and smaller	8.45

IMPROVEMENT NOTED IN WINDOW GLASS SALES

London, Ont.

There has been a recent slight improvement noted in window glass sales, and the commencement of the fall activity is at hand. Following are current quotations:

Single Diamond, 50 per cent. off list.
Double Diamond, 50 per cent. off list.
Cut lights, 70 per cent. off list.

NET PRICES ON STANLEY TOOLS.

London, Ont.

Following are net prices on some of the Stanley make of carpenters tools, on which lower prices were recently quoted.

STANLEY TOOLS—

Planes—No. 3

Planes.

No. 3, $3.40 each; 4, $3.70; 4½, $4.30; 5, $4.30; 6, $5.40; 7, $6.30; 8, $7.45; 9, $9.20; 9½, $1.95; 9¾, $2.25; 16, $2.30; 17, $2.65; 18, $2.50; 19, $2.60; 26, $2.80; 27, $3.10; 28, $3.55; 35, $3.20; 36, $3.60; 101, 38c; 102, 37c; 103, $1; 110, $1; 120, $1.40; 130, $1.45; 220, $1.45.

TRY SQUARES—No. 20 x 4½ in, $5.40 doz.; 6 in., $7.20; 7½ in., $7.85; 8 in., $8.10; 9 in., $10.05; 10 in., $10.90; 12 in., $13.40. No. 12 x 6 in., $7.85; 8 in., $8.80 doz.; 10 in., $11.55 doz.; 12 in., $13.65 doz.

SLIDING TEE BEVELS—No. 25 x 6 in., $6.50 doz.; 8 in., $7.30 doz.; 10 in., $7.60 doz.; 12 in., $8.50 doz. No. 18 x 6 in., $10 doz.; 8 in., $12.80 10 in., $13.95.

SCREW DRIVERS—

	Per dozen. 3in.	4 in.	5 in.	6 in.	8 in.	10 in.
No. 80—	$1.85;	$2.20;	$2.30;	$2.50;	$3.40;	$4.10
No. 70—	2.40;	2.60;	2.90;	3.15;	4.15;	5.00
No. 20—	3.00;	3.60;	4.25;	5.10;	6.25;	7.85

SPIRIT LEVELS—No. 0, $15.35 doz.; No. 00, $13.80; No. 2, $22.00; No. 3, $26.95; No. 4, $21; No. 5, $35.40; No. 10, $30; No. 30, $40.75.

CARPENTER BRACES—	
No. 966 x 10 inch, each	0 95
No. 965 x 10 inch, each	1 90
No. 946 x 10 inch, each	1 70
No. 945 x 10 inch, each	2 65
No. 915 x 8 inch, each	3 05
No. 915 x 10 in., each	$3.15
No. 915 x 12 in., each	3 20
No. 919 x 10 in., each	5.50

No. 919 x 12 in., each	5 65
No. 919 x 14 in., each	5 85
No. 921 x 10 in., each	4 40
No. 921 x 12 in., each	4 55

INCREASED PRICES ON WRAPPING TWINES

London, Ont.

Increased prices are also announced on wrapping twines. The revised quotations show an advance of 6 to 8 cents per lb. The new prices are as follows:

COTTON WRAPPING TWINE—3 ply in balls, 44c per lb.; 4 ply, 46c.

SEINE TWINE—No. 18 and larger in 1-lbs., 62c per lb.; No. 18 and larger in ¼ lbs., 63c; No. 15 and smaller in 1 lbs., 63c per lb.; No. 15 and smaller in ¼ lbs., 4c.

HIGHER PRICE ON SASH CORD

London, Ont.

Owing to the recent strength of the cotton markets, and the higher cost of this raw material, prices have advanced on sash cord to the extent of 5 cents per lb. The revised quotations are contained on the current market pages.

LOWER PRICES ANNOUNCED ON KIDDIE KARS.

London, Ont.

Lower prices on Kiddie Kars have now been announced. The extent of the reduction is 25 cents on each size, the revised quotations being as follows:

	Each
No. 3	1 75
No. 4	2 08

COMPRESSION DISCOUNT REVISED

London Ont.

Included among the price changes announced this week is the revision in discounts on compression bibbs. The new quotation is 43 per cent. off list.

GARDEN HOSE QUOTATIONS ON LOWER REVISION

London, Ont.

New lower quotations are now in effect on rubber garden hose for spring booking. In addition to the reduction in quotations a special 5 per cent. discount is being offered on all orders taken prior to December 1 next. Following are the new prices:

RUBBER GARDEN HOSE—

Corrugated (in full reels of 500 ft. less 5%.)—½ in., 16 cents ft.; ⅝ in., 18c ft.; ¾ in., 21c.

3 ply—½ in., 9¾ cents ft.; ⅝ in., 12c; ¾ in., 13c.

4 ply—½ in., 11 cents ft.; ⅝ in., 13¾c; ¾ in., 14½c.

5 ply—½ in., 12¾ cents ft.; ⅝ in., 14c; ¾ in., 16½c.

A special 5 per cent. on all hose for early booking orders taken before December 1st, 1921.

LAWN MOWERS HAVE NEW LOWER LIST

London, Ont.

A further adjustment of prices on Taylor-Forbes lawn movers for spring shipment have now been announced. The discount remains unchanged at 20 per cent. off, but the new lower list prices on some types are as follows:

LAWN MOWERS—

Daisy—12 in., $8.65 each; 14 in., $9; 1 in., $9 20.

Star—12 in., $9.70 each; 14 in., $10.40; 16 in., $11.10.

Woodyatt—12 in., $11.25 each ;14 in., $12; 16 in., $12.75; 18 in., $13.50; 20 in., $14.25.

Empress—(Ball bearing)—14 in., $14.70 each; 16 in., $15.50; 18 in., $16.20; 20 in., $16.90.

WIRE NAIL BASE DOWN TO $4.15 PER KEG.

London, Ont.

Further adjustment in the price on wire nails is now given, the reduction being 5 cents per keg more than the new lower prices shown last week. This change brings the prevailing quotation down to $4.15 base.

There has been no change in the current price of cut nails, the base quotations remaining at $4.95, London.

LINSEED OIL PRICE HOLDS.

London, Ont.

Linseed oil still holds at the lower range of prices recently quoted. A fair volume of sales is reported. Following are current quotations:

1 to 2 bbls., imp. gal.	0 92	0 95
3 to 5 bbls.	0 91	0 94
6 to 9 bbls.	0 89	0 92

Less barrels, add 15 cents gal.

SASH WEIGHTS ARE AGAIN REDUCED IN PRICE

London. Ont.

New lower prices are now in effect on sash weights. Following are the revised quotations:

Solid, 3 lb. and larger, $3.10 per 100 lbs.
Sections 1 lb. $3.75 per 100 lbs; ½ lbs. $4.25 per 100 lbs.

WEATHER STRIP WILL COST LESS THIS SEASON

London, Ont.

Quotations on felt weather strip are lower this season. and a new price of $5.00 is now given.

WINNIPEG MARKETS

WINNIPEG, September 21.—Price reductions continue in volume on the current hardware markets, linseed oil offering one of the chief changes. The price which has remained steady for some time has now been reduced ten cents per gallon.

Many small wares in hardware commodities have received reductions in prices this week such as Rivets, Burrs, Carriage Makers Clamps, Fence Staples, Harness Buckles and Snaps, Stove Bolts, Glaziers' Points, etc. Seasonable fall lines are moving fairly satisfactory and a good fall trade is now expected.

BIG DECLINE IN PRICE ON LINSEED OIL

Winnipeg.

Quotations on linseed oil show a reduction of 10 cents per gallon this week. Following are the new prices:

Raw, $1.10 per gal.; boiled, $1.13 per gal., in barrel lots.

FENCE STAPLES REDUCED.

Winnipeg.

A reduction in prices has been recorded this week in bright fence staples and following are the newest quotations:

Fort William, $5.30.

Winnipeg, $5.95.

REVISION IN PRICES ON RIVETS AND BURRS

Winnipeg.

A general reduction has been made in all kinds of rivets and burrs. Following are the new ruling quotations:

RIVETS—

Carriage rivets, 40 per cent. off list.
Wagon box rivets, 40 per cent. off list.
Section rivets, 40 per cent. off list.
Hame rivets, 40 per cent. off list.
Iron burrs, 40 per cent. off list.

Coppered Belt Rivets Assorted.

8, 26½; 9, 27c; 10, 28¼.

J H R

Coppered Iron Belt Rivets.

½ x 10, 21c; ⅝ x10, 21c; ¾ x 10, 20½c; ⅞ x 10, 20½c; 1 x 10, 20¼c; 1¼ x 10, 20¼c; 1½ x 10, 20¼c; ½ x 8, 19¾c; ⅝ x 8, 19¾c; ¾ x 8, 19¾c; ⅞ x 8, 19¾c; 1 x 8, 19c; 1¼ x 8, 19c; 1½ x 8, 19c.

Belt Rivets—Tinned Iron.

¼ x 8. 28¼c; 5-16 x 8, 27½c; ½ & ⅝ x 8, 24½c; ¾ & ⅞ x 8, 25c; 1, 1¼ & 1½ x 8, 24½c; ⅜ x 10, 28¾c; ½ & ⅝ x 10, 26¼c; ¾ & ⅞ x 10, 26c; 1, 1¼ & 1½ x 10, 25¾c.

Tinners and Coopers Rivets.

Black, 40% off list; tinned, 40% off list; plus 9c per lb. net for tinning.

LARGER DISCOUNT ON STONE BOLTS.

Winnipeg.

Stone bolts have been reduced in price slightly over 10% and the discount quoted this week is 65 per cent. off list.

ADVANCE IN PRICES OF SAND PAPER

Winnipeg.

Prices on sand paper have advanced a few cents per quire this week and are now quoted at the following levels:

FLINT PAPER

In sheets.	Per Ream	Per Quire
00 & 0	$ 8 07	45c
1½	8 55	47c
1	9 67	52c
2	10 05	72c
2½	15 00	82c
3	17 10	92c

SUBSTANTIAL PRICE REDUCTION ON CARRIAGE MAKERS CLAMPS

Winnipeg.

A substantial reduction is made this week in prices of carriage makers' clamps and are as follows:

104	$9 60
105	12 00
106	15 60
108	24 00

CROW BARS REDUCED.

Winnipeg.

Reductions are made this week in prices of crow and claw bars. Following are the revised quotations:

Crow bars	$10 00
Claw bars	13 50

QUOTATIONS LOWER ON GRUB HOES AND MATTOCKS

Winnipeg.

Prices are 25 cents per dozen lower on grub hoes and grub mattocks. Following are the up-to-date prices:

Grub hoes	$9 50
Grub mattocks	12 00
Pick mattocks	12 00

PICK PRICES LOWERED

Winnipeg.

Prices have dropped 25 cents per doz. on railroad and ore or rock picks. Following are the present quotations:

PICKS

Railroad.

5 to 6 lbs., $10.00; 6 to 7 lgs., $11.00; 7 to 8 lbs., $12.00.

Ore or Rock.

6 to 7 lbs., $11.00; 7 to 8 lbs., $12.00.

TURPENTINE COST UNCHANGED

Winnipeg.

There has been no revision on turpentine prices this week.

The prevailing level of $1.20 per gal. in barrel lots still being generally maintained.

White Lead Not Likely to be Supplanted with Zinc Oxide in Paint

Many Reports of Painters' Objection Recently Due to Possibility of Lead Poisoning from White Lead in Paint—Agitation Started in France Which Has no Lead Industries but Extensive Zinc Industry—Zinc Oxide in Paint Leaves Surface Unfit for Repainting

IN A number of occasions recently there have appeared reports in the daily newspaper and trade press concerning the dangers from the use of white lead in paints. One of these reports dealt with recommendations of a body that white lead be eliminated from paint in order to protect painters against lead poisoning.

Discussing this matter with J. R. MacGregor, Ass't. General Sales Manager of The Eagle-Pitcher Lead Co. Chicago, Ill., who addressed a gathering in Ottawa, Ont. on the subject, Hardware and Metal was informed that the problem of prohibiting the use of white lead is not entirely an altruistic movement on the part of "certain European labor parties." It was pointed out that this agitation was started in France probably for the reason that France has practically no lead industries but has an extensive zinc industry. The same is true of Belgium.

"This agitation is one to assist France in developing her zinc industry. They have, however, very cleverly thrown an altruistic cloak around the mercenary propaganda," said Mr. MacGregor.

In his recent address on the subject before a gathering of painters Mr. MacGregor said in part:

"The subject is one most difficult to cover because of the confusion pro and con that has been thrown around the question of lead poison and white lead versus zinc oxide paint.

"The official unbiased data on lead poison among painters is not complete enough to warrant drawing conclusions as to the danger involved in using lead paint containing no lead. This data will not be easily obtained because it must involve a careful study of the effects of thinners and vapors given off from paint and until this is known we cannot state that the use of white lead causes any ailments besides lead poisoning. Inasmuch as this data is confusing I prefer to ignore it at this time and to merely state that lead is toxic and you cannot be poisoned unless you eat it, that is to say, get it into your throat and then swallowing it, or by eating it on your food.

Lead Colic Rare

"There is still some controversy as to whether or not you can be poisoned by lead that has been breathed into the lungs. Now, admitting that lead is toxic and that you must eat it to get poisoned, it stands to reason that unless painters are extremely careless they will not get poisoned and I will wager that no bright, keen journeyman painter employed by any one here has ever been afflicted with lead colic. Individuals who do not use white lead carry the impression that painting is a very dangerous vocation. Reliable information regarding this question was obtained from two insurance companies, the New York Life Insurance Co., and the Metropolitan Life Insurance Co. The New York Life Insurance Co., who have for thirty years compiled data on the mortality rate in various vocations, list painters as normal risks, together with farm laborers, machinists and others regarding which there is no question as to the healthfulness of the vocation. The Metropolitan Life Insurance Co. also have data that is of interest. Two per cent of all painters insured by this company have died from lead colic and 2 per cent died from suicide. Thus you see lead colic was no more prevalent in the painting industry than suicide. These two companies have not noticed any increased mortality among painters, but regard them as normal risks. They have not drawn sweeping conclusions from a few limited investigations. Their conclusions, I am sure, are the same as you, gentlemen, have drawn from your years of experience in painting. The two statements referred to above have been obtained from past years of experience and I wish to call your attention to the statement made by Dr. E. R. Hayhurst, Professor of Hygiene, of Ohio State University, who says: 'Our experience in Ohio shows that lead poisoning is falling off considerably, due undoubtedly to the increasing precaution taken by workers, particularly painters.' In view of Dr. Hayhurst's observations the mortality rate amoung painters should be lower from now on.

Zinc Oxide Can Replace White Lead

"With these few statements I propose to leave the question of toxisity and call your attention to statements made in the Agenda of the International Labor Congress, which meets in Geneva in October. This is a most unusual document. In that the writers have definitely stated that zinc oxide can replace white lead for painting purposes. They have very loosely referred to tests made in this country. One of the tests referred to was the North Dakota Experimental Station Test Fence. Inasmuch as this is the only North American test conducted to determine the relative merits of various types of paint and since it was referred to in the Agenda as a test which showed zinc ozide to be a satisfactory substitute for white lead paint, I am herewith submitting data obtained from the North Dakota Experimental Station. The letters that I flash on the screen state the conclusion arrived at by the official having this work in charge. The North Dakota Experimental Station has been conducting paint tests since 1905 and is still doing so. I believe that they are qualified by this time to pass judgment as to the relative merits of various types of paint. Please note these conclusions are not mine, but are those of an official of the state who has been carefully studying the entire paint problem. The data obtained from Dr. W. T. Pearce, in charge of this work, are submitted herewith and is explained best by his letters:

North Dakota Agricultural College
E. F. Ladd, President
Agricultural College, North Dakota
School of Chemistry and Technology
June 10, 1921.

To Whom It May Concern:

From a very comprehensive study of the data obtained from our 1906, 190? and 1915 Test Paint Fences, I am convinced that a good paint must contain a pigment which is composed of at least sixty per cent (60%) of either "Basic Sulphate White Lead," or "Basic Carbonate White Lead," not over fifteen to twenty per cent (15-20%) Inerts, and not over from fifteen to twenty-five per cent (15-25%) Zinc Oxide. We have found that whenever these limits of either the "Inerts" or Zinc Oxide are exceeded, the paint film will in time crack and scale excessively and thus leave a hard, rough surface that is unfit for repainting.

Some typical data from our 1915-1916 Test Paint Fence is appended. The wood used in this test was white pine.

Signed: W. T. Pearce,
Head, School of Chemistry and Technology and Paint Chemist, Regulatory Division
North Dakota Agricultural College
E. F. Ladd, President
Agricultural College, North Dakota
School of Chemistry and Technology
June 10, 1921.

To Whom It May Concern:

The data given below were obtained from the examination of the North Dakota Agricultural College, 1915 Test Paint Fence, in 1917 and in 1920. The

data for the third reading were obtained from the examination of the fence by the writer and his assistants. The fence was constructed and painted under the direction and supervision of E. F. Washburn, who is an experienced paint man.

Signed: W. T. Pearce,
Head, School of Chemistry and Technology and Paint Chemist, Regulatory Division

"From this data obtained from the State of North Dakota the official character of which cannot be questioned, I think we can safely state that zinc oxide either pure or containing only a small amount of white lead, is entirely unsuited as a substitute for white lead.

I wish to call your attention to the fact that the same physical and chemical changes will be involved regardless of which zinc oxide is used. Zinc oxide is chemically the most active pigment used in making paint. It combines with linseed oil and the zinc soap resulting from this combination goes into a colloidal glue-like condition. This produces a very hard non-plastic film and when the normal shrinkage occurs in the drying paint the hard zinc film does not flow like a plastic film, instead it cracks and draws from the wood, thus leaving an unsightly surface, not suited for repainting. This chemical and physical action will occur whenever any kind of zinc oxide is used in painting. The conclusions arrived at in North Dakota bear me out in this respect. Therefore, it seems that the proper thing to do is not to discontinue the use of white lead, but to realize that it is not wise to get white lead into the stomach. This is a very simple precaution and one that will be prescribed rather than the discontinuance of the use of white lead.

How Service Helps in Paint Selling

Making Service a Business Pulling Power in the Paint Department—Ways of Giving Unusual Service Which Stamps the Hardware Store With a Mark of Individuality

(By a Hardware Merchant)

TO THE average consumer, all paint and varnish stores look more or less alike. Goods have been standardized and prices have been so well established that "service" is the one thing that determines more than anything else the growth of the paint business.

What does service mean?

It means, first, a selection of paints and varnishes for which there is a steady demand.

It means all paints and paint accessories attractively displayed.

It means adjustment of differences without dispute .

It means an absolute willingness to refund money or exchange unsatisfactory goods without hesitation.

Anticipating Wants

It means to anticipate the wants of the community. The paint dealer should not be backward in introducing new goods that are being nationally advertised or for which there already exists a demand elsewhere. This in itself will prove that the paint dealer and his store are wideawake and in the front ranks with other progressive paint dealers.

Service means pleasant salesmen and courteous treatment of customers at all times.

Service, real service, means a thorough knowledge of your trade and the ability to talk to customers on any subject that has to do with paint or painting.

The paint dealer who knows in advance what his customers require, and then makes it his business to remind his customers of these needs, will be giving such good service that his business and influence cannot help but grow. Every home owner and every business man in the paint dealer's community will appreciate the fact that the paint dealer takes enough interest in him and his buildings to suggest a new coat of paint for a building, a new coat of varnish for the floors or the repainting or refinishing of the interior of any building.

Appreciate Interest

If you were to ask a man whether he appreciates being told that his building is in need of a new coat of paint, he would at once say "no." But the fact is that he appreciates any interest a paint dealer takes in his affairs. It is human nature to want to be remembered. It is human nature to feel flattered when complimented. And it is a compliment to remind a man that he is a property owner, that he owns buildings that require care.

Of course, it would not be good policy simply to tell a man that he has been neglecting the buildings he owns. A better way would be to tell a prospective customer that a new coat of paint will greatly improve the appearance of the building, preserve the wood, and increase the value of the property

It would not be natural to expect a man to immediately order his paint on a single suggestion, but it gets him to think about repainting, and the more he thinks the more convinced will he be that his home, his barn, or his store really is in need of a new coat of paint, and the first thing you know he will be around to ask about color schemes, the amount of paint necessary, etc., and the result is that the paint dealer who made the suggestion is pretty sure to get the business.

Writing Prospects

Another way of giving unusual service to a customer is simply to write him, enclosing a color card, and suggesting some particular color as unusually desirable for a home, a barn, or store building owned by the customer. In a letter of this kind it is always a good policy to simply take it for granted that the customer knows that his building requires repainting, that the interior should be refinished, etc. A letter of this kind need not be long. Simply say: "The other day while passing your home the thought came to me that your home, repainted in our No. ..... as shown on the enclosed color card, would greatly improve the appearance and increase the value of your property. I would be glad to have you come in the next time you are in this neighborhood, as I have some special suggestions I would like to make."

A letter of this kind is very friendly, and at the same time offers a good opportunity for getting in touch with a customer. Of course, the letter should be worded to apply to the individual customer. It will prove to him that you are thinking of him and his property. And the chances are that just as soon as he is in need of painting material he will remember your letter and the chances of getting this business are in your favor.

All this is service, real service, and it means a closer relation between the paint dealer and his trade—it means an acquaintanceship that has a firmer foundation than a mere desire to sell paints.

Any hardware merchant who carries out these ideas of service cannot help but make a success of his business. It will increase his circle of friends; it is the real power that will pull business to the store.

DEMONSTRATING AIDS IN SELLING COOKING UTENSILS

Messrs. W. H. Thorne and Co., Ltd., of St. John's, recently adopted the method of actual cooking demonstration in order to boost the sale of aluminum kitchen utensils. The demonstrator, in this case, was a representative of the manufacturers, and in conjunction with the demonstrating period, some aluminum goods were offered for sale at reduced prices. It is reported that the innovation proved especially attractive for female shoppers.

Barrett Roofings, Cements Industrial Paints etc.

Everlastic "Rubber" Roofing

Plastic Elastigum Patching Cement

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

THE man who buys Barrett Products usually buys them through a dealer. The dealer carries them because he knows who makes them and what they *are*. He knows, also, that The Barrett Company's reputation throughout the Dominion is *his* reputation in his locality, and that it increases his sales, his profits, and his name for quality and fair prices.

Consumers are likely to judge you, Mr. Dealer, by the products you handle. Barrett Products on your counter will tell them that you are the man they want to do business with.

Farm impliments don't wear out—they rust out. Everjet prevents rust.

Everjet Elastic Carbon Paint

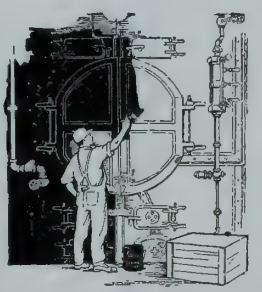
A black carbon paint for industrial purposes. No other paint on the Canadian market has ever enjoyed the same popularity and filled so many demands in the industrial world as Everjet, which was put on the market by our chemists less than ten years ago.

We manufacture no product which we can more thoroughly recommend. For use on all kinds of metal and wood, particularly on materials subject to severe conditions; for use on boilers, smokestacks, machinery, piping; in fact, metal work of all kinds. It is also used extensively for painting metal roofs. It successfully resists the corrosive action of acids, alkalies, fumes and vapors, and will wear stubbornly under the most adverse conditions.

Everjet Paint adds years to the life of outdoor metal work.

It is being used extensively by big manufacturing concerns, railroads, etc., all over Canada, and has been endorsed by some of the most eminent engineers.

Put up in: 1-Gallon Cans, Lithographed (cases of one doz.), 5 Gallon Cans, ½-Barrels (about 20 gallons), Barrels (about 40 gallons).



Everlastic Liquid Roofing Cement

FOR resurfacing old and worn-out "rubber" and prepared roofings, here's a winner!

Comes ready for use, is easy to apply and forms a smooth, tough, durable surface which stubbornly resists moisture, acids, alkalies and fumes. Adds years of service to a worn-out roof at small expense.

Everlastic Liquid Roofing Cement is in a class by itself among roof repair materials.

MONTREAL TORONTO ST. JOHN, N. B.

Weekly Paint Markets

MONTREAL

MONTREAL, Sept. 21—With revised quotations to lower levels now ruling on paints, varnishes and allied products generally, the autumn trade is said to have made a start with the anticipation of a good amount of business to continue during the following months before the colder weather set in. The new prices, which show extensive reductions, covering practically all lines, are announced complete by some manufacturers, while others are busily engaged in revising their lists.

The current markets for the week show linseed oil and turpentine holding at former prices, with a fairly firm tone in both products. Linseed oil showed a marked gain over the week end, but has again sagged to the extent, falling back to the situation of last week which is however, far from a weak state, and the market can be stated as holding very well. Turpentine quotations are holding at 96 cents a gallon in one barrel lots, being unchanged for the week. With anything like a fair demand continuing on turpentine, little change to a lower price basis is expected as southern markets report a firm undertone for this season of the year.

White lead in oil and putty are enjoying a fairly active market at the new lower prices, and in the latter product increased sales will in all probability be made as the season advances. Shellac prices are unchanged with business stated to be good for this time of year. There is a temporary shortage of window glass, but of no serious nature as shipments are arriving from Belgium to replace the depleted stocks. Buying in window glass has not taken the active turn as yet, but dealers consider it yet early for the usual fall demand.

LINSEED OIL HOLDS AT STRENGTH

Montreal

The current market for linseed oil is at present fairly strong, notwithstanding a falling off in the past few days. Over the week end a marked advance was made when flax seed not only touched the $2.00 mark but soared well above. This high level was not maintained for any length of time but the drop was not to the extent of the climb and the present price standing of flax seed still remains in advance to the above level.

On outside markets the tendency for futures promise a fairly firm situation. New seed now on the market is said to be not of the quality of the old, being dirty and of poor oil content. There is also a general expectation of an actual shortage in the American supply. With these conditions, the European market continues active, the shipments of seed continuing on a large percentage, and crushers on this side are now taking good quantities of seed both to take care of immediate mill demands and to build up their reserve stock.

On the local market the demand is still on the quiet side, but increased business is looked for in the very near future, and in this connection paint manufacturers are expected to figure, requiring supplies for their usual fall manufacture.

Quotations hold for the week as follows:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal.	0 90	0 92
3 to 4 barrel lots, per gal	0 88	0 90

Less barrels, add 10 cents per gallon.

TURPENTINE CONTINUES FAIRLY FIRM

Montreal

Locally, quotations on turpentine hold at 96 cents a gallon in one barrel lots with the demand only fair and continuing in small quantities.

Southern markets report a firm market during the week with a slight gain in price recorded, principally due to dealers being anxious to secure supplies for prompt shipment. It is apparent that all depends on the demand, as supplies are not of the ample nature that is usual producers still maintaining the inability to produce at present figures.

Some few weeks ago it was thought the price of turpentine would hold around the 90 cent figure and so far the prediction has been correct, and the present outlook points to a continuance of a steady price basis.

Following are current prices:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	0 96
2 to 4 barrel lots	0 94
Broken lots	1 06

SHELLAC PRICES UNCHANGED

Montreal

Shellacs have apparently settled on a steady market, with quotations remaining unchanged for the past few weeks. There is a recent improvement in the undertone, buying becoming more active, and although locally the demand is seasonably quiet a gradual increase in purchases is looked for. Unchanged prices are as follows:

SHELLAC—	
Orange shellac, in nbarrels ... ...$	3 60
Do., in one gal. jugs	3 90
White, in barrels, or 5 gal. jugs	4 10
Do., in one gal. jugs	4 40

WHITE LEADS SELL WELL

Montreal

Business in white lead in oil is quite satisfactory, sales being of a steady volume. Whether the new lower prices will offer a stimulus to trade seems problematic at present, but the trade is satisfied that a good amount of fall painting will be done, and this will reflect to a great extent on white lead. New quotations will at any rate cause a settlement in prices on the market and this will be welcome as formerly the market was far from steady.

Present quotations are $12.00 in 5 ton lots, $12.75 in one ton lots and $13.10 in less quantities.

WINDOW GLASS AND PUTTY NOT YET ACTIVE

Montreal

Dealers in window glass report business has not yet taken the active turn that is usual in the fall months, but are little concerned as it is still early. Stocks throughout the outside country are undoubtedly low and with booking not being in evidence to any great extent this year, the actual consuming demand will necessitates purchases commencing no doubt next month.

There is a temporary shortage, particularly in the double diamond cuts, now reported in some quarters, but with the arrival of early shipments from Belgium stocks will be replenished in time for the active season. While on the other hand, some jobbing houses are making a special effort to reduce their stocks in some sizes. Quotations remain at the Montreal net list found on the current market page.

PUTTY MOVEMENT NOT SHOWING MARKED ACTIVITY

Montreal

Shipments of putty are now being made at the new revised prices, but the demand is not yet as active as anticipated for the coming fall months. Recently revised quotations are the following:

PUTTY— Standard Putty—	5 ton.	1 ton.	Less
Bulk, bbls., 800 lbs. ... .$	4 00	$4 50	$4 75
Bulk, drums, 100 lbs.	5 00	5 50	5 75
Do., or tins, loose, 25 lbs. .	5 25	5 75	6 00
Drums or tins, cased, 25 lbs. .	6 00	6 50	6 75
1-lb. tins .. ..,	8 75	9 25	9 50

Pure linseed oil putty, $1.50 per 100 lbs. advance over above prices.

HILLCREST
A GUARANTEE OF QUALITY

HILLCREST

California Gold Paint-Bronzing Liquid Aluminum Paint

For the finishing touches on inside winter work your customer will want Hillcrest California Gold Paint, Bronzing Liquid, and Aluminum Paint, for radiators, fixtures, piping, etc.

There is a surprising amount of work of this nature done during the long evenings spent indoors through the winter months. Ask the Hillcrest Salesman about the stock for this need.

Hillcrest Paint Products

WATCH FOR OUR SEMI-MONTHLY BULLETIN NEXT SATURDAY

If interested tear out this page and place with letters to be answered.

TORONTO

TORONTO, September 22—Turpentine and window glass furnish the feature price attractions on the current paint markets. A further advance of 5 cents per gallon on turpentine increases the price on this product to the highest levels noted on local markets for some time. Window glass gains attention due to the general adoption of the new net glass list.

Paints and the allied products are beginning to feel the fringe of the looked for active fall movement in these lines. The revised quotations recently announced extend to practically all lines in greater or less degree, and the lower price levels should stimulate the advantage to the consumer of current purchasing. While many price changes have been given by the different paint market manufacturers, and these revised quotations are contained on the current paint market page, yet others are still engaged in changing their lists in accordance with the recent decision to lower prices.

LINSEED OIL SOURCES

Toronto.

Estimates on the current season's flaxseed crops would indicate that the amount of seed available to crushers for the coming year, may show a decrease of approximately thirty per cent from the average amount produced last season. This applies equally to the Canadian, United States, and Argentine crops, and of these three, the most encouraging report covers the flax seed territory under cultivation in this Dominion. While the estimated Canadian flax seed crop will be about one million bushels less than during 1920, this difference is accounted for in the reduction of acreage. The yield per acre is well up to the average for the last ten years, and far above that of last season.

The American government are anticipating a reduction of 40 per cent in the flax seed returns for that country. The condition of the Argentine territory was also unfavorable until just recently, when improved weather conditions have brought forth more optimistic estimates. The linseed oil market, however, has not varied to any extent from these conditions, as the falling off in demand for oil has discounted these contributory market elements.

ANOTHER FIVE CENT ADVANCE IN TURPENTINE PRICES

Toronto.

The continued strength of turpentine on the primary markets, and the corresponding gain in price at southern supply centres, has resulted in a further rise of 5 cents per gallon in the local quotations. This increase is the third successive gain of 5 cents recorded during the last three weeks, and the current quotations have now reached the highest level noted on the local markets for some time past, being generally quoted at $1.15 per Imperial gallon in 1 barrel lots. The fact that distributors have been forced to purchase directly from the southern markets and at the recent higher prices, indicates that local stocks are practically exhausted. The rate of exchange, the transportation cost, evaporation of the product while in storage, and other important factors are all added to the increased primary cost, and local values have therefore, generally reflected the advanced levels.

On the other hand, it is noticeable that where stocks of turpentine are more or less normal, the price is a few cents below the new high quotation. This price, however, is not general, and has to be located. The fact that the surplus on hand was purchased previous to the advance in prices on Southern supply markets is chiefly accountable for the variance in local prices. Following are the current higher quotations on turpentine, now generally quoted:

TURPENTINE—

1 barrel lots, per Imp. gal.	$ 1 15
2 to 4 barrel lots. per Imp. gal.	1 14
5 gallon lots, per Imp. gal.	1 30

LINSEED OIL PRICE HOLDS

Toronto.

Quotations on linseed oil are unchanged this week, and the local price is maintained at 92 cents per gallon for raw and 95 cents for boiled. The gain in the price of flax seed, which gave rise to the expectations of reflected strength in linseed oil markets, has been offset to some extent by a lack of demand for oil. Following are the prevailing quotations:

LINSEED OIL—

	Raw.	Boiled.
1 to 2 barrel lots, per gal.	0 92	0 95
3 to 5 barrel lots,. per gal.	0 91	0 94
6 to 9 barrel lots, per gal.	0 89	0 92

Less barrels, add 15 cents per gallon.

NET LIST NOW GENERAL ON WINDOW GLASS

Toronto.

There has been a readjustment in quotations on window glass made by the various distributors, and in many cases the new net list has now been adopted. While prices are practically unchanged, the revision extends to the discount which was previously 50 per cent off. This is, of course, eliminated by the net prices, with the exception of quantities of 25 cases, or more, where a discount of 5 per cent is given.

The current market for glass is stated to be slightly improving, and the seasonable fall movement now shows signs of getting under way. Building proclivities have enhanced the demand for glass in various sizes, and it is felt that a large proportion of this season's glass sales are intended for installation in the many new homes that have been erected throughout the country.

Following is the new net glass list:—

GLASS LIST—

Case lots—	Star or 16-oz.	Double or 24-oz.
Up to 25	$ 5 50	$ 9 05
2 to 40	6 95	11 40
41 to 50	7 65	13 05
61 to 70	8 35	13 65
71 to 80	8 80	14 40
81 to 84	10 30	17 70
85 to 90	10 85	18 55
91 to 95	.....	20 80
96 to 100	.....	22 60

In lots of 25 case, or more, 5 per cent. discount.

F.o.b. Montreal, Toronto, Hamilton, London.

REVISED PUTTY QUOTATIONS TO HELP FALL TRADE

Toronto.

With the recent revisions in quotations on putty now in effect, the customery fall movement in this product should be stimulated both in volume of shipments and the number of current orders. Up to the present, however, the degree of activity has only been slightly accelerated, dealers being of the opinion that it is yet a little early for the annual fall trading, and that the next few weeks will witness the looked for revival.

Following are the new prices on putty:

PUTTY—

Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk bbls	$ 4 45	$4 95	$5 25
100-lb. drums	5 45	5 95	6 20
25-lb. irons	5 70	6 20	45
Bladders in bbls.	6 70	7 20	7 45
Do., less quantities	6 95	7 45	7 70

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices for similar quantities.

EXPECT FALL ACTIVITY IN WHITE LEAD

Toronto.

The demand for white lead in oil can be described as just on the fringe of the fall movement in paint products generally, and coupled with the recent substantial price revisions in the prevailing quotations on white lead in oil, a fairly substantial movement during the Fall season is generally looked for. Following are the revised quotations:

WHITE LEAD IN OIL—

	5-ton-lots.	1-ton lots.	Less quantities
Per 100 lbs...	$12 70	$13 20	$13 55

WHITE MOTOR CONTROL

The White Motor Control places in centre of the steering wheel directly under the driver's eye, all the instruments heretofore arranged on the dash. The makers claim that operation of the car becomes more restful since less concentration is necessary.

The control is mounted in the steering wheel flush with the rim of the wheel. It is a compact unit containing the speedometer, oil gauge, ammeter, electric control switches, horn button, or any other indicating mechanism that is standard equipment of a car. On the Motor Control, the makers claim, body wiring has been eliminated, instrument mounting has been dspensed with and the connection of chassis to body wiring has been reduced to a single operation.

By removing the top cover of the control it is possible to reach all the instruments, and all the wiring back of where there's plenty of room, and where a repairman can work unhampered.

A specially designed steering column is provided though which the wires are placed. Manufactured by the Whyte Duffield Manufacturing Company.

GLIDDEN

EVERYWHERE ON EVERYTHING

It's Floorette!

Meet little Miss Floorette. Learn to know her as well as the good floor varnish she represents — Glidden Floor Varnish.

With Floorette guarding the floors the kiddies can have the run of the house, and the floors and other furniture will stand the hard wear. Glidden Floor Varnish—Floorette—is made to have a good time on. It is made to last as well as to beautify.

Like all Glidden products, Floorette will find ready acceptance among your customers. The well-known Glidden name and green label have already won the confidence of the public and make the selling of Glidden products easy. Write today for dealer proposition.

The Finish that Endures

"Save the surface and you save all" *Paint & Varnish*

"Exterior Surfaces for fall painting"

Advise your customers to paint outdoor surfaces in the Fall—when surfaces are dry and receive paint best—when outdoor surfaces should be protected against the coming damp winter weather.

Advise them to use Floglaze, the hardest-drying, longest-wearing surface finisher on the market.

Floglaze gives the dealer a finish for every surface.

The Seven **Floglaze** *lines are*

"—we believe the Live Merchant will profit by using this Boy and Slate"

—a quotation

THOUSANDS of people are talking about this sign. Thousands of people have commented on the Boy and Slate epigrams.

Every word uttered about this proposition is enthusiastic.

Garagemen and dealers in gasoline and lubricants recognize in this Boy and Slate Sign the biggest business-builder of the day.

Let Us Tell You About It

There are a few sections of the country where this Boy and Slate is not in use. Therein lies a golden opportunity for you. For, to any merchant reading this paper we will gladly send the most complete information about it, entirely without any cost or obligation whatsoever.

The boy is life size. The Slate itself is 5 ft. wide. The whole sign is solid wood construction and is painted in natural colors.

We supply the epigrams—a new one for every other day of the year.

The minute you put this sign down in front of your place, you have planted there a lasting tribute to your agressiveness. Make the start now.

Get this coupon in to our Branch nearest you right away. By return mail all the information will be put right in your hands, so that you may know all about this wonder sign.

TINKER TOM'S TALKS.

No. 331

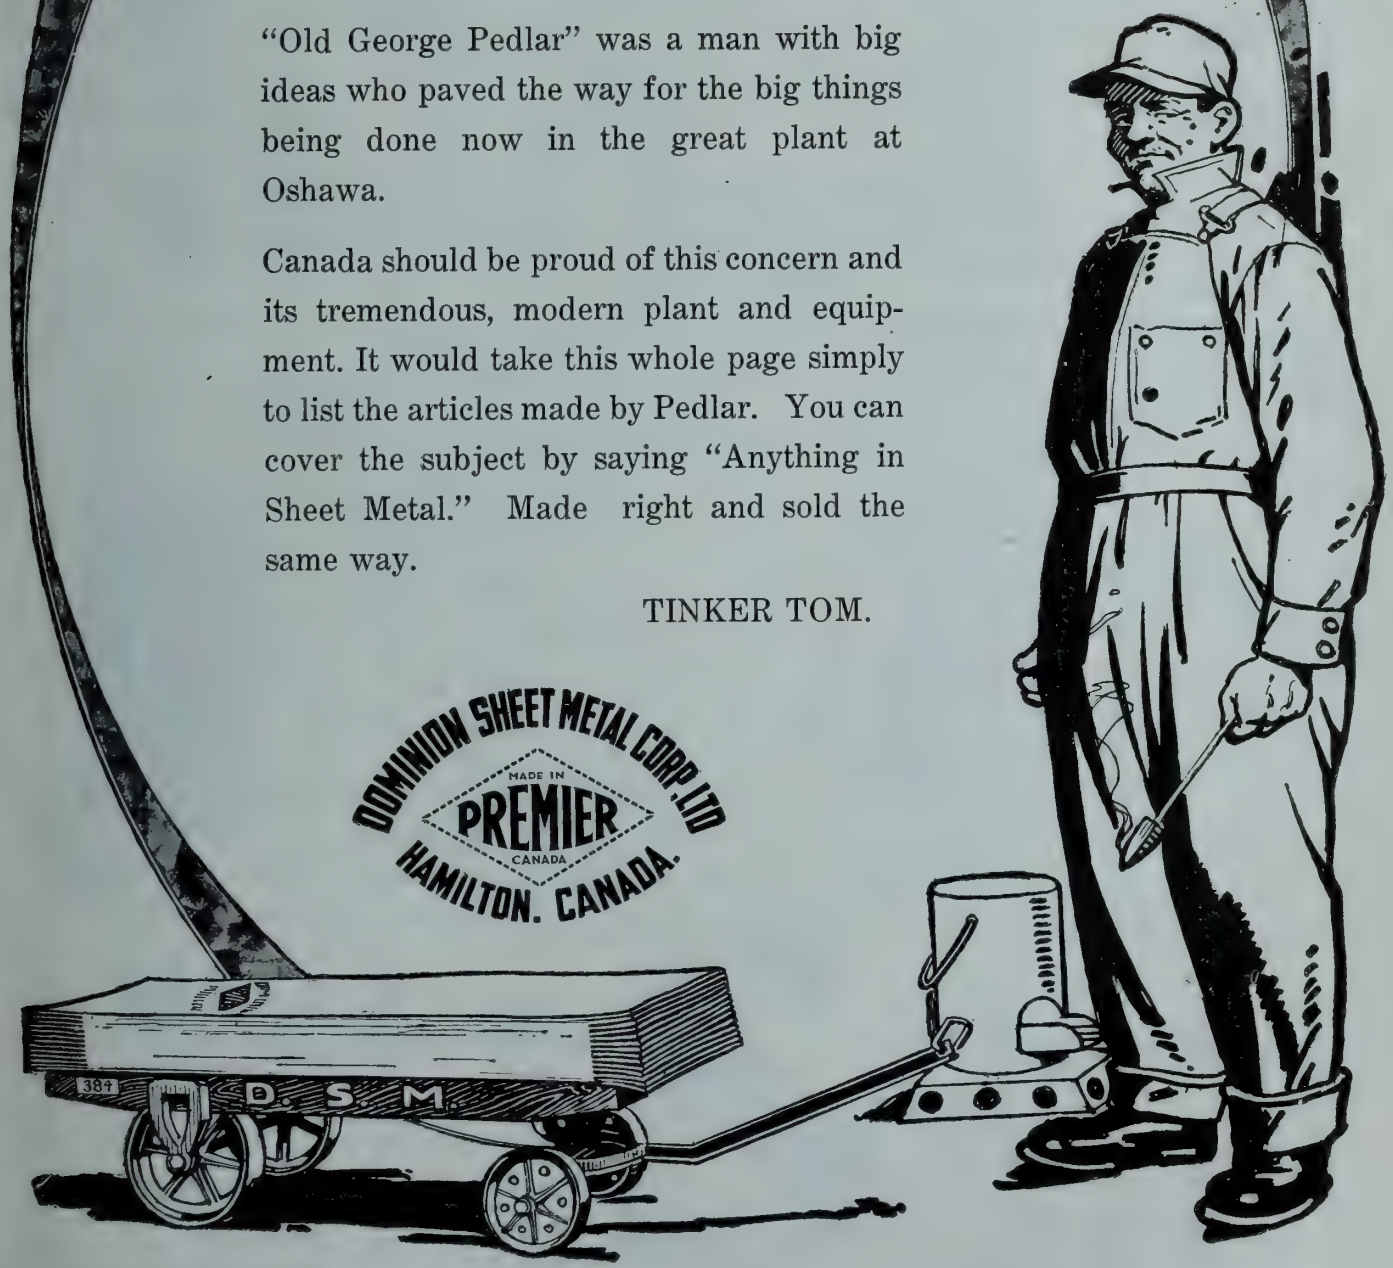
A Little Series on Prominent Users

Pedlar People Limited, of Oshawa

"Old George Pedlar" was a man with big ideas who paved the way for the big things being done now in the great plant at Oshawa.

Canada should be proud of this concern and its tremendous, modern plant and equipment. It would take this whole page simply to list the articles made by Pedlar. You can cover the subject by saying "Anything in Sheet Metal." Made right and sold the same way.

TINKER TOM.



If interested tear out this page and place with letters to be answered.

List Price Each $17.00.
Ask for Discount.

"THE BEST TORCH I EVER USED"

This is the remark frequently made by owners of the C. & L. Double Needle Torches. They are dependable Torches under all conditions of wind and weather. The burner has a powerful generator, producing from 100° to 300° hotter flame than any other make. The upper needle has a wire tip which cleans the orifice. The lower needle regulates. Both needles are blunt—not sharp-pointed—which prevents enlarging the orifice and ruining the burner. Will give better service and outlast two ordinary Torches. Jobbers supply at factory price. Catalog upon request.

Wa-Ko-Ver Stain
Beautifies All Woodwork

Not only does it beautify, but it wears like iron. You will find it pays in future sales always to recommend Wa-Ko-Ver Stain whenever your customers have worn floors or scratched woodwork to renovate. It restores the freshness of the floors or woodwork, pleases your customers, and makes permanent business for you. The established reputation of this effective, serviceable stain makes it a pleasure to sell. Good displays in your windows, on your counters, or other conspicuous places, remind visitors to your store, and people that would otherwise be "passers-by," of their need for Wa-Ko-Ver stain. This sales-maker will handsomely reward a little sales-effort on your part.

The Trade Mark behind the "Hardware House of Quality"

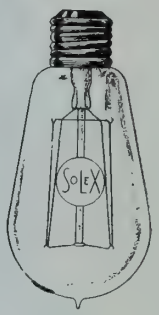
DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

SOLEX
Electric Lamps

Tungsten Lamp

Round Tungsten



Nitrogen Lamp

Lamps That Save Money

Solex Lamps combine quality materials, and superior workmanship. They are brilliant—yet economical, giving a white, intense light closely resembling natural light. Solex Lamps give more light for the same cost of current, to which is added an average life guarantee of 1,500 hours. These efficient lamps save money. There are Solex Lamps to meet all requirements of the home, factory, office or farm.

The Blue Lunar Lamp when illuminated gives a soft and diffused light. A most suitable lamp for window illumination.

All Solex Tungsten Lamps are pure, continuous filament drawn through diamond eyes into a fine, strong wire. Breakage is minimized through springy metal supports.

The Round Bulb Tungsten Lamp will be found in some cases more suitable than the pear-shape. Can be used to fit in smaller electric light fixtures, etc.

The Solex Low Voltage Nitrogen Lamps are specially designed for use on farms. Conserve electricity, yet give a steady, bright light.

Write today for full particulars of this money-making plan.

SWAN
Weatherstrip

Positively Prevents Drafts

THE SWAN WEATHER STRIP

is made of WOOD and FELT

(PATENTED)

The wood is selected Fir nicely finished. The felt is manufactured specially of lasting quality. Color Green.

Holes are drilled to prevent splitting. Nails are supplied with every set.

The top ends of the side pieces are coved so as to make a neat joint.

A set for a door is composed of two pieces 7 feet long for the two sides, and two pieces 3 feet long for top and bottom.

For shipping it is put up in bundles of ten sets, and weighs 15 lbs.

Sold by

J. H. Ashdown & Co., Marshall Wells Co., Walter Woods Co., Winnipeg Paint & Glass Co., Wood, Vallance Co., Miller, Morse Hdwe. Co., Mackenzie Brothers, Winnipeg.

Also through other leading jobbers throughout Canada.

Brass Well Screens

JOHNSON'S

Fig 2

For use where sand or gravel gets into wells and clogs them.

Johnson Brass Well Screens effectively prevent this. They are skilfully designed with a continuous slot; the inlet is sharply undercut; the brass used is very hard, to prevent "sand-cutting"; And the inlet width is correct for keeping out sand and affording maximum well capacity.

We will gladly send a useful book of valuable information on this subject.

Manufactured by

Edward E. Johnson, Inc.

2304 Long Avenue, St. Paul, Minn.

HANDLES

How is Your Stock?

We are prepared to ship you quickly anything in the line of Axe, Hammer, Peavy, and Cant Dog Handles. Ours are made of the very finest of clear, straight-grained Second Growth Hickory, White Ash and Maple.

We take special pains to split our stock the right way of the grain, assuring perfect uniform goods. We also make remarkably good base-ball bats.

Darrah Bros.
Sutton, Que,

PERFECTLY FLAT GLASS THAT WILL BREAK ON CUT

Have you looked forward to the day when you would be able to procure something better than the cylinder made window glass which is so full of defects?

Have you looked with regret at the growing pile of waste glass caused by uneven breaking under the diamond? Have you ever imagined a PERFECT glass,—one which would forever end your glass troubles?

Some dreams come true, and this is one of them. For we now, without hesitation, and without exaggeration, make this statement—that every sheet of Libbey Owens Flat-Drawn Glass is PERFECT.

Libbey Owens Flat Drawn Glass is Perfectly flat, perfectly annealed, perfectly uniform in thickness. It has a perfect cutting temper, and may be depended upon to break ON the cut. It will never fade; it has a natural fire finish, and is remarkably free from distortion. It puts an end, in one moment, to all your glass problems and difficulties.

You will want to read how this wonderful new flat-drawn glass is made. Send to-day for your copy of our beautifully illustrated descriptive booklet, "The Story of Libbey Owens Flat-Drawn Glass." It is yours for the asking.

Our magnificent new factory in Hamilton, Ontario, is proof of our knowledge of the reception which the retail trade of Canada will give to the first perfect sheet glass ever made in this country.

"There is no Flat-Drawn Glass but Libbey Owens"

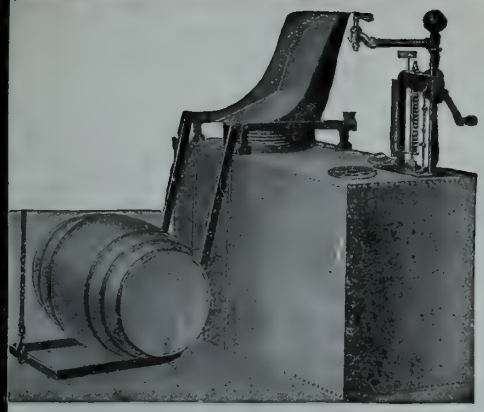
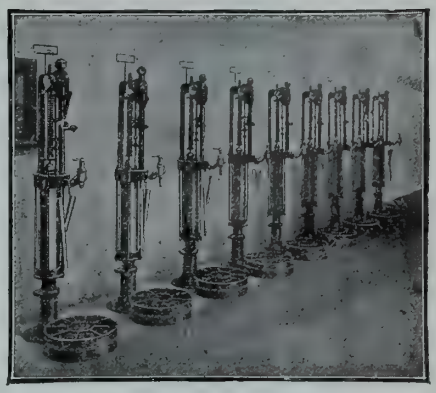
Paint Sales That Pay a Profit



One unit or as many as you want, in a compact row

You want a profit on every sale, and you should have it. But with the present high cost of paint oils you stand a big chance of losing your profits, unless your methods of handling are systematic and free from loss of time, labor and oils.



Pumps on Sales room Floor. Tanks in basement where ver convenient.

BOWSER ESTABLISHED 1885

Paint Oil Storage Systems

prevent paint oil losses. The pumps measure accurate quantities: no over measure, no leakage, no spilling, or evaporation. Everything is exact, systematic and saving. The sooner you install a Bowser System the sooner you will begin to reap the profits from proper storage equipment.

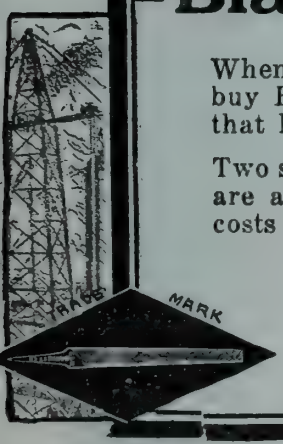
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.
Owned and Operated by Nicholson File Co.

When Writing to Advertisers Kindly Mention This Paper

Here is a real money-maker for dealers—"Comfort" Flat Iron — "Heats as It Irons."

Every housewife wants one. Spring-time is profit-time. We supply cuts of ads free and pay for first ad in your local newspaper.

Write your jobber

Do You Read These Advertisements?

Every advertisement in this magazine is worth reading. It is the product of some concern that is using a modern method of making sales, viz., technical paper advertising, in order to present most effectively to you the leading features of its line.

These advertisers are making it easier for you to buy intelligently with the least waste of your time and theirs. They realize that a sales force cannot replace this service at equal cost. They know that advertising is good business, for the manufacturer who does not advertise cannot save the cost of advertising. Consistent advertisers are progressive merchandisers. They are saving your money and their own; and it pays to do business with them.

Don't miss your opportunities. These advertisements are interesting. Many are distinctly instructive, and a glance through them every month will keep you posted on the latest developments for machinery equipment.

Have you any small needs?

Do you want to sell anything?

If so, advertise on this page and watch results.

It Pays to Read the Advertisements

The main thing an advertiser wants to do is to tell you plainly just how and why his goods are worthy of your consideration. You can learn a great deal from that alone, because many things you see advertised are the things you buy and use in your regular daily life. By reading advertisements you can learn the names and read descriptions of the things that are best and most satisfactory.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Sales Possibilities

For any hardware business, genuine Rainbow Packing represents a splendid source of profitable business because all steam engineers appreciate its worth. They know the better service it gives in keeping joints tight and in eliminating frequent shut-downs to re-gasket steam lines.

You do well to let every steam plant in your district —large or small—know that you sell genuine Rainbow Packing, and that you can supply their needs without loss of time.

But be sure you see the Diamond Rainbow Trademark on every yard. Your customers have learned to look for it. Genuine Rainbow is made in Canada. Get in touch with your jobber or write direct for interesting proposition to hardware dealers.

The Double Grip VICTOR

A modern game trap having all the VICTOR features **your** customers know so well, with the addition of the double jaws which grip high on the animal's leg, in two places, eliminating fur losses through twisting or gnawing out.

You can't afford to sell **your** customers inferior traps. Show them the "V" cut in every pan.

Oneida Community GAME TRAPS

Dominate the Market

Trappers look for the name ONEIDA COMMUNITY, LIMITED on every trap they buy because they know it has stood for the utmost dependability in Game Traps for over 70 years.

Oneida Community Game Traps dominate the market. The only selling needed is to keep them out in front where your customers can see them.

You can be proud to sell Oneida Community Traps because they can be relied on to do more than is expected of them.

The Fall trapping season is almost here!

Dealers Everywhere

have written us commenting on the repeat sales they have had with our new polish. Their customers always come back for more. We have received hundreds of such testimonials, which go to prove that once the housewife has tried Liquid Veneer Mop Polish, nothing else will do. The way it will renew any dusting mop, the wonderful manner in which it transforms dirty, dull, scratched floors, to their original beauty and finish, is a revelation.

LIQUID VENEER MOP POLISH

Goes Twice as Far

You can offer it to your trade with our strong money back guarantee. If it is not entirely satisfactory in every way, they may return what they do not use and you are authorized to refund the purchase price. We in turn, will reimburse you for any so returned.

Our big fall advertising campaign is greatly increasing the demand. Be sure you get your share of the handsome profits.

And don't forget the Liquid Veneer Mop, with the removable swab for washing, full yarn center, extra long, adjustable handle and many other exclusive features. It sells on sight.

Ask your Jobber or write us for full particulars regarding Liquid Veneer Products.

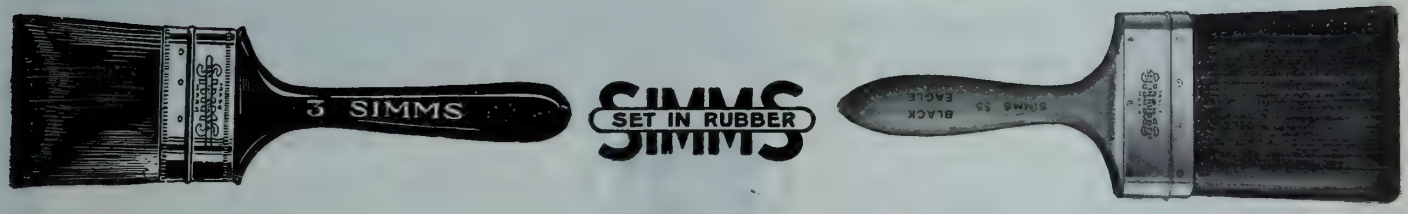
Bridgeburg, Ontario

'RICE LEWIS' NEWS

Brushes are most important in "Save the Surface and you save all" campaign



DURING the recent Canadian National Exhibition held in Toronto hundreds of thousands of Ontario people viewed the interesting brush exhibits in the Industrial Building. Of the several lines handsomely displayed none attracted more attention than Simms, with their neatly arranged booth showing the large variety of all kinds of brushes for domestic and industrial uses.

With the "Save the Surface" idea becoming deeper seated and Fall painting more in vogue because of the better weather conditions, lack of insects, etc., the hardware dealer should make a bid for paint, varnish and brush business right now.

Cash in on the desire created at the Canadian National Exhibition for Simms brushes by displaying them in your paint windows.

We carry Simms brushes in stock. Sort your styles and sizes now for Fall selling.

Rice Lewis & Son, Limited, Toronto

Introducing the PURITAN Oil Heater

SOME months ago we announced that we had obtained exclusive selling rights for Canada for Puritan Oil Stoves. We now take pleasure in announcing that we have just completed arrangements for sole selling rights in Canada for another of the famous Puritan Line --"The Puritan Oil Heater".

Every dealer realizes the absolute necessity of carrying in stock a good grade of Oil Heaters, as the demand for this modern form of heating is becoming greater every year.

Puritan Oil Heaters are safe and simple to operate and being light are easily carried from room to room.

Puritan Oil Heaters will find ready sales. They are the acme of perfection in construction, and are handsome in appearance. They mean the utmost of economy in oil consumption.

Made in one finish only—Black with Japanned Trimmings. Full information, prices, etc., may be obtained from your jobber or direct from us—any size order can be filled at once.

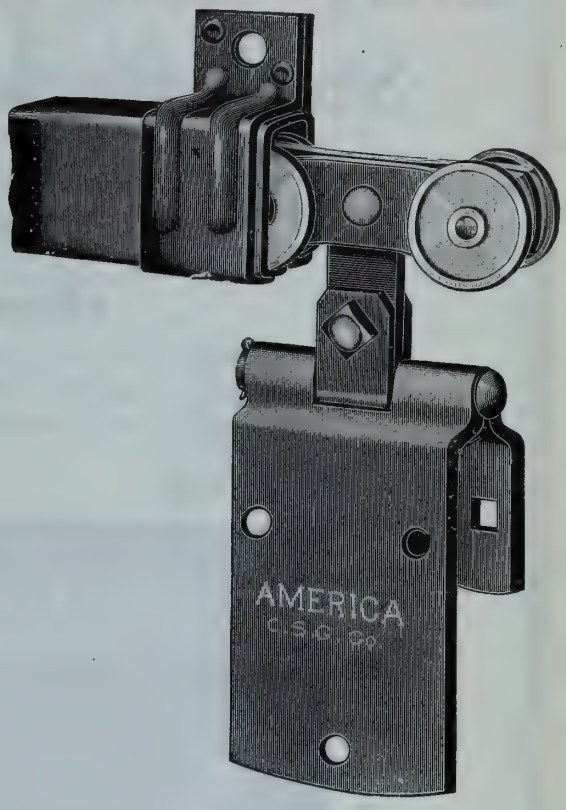
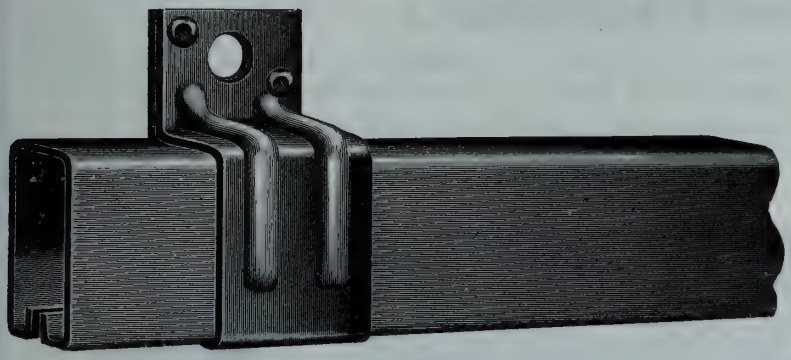
"America"

Trolley Hangers

The Dealers' Friend





Steel Trolley Track
The "America" operates in the Hatch Trolley track—the only track supported by the famous corrugated track brackets. These brackets are naturally, much stronger and better than ordinary plain track brackets.

The Largest Sales of any Trolley Hanger in the Dominion

If you are not now sharing in the sales of this "best seller" and others of the popular Canada Steel Goods Line, you are overlooking an opportunity for constant, profitable sales.

"America" is for warehouse, factory, garage and barn doors. It has tandem trucks, hardened roller bearings and an apron 6 in. long, 3¼ in. wide. This hanger appeals to customers because of the simple adjustments, anti-friction forged steel yokes and ability to stand hard usage.

Its popularity with consumers and its great demand are well founded—on merit.

With each pair of Hangers are included two End Caps, Bolts for Hangers and Lag Screws for Brackets.

Packed one pair in a box complete with Screws and Bolts.

Weight per dozen pairs, without Brackets, 95 pounds.

Make This Test Yourself

LAY a piece of Brantford Roofing (say 4 ft. Square) flat on boards. Throw a shovelful of blazing coals on it. Watch the results—here is what will happen:

1 The **coating** immediately below the coals will melt (as the asphalt blend we use will melt at approximately 250 degrees F.) —BUT the rest of the roofing will not ignite.

2 Gradually the asphalt **saturation** of the roofing will melt, leaving the felt base exposed to the heat—STILL the roofing will not ignite.

3 The **felt base** is now exposed to the heat and will char, or burn if the fire is hot enough, but the charred embers will not blow or carry fire—AND the roofing immediately surrounding the coals will not ignite.

4 When the fire has died out brush the burned-out embers gently aside and you will find that the wood below may have charred but it has not burned through.

Do you want anything more convincing that

Brantford Asphalt Roofing

is the material for your roof.

Here is what A. R. LePage, the well-known builder, of Toronto, says:—

"It might interest you to know that we put your Asphalt Slates to a very severe test on Saturday, June 4th, with the following results:

1 "Although the butts were burned off, they did not blow off the roof to carry fire, notwithstanding there was a very stiff wind blowing at the time.

2 "The Asphalt melted, and ran onto the ground, but did not carry any flame with it.

3 "Although the butts were entirely burned, the slates underneath were not burned, nor was the paper underneath even scorched.

"I may say that this test was made by putting two bags filled with shavings, and a lot of lumber on the roof, fastened in such a way that it could not be displaced until it was burned out in about forty minutes. Over all of this was poured two gallons of coal oil, which ran down through the fire onto the Slates of the roof.

"I feel quite sure that if these shingles are properly put on, according to the specifications supplied by your Company, that they will prove to be a good fire retardent."

See our dealer in your district.

have now become so popular that no up-to-date merchant can afford to be without them.

We are now making substantial shipments to all the leading jobbers throughout the Dominion and would urge every retailer to see that his clerks have them to offer when required.

Stainless steel is a boon to the housewife as it absolutely does away with the knife board or cleaning machine, yet is always clean and bright for the table.

After extensive experiments we have finally overcome the many technical difficulties in tempering and are now combining all the virtues of stainless steel with a wonderful cutting edge.

Attract Attention— Arouse Interest— Stimulate Desire

The Three Functions of a Good Display

The C.G.E. One-To-Two Plug, conforming to the C.G.E. Merchandising policy of packing wiring devices in individual and artistically labelled cartons, is meeting with an enthusiastic reception everywhere.

C.G.E. Wiring Devices, with their distinctive orange and blue labels, practically sell themselves. For example, by dressing your window with One-To-Two Plugs, you cannot help but develop an excellent display which will have its effect on your cash register. The striking design of the cartons showing the adaption of the plug to one or more of its many uses and the message that it makes "Two Plugs out of One" will attract attention—rouse interest and stimulate desire.

A supply of imprinted folders will be forwarded upon request.

Important Announcement

ASBESTONOS

BRAKE LINING

Made in Canada
from
Canadian Raw Materials

A Canadian Owned Company
for
Canadian Markets

It is made right in the centre of the principal world's supply of Asbestos—in the Eastern Townships of Quebec. Made under the most perfect conditions—it is a perfect brake lining, and its cost is the minimum.

The Asbestonos Company is an all Canadian Company, which has spared no effort or expense to produce a brake lining which is the best on the market. It has succeeded with ASBESTONOS.

The **wearing life** of ASBESTONOS can be depended upon. The best asbestos fibre produced in the Thetford district is used, and the yarn is interwoven with a double fibre brass wire to give it more strength. After the weaving operation it is thoroughly impregnated with a special compound which renders it impermeable to oils, grease, etc.

The policy of the Asbestonos Company will be to sell through legitimate trade channels. The selling arrangements will be taken care of by Messrs. Richardson & Bureau of Montreal, who are ready to quote prices for immediate deliveries and supply samples, both of the raw white and finished black products.

Asbestonos Company, East Broughton, Quebec.

Millers Falls

Auto Jack—No. 145

WE wanted a jack that would lift a 1½ ton truck. It must be simple in construction. It had to stand firmly on its base and take up little room in the tool box. Lastly, of course, it must measure up to the Millers Falls standard and be worthy of the Millers Falls guarantee.

Having thus decided, we made a jack to fit the specifications. We christened the new jack "No. 145" and put it through its paces. It performed right up to the handle. It had to, in order to win membership in the Millers Falls family of dependable tools. Every Millers Falls Auto Jack is severely tested before it leaves the factory. If one of our jacks fails to give satisfactory service, we replace it cheerfully.

This fine auto tool makes friends for you and for us, and the more friends we have, the more tools we are going to sell. How many jacks do you need, right now, to round out your stock?

For Accurate Fast— Cutting Efficiency Sell

Butterfield Reliable Tools

Butterfield tools cut fast and require less tool-makers' attention. They are accurate and will duplicate work with precision again and again. Because they are sharp, fast-cutting tools they reduce the amount of power consumed. In fact, every investigation of Butterfield Tools brings to light additional evidence to show that they definitely increase production in the shop or factory with a lower proportionate cost.

Butterfield Tools are made in wide variety. A Butterfield catalog will show you the wide range. Moreover, Butterfield's make special tools to order from suitable working drawings or from samples. Thus hardware dealers are able to turn any inquiry into an order.

SEAFOAM ELECTRIC

WASHING and WRINGING MACHINE

Unsurpassed washing principle —wooden dolley moving half way around and back forces the hot suds through the clothes and thoroughly washes them in a few minutes.

Cypress tub—nothing to corrode or tear clothes — keeps water hot.

Reversible wringer with highest grade rolls—will start, stop or reverse instantly. Controlled by lever conveniently placed at side of tub.

Safe to operate—as being belt driven the motor is protected against overloading. All gears and flywheel being covered the danger of accidents is removed. Safe for children to be around.

Simple in construction—does not easily get out of order.

Attractively and durably finished. Shipped complete ready to operate on ordinary house lighting service.

Also Supplied for Gasoline Engine Power

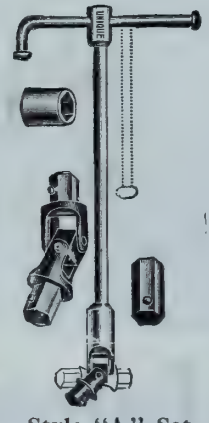
LANE'S UNIQUE TOOLS

Unique Universal Socket Wrench Set



Style "A" Set

Mechanics are ready buyers of Lane's New Wrench. They appreciate its utility. It may be used as a Universal Joint Wrench or an ordinary Tee Handle Socket Wrench. The sockets of Lane's small unique Ratchet Sets fit both the Joint and Adapter Pin of the New Unique Universal Wrench. It operates at any angle up to 45 degrees. The sliding handle permits using the wrench in close quarters. Style "A" Set.

MANUFACTURED BY

WILL B. LANE UNIQUE TOOL CO.

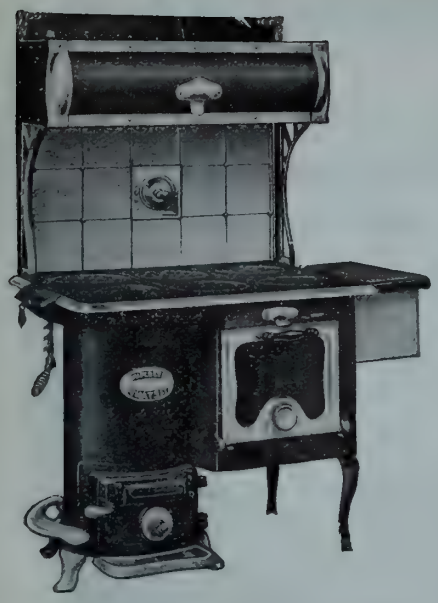
170 W. Randolph St., Chicago, Illinois

Quality Counts

If you sell merchandise that you can stand back of—this merchandise will in turn stand back of you. Which is another way of saying "quality counts."

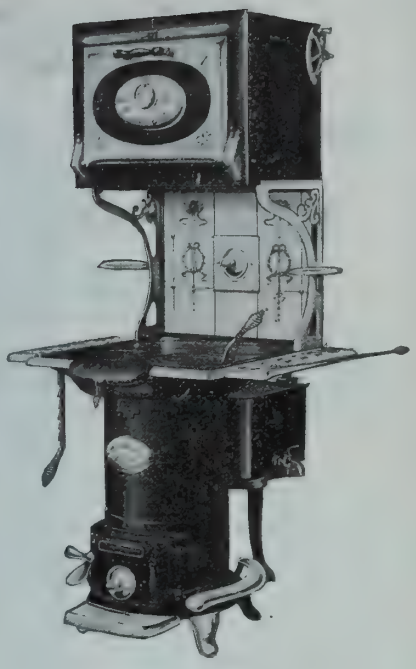
In heaters and ranges for instance, the dealer has the satisfaction of knowing when he sells the Maple Leaf line to his customers that there is nothing made that is better—that the stove will stand up and deliver satisfaction and comfort in big quantities without reserve.

Here are four of the "Quality Members" in the Maple Leaf line.



Maple Leaf "Thatsit"

A side-oven, 6-hole "Quebec" range that leaves nothing to be desired. The heat units are so controlled by the new undertop that the fire must pass under all six covers. The oven is 13¼ x 11½ x 20" deep with balanced spring type drop door, friction catch, non-heating handle and thermometer. It has a broiler lift and a pouch feed door. It can be fitted either with a hot water boiler or copper reservoir and with or without warming closet. This is a stove that is hard to beat.



Maple Leaf Composite

This range is unique—there is nothing like it on the market. There never will be, because of its patented flue system which makes the high oven possible. It is the peer of all "Quebec" heating, cooking and baking ranges. It occupies only a small floor space. It has all the modern attachments. It burns all kinds of fuel and every woman who buys one will help you sell others.

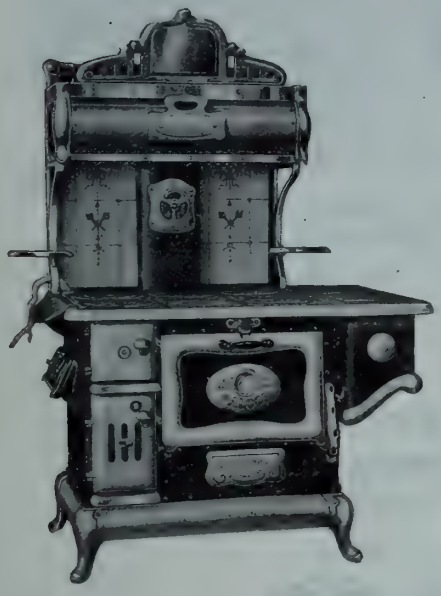
BEACH FOUNDRY

LIMITED

Head Office and Factory

OTTAWA - CAN.

Branches in Winnipeg and Vancouver.

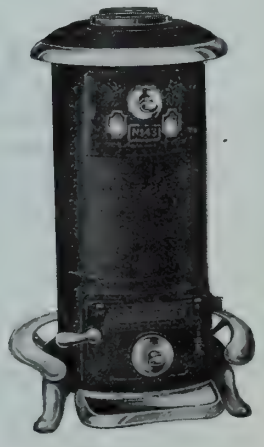


Maple Leaf Falcon

An aristocratic steel range that will back up every claim you can make for it. It is made in several handsome designs which makes it an ornament in any kitchen. It gives perfect satisfaction at all times. The Falcon is both a money-maker and a friend-maker for the dealer.

Dealers---

If your town has no Maple Leaf agency, better write us today.



Maple Leaf Quebec Heaters

There has never been a heat-making machine invented for this northern climate that excels in simplicity and efficiency the so-called "Quebec." It burns any and all kinds of fuel—consumes it completely—extracting every last heat unit. Maple Leaf "Quebecs" are made in many sizes and many designs—all of them are winners.

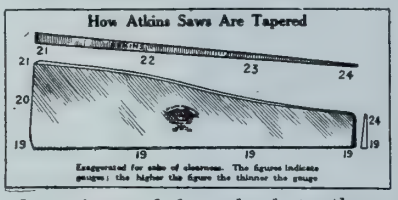
ATKINS

STERLING QUALITY SAWS

REASONS WHY YOU SHOULD SELL ATKINS STERLING QUALITY SAWS

Sterling Quality Steel is our exclusive formula, and the best saw steel made



Atkins Hand Saws are ground the two-way taper, that is, the cutting edge is the same thickness while the back tapers evenly from the handle to the point and from back to the cutting edge. See illustration.

Segment Grinding

Atkins Cross-Cut Saws are Segment Ground. This gives our saws clearance with very little set. The illustrations show the difference between Atkins process of SEGMENT GRINDING and the imitation.

The Imitation

Atkins Sterling Quality Steel receives our special process of Gas Tempering, which makes it tough and stiff, without being brittle. This is the reason why Atkins Saws will hold an edge longer.

Sell Atkins Saws and you will learn the meaning of "The Finest on Earth."

JARDINE TOOLS

This is a remarkably efficient machine that one man of medium weight can operate with ease on the heaviest work. It has the usual direct leverage for upsetting light to medium tires, and, in addition, a geared leverage that increases the power more than three to one for heavy tires and axles. The jaws are of tool steel, the teeth are machine cut and carefully tempered. This powerful machine upsets any tire up to four inches by one inch, and axles up to one and one-quarter inch.

Ask for catalogues.

Arrests Follow Metal Firm's Failure

Broad Dealings in Metals and Exchange by Defunct Firm of N. Brenner & Co., Ltd., Toronto, under Investigation—Officials Charged With Using Company's Assets for Personal Dealings and With Stealing $700,000 from the Company

WHAT will probably prove to be one of the most interesting court cases in the metal trade of Canada for some years, will be the trial of officials of the defunct firm of N. Brenner & Company, Toronto, the arrest of whom has just been made. This company, which dealt largely in metals and futures, failed in November of last year, since which time alleged investments in race horses, houses, automobiles etc., have indicated affluence which was not evident when the assignment was made.

The officials now under arrest include Nathan Brenner, President of the defunct firm; his son Meyer Brenner, vice-president of the company and Gordon Blackford bookkeeper. The first named has been released on bail of $50,000, Meyer Brenner, who was the active head of the organization is out on bail of $100,000 and the bookkeeper on $25,000 bail.

The arrests as ordered by the Crown Attorney on information sworn by unknown parties, were made in a rather dramatic manner by the Toronto police, Meyer Brenner having been arrested while driving home in his car following the afternoon's racing at Woodbine Park, Toronto, and his father being arrested while in a Turkish bath hotel. The charges on which the men were arrested are as follows:—

$700,000 Stolen

"That Nathan Brenner, Meyer Brenner and Gordon I. Blackford in the years 1918-1919 and 1920 at the city of Toronto, contrary to law, did conspire, combine, confederate and agree together and with other persons unknown by deceit or falsehood or other fraudulent means to defraud the public or any persons, firms or corporations who were or might become creditors of N. Brenner and Co. Ltd. by appropriating to their own use or to the use of some one or more of them, the assets of the said N. Brenner & Co., contrary to the criminal code.

"That Nathan Brenner, Meyer Brenner, and Gordon I. Blackford in the years 1918-1919 and 1920 at the city of Toronto did receive or retain in their possession $700,000 in money, the property of N. Brenner & Co. Ltd. and therefore stolen, they the said Nathan Brenner Meyer Brenner and Gordon I. Blackford then well knowing the same to have been stolen contrary to the criminal code.

"That Nathan Brenner, Meyer Brenner, and Gordon I. Blackford, in the years 1918-1919 and 1920 did contrary to law conspire, combine, confederate and agree together and with other persons unknown by deceit or falsehood or other fraudulent means to defraud N. Brenner & Co. by appropriating to the use of some one or more of them the assets of the said N. Brenner & Co. contrary to the criminal code.

"That Nathan Brenner and Meyer Brenner in the years 1918, 1919 and 1920, being directors or members of a body corporate, to wit N. Brenner & Co. Ltd. did unlawfully make or concur in making false entries or omit or concur in omitting to enter material particulars in books of account or other documents belonging to the said N. Brenner Ltd. contrary to the criminal code.

"That Nathan Brenner and Meyer Brenner in the years 1918, 1919 and 1920, being directors, managers or members of a body corporate, to wit, N. Brenner & Co., Ltd. with intent to defraud, did unlawfully destroy, alter, mutilate or falsify books, papers, writings or valuable securities belonging to the said N. Brenner & Co., Ltd contrary to the criminal code.

"That Nathan Brenner, Meyer Brenner and Gordon I. Blackford in the years 1918, 1919 and 1920 did steal $700,000 in money, the property of N. Brenner & Co. Ltd. contrary to the criminal code.

The charges against the bookkeeper, concerning the handling of the books, are as follows:

"That Gordon I. Blackford in the years 1918, 1919 and 1920 did

Canadian Wholesale Hardware Association in Annual Convention

General Sir Arthur Currie Deals with Plans of Universities For More Practical Education on Business Topics—T. M. Birkett, Ottawa, Elected President for 1921-22—Confidence in Business Future of Canada—Value of Trade Papers Emphasized.

THE Annual Banquet of the Canadian Wholesale Hardware Association, following the conclusion of the Annual Convention held at Montreal, was attended by about 150 prominent

COLONEL ROBERT STARKE, of Starke, Seybold Co., Montreal, Retiring President of the Canadian Wholesale Hardware Association.

wholesalers, manufacturers and trade representatives. The guest of honor was General Sir Arthur Currie of McGill University, and former Commander-in-Chief of the Canadian Overseas Forces. Good music, songs, and a splendid dinner combined with a splendid spirt of good fellowship which prevailed, provided a happy evening's entertainment for the representatives of the Canadian Hardware trade.

During the convention groups of representatives from the various branches of the trade held conferences with the Canadian Wholesalers Association.

At the election of officers, T. M. Birkett of Thomas Birkett and Sons Company Limited, Ottawa, was elected president of the Canadian Wholesale Hardware Association succeeding Colonel Robert Starke, of Starke Seybold Company, Montreal, S. Rae of D. H. Howden and Company, London, Ontario, was elected vice president.

The executive committee was elected as follows: Geo. C. Davis, Frothingham and Workman, Ltd., Montreal; Hector Prudhomme, A. Prudhomme and Fils, Montreal; S. R. Kennedy, Kennedy Hardware Co., Ltd., Toronto; W. J. Lawson, Rice Lewis and Son Company, Limited, Toronto; J. Mac. D. Wilson, Chinic Hardware Co., Quebec, Que.; James Hardy, James Hardy & Son, secretary-treasurer.

The banquet held at the Windsor Hotel was presided over by Colonel Robert Starke of Starke Seybold and Company, Limited, Montreal, retiring President. The banquet was one of the most pleasant of the large number of happy affairs of this kind which have been conducted by the Canadian Wholesale Hardware Association.

All present entered heartily into the singing and particularly singing contests held between the various tables. Many complimentary remarks were heard regarding the address of General Sir Arthur Currie. Colonel Robert Starke spoke of the great pleasure which it gave the Canadian Wholesale Hardware Association to entertain their friends each year and to gather together in good fellowship. He also voiced the appreciation of the Wholesalers Association to General Sir Arthur Currie, the guest of honor, and also C. W. Asbury of Philadelphia, for their attendance and addresses.

S. RAE of D. H. Howden N Co., London, Ont, elected Vice-President of the Canadian Wholesale Hardware Association.

T. M. BIRKETT of Thomas Birkett & Sons Co., Ltd., Ottawa, Ont., who was elected President of the Canadian Wholesale Hardware Ass'n. for 1921-22.

General Currie's address to the gathering was as follows:—

"When my good friend, and your much respected companionable confrere Col. Robert Starke, asked me to join you in this banquet tonight I gladly assented, gladly because I enjoy the association with men who represent such a large force in the business life of Canada, and yet I hesitated when he intimated that I would be expected to speak to you, for though you may not think so, I always have a great diffidence concerning my own ability to say anything of interest. I know an after dinner speaker is expected to be amusing and entertaining, and yet so few of them are. Did you ever hear of an edict in vogue in China more than two thousand years ago? We often suspect the Chinese of being backward and out of date, but from time to time, things come to light which prove that in some things their practices or customs were much in advance of ours. This edict made it a crime punishable by death for anyone to attempt an after dinner speech. Rather a sensible edict wasn't it and one worthy of adoption?

"Let me in the first place associate

JAMES HARDY of James Hardy & Son, Toronto, Secretary-Treasurer of the Canadian Wholesale Hardware Association.

myself with all Montrealers in giving you a welcome to our city, and in this connection I shall not infict upon you the rather stale suggestion that Montreal claims as its very own rather exclusive attractions as a convention city. We have many temporary visitors,—no, I did not say temperate—yet such is the charm of the city, such its magnetism, that many of those visitors return to make this their home. Personally, I have been very glad that Fate has decreed that probably the greater part of the life I have yet to live will be spent here, though I confess, a warm spot is still kept in my heart for the great west and the cities by the sun-kissed Pacific. I hold it a great privilege to have such an intimate connection with the great McGill University—our city's pride and an institution of proud traditions and national worth and value.

May I say a word about the University, claiming, as I do, that there is much of common concern between the activities of the university and those of the industrial world with which you have such close and daily association. During recent years universities have enlarged their views of their functions and have realized that they have more direct duties and responsibilities to the community than was formerly felt.

GENERAL SIR ARTHUR CURRIE Dean of McGill University and formerly Commander-in-Chief of Canada's Overseas Forces who was Guest of Honor at the annual convention of the Canadian Wholesale Hardware Association in Montreal.

John Henry Newman in his lectures on "The Ideals of a University" limited its scope to "the diffusion and extension of knowledge" and left to other academies "scientific and philosophical discovery." He defined university training as "the great ordinary means to a great, but ordinary end; it aims at raising the intellectual tone of Society, of cultivating the public mind, at purifying the national taste, at supplying the true principles to popular enthusiasm and fixed aim to popular aspiration, at giving enlargement and sobriety to the ideas of the age, at facilitating the exercise of political power, and refining the intercourse of private life."

The university yet seeks to discharge those functions, "still endeavours to raise the intellectual tone of Society," to "cultivate the public mind, to purify the national taste" but it does not now leave to other academies "scientific and philosophical discovery."

John Stuart Mill once told the University of St. Andrew's that "A University is not a place of professional education" and an equally famous man, a university man, once said "let industry have the brains it wants, get them trained how it wants and where it chooses—any where but here."

All that is changed and rightly so. The university still remains the nursery

HECTOR PRUDHOMME, of A. Prudhomme & Fils Ltd., Montreal, who was elected to the Executive Committee of the Canadian Wholesale Hardware Ass'n. for 1921-22.

W. J. LAWSON, Rice Lewis & Son Co. Ltd., Toronto, elected to the Executive Committee of the Canadian Wholesale Hardware Ass'n. for 1921-22.

S. R. KENNEDY, Kennedy Hardware Co., Ltd., Toronto, elected to the Executive Committee of the Canadian Wholesale Hardware Ass'n. for 1921-22.

of ideals, the home of thought, visions, motives, the world of inspirations but it is linked up more closely and with mutual advantage to the world of facts, deeds, actions and methods—the industrial world. It has realized that these two worlds are but the two halves of existence, that no life can be complete and perfect which does not combine them into a beautiful and profitable harmony. The evolution of Society and its welfare has demanded that we bring these two worlds together, for neither can achieve its full purpose without the other. The university as it formerly stood was only half life. The industrial world was imperfect and incomplete. Every step that has brought them into closer and more effective relations has served the best interests of humanity.

S. H. ALEXANDER, Wood, Alexander & James, Hamilton, Ont., who attended the annual convention of the Canadian Wholesale Hardware Ass'n. in Montreal.

I could dwell for many minutes on the progress and the development of the process of drawing the university and the business world together. Much has been done and much remains to be done. But I desire, before resuming my seat, to make brief reference to one activity of McGill which has appealed and will, I believe, continue to appeal to the business world of Canada. I refer to our School of Commerce.

The Technological departments have won their place and are becoming increasingly useful and valuable. It would be a difficult task to estimate the contribution they have made to the country and to the increase of the wealth of the world. Our Science departments have taught us how to extract the highest possible good from the resources of the world, and in the process to make life endurable and, if possible, pleasant to the maximum number of people. They have taught us how to avoid waste and extravagance, in production, distribution and use. And in this process of extracting Nature's wealth they have taught us how the operation could be conducted with such a margin of economy as would deplete as little as possible the heritage which it is our duty to conserve for our children's sake.

It is a regrettable fact that in the use of every kind of resource, animal, vegetable and mineral, man has been woefully extravagant, partly through thoughtlessness but mainly through ignorance. Mines, water power, oil lands, soils, forests. even the fishes of the sea, have been or are being exhausted and left derelict, in most cases long before they need have been. But science is improving this state of things—surely a task not unworthy of the great and greatest universities.

The science graduates of our universities are the men best trained to lead our industries forward in the direction of higher efficiency, smoother working and increased production. You will agree with me in that.

But we have gone a step farther than the engineering and physical science studies and have set up a department of commercial studies and have provided a curriculum which embraces cultural subjects as well as utilitarian subjects. Let me say, with all emphasis, that, in my opinion, the idea which was at the back of the general cultural doctrine is one of permanent and fundamental value. That doctrine aimed at training the judgment, at reducing a subject to principles, at storing the reason with ideas, the memory with history, but rather left it to chance, if indeed it considered the matter at all, that utility would somehow or other emerge as a by-product. In our commercial course we do not neglect mental culture, mental discipline or mental enlargement, but we aim more directly at utility.

Naturally "Economics" form a large part of the course, not merely the abstract principles of economics which leave you supended in mid-air as it were, but the economics which establish a visible relation to actual business life. We recognize that the economics taught must be more concrete, more descriptive, more statistical and more historical than was formerly given in the old time Arts course. The teaching must come to close quarters with the actual structure of existing economic organization, and deal with the direct question of business success, efficiency and profit making. Business is intensely interesting and presents to men of intelligence a series of problems, to which the University does not pretend to offer a golden key, but which we do endeavour to train our young men to visualize and analyze.

G. C. DAVIS, Frothingham & Workman Ltd., Montreal, elected to the Executive Committee of the Canadian Wholesale Hardware Ass'n.

I daresay we have as yet a tendency to lecture too much about banking and currency and the money market because they are conventionally economic subjects, but Montreal is, we claim, the financial centre of the Dominion and these subjects cannot be neglected. Yet they should not be over-stressed. This is a merchandising centre, a manufacturing centre, even an agricultural centre, and the economics of the needs thus arising are of surpassing interest.

GEORGE CAVERHILL, Caverhill Learmont & Co., Montreal, who attended the annual convention of the Canadian Wholesale Hardware Ass'n. in Montreal. He predicted better times for the Canadian hardawre trade in the near future.

Closely associated with the economic courses are those of Accounting and Accountancy. The latter receives considerable attention because many students after graduation desire to become members of the Chartered Accountants' Association. Accounting is an important subject. It is the understanding of the rationale of accounts, something which all business men should possess. It is another avenue of approach to the questions of Reserves, Depreciation, Costing, Overhead Charges etc., about which the student has heard something in the Economic courses.

Commercial Law is another course, embracing, as it does, relations between employer and employee, law of limited liability capitalization, and all of what we might call industrial law. Modern Languages, French and Spanish in particular—is another course. It is un-

necessary to dwell on the importance of this. French is not only the diplomatic language, but more than one fourth of the people of Canada speak little else. Furthermore, our trade with France is large and increasing as is our trade with the West Indies and South America, where so much Spanish is spoken. You will all appreciate the value of the Modern Language course, because you know how important it is for a business man to have the ability to speak and write and understand the language of those with whom he does business. He is, moreover, better qualified to keep in touch with business conditions in foreign

A. PRUDHOMME, A. Prudhomme & Fils Ltd., Montreal, who attended the annual convention of the Canadian Wholesale Hardware Ass'n in Montreal and extended greetings on behalf of the French Canadian wholesale hardware firms to the delegates.

countries, if he can read the Trade journals published in those countries. And a business man who does not read and study trade journals is "sleeping at the switch".

While giving a course in Modern Languages we do not neglect our own. I believe if Canadian education fails in anything today, it fails in that our English language is not sufficiently mastered by the majority of the students of our schools.

Special attention is given to Mathematics also, but I have detained you much too long already. I wanted you to know that McGill gave a course of Commercial Studies quite thorough and practical. We try to serve the needs of the business man, as well as all other classes in the community and country. We believe that no institution in the State can be so potent a factor in helping in the solution of the problems confronting the country, in assisting in the development and conservation of our resources, in aiding in the organizing of the industries of our land, in guiding and stimulating the thinking of our people, as the university, and for your

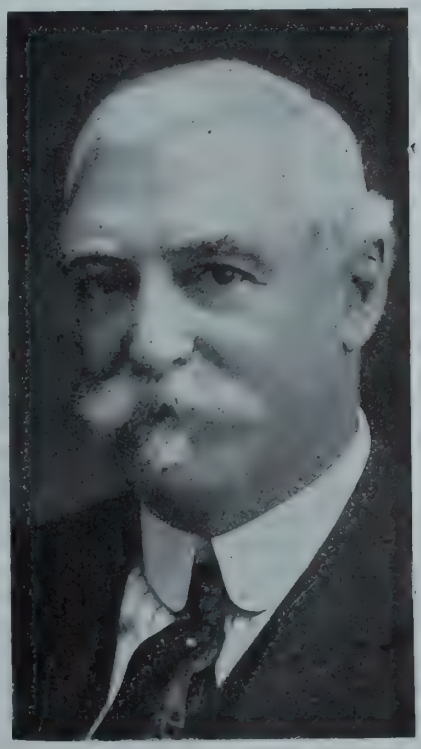
support and practical sympathy we confidently appeal."

C. W. Asbury of Enterprise Manufacturing Company Philadelphia was referred to by Colonel Starke as a man who has served the United States in connection with various duties undertaken on the Government's behalf in connection with the war. Mr. Asbury who has had an opportunity of visiting the war-devastated countries paid a most fitting tribute to the Canadians who served and fell in the Great War. On behalf of the United States Hardware Manufacturers and Wholesalers Mr. Asbury also extended an invitation to Canadian Hardware men to attend the big annual convention to be held in Atlantic City, October 17, to 22.

Robert Hobson, President of the Steel Company of Canada Limited, in a brief



ROBERT HOBSON, President of The Steel Company of Canada Ltd., Hamilton, Ont.

address expressed the opinion that the corner has been turned and that business is now on the up grade. Mr. Hobson expressed the opinion that business would experience its ups and downs in the months to come and that there would be temporary reverses and interruptions, but nevertheless in his opinion there was a very strong improved tendency, which would likely show continued improvement. Greater efficiency, more work, and lower wages are vital neces-

COLONEL A. F. HATCH. Canada Steel Goods Co., Ltd., Hamilton, Ont., who in addressing the annual convention of the Canadian Wholesale Hardware Ass'n. warned his hearers of the dangers of free trade and the distribution of Bolshevik literature.

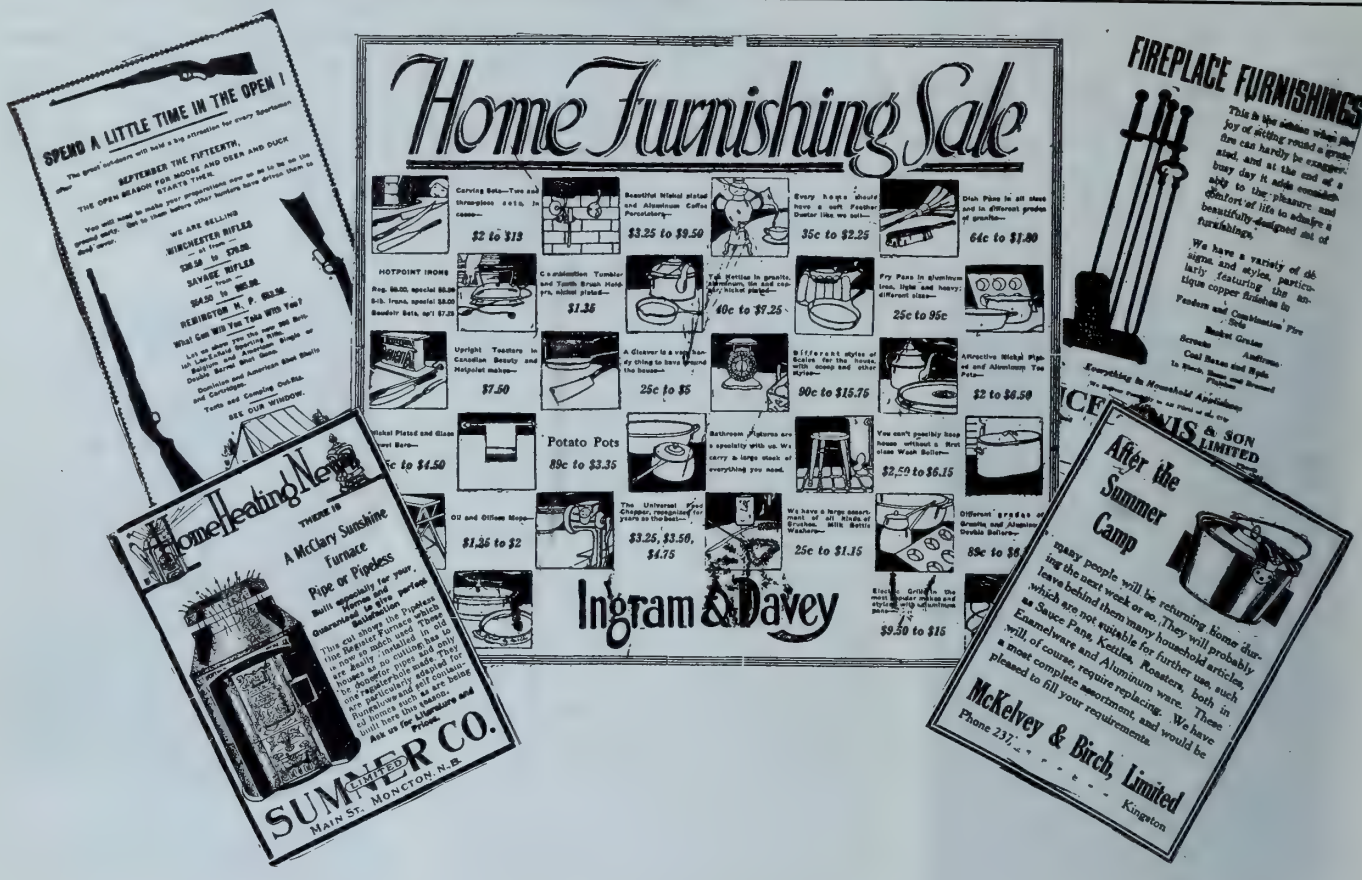
sities at the present time in order to assist in bringing business back to normal. Freight rates and taxes plus extravagance in some quarters, are items which are having a very direct bearing upon costs of all kinds at the present time and are responsible for the so-called high prices on many lines. Iron and steel prices were liable to show advances at any time. Mr. Hobson stated that in view of freight, labor, taxes and other costs, iron and steel could not continue on the present low price level.

Colonel Arthur Hatch, Canada Steel Goods Limited, Hamilton was called on by Colonel Starke to tell a story. The story has been suppressed by the censor, but it caused uproarious laughter in which Mr. Robert Hobson the victim joined heartily. Mr. Hatch in a brief address warned his hearers of the dangers of free trade, the distribution of Bolshevik literature and the underhand workings of a number of organizations which are constantly trying to foment trouble in Canada.

A. Prudhomme of A. Prudhomme and Fils was asked to extend greetings on behalf of the French Canadian Wholesale Hardware Firms. Mr. Prudhomme expressed the great pleasure which it gave the French Canadian **Hardware**

(Continued on page 59)

Advertising Fall Hardware Lines



AMONG the lines of hardware which will require some publicity at this season of the year are Fall housecleaning and housefurnishing lines,hunting and otherFall sporting requirements, stoves, furnaces, fireplace furnishings, preserving utensils, washing machines and accessories, electrical goods, paints, varnishes, lanterns, etc. Many of these lines can form the subject of effective advertising copy providing they are handled to best advantage and an early start will help bring results. A study of various local uses for the articles to be advertised will also increase the effectiveness of the "copy."

In the layout of ads shown herewith there is one dealing with hunting requirements. The Fall hunting season is now under way and the Sumner Co., Moncton, N.B.,suggest that the reader "Spend a little time in the open." It points out that the great outdoors will hold a big attraction for every sportsman when the hunting season for various animals is open. The ad continues, "You will need to make your preparations now so as to be on the ground early. Get them before other hunters have driven them to deep cover." At the foot of the ad are the words "See our window," a statement which helps increase the value of window displays and reults in a bigger turnover of the line dealt with.

An ad by the same firm dealing with furnaces bears the heading "Home Heating News" under which all ads dealing with furnaces etc., appear. This ad states "The cut shows the pipeless one register furnace which is now so much used.These are easily installed in old houses as no cutting has to be done for pipes and only one register hole made. They are particularly adapted for bungalows and self contained homes such as are being built here this season. Ask us for literature and prices."

....

A large number of home furnishing lines are dealt with in the ad by Ingram & Davey, Ltd., St. Thomas, Ont., which is drawn up on checker-board plan. Carving sets, electrical goods, ironing boards, bathroom fittings, utensils, weighing machines, mops, etc., are illustrated and briefly described, with prices shown prominently on each. This ad was used in connection with a special sale of home furnishing lines.

With the approach of colder weather a number of heating accessories at once become seasonable. There is the oil heater and the portable electric heater to take the chill off the rooms during the Fall days and evenings, and the fireplace will also come in for considerable use at this season. The ad by Rice, Lewis & Son, Ltd., Toronto, dealing with fireplace furnishings, states: "This is the season when the joy of sitting round a grate fire can hardly be exaggerated and at the end of a busy day it adds considerably to the pleasure and comfort of life to admire a beautifully designed set of furnishings. We have a variety of designs and styles, particularly featuring the antique copper finishes in fenders and combination fire sets, basket grates, screens, andirons, coal boxes and hods, etc."

The preserving season is still active and due attention can be given this phase of kitchen and utensil trade. Washing machines and accessories come in for some share of publicity at this time of year because in the colder weather the washing becomes much heavier. Blankets and heavy underwear take the place of sheets and the light underwear of summer and the amount of energy required to handle the fall and winter washing is many times that of the summer washing. The housewife will therefore be a good prospect for the purchase of a washing machine at this season of the year. In planning the advertising do not neglect to address some of the arguments to the husband as well because he generally has to be convinced too before the machine can be purchased.

Attention to the various uses for these Fall lines will provide the merchant and the salesman with many effective arguments and suggestions which can be made to produce good returns if used to best advantage. Careful attention to the preparation of "copy" for the ads is an important part of such selling effort.

Realistic Display Attracts Fall Hunters

For realistic arrangement it is doubtful if any line of hardware lends itself as well to display as hunting and other Fall sporting requirements. The above display shows a real knowledge, on the part of the window dressers, of what the average camp of the big game hunter appears like. The tent, fire, utensils, weapons, clothing, etc., are all in their most natural location, just as if the camp was out in the wilds. Perhaps the most unusual feature of the display is the close proximity of the big game sought after, though probably this happens frequently when the hunters are away from camp. Such realistic displays help a great deal to stimulate local interest and secure the attention of those interested in Fall hunting.

THANK YOU

Hardware and Metal has received a number of compliments in connection with the recent publication of the 33rd Annual Fall Number. These complimentary remarks are highly appreciated, particularly in view of the important interests from where they have been forthcoming. The following complimentary paragraph is reprinted from the "Savannah Weekly Naval Stores Review and Journal of Trade" of Savannah, Georgia, U.S.A., a trade paper of foremost authority;—

"A JOURNAL WHOSE SPECIAL NUMBERS ARE FULL OF MERIT AND ATTRACTIVENESS"

"There is not a trade paper that comes to The Review office, or which we have the pleasure of seeing, that excels in the beauty and merit of its special issues "Hardware and Metal," the well-known Canadian journal, published at Toronto, and dealing with not only the commodities its title indicates, but naval stores, oils, etc. as well. Always attractive and interesting this popular journal every now and then favors its readers with a volume that from the standpoint of completeness, value of matter contained, reaches the very highest standard. Its latest special effort is its 33rd Annual Fall Number, a book of 322 pages, replete with trade information and what is of equal interest, trade advertisements that are gems of typography and effective publicity. The interested trades of the Dominion are to be congratulated on having so progressive a public spokesman as "Hardware and Metal."

MANITOBA'S HEMP CROP WILL BE LARGE THIS YEAR

Winnipeg—The hemp crop of Manitoba for 1921, the first year that it has been cultivated extensively, will be large, according to a local company under whose direction individual farmers in the Province seed and grow the hemp. Five hundred tons of fibre will be realized, it is estimated.

INSURANCE OF PARCEL POST

On and after the 1st of October, 1921, parcels posted in Canada, for delivery within Canada, which conform to Parcel Post regulations, may be accepted for insurance up to $100 against loss, rifling or damage while in the custody of the Canadian Postal Service.

The scale of insurance fees will be as follows:

3 cents for insurance not exceeding $5.00.

6 cents for insurance exceeding $25.00. $25.00.

12 cents for insurance exceeding and not exceeding $50.00.

30 cents for insurance exceeding $50 and not exceeding $100.

The insurance fee is to be paid by means of postage stamps affixed to the parcel by the sender.

Parcels for insurance should not be dropped into a box or receiver but should be handed in at the Post Office or to a carrier. A receipt will be given the sender, which must be produced in case of a claim being made.

Registration of Parcel Post will be discontinued on October 1st, the system of insurance taking its place.

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member [illegible]

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

SATURDAY, OCTOBER 1, 1921

ANOTHER increase in prices of certain manufactured cotton goods this week, being the second in the last two weeks, increases interest in the movements of the primary cotton market as outlined fully in a recent issue of Hardware and Metal, at which time predictions of firmer prices of these lines was made.

FORTY-FIVE hardware merchants in thirty Ontario towns were asked what percentage of their total trade was with farmers. An enumeration of the answers indicates that a total of 35 out of those asked had 50% or over of their trade with farmers—a mean average of 62.11% farm trade. This indicates the importance of hardware merchants in towns studying the special requirements of the farm trade.

MUCH unemployment relief should be afforded by the decision of the Department of Railways and Canals to proceed with railway repair work. Not only will this give employment to workers in the railway shops but the placing of orders for steel, comprising rails, repairs and other equipment, which has been authorized, should aid considerably in stimulating mill industry in Canada.

Movement of Copper

IT is being rumored as a possibility that copper may be the next commodity to follow the recent upward turn in cotton. On the other hand such reports may be the work of manipulators. At any rate the present position of copper is interesting. It is estimated that 40,000,000 pounds of copper were marketed in August in America and the forecast has been made that the sale in September will be 60,000,000 pounds. That would reduce the accumulation of copper by 100,000,000 pounds in two months, and would soon necessitate the reopening of refineries. The disposition of copper is largely governed by the extent of general construction and a maintenance of the recent increase in this direction may bring about a renewal of activity in this metal.

No Need to Worry Yet

NEW Customs regulations governing the marking of imports, though postponed in becoming effective from October 1 to December 31, have already brought forth a storm of protest from importers, due to the apparent difficulties of complying with the regulations. The idea of giving purchasers reliable information as to the origin of merchandise is a thought to be unnecessarily onerous. The difficulties in marking imports of iron, metals, etc., are said to be great. The future enforcement of these regulations is, however, somewhat doubtful due to the fact that the matter may be made an issue at the forthcoming general election, so there is yet some time before importers need worry over the matter.

Education and Industry

THE great need for education of a more practical nature has long been realized by business men as something necessary in order to adequately cope with the increasing business problems of the age. In this connection it is interesting to note the statements made by General Sir Arthur Currie, of McGill University, and formerly Commander-in-Chief of the Canadian Overseas Forces, to the effect that during recent years universities have enlarged their view of their functions and have realized that they have more direct duties and responsibilities to the community than was formerly felt. This statement was made in an address to the members of the Canadian Wholesale Hardware Association gathered in convention, and the indication of closer relations between the activities of the university and those of the industrial world received hearty approval. There is no doubt but that there is much of common concern between the great interests of industry on the one hand and education on the other, and with the perplexing problems of big business constantly before the industrial leaders of this age too much importance cannot be attached to the practical education of those who will follow along to take up the burdens of leadership. Already the advantages of certain practical courses introduced as faculties of our various universities and high schools has been felt in the business world and this is evidence of the widespread advantage to accrue from a still wider application of the plan.

Looking the Facts in the Face

THERE are times when perhaps it is well that the edges of our enthusiasms should be dulled and we should take stock of actual condition. We have heard much of Canada's wonderful development. Yet the census figures are rather an indication that we have been talking rather than doing, in this connection. We have heard much also of Canada's wonderful resources and yet the actual facts are at times somewhat disappointing.

At the convention of the Canadian Institute of Mining and Metallurgy at Edmonton, Dr. John McLeish, assistant director of the geological survey, Ottawa, said:

"It must come as a shock to many to realize that Canada is importing minerals greater than her total mineral production, and that at the present time we are dependent on outside sources for fifty per cent, of our coal supply, while in iron we are supplying but five per cent. of our own needs, and in petroleum less than that proportion."

Perhaps no country in the world can look to the future with greater confidence than Canada yet looking to the future good one, but the provisions for carrying it into effect are and idling in the present will not win national success and prosperity in such a period as that upon which the world is now entering. For both settlers and capital we must compete with other prosperous countries also with great potentialities, and we must be prepared to get down to work and place our agricultural and manufactured products in the markets of the world at a price which will bring orders.

Like every other prosperous nation, Canada must produce those commodities which she can produce to the best advantage, in order to sell them in the world's markets at a price which will enable her to buy the goods and materials which she does not produce—and represent a surplus which will enable us to carry the financial burdens which the war has left us.

Methods of Marking Hardware Imports

Not Sufficient to Attach Tags to Imports of Hardware Capable of Being Stamped Without Injury—Name and Address of Maker Not Sufficient

IN view of the fact that the recent regulations governing the marking of imports, will probably be enforced in three months, according to present plans, some details concerning the regulations governing the marking of certain hardware lines is of interest. Hardware and Metal has communicated with R. R. Farrow, Commissioner of Customs and Excise, who advises that articles such as screw drivers, hammers, nail pullers, etc.. which are capable of being marked without injury, so as to indicate the country of origin, will necessarily be so marked after the regulations are effective. It was stated that it will not be sufficient to use a label or tag giving this information. It was further pointed out that the name and address of a manufacturing company is not in itself a sufficient indication of the country of origin. This indication is required to be specific.

The regulations provide that all goods imported into Canada which are capable of being marked, stamped or labelled without injury, shall be marked, stamped, branded or labelled in legible English or French words in a conspicuous place that shall not be covered or obscured by any subsequent attachments or arrangements, so as to indicate the country of origin. Such marking is to be as nearly indelible and permanent as the nature of the goods will permit. Imports which do not comply with these regulations will be subject to an additional duty of ten per cent. ad valorem and will not be released from Customs until so marked.

The regulations will not become effective until December 31, 1921, according to the recent amendment to the Act. Full particulars will be outlined in Hardware and Metal prior to the regulations being made effective.

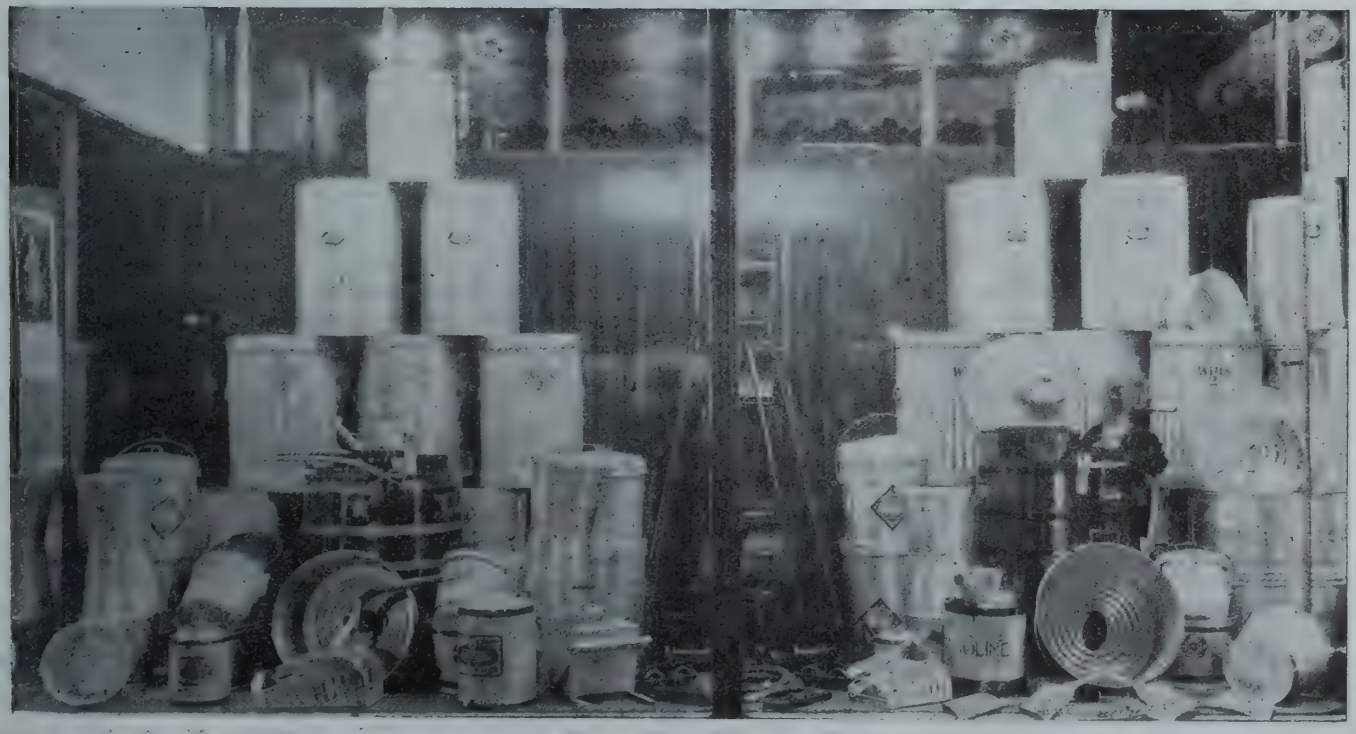
HARDWARE FIRMS AT OTTAWA EXHIBITION

Ottawa, Ont.,—The Central Canada Exhibition this year proved a gratifying success from every angle. From the moment of the opening, throngs passed into the grounds. The Pageant of Progress parade was an outstanding feature of the official opening and in this parade the hardware and metal goods were in evidence W. A. Rankin Limited, took part in this parade. Under the grand stand a new place had been found for the Stove Show while Automobile Accessories and trucks were to be found in the old location in the Howick Annex. In this section the display of automobile hardware by A. Workman, Limited, Sparks Street was notable. A. J. Freiman, Rideau Street, was showing kitchen hardware in the Main Building while aluminum ware was on view in the Pure Food Show. One local firm capitalized by advertising "If you see anything in hardware at the Exhibition, remember we SELL it, come and give us your order."

OTTAWA BUILDING INCREASES IN ACTIVITY

Ottawa, Ont.—A big increase in Ottawa building during the month of September is reflected by the building permits which have been issued this month. To date there have been 68 permits granted, as against 45 for the corresponding period in 1920. The estimated value of the work for which permits have been granted is $380,000, as against $312,255 for September last year an increase of over $68,000.

Furnace Time Will Soon Be Here



Furnace time will soon be here again and many utensils such as are shown in this display will be in demand. Ash cans, coal scuttles, pails, ash sifters, wash tubs, etc., are good lines to feature at this time along with other lines shown, such as carpet sweepers, brushes, etc., for Fall house cleaning.

Events in the Trade

BUSINESS CHANGES

Ottawa Ont.,—Announcement is made of the amalgamation of two hardware and electrical firms of Ottawa, namely, the Currier-Jeffrey Co., and the N. W. McKnight Co. The united company will be known as the Currier-Jeffrey-McKnight Company. The headquarters of the new company are at 126 Queen St.

NEW FIRMS

Toronto, Ont.—Waller Bros. are commencing hardware business at St. Clair and Greenlaw Ave.

OBITUARY

Ottawa, Ont.—D. Gosselin, hardware merchant, is dead.

John S. Irvin, for some years connected with the Canada and Portland Cement Companies, died recently in Toronto.

Brockville, Ont.—After an illness of several months, John M. Gill, for many years associated with the James Smart Manufacturing Company as its President and General Manager, and one of the most prominent residents of Brockville, is dead.

Henry Munderloh, president of Munderloh & Co., Montreal, general importers, including hardware lines, died in Burlington, Vt. Owing to ill health Mr. Munderloh has not taken an active part in business in the past few years.

Ottawa, Ont.—Alexander Fleck, president of the Alex. Fleck Limited, Vulcan Iron Works, Ottawa, is dead. The late Mr. Fleck was born in Montreal 64 years ago and was associated with his father in foundry business. After some time in Galt and Montreal, he returned to Ottawa and with Thomas Stewart bought out his father running the business as Stewart and Fleck. Later he bought out his partner and has been president of the limited company for some years.

PERSONAL

N. C. Baiden, has now assumed the position of manager in the Toronto head office of Lyons & Marks, wholesale hardware specialties. Mr. Baiden has been associated with the sales staff for the past 12 years, and now succeeds to the poition vacated by Mr. Folger.

Savage Arms Corporation has just announced the affilliation of, A. H. Meyerhoff with their New York Executive Offices as Special Representative.

MONTREAL NEWS

Chas. Mott, Canadian Manager, Shell Company of Canada, Limited, was in Quebec city this week to meet Mrs. Mott on her arrival from England. Mr. and Mrs. Mott will make their future home in Montreal.

Commencing next week, E. Bureau, of Richardson and Bureau, Montreal, will spend three weeks calling on the jobbing trade throughout the Maritime provinces.

J. H. Conover, general-manager, and Tom Houghton, sales-manager, The Martin-Senour Co,. Ltd., are leaving next week for the Maritime provinces to visit the Halifax branch and other centres.

J. T. CROWDER
merchant of Vancouver, B.C., elected president of the British Columbia Board of the R.M.A. of Canada.

D. Brewer of Adcock & Brewer, Montreal, is at present calling on the jobbing trade in the Western provinces. Mr. Brewer will be away from his Montreal office until the middle of October.

Edward Goodwill, vice-president of Thos. Davidson Manufacturing Co., Ltd., Montreal, has returned after spending the past three months out of the city owing to ill health. Mr. Goodwill is feeling much better, but is not yet able to resume his complete duties and is at present only spending a few hours at his desk each day.

A. Pinette of Pinette & Jerry, hardware merchants on St. Hubert St., Montreal, joined the benedicts this week. Mr. and Mrs. Pinette are spending their honeymoon trip in New York and Atlantic City.

W. A. C. Hamilton of the Consumers' Cordage Co., Montreal, left this week for a month's business trip through the Western provinces to the coast.

E. Pilou, formerly of Lewis Bros., Limited, has been appointed sales-manager of the National Farming Machinery Co., Ltd., Montmagny Station, Quebec.

J. W. Grant has joined the sales force of Lewis Bros., Limited, and will call on the Gaspe coast trade, the territory for merly covered by E. Pilou.

INCORPORATIONS

Tilt-Lok Steering Wheels Ltd., has been incorporated in Ontario with head office in Toronto, and capital of $200,000 to manufacture automobile accessories.

Bluebird Sales Ltd. has been incorporated in Ontario with head office in Toronto and capital of $40,000 to manufacture and deal in electrical goods.

Feldspar Glass Ltd. has been incorporated in Ontario with head office in Bowmanville and capital of $1,000,000 to handle ores, metals and minerals. Provisional Directors are W. T. Symons, S. Snowden, W. H. Densem, H. R. Bricker and E. S. Wilson.

The Rexhide Leather Products Ltd. has been incorporated for the Dominion with head office in Hamilton, Ont. and capital of $50,000 to manufacture and deal in mill supplies and manufacturers' supplies generally including al eather and metal goods.

WESTERN CANADA NOTES

St. Walburg, Sask. — The hardware store of Lea Jeannette has been sold to Mr. A. Cooper of Yellow Grass. Mr. Cooper will take possession about the third day of November.

RUMOR FORD MAY BUY DOMINION FOUNDRY CO.

Hamilton,—It is rumored that Henry Ford is negotiating for the purchase of the Dominion Steel Foundry Co., Ltd.

MANUFACTURING BRASS TRAYS

Hamilton Gas Mantle Co., Hamilton, are now manufacturing a line of brass ash trays.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

PRICE recessions on wrought iron products, coupled with further increases in manufactured cotton goods, are primary events in the current hardware markets. A new list, No. 53, is now effective on wrought iron and steel piping. Lower price levels are noted on wrought nipples and couplings, also wrought iron washers. A further reduction in wire nail base price attracts attention, while lower quotations are given on sash weights, lantern globes, galvanized shingles, steel ceilings, and stocks and dies.

Manufacturers of agricultural implements have announced price reductions varying between 15 and 25 per cent. Revised quotations also affect closet combinations, bowls and tanks. Easier prices for 1922 bookings are given on ice cream freezers and baseball goods.

The advance in such manufactured cotton products as twines, sash cord, candle wick and clothes lines, further reflect the recent gains on the raw cotton markets. The gain in Fall business is being held, with an improved movement in seasonable lines, especially stoves and furnaces, firearms and ammunition .

MONTREAL MARKETS

MONTREAL, September 29.—The market reports are again featured by revisions in many important hardware lines this week. Revisions are both to higher and lower levels, but the featured change is the price decline on wrought iron and steel pipe. Pipe fittings are also generally revised to lower prices. Another important reduction, to those interested, is on galvanized shingles, siding, crimps, tiles, roofing, and culverts. These lines are now quoted about 10 per cent. less. All kinds of hammers are also lowered approximately 10 per cent., and pipe stocks and dies have new lower prices through a change in discounts. Wrought washers will now sell at less 60 per cent., the former discount being less 50; while drivewell points have new lower net prices. For next season's supplies, the prices on both garden hose and ice cream freezers are announced, and in each case the prices are considerably lower.

NEW LOWER PIPE LIST

Montreal.

Through the issuing of a new list on piping, wrought iron and steel pipe are again reduced in price. The amount of reduction varies on the different sizes, but from 3 to 6 points is approximate. This adjustment adds another revision to the long list of changes since the beginning of the year, wrought pipe having undergone more price lowerings than almost any other line of iron and steel products. It also comes at a time when other commodities in its line are showing a slight firming from the easier tone of the past months.

SASH CORD AGAIN ADVANCES

Montreal.

The continued strength of the cotton markets, and the higher cost of raw material have again advanced the prices on sash cord. New quotations are two cents higher than formerly, and are as follows:

SASH CORD—	Per lb.
No. 6	0 59
No. 7	0 58
8 to 12	0 57

HIGHER PRICES ON COTTON CLOTHES LINES

Montreal.

Cotton clothes lines also come under the advancing market on cotton goods, and are this week again quoted higher as follows:

CLOTHES LINES—	Per doz.
30 ft.	$2 20
40 feet.	2 70
48 feet	3 25
60 ft.	4 05

FURTHER INCREASED PRICES ON WRAPPING TWINES

Montreal.

Further increased prices are also announced on wrapping twines this week. Revised quotations show another advance of two cents per pound, and new prices are the following:

COTTON TWINE—	Per lb.
3-ply, in balls	0 44
4 ply, in balls	0 47
3 ply, in cones	0 42

CANDLEWICK PRICE INCREASED 3 CENTS POUND

Montreal.

New prices announced on candlewick show a further price increase of 3 cents per pound, and present quotation is 53 cents.

COTTON ROPE VERY FIRM

Montreal.

Quotations on cotton rope remain unchanged this week, while almost all other lines of cotton goods show further price increases to those announced two weeks ago. The market is very firm however, and another advance in these prices would not be surprising in the near future.

SCRAP MARKET VERY DULL

Montreal.

There seems little improvement forthcoming in the waste material market, at least not up to the present. Dealers report a dull condition, neither buying nor selling showing much activity. A reported improvement in steel markets is now causing some interest, and if this continues, dealers have every hope that a reflection will be cast on the scrap metals. Quotations continue at former nominal figures as follows:

WASTE MATERIALS—	
Automobile tires	0 75
Rubber shoes	0 02½
Yellow brass	0 05
Red brass	0 08½
Light brass	0 04
Scrap zinc	0 03 to 0 03½
Lead, heavy	0 04
Lead, tea	0 02½
Light copper	0 07¾
Heavy copper	0 10½
Wrought iron, R.Rd.,No.1 per gr. ton	10 50
Malleable scrap (ton)	10 50
Pipe scrap (ton)	7 00
Heavy melting steel	7 50 to 8 00
No. 2 busheling	4 00
Boiler plate	8 00
No. 1 machinery cast	20 00

CORRUGATED SHEETS REMAIN AT RECENT DECLINE

Montreal

The current quotations on corrugated sheets remain at the lower levels given last week. Through the revising of these quotations from time to time,

these sheets have been gradually reduced in price until at present they are well down in line with the plain sheet quotations. It would seem now that a fairly steady market prevails, as a slight advance has been made in outside markets on the plain iron sheets.

It is yet early to determine whether the new lower prices will result in an improvement in the movement, but, owing to the season now advancing, it is thought little increased sales will result. On the whole, however, the situation is quite satisfactory and the Fall is expected to return a fair amount of business. Following are the present list prices and discounts:

Corrugated—

No. 28 gauge	$7 00
No. 26 gauge	7 50
No. 24 gauge	10 50
No. 22 gauge	12 50
No. 20 gauge	14 00
No. 18 gauge	18 50

Less 7½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

STOVES AND HEATERS NOW ON ACTIVE MARKET

Montreal.

Stoves and heaters are now entering the active Fall season. Shipments are being forwarded from the local warehouses, and while sales are not as heavy as last year at this time, they are quite satisfactory. One local manufacturer stated to HARDWARE AND METAL that since the different exhibitions and Fall fairs commenced, increased activity has been noted. These seem to prove more beneficial each year, many sales to consumers being made as well as a great help with dealer trade.

There seems little liklihood at present of a further price change in any lines. The last revision is taking care of present productive costs and it is worthy of note that a slight increase is made on raw materials on the American market. This will not, in all probability, have any direct effect on the situation here for the present, but it leaves the chances of a further revision to lower levels more remote.

GALVANIZED SHINGLES REDUCED IN PRICE

Montreal.

A new price list, effective September 20th, is issued by the manufacturers of galvanized shingles, siding, crimps, tiles, roofing, culverts, etc., showing a reduction in all lines of approximately 10 per cent. The announcing of these new lower prices brings current quotations to a level corresponding with the plain galvanized iron, which has shown reduced figures in the past few weeks. The future trend of these products depends almost entirely on the sheet market, a revision of which in either direction will reflect on the situation of the finished product.

COAL OIL ADVANCES ONE CENT

Montreal.

The current quotation on coal oil has been increased one cent and is now quoted at 19½ cents per gallon. Gasoline prices remain unchanged at 31 and 34 cents.

RANGE BOILERS PRICES ARE UNCHANGED

Montreal.

Although a new list on range boilers would not be surprising—in the hope of causing a settlement on the local market—there is at present no indication of such appearing. For some time past the re-sale prices on boilers have shown a material variation among the different jobbing houses, and it is the opinion of the manufacturers that if a new price basis was established, prices would again become uniform. However, the market has improved in recent weeks, and whether new prices are forthcoming or not, it is expected an agreement will soon be reached among the dealers.

A REVISION IN FITTING QUOTATIONS

Montreal.

Practically all kinds of pipe fitting are this week revised to lower prices through the increasing of discounts. In most cases the discounts have been increased 2½ per cent, although nipples and couplings have been increased 5 per cent on all sizes. These are issued on the new pipe list in effect this week. Pound goods, which are quoted at net prices, show a reduction of approximately 10 per cent on the three classes, while Dart unions remain unchanged. Sales of pipe fittings are fair, the sorting movement continuing in small but numerous orders. Following are revised prices:

PIPE FITTINGS—

Cast iron fittings	20 per cent	
Bushings, cast	27½ per cent.	
Do., malleable	30 per cent.	
Flanges	37½ per cent.	
Plugs	27* per cent.	
Flange unions	22½ per cent.	
Malleable unions	42½ per cent.	
Dart unions, black	29 per cent.	
Do., galvanized	8 per cent.	
Nipples, ⅛ to 4 in. close and short	50 per cent.	
Do., long	60 per cent.	
Do., 4½ to 8″ close and short	40 per cent.	
Do., long	50 per cent.	
Couplings, 4″ and under	30 per cent.	
Do., 4½ inch and longer	10 per cent.	
POUND GOODS—	Black.	Galv.
Class A	0 53	0 6
Class B	0 20½	0 28¼
Class C	0 14	0 21½

HAMMER PRICES REDUCED 10 PER CENT

Montreal.

The various manufacturers of hammers announce a reduction of approximately 10 per cent on their lines. This price decline is effective on machinist, riveting, tinners', sledge and nail hammers.

NEW PRICES ON ICE CREAM FREEZERS

Montreal

The new prices for next year are announced on ice cream freezers. At time of going to press the new net prices were not available, but a substantial reduction has been made on all sizes.

BOILER TUBES STILL ON DULL MARKET

Montreal.

There is little, if any, improvement in the movement of boiler tubes, the smaller sizes constituting what little business that is to be obtained. The following list of prices are more or less nominal, as the various dealers are quoting to obtain the business, especially if the order is of any size. A further general lowering of prices on all sizes would have little stimulating effect, but a general improvement in steel products is thought to be the only factor in improving the sale of tubes. Following are the figures given on the various sizes:

BOILER TUBES—

1 inch	25 00	....
1¼ inch	26 00	....
1½ inch	25 00	....
1¾ inch	28 25	27 00
2 inch	27 80	23 00
2¼ inch	31 35	26 00
2* inch	39 65	28 00
3 inch	46 80	33 00
3½ inch	60 35	41 00
4 inch	81 00	51 75

LEAD PRODUCT PRICES HOLD

Montreal

Quotations on the different lines of lead products continue unchanged, with the tone of the market practically the same as last week. Prices are stated to be well down to bottom in accordance with metals on the primary markets, and a revision to higher prices is more in line than a further decrease, dependent on metals in the ingot stage. These quotations have remained steady for the past few weeks, previous to which reductions were frequently made. Following are present prices:

LEAD PIPE—

Lead pipe	0 12½
Lead waste	0 13½

Note.—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10 per cent. off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Do., 3 to 3½ lbs., sq. ft., lb.	0 10¼
Do., 4 to 8 lbs.	0 09½

Cut sheets ¼c lb extra and cut sheets to size. ¾c lb. extra.

Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 35
Zinc, sheets, casks	0 11½
Do., broken lots	0 12

STOCKS AND DIES AT LOWER PRICES

Montreal

Through a change in discounts, the net prices on pipe stocks and dies have been reduced. Present discount is 22½ per cent off.

NEW PRICES ON DRIVEWELL POINTS

Montreal.

A reduction has been made in the prices of drivewell points, and 1¼ inch is now quoted at $17.00 dozen; 1½ inch, $27.00.

WROUGHT WASHERS NOW 60 PER CENT OFF

Montreal.

Wrought iron washers have been reduced in price by the discount being changed to 60 per cent off list prices. Former discount was 50 per cent. Broken lots are now quoted less 55 per cent.

NEXT YEAR'S HOSE PRICES ANNOUNCED

Montreal.

Quotations for next year's garden hose are now announced, showing sub-

stantial reduction from the prices of this year. New prices on corrugated and plain are as follows:

GARDEN HOSE—	½-inch.	¾-inch.
3-ply	$ 9 75	$13 00
4-ply	11 00	14 50
Corrugated	16 00	21 00

Corrugated less 5 per cent. for full rolls of 500 feet.

SHEET QUOTATIONS UNCHANGED: MARKET FIRMER

Montreal.

While the quotations on the various lines of sheets are unchanged, the market is now somewhat firmer. The recent announcement of higher quotations by some of the United States mills has caused more interest to be shown on the local market. This is a marked change from the trend of the sheet market since the beginning of the year when prices have been frequently revised to lower levels until to-day they are considered at the bottom when present day productive costs are considered. Local importers and dealers generally are carefully watching the market and it would not be surprising if prices were slightly increased in the near future. This would apply to the American galvanized and black sheets more than other kinds.

Tin plate, terne plate and Canada plates continue to sell well and importers of Welsh plates are now experiencing some difficulty in bringing in supplies owing to delayed shipments. These sheets have sold well this season considering they were off the market during war years.

SLIGHT IMPROVEMENT IN IRON AND STEEL

Montreal.

Current sales locally on iron and steel are reported slightly more numerous than in the summer months. This is expected at this season and a continued improvement is looked for. The market as a whole can be said to have shown improvement in recent weeks as both consumption and production have been slightly increased. As in the sheet market, prices on bars are considerably well down to bottom prices, and while there is no sign of an increase in quotations, it is felt by some who are well informed that the next revision will be in the nature of an advance.

INGOT METALS ARE STEADIER

Montreal.

The general tone of the ingot metal markets is fairly steady and while there is no marked change in prices, the feeling is, if anything, somewhat better than has been ruling recently. Consumers are showing slightly more interest, and it is hoped the present improvement will continue.

TIN—Tin remains steady on the London market and is quoted higher than last week, although with the large stocks available, no great advance can be expected. Local price remains at 34½ cents.

COPPER—London ruled slightly higher this week, with New York steady at 12¼ cents for electro. There are no special features of interest but the market generally is in a steady condition, and there is no sign of any weakness. Locally casting is firmer at 16¾ cents, with electro at 17 cents.

LEAD—The London market continues irregular with no special trend in either direction. but the American market is firmer. There is no marked change looked for and the local market is steady at 6½ cents.

SPELTER—East St. Louis has stiffened appreciably during the past week with spot now quoted at $4.30 as compared with $4.15. London is also stronger and the market generally has a firm tone. Local price is unchanged at 7½ cents.

ANTIMONY—Cables from China indicate a firmer tone there which is reflected to some extent in New York, although stocks there are still quite ample. Local market remains at 7½ cents for Chinese, 8½ cents for high grade English.

ALUMINUM—Aluminum is quiet with little movement and little interest shown. Present quotation is 29 cents.

TORONTO MARKETS

TORONTO, September 29.—Price readjustments to both higher and lower levels are again important features in the current hardware market reports. The higher quotations chiefly affect manufactured cotton goods, such as cotton and seine twines, cotton clothes lines, sash cord, and candle wick. Marked reductions in quotations are noted on wrought iron and steel piping, wrought nipples and couplings, wire nails, sash weights, Ruby lantern globes, wrought iron washers, galvanized shingles, and steel ceilings, both miscellaneous and standard plates.

Revised prices are also in effect on closet combinations, bowls and tanks, while reductions are announced by the manufacturers on agricultural implements. Ice cream freezers and baseball goods for the season of 1922 also have lower price levels.

The gradual improvement in general business which has been recorded since early in the month, is being held. Fall sales are good in many seasonable lines, especially rifles and shot guns, cartridges and shells.

FURTHER ADVANCE OF 2 CENTS PER LB. IN SASH CORD PRICES

Toronto.

Higher prices again rule on hercules sash cord, the current readjustment in quotations showing another increase of 2 cents per lb. This change brings the prevailing prices to 59 cents per lb. for No. 6; 58 cents per lb. for No. 7; and 57 cents per lb. for No. 8. These revisions are contained in the current market quotation pages.

COTTON TWINE PRICES AGAIN HIGHER

Toronto.

Further increases are announced this week in prices on cotton wrapping twines. The revised quotations show an advance of from 2 to 3 cents per lb., and the current change brings the cost of 3-ply twine in the 5-lb. sack to 47 cents per lb., and increases the price on the 4-ply, in cones, to 45 cents per lb. The revisions are also shown on the current market pages.

CLOTHES LINES COST MORE

Toronto.

In conjunction with the current price advances on manufactured cotton goods the quotations on cotton clothes lines are also increased, according to announces recently received.

The new advanced quotations on cotton clothes lines are as follows.

40 feet	$2.80 per doz.
48 feet	$3.35 per doz.
60 feet	$4.20 per doz.

COTTON WASTE PRICES FIRM

Toronto.

While prices on cotton wastes are at present unchanged, and locally are holding at the levels which became effective in June, some price advances have been made in southern waste markets, and a firm tone exists in cotton generally. The higher price of the raw material, coupled with the recent advances in prices on manufactured cotton goods, has developed the strong undercurrent in wastes. However, dealers state that if cotton wastes were locally in steady or increased demand, prices would undoubtedly have advanced. There is however, no wish on the part of dealers to retard what business is now evident in wastes by higher quotations; but based on the present cost of raw cotton, advanced prices on wastes will likely be in order as soon as present stocks are consumed.

The Aluminium Ware

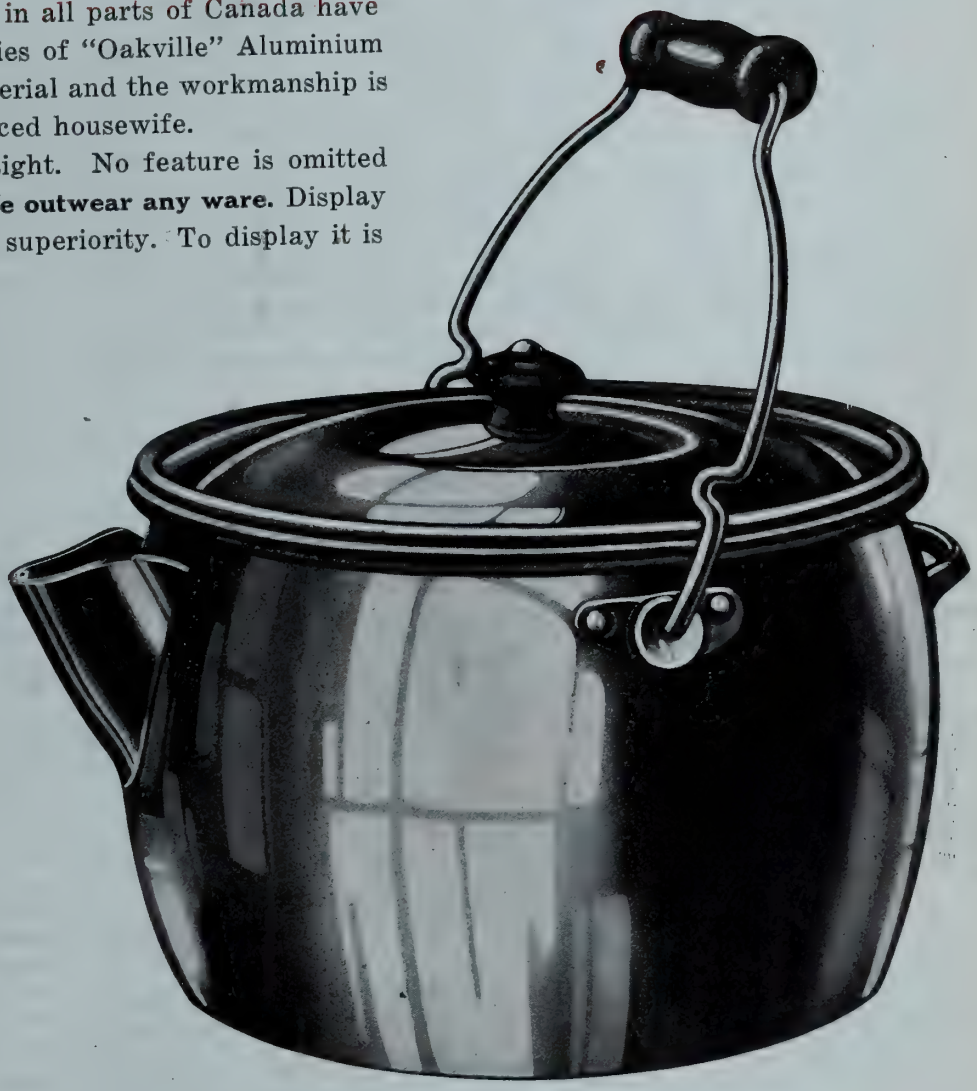
RICHARDSON & BUREAU, MONTREAL, *Agents*

on Aluminium Ware

Dependability

Hundreds of hardware dealers in all parts of Canada have proved the sales-getting qualities of "Oakville" Aluminium Ware. The quality of the material and the workmanship is evident even to the inexperienced housewife.

The patterns appeal at first sight. No feature is omitted that **will make "Oakville" ware outwear any ware.** Display "Oakville" ware and prove its superiority. To display it is to sell it.



The New Potato Pot

This new "Oakville" potato and vegetable pot has the welded spout. Each spout is fitted with strainer which facilitates straining without loss of contents.

The lock-tite handle holds the lid on during the straining operation. Does not fall down the side, thus preventing heating. Made of heavy gauge metal.

CORRECT LAWN MOWER PRICES

Toronto.

Through the transposition of lines giving the new prices on lawn mowers, in a recent issue of Hardware and Metal, some quotations appeared inaccurate. Following are the corrected prices:

LAWN MOWERS—

Comet, 3 blades—	
14 inch, each	8 05
16 inch, each	8 95
King, 4 blades—	
16 inch, each	10 20
18 inch, each	10 80
Victor, 4 blades—	
14 inch, each	11 75
Above prices net.	
Thousand Island, 5 blades—	
16 inch, each	10 25
Red Wing, 4 blades—	
14 inch, each	9 60

HACK SAW BLADES LOWER

Toronto.

A 10 per cent reduction in prices on the Victor line of hack saw blades have been announced by the manufacturers.

PRICES LOWERED ON WROUGHT NIPPLES AND COUPLINGS

Toronto.

In conjunction with the recent change in prices on piping, the quotations on wrought iron nipples and couplings are also revised, The change is in the nature of a reduction, and varies approximately between 7½ and 10 per cent. on the different sizes, five points being added to the discount figures. Malleable B and C class fittings, now have revised quotations, and the discounts on malleable and cast bushings, and also plugs are changed. Following are current quotations on pipe fittings generally:

PIPE FITTINGS—

Cast iron fittings	20 per cent.
Plugs, cast iron	25 per cent.
Do., solid	25 per cent.
Do., countersunk	25 per cent.
Bushings, mall.	27½ per cent.
Bushings, cast	30 per cent.
Unions ¼ in. to 2 in.	40 per cent.
Unions, ⅛ in., 2½ to 4 in.	40 per cent.
Flanged Unions	20 per cent.
Dart unions, blk., ¼ to 2 in.	29 per cent.
Do., ⅛ in., 2* to 4 ins.	40 per cent.
Do., galvd., add to black	30 per cent.
Nipples, blk., and galvd., ⅛ to 4 in.	
close and short	50 per cent.
Do., 4½ in. and larger	40 per cent.
Do., long, ⅛ in. to 4 in.	60 per cent.
Do., 4 in. and larger	50 per cent.
Do., running thread	30 per cent.
Couplings, 4 in. and under	30 per cent.
Do., 4½ in. and larger	10 per cent.

MALLEABLE FITTINGS—

	Black	Galvanized
Class A	0 58	0 72
Class B	0 22	0 31
Class C	0 14¼	0 22

FAIR MOVEMENT IN EAVESTROUGH

Toronto.

The current movement of eavestrough conductor pipe and conductor elbows is reported to be well up to last year's volume, and is generally now more satisfactory. The nature and proportion of all building activity has been reflected in this improved demand for eavestrough and pipe, while the recent price lowering on these products, is considered to have had a stimulating and encouraging effect towards home improvement and erection. Following are the unchanged discount quotations:

TROUGH (Eave)—

O. G. Square Bead and half round. Size in girth:

	Per 100 ft.
8 in.	15 90
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50

Less 60—10 per cent.

PIPE (Conductor)

Plain, round or corrugated.

	Per 100 ft. in 10 ft. lengths.
2 in., in 10 ft. lengths, list	18 40
3 in. in 10 ft. lengths, list	22 80
4 in. in 10 ft. lengths, list	29 60
5 in. in 10 ft. lengths, list	40 00
6 in. in 10 ft. lengths, list	49 00

Less 60—10 per cent.

ELBOWS (Conductor)

2 inch, list	5 25
3 inch. list	6 00
4 inch. list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 55 per cent.

CEMENT SALES IMPROVE

Toronto.

The recent improvement in the volume of home building and other seasonable construction work, has been reflected in the demand for concrete. While sales are reported to have recently attained a more active stage, stocks in the hands of cement manufacturers are described as ample. Production of this building commodity has been well up to the average this season, but the lower prices recently announced, have had some effect in stimulating current building activity. Following are the prevailing local quotations:

Cement—

	Toronto.
Car load lots	
Per barrel	4 00
Less Car lots	
Per barrel, f.o.b. yard	4 75
Per barrel, delivered	5 00

Single bags, $1 25 each: 4 bags to barrel.
Extra charge of $1 50 per load on less than 24 bag lots.
Rebate of 20 cents for empty bags.

ANOTHER LIST WITH LOWER PRICES ON PIPING

Toronto.

A new pipe list has now been issued, thus superseding No. 52, of July 11. The revised table, No. 53, dates from Sept. 22, and shows a reduction of approximately 7½ to 10 per cent. in the prices on wrought iron piping. Recent easier market tones in steel products generally, have extended to tubular goods, and the current revision supplies a change in the downward direction, which is said to be based upon some slight reductions in cost levels, coupled with the irregular demands for piping which has been more or less noticeable all through the season. The general movement is more pronounced in the smaller sizes, a factor which is featured indirectly in these prevailing revisions, as a higher percentage of price reduction is given on the larger sizes.

GALVANIZED SHINGLES NOW $9.00 PER SQUARE

Toronto.

Galvanized shingles have been reduced in price and are now selling at $9.00 per square, according to a recent announcement by the manufacturers. This quotation is subject to the usual discount of 7½ per cent.

REVISED LOWER PRICES GIVEN ON STEEL CEILINGS

Toronto.

Price reductions are also announced by the makers on steel ceilings. These are now listed at $6.00 per square for

standard plates, and $7.00 per square for miscellaneous plates. The customary discount of 10 per cent. is still maintained.

LOWER PRICES ON LAMPS

Toronto.

A new price list showing revised lower quotations has now been issued by the Dalyte Electric Limited, covering their lines of nitrogen and tungsten lamps; also street series and gas-filled lamps.

WIRE NAIL BASE NOW DOWN TO $4.00 PER KEG

Toronto.

A further reduction has now been made in the base price of wire nails, the current decline of another 15 cents bringing the local quotation to $4 per keg. This is the second recession in prices on wire nals recorded durng the past two weeks, the general stuation indicating some unsettlement in market centres.

REVISED PRICES ON CLOSET COMBINATIONS, TANKS, AND BOWLS

Toronto.

An increase in the prices on closet combinations, and some reductions in quotations on closet tanks and bowls, constitutes one of the feature price revisions on the current markets. The lower price levels recently existing on the standard combination closet outfits is stated as having been too low when compared with production costs, and any slight unsettlement which may have developed between jobbing houses because of this factor, is expected to be eliminated through the prevailing readjustment.

The movement in these products is described as fair, and following are the revised quotations:

	each
CLOSET COMBINATIONS, low down	
Closet, standard outfit, oak	28 00
Do., with post hinge seat	28 75
Do., mahogany Vitro or Pussyfoot, with mahogany post hinge seat and cover	31 00
Do., vitreous china, with oak post hinge seat and cover	31 55
Do., vitreous china, with mahogany post hinge seat and cover	31 75
Do., white, Vitro or Pussyfoot, with oak post hinge seat and cover	31 55
Do., white vitre or pussyfoot, with mahogany post hinge seat and cover	31 75
Do., enamelled iron tank with oak post hinge seat and cover	31 55
Do., enamelled iron tank with mahogany post hinge seat and cover	31 75
Additions or reductions to above	
Add for reversible trap bowl	1 25
Add for syphon jet bowl	7 00
For ¾ in. valve on supply pipe	1 50
Deduct for supply pipe	0 70
Deduct for floor flange and bolts	0 80
CLOSET BOWLS—	
Washdown bowl, less spud	10 00
Reversible trap bowl, less spud	11 25
Syphon jet bowl, less spud	17 00
"Richelieu" bowl	10 50
CLOSET TANKS, low down	
Oak, Vitro or pussyfoot tank with fittings, less seat	13 10
White Vitro or Pussyfoot tank with fittings, flush elbow and supply	15 25
Vitreous china tank with fittings, flush elbow and supply	18 00
Enamelled iron tank with fittings, flush elbow and supply	20 25
CLOSET SEATS—	
Oak wood strip seat and cover	3 70
Oak post hinge seat and cover	4 75
Mahogany finish post hinge seat and cover	5 00

HOPE FOR IMPROVEMENT IN SCRAP MARKET

Toronto.

A slightly better tone has recently developed in the scrap markets, but no expansion in buying by consuming interests has been recorded with the steel mills and foundries now operating more actively, dealers in waste now entertain the opinion that some gradual improvement is likely in the future. The following averages of dealers' buying prices for large quantities, f.o.b. Toronto, are more or less nominal:

WASTE MATERIALS—		
No. 2 busheling	.....	11 00
Heavy melting steel, gross ton	9 50	10 00
R. Rd. wrought iron, No. 1, gr. ton	10 25	11 25
Scrap pipe, gr. ton	6 00	7 00
Stove plate, net ton	11 00	12 00
No. 1 machinery cast, net ton	15 00	16 00
Heavy lead	3 75	4 00
Tea lead	2 00	2.50
Red brass	....	9 00
Yellow brass	5 00	6 00
Light brass	3 00	3 50
Heavy copper	9 25	10 00
Scrap zinc	3 00	3 50
Old rubbers, boots and shoes	2 00	2 50
Lumberman's rubber boots	1 25	1 75
Auto tires	0 50	1 00
Solid tires	0 75	1 25

SLIGHTLY FIRMER TONE NOTED IN COPPER

Toronto.

A slightly firmer tone is now noted in several ingot metals, particularly copper, and tin; but whether this is a permanent step forward, or the gain in market strength will be only temperarily, is yet too early to determine. Fluctuations are almost bound to occur, when the review is based upon conditions which have governed ingot metals throughout the past months of deflaction. The viewpoint that the metal markets have reached the bottom of depression and will sooner or later commence a gradual climb towards improvement, is now spreading. The individual characteristics of the various markets are as follows.

COPPER—Business in copper is without any marked expression of improvement. It is reported that copper consumers still adhere to the attitude of watchful waiting, this condition being more pronounced because of the slackness in demand for finished products. As a result of the increased activity in steel, however, some producers are hoping for a reflection of this improvement in non-ferrous metals also, but up to the present, such expectations have not been realized. Prices during recent weeks have indicated more or less accurately the condition of the market, and the local quotation has remained at 17 cents thereby reflecting the dull undertone of other primary markets.

NEW QUOTATIONS ON SEINE TWINE

Toronto.

Quotations on seine twine have now been revised, and following are the new price levels. No. 12, 68 cents per lb; No's 18 and up, 67 cents per lb.

CANDLE WICKS 53 CENTS POUND

Toronto.

Prices on cotton candle wick are now quoted at 53 cents per pound.

LOWER PRICE ON RUBY LANTERN GLOBES

Toronto.

Prices on Ruby lantern globes have now been reduced, the revised quotation being $5.40 per dozen, compared with the previous price of $5.75.

WROUGHT IRON WASHERS HAVE REVISED DISCOUNTS

Toronto.

The discount on wrought iron washers has been revised thus giving lower prices on these products. The new quotation is 60 per cent off list, compared with the previous discount of 50 per cent.

SOME BASEBALL GOODS WILL COST LESS

Toronto.

A reduction of approximately 25 per cent has been recorded on certain makes of baseball sport supplies for next spring booking.

LOWER PRICES AGAIN GIVEN ON SASH WEIGHTS

Toronto.

Lower prices are again given on sash weights, both solid and sectional. This revision constitutes the third change in local quotations which has recently occured, and brings the prevailing prices down to the following levels:

Solid ..... $2.30 per cwt.
Sectional ..... $2.70 per cwt.

NET PRICES ON ROPE HALTERS

Toronto.

The revised quotations shown in last week's isue of Hardware & Metal, covering Rope Halters were net prices only. The discount line shown was a typographical error, merely applied to prices on oil stoves given on another pags. Following are the prices on rope halters, re-produced from last week's markets:—

ROPE HALTERS—	Per gross.
Sisal ...7-16 in.	$21 00
do. 9-16 in.	33 00
Jute ...7-16 in.	19 00
do. ...9-16 in.	28 50

Above quotations, net.

REPORT GOOD FALL SALES OF AMMUNITION

Toronto.

Dealers generally report that a good fall sale for shells, cartridges, and ammunition of all kinds, is now proceeding. The seasonable movement in rifles and guns, is also under way. Ammunitions quotations remain unchanged as follows: Dominion, List less 30/20 per cent.

American, Amer. List plus 22½%.

AGRICULTURAL IMPLEMENTS HAVE LOWER PRICES

Substantial reductions in the prices on agricultural implements have been announced by the Massey-Harris Co., of Toronto. The extent of the decline varies approximately between 15 and 25 per cent, and in making the lower price levels, the manufacturers state that the new revised quotations apply to manufactured stocks as well as to future productions. Easier freight charges in the future, with lower material costs, have been generally anticipated, and the easier price levels for 1922 trade have consequently developed.

LONDON MARKETS

LONDON, September 27.—Although the budget of price changes is not as large as some recent market reports, yet several important hardware lines are quoted at lower levels this week. These changes include wire nails; iron washers; clipper plates; and baseball goods. An advance in quotations is again registered on turpentine and manufactured cotton goods.

Good seasonable business is generally reported, and it is expected that the advent of colder weather will add many lines to the present good sellers, thus increasing the brisk volume of Fall trade. Collections continue good.

HIGHER PRICE ON SEINE TWINE

London, Ont.

Seine twine prices have also been advanced in conjunction with the recent increases in quotations on other manufactured cotton lines. The new prices follow:

SEINE TWINE—	Per lb.
No. 18 and larger in 1 lbs.	0 66
No. 18 and larger in ¼ lbs.	0 67
No. 15 and smaller in 1 lbs.	0 67
No. 15 and smaller in ¼ lbs.	0 68

PRICES ON COTTON TWINES ALSO INCREASED

London, Ont.

New higher prices are now in effect on cotton wrapping twines. The revised quotations show 47 cents per lb. for 3-ply in balls; and 50 cents per lb. for 4-ply. Candlewick prices are now 50 cents per lb.

HIGHER SASH CORD PRICES

London, Ont.

Quotations on sash cord have advanced another two cents per lb., according to the latest price revisions. This change brings the current prices to 59 cents per lb. on No.6; 58 cents per lb. on No. 7; and 57 cents for No's. 8 to 12.

NEW LOWER PRICES GIVEN ON PLATES AND HEADS FOR HORSE CLIPPERS

London, Ont.

The Stewart line of horse clippers, shearers, and parts, all remain unchanged in price for spring booking with the exception of plates and heads complete for horse clippers. These alone are now lowered in price, the new list on heads complete being $3.50 each, as compared with the previous quotation of $4.00. Top plates, Nos. 90 and 360 are likewise reduced the new price being $1.00 each. Bottom plates, Nos. 99 and 361, are changed from $1.75 each to $1.50. A discount quotation of 25 per cent off this list is also given.

WIRE NAIL BASE PRICE AGAIN REDUCED

London, Ont.

The base price on wire nails has again been lowered, the latest reduction bringing the current price down to $4.00 per keg, f. o. b. London. The quotation on cut nails remains unchanged at $4.95, base.

REVISED DISCOUNT ON WROUGHT IRON WASHERS

London, Ont.

A new lower price is now given on wrought iron washers, through a revision in the discount. The extent of the decline is approximately 20 per cent. The new quotation is list less 60 per cent, with the usual extras.

TURPENTINE PRICE AGAIN 5 CENTS HIGHER

London, Ont.

Revised quotations on turpentine are now in effect, this change bringing local prices 5 cents per gallon higher than the increased level of last week. The prevailing price is now as follows:

TURPENTINE—	Imp. Gal.
1 barrel lots	1 15
2 to 4 barrel lots	1 14
5 gallon lots	1 30

WINNIPEG MARKETS

WINNIPEG, September 26.—Easier price levels are recorded on a variety of hardware lines this week. These current revisions include all lines of baseball goods for next season; various makes of compression work such as basin cocks, bath cocks, compression bibbs, stops, stop and waste cocks, and sill cocks. Garden hose is also lower in price, and a revised list is given on machine screws.

Business generally is quoted as fair. Some fall goods are moving, well ,however, particularly guns and ammunition, and a brisk rade is reported in these seasonable lines.

LINSEED OIL PRICE HOLDS

Winnipeg.

The reduction on Linseed Oil recorded last week remains the same. Prices quoted last week are $1.10 per gal. for raw and $1.13 per gal. for boiled in barrel lots.

RANGE BOILER PRICES HOLD

Winnipeg.

Prices are holding on Range Boilers and the general opinion is that they will likely hold for some time at present prices. Following are the latest quotations:

RANGE BOILERS—	
30 gallons, each	$10 00
35 gallons, each	13 25
40 gallons, each	16 25
52 gallons, each	23 45
66 gallons, each	33 15
82 gallons each	40 60
100 gallons, each	62 50
120 gallons, each	75 00

NEW REVISED LIST FOR MACHINE SCREWS

Winnipeg.

A new revised list has been isued covering machine screws and is effective from September 1st, 1921. This applies to steel and brass in flat, round and fillister head.

There is very little difference over the previous list of September 1919, with the exception of sizes. Where the gauges of 14, 16, 18, 20, and 24 were formerly shown, the sizes of ¼ inch, 5-16 and 3-8 inches are now given.

The revised list was enumerated in detail in the September 10, issue of Hardware & Metal.

REVISION LOOKED FOR ON WROUGHT PIPE

Winnipeg.

Some revision is looked for in certain quarters in quotations on wrought tubing.

The movement of piping has been very irregular during the past few months, but has been satisfactory from the jobbers standpoint. Outside dealers stocks have been kept low during the summer, and the buying has been purely of a sorting character. A fairly steady movement is anticipated however in the coming season.

NEW DISCOUNTS ON COMPRESSION WORK

Winnipeg.

Lower quotations are announced on various lines of compression work, showing fairly substantial reductions. Following are some of the revised discounts, and net prices:

COMPRESSION WORK—	
Basin cocks	23 per cent. off list.
Pantry cocks	28 per cent. off list
Bath cocks, No. A2360 without tail pieces	$5.10 each
Do., with tail pieces	$6.30 each
Do., quick pression	38 per cent. off
Compression bibbs	35 per cent. off
Compression stops	35 per cent. off
Stop and waste cocks	35 per cent. off
Still cocks	45 per cent. off

GARDEN HOSE REDUCED

Winnipeg.

Prices have been reduced this week on Garden Hose. Following are the new prices.

GARDEN HOSE—	
½ x 3 ply, per 100 ft.	$ 9 75
⅝ x 3 ply, per 100 ft.	12 00
¾ x 3 ply, per 100 ft.	13 00
½ x 4 ply, per 100 ft.	11 00
⅝ x 4 ply, per 100 ft.	13 75
¾ x 4 ply, per 100 ft.	14 50

REDUCTION OF 25 PER CENT ON BASE BALL GOODS

Winnipeg.

Prices on Baseball Goods for next season have dropped 25 per cent. Following are a few of the new revised quotations:

BASEBALL GOODS—	
Reach Base Balls.	
No. 0, per dozen.	$18 00
Base Ball Mitts.	
No. 5, per dozen	$14 40
No. 160, per dozen	40 00
No. 200, per dozen	39 00
No. 31, per dozen	63 96
No. 500, per dozen	120 00
No. 6A, per dozen	128 04

THE underlying principles of "Save the Surface and you Save All" provide hardware merchants with some of the most potent arguments which can be used to stimulate Fall trade in paint and varnish. In this issue will be found considerable editorial data bearing on this subject, outlining many ways in which the meaning of the above slogan can be most effectively applied, particularly in so far as the Fall painting is concerned.

Retail business is in such a condition to-day that "price" becomes a more important factor than has been the case for some time. Customers have developed a "shopping" tendency and only make purchases when the "price is right". Fortunately another reduction in paint prices has recently taken place and the hardware merchant is thereby provided with an effective "lead" to bring up the subject of painting to all prospects particularly those of an economical turn of mind who pride themselves on always buying to best advantage. This is the third reduction in paint prices within ten months and brings costs to below the pre-war level. Few customers will not be interested to learn of this.

With these price reductions as a lead, the merchant can bring to bear the many other arguments with which he is provided at this time of year. Firstly, the basic idea of "Save the Surface" is the protection of surfaces against the destruction wrought on exposed parts through lack of paint, varnish, etc. It is doubtful if any other season of the year calls for such protective measures to the same extent as does the Fall. With the approaching rain and sleet, followed by the snows of Winter and the dampness of the ensuing Spring thaws, the need of adequate protection to property, vehicles, implements, etc., becomes imperative, if they are to render maximum service. The Fall is a good season for the merchant to make a close survey of the needs of his community and to make plans for bringing to the notice of his prospects the various arguments dealing particularly with their specific needs. Effort applied in a general way to the sale of paint and varnish is not nearly as effective as specific effort, and in view of the great need for education on this subject to alter the habits into which customers have fallen, specific effort on the merchant's part is needed. By specific effort is meant bringing to the attention of various prospects the arguments for Fall painting most applicable to their particular needs. Now let us make a brief survey of the paint needs of various customers in the Fall.

Firstly the property owner who has been postponing painting until prices were reduced will be interested to learn of the extent of recent reductions. He will be easily convinced that paint at today's price is cheap protection against the ravages of Fall and Winter elements. He may not know that highly satisfactory painting of exteriors can be done in the Fall and Winter. Property values are being well maintained in this country in the face of declining values of other commodities—therefore the need of protection is great, and the insurance, in the form of paint, has steadily declined in price.

Then there is the interior work to be undertaken. Long dark evenings are ahead with the approach of the indoor season and every housewife will appreciate the value of the suggestion that when Fall housecleaning is undertaken, paint, varnish, wall and furniture finishes, etc., can be used to good advantage in improving the appearance of the home.

In the rural districts the farmer is a good prospect for fall painting. His crop is harvested and he has a breathing spell in which to consider any valuable suggestions such as can be offered concerning the use of paint and varnish around the farm. There are the farm buildings to be looked over. A remarkable percentage of barns on Canadian farms never have received a coat of paint,— a most poignant evidence of the need of education of the farmer. The farm implements are also frequently neglected, many of them being left exposed in the fields from season to season without adequate protection of paint and varnish. The usefulness of such implements is soon diminished and their cost thereby greatly increased. Some talks along the line of business efficiency should help bring the farmer to a realization that his overhead costs could be greatly lowered by giving buildings and implements the needed protection. With the declines which have taken place in values of agricultural and dairy products the need for such efficiency on the farm is increased. The reduced prices of paint should be of great interest to the farmer who is a little inclined to hold off buying hardware on the grounds that prices have not declined in proportion to the declines which have forced upon him.

There are a great many other specific suggestions which can be applied from a close study of local possibilities. For instance, there are those who will be moving during the fall months and whose tastes usually call for some painting or varnishing in their new premises. There is the auto owner who paints his own car during the winter months. The house floors need special protection against snow tracked in by children in the cold weather.

When the specific needs of the community have been established it then becomes necessary to adopt the most effectual means of bringing the arguments before the right prospects in the most effective manner. In this connection local newspaper advertising, personal selling effort over the counter

(Continued on page 55.)

"Save the surface and you save all" Paint & Varnish

Half a Day in the "Save The Surface" Dep't of Jones' Hardware

WHILE Tom Jones did not deliberately expend more time or energy in any one department of his store than another, or wilfully neglect one phase of the business while developing the other, yet it must be stated that he certainly did relish selling paint. He used careful judgment in allotting a fair share of interest to the Paint and Varnish department, and he certainly did not overlook its copious possibilities. Leaving any line of merchandise to "take care of itself" constitutes a business crime in Tom's personal opinion, and because of his whole-hearted and energetic attention to all departments during the ten years he had been established at his present location, Tom Jones had become the proud owner of a thriving business.

That business had grown each succeeding year in both volume and efficiency until to-day he could look back and smile on the problems and difficulties he had overcome. His success up to the present was undoubtedly due to his painstaking efforts, but Jones was not foolish enough to believe this work completed. Present-day merchandising required much thought and hard labor to keep pace with the trend of the times, and Tom Jones was thinking hard each day how he could improve his present methods of doing business.

Suggestions and even arguments from the representatives of the business houses who supplied his wares were always duly considered and absorbed. Business methods of other dealers brought out in trade papers and periodicals appertaining to his merchandise, were always read and studied with interest. Although situated in a town of less than 5,000 population he was aware that twentieth century tactics had to be embodied to bring his business to the goal he had reached each preceding year:—that of increasing his sales over the previous twelve months.

Looking For a "Bumper" Year.

Paint and its allied lines had increased their turnover each year. However, Tom was not satisfied that 1921 would return only the usual advance over 1920. He was anxious that a new record should be established, and in his own mind there was no better opportunity than the present to bring about this increase. April, May, June and July had shown higher returns than last year, and with an extra effort this Fall, his goal would be reached. He realized the paint manufacturer who supplied his paint and sundry lines was always ready to assist him in his campaign, and the sales slogan "Save The Surface and You Save All" had been established in his store for the Spring paint season, thus proving a great help in furthering his efforts. With his paint department now well labelled with this business axiom conveying "more truth than poetry," he was intent on bringing the Fall paint trade equal to his annual Spring sales.

Careful attention to women customers

As a result, one Saturday afternoon early in September Tom was prepared to "push" Fall paint sales. He knew that a good many of his customers this afternoon had not yet realized the early approach of Fall. That many had not even given a thought to covering the surfaces of houses and barns against the ravages of the wet and cold weather of the following months. However, he was there to acquaint people with these facts whenever the opportunity presented itself.

Tom Sells One of His Best Friends.

Joe Thomas had commenced his business career about the same time that Tom had elected the hardware store as his own special line of efforts. Joe decided on farming because his early days were spent in agriculture, and he knew the game thoroughly. He had purchased a farm not far from town, and in the course of a few years enjoyed a paying business, of which he was the proud proprietor. With his new barns and remodelled house, just completed last year, Joe's holdings certainly announced prosperity.

On this Saturday afternoon he entered Tom's store, purchased nails, a lantern, a file, and then stated he wanted a quart of paint.

"The same shade as the trimming you supplied for the house last Spring," he said. "We want to give the verandah at the front another coat."

"Will this be all you require to make a good job of your home?" asked Tom.

"The quart will finish it nicely, and it has been a great job. Improves the appearance of our home immensely," was the reply.

"Yes, Joe, you have certainly made an improvement. I was passing only this week and noticed the bright, clean appearance of the house; also your new barn. Between the two, your farm has increased in value a good deal, but painting has enhanced and insured that value. But say Joe, you should really give that new barn a touch of paint also. If it was given only one coat it would further add to both appearance and value, and protect your investment in the building itself," commented the store proprietor.

"No; I have decided enough money has been spent on the place this year, but perhaps that will be done next year."

"Winter is coming, Joe; the wet weather and then the cold following months will do more damage to that new siding than you can imagine. For the further outlay of a few dollars your barn will be protected against this, not mentioning the added improvement to the appearance. You have undoubtedly laid out a considerable sum of money already on your buildings, but with the added amount necessary to paint your barn, I am convinced that it will pay you better than any you have previously spent. The protection against one winter's weather alone will net you the amount in the long run. Getting down to brass tacks, I believe it can be painted for $100.00, which although it sounds big at the moment, is not much when the benefits are considered."

"I have never looked at it in that light before, Tom. Few people consider paint as a surface protector, and I have always thought we painted merely to beautify our property. I believe you are right. One hundred dollars is a comparatively small amount to what that siding cost me, and if you are convinced that it can be painted for anywhere near the hundred dollar figure you had better send out enough to do the job."

"Our truck is making a trip out that way this afternoon, and we will be only too glad to stop off and leave it," was Tom's reply.

Does Not Confine Activities to Store

Tom had made the sale. Made it to a good friend and customer, and in so doing he knew that while the store received benefit through the sale of paint, his customer had also derived benefit by being acquainted with facts and not mere sales talk. Sales talks were necessary in business, but they should consist of facts; and in this case he was sure Joe Thomas would profit materially by the early painting of his fine new structure.

Tom had said he would be only too glad to deliver the purchase. Perhaps the chief reason for this being another house on the same road, the owner of which had delayed painting in the spring of the year. He would load Joe's consignment of paint in the back of the truck and go personally with the driver to see if he could not close another sale the same afternoon. It was yet early and the trip could be made before the busy hours commenced.

Very soon the car was driving up to the farm house and Tom was met by the man who had almost decided but not quite to paint last spring.

"Hello, Mr. Jones, what are you doing out here on a Saturday afternoon?" was the greeting.

"We had to come out to Joe Thomas' place, so we dropped in," smiled Tom. "Joe is completing the investment on his farm buildings by painting his new barn this fall and we brought the paint with us."

"Painting his barn in the fall? Why didn't he wait until the spring, which is the proper time to do outside painting?"

The "Finishing Touch"

This was just the question wanted, and Tom made his answer go a long way. He repeated the argument used in the sale of barn paint; told this new prospect the advantages of fall painting; how the house would depreciate in value if left exposed to the elements and went on further by explaining the longer it was left unpainted the more paint it would take.

"I had every intention of painting last spring but kept putting it off until the real warm weather set in. I didn't figure on doing it this year now. How much paint will be required to give my house two coats?" asked the tiller of the soil.

"About eight gallons, or an approximate outlay of fifty dollars for the entire material," replied Tom. He had anticipated this question and was ready with the reply for he had totalled the amount it would take before he came out.

"Well the house needs painting all right. Suppose I may as well do it this fall as any other time. What you say about damages done by delaying is true, so you had better put aside what paint and other material I will require, and I'll call for it the first of the week."

Now Looks to Store Trade

Another sale made and back at the store in time to care for the usual Saturday afternoon trade. Tom's next hour or so was fully occupied in supplying the demands over the counter. The smaller can of paint or varnish would be taken from the shelves and wrapped for the few customers who desired these products, but somehow this did not satisfy Tom. He had been successful in two sales earlier in the afternoon and his selling ambition was aroused. He failed to see why the lady customers should not be persuaded to buy their sundry lines of paint or varnish, if arguments were given to accompany the signs conveying their message in his "Save the Surface" department. They were doing their share; also the window that was recently arranged to suitably assist in promoting bigger sales.

The opportunity soon came when a lady customer, after purchasing a bottle of furniture polish, remarked:—"Some of my furniture is beginning to show signs of wear, particularly the sitting room chairs, and I hope this will brighten them up."

"That will do its duty as far as it goes, but if your chairs have the polished finish and now show scratches, I believe a can of high grade varnish is what is required. While the furniture polish will temporarily hide the scratches, it does not fill them; and these same marks become deeper, and more

Discussing paint requirements with the farmer

added, as the chairs are continually used. A coat of good quality varnish will protect the wooden surface, as well as completely covering any marks of wear. With the approach of winter nights, the sitting room offers a more inviting appearance than when the weather was warm, and consequently, your furniture will be used more. If the surface is protected against this, the chairs themselves will undergo no damage whatever, insofar as the wood is concerned," explained Tom.

It was a simple explanation but none the less effective, for the sale of a quart can of high grade furniture varnish was made and the lady also purchased a suitable brush. Tom himself was a little surprised when he found out how the stating of facts relative to "saving the surface," both to outside property and articles and woodwork, would invariably bring about the closing of a sale. The more he thought over the truth of the slogan, the more he was convinced it should be used to a greater extent in his paint department.

Tom's assistant salesman was not slow to emulate his employer's example of the paint section into a "save the sur-

(*Continued on page* 62)

OVER THE TOP THIS FALL

(*Continued from page* 53)

and in conversation with prospects at their homes, effective window and store displays and use of letters, are among the most helpful mediums of getting the arguments "across". In this issue will be found advertising helps, suggestions, for sales talk in the store and on personal calls on prospects, window displays, and pointers on turning many other arguments to best advantage.

The widespread publicity given arguments for "Save the Surface", combined with the efforts of hardware merchants, constitute a force which has great possibilities for increasing the sale of paint and varnish. Much trade has already been stimulated and with the progress of education along this line the combined effort will have cumulative effect increasing in proportions from year to year. Just now the important thing is to educate customers that paint and varnish is not a seasonable commodity but an all-year necessity. An important and widespread movement has been stimulated, resulting in an unprecedented sale of paint, varnish and kindred lines during the past spring and summer and there is no just reason for allowing it to lag this fall.

Some "Save The Surface" Ideas

What Would You Think?

of a person who appeared on the streets in threadbare clothing on a cold, raw, Fall day?

Don't forget that your house, garage or other property which is neglected through insufficient paint protection against the elements, undergoes similar exposure with equal danger.

HIGH COSTS OF CONSTRUCTION

are being maintained and it is therefore even more necessary to protect the increased investment represented by property.

FALL RAINS AND WINTER SNOWS

will soon be here to attack the exposed exteriors of buildings and to be tracked into the home by children.

See that the floors, woodwork and exterior of the buildings are well protected.

We can give much helpful information on this subject and we will be glad of the opportunity to discuss your particular requirements.

"Save the surface and you save all" Paint & Varnish

BLANK'S HARDWARE

IN making plans for stimulating paint and varnish trade during the Fall and Winter months close attention should be given the question of advertising, either in so far as insertions in local newspapers are concerned or in the broad application of the word, taking in the distribution of letters, folders, etc.

Great possibilities are involved in the use of local newspaper space, and judicious "copy" will do much to bring success to the Fall paint plans. The window displays will catch the eye of passers-by but the ad in the local newspaper with its distribution among thousands of families locally and in the rural district will bring the message to many additional prospects. The windows will then serve to back up this effort because when the prospect who has read the ad in the newspaper passes the store his attention will be arrested for the second time and he is more likely to act upon the second reminder.

In making plans for handling the advertising copy the local field should be investigated with a view to giving due attention in the advertising to all classes of prospects. For instance there is the local house-owner, the church and school boards, the manufacturing plants, the housewife, the farmer and others. A different appeal will be necessary for each in order to secure maximum results from the advertising. Each one has some special interests, and these can be studied so as to form the basis of a personal appeal in the ads. When this basis has been established the "copy" can be designed to conform with the season.

Cutting Cost of Property Upkeep

In the Fall of the year the property owner should make a practice of looking over his buildings with a view to uncovering any parts which may be exposed to the elements through an insufficient protection of paint or varnish. He will save many dollars in repairs by this attention and he should be so informed through the hardware merchant's paint ads. The housewife will be conducting Fall cleaning and may wish to refinish the floors and woodwork to give protection against the snow tracked in during the cold weather. The walls may be marked up by the children and a coat of wall finish, easily applied, will greatly improve the appearance of the home for the indoor season. Other improvements will likely be contemplated by the housewife for the Fall months, including the refinishing of furniture, etc., in order to improve the appearance of the house-furnishings.

Those that Move in the Fall

Many people move to new premises during the Fall months and these too are good prospects for seldom do people move without finding the necessity of using some paint or varnish for re-touch-

For the Fall Local Advertising

ing floors, painting borders to match floor coverings, refinishing woodwork, walls, furniture, etc. A feature might be made of this point in the ads.

A number of retailers report a stimulation in the sale of paint in quart cans and brushes to men unemployed. Here too is an argument which might be made namely, for those unemployed to utilize their spare time to good advantage in the preservation of their property with the application of paint.

Manufacturing plants are always good prospects for paints for the business man is generally quick to see the value of giving adequate protection to his investment. The same principle applies to the houseowner and the farmer. The latter is very much inclined to neglect his barns, implements and buildings, but with decreasing values of agricultural and dairy products he should be quick to see the importance of cutting down his overhead charges as much as possible. The adequate use of paint and varnish on the buildings and implements will save much of the cost of upkeep through avoiding premature repairs and enable the giving of better service during the production period. Even if he does not care so much about his buildings, the farmer will soon realize what a handicap it would be for him to suffer enforced idleness in midsummer due to a breakdown in his machinery which might have been avoided if the implement had been given careful attention and well protected against the elements from year to year. In the farmer's case it is well to advocate that he keep a few shelves in one of his sheds for a general stock of paints. Such a stock if kept handy will encourage the farmer to apply a protecting coat occasionally because it can be done without the trouble of going to town for the necessary paints and brushes. When he visits town occasionally enquiries can be made of the farmer by the merchant as to the condition of the stock paints on the farm and in this way sales can be made which would be missed otherwise due to the farmer's reluctance to go to much trouble for the sake of painting.

Lack of Information

One of the main obstacles still in the way of greater paint sales is the lack of understanding concerning the correct methods of applying paints and varnishes, etc., in order to get best results. If the merchant will make enquiries among his townspeople he will be surprised at the lack of knowledge concerning the application of even the most simple color combinations, especially where bare lumber furnishes the material to be treated. If more persons thoroughly understood the methods of securing the splendid finishes which result from the proper combination of paints and varnishes, doubtless more of these products

(Continued on page 64)

Increased Value of

Farm Products

The progressive farmer is the one who, when he has marketed the product of his summer's toil, takes time to carefully examine his buildings, implements, etc. for signs of wear and tear, so that they will give their maximum service from year to year.

Such an examination will reveal the exposed parts of house, barn or implements and show where protection is necessary before the

FALL RAINS AND WINTER SNOWS

arrive.

By this protection the overhead charges of the farm are lowered. Each crop therefore means more to the farmer, in actual cash.

The expenditure for this valuable protection is small. NOW is the time to apply it.

Let us look over your property and estimate your requirements.

Save the surface and you save all" *Paint & Varnish*

Suggestions for the Window Show Card

Nicely-displayed and well-worded show cards add materially to the effectiveness of show window and interior display advertising. The suggestions below may give you a lead in getting up your Fall and Winter cards.

Prices Reduced

For the third time in ten months paint prices have undergone reduction. High costs no longer excuse failure to "Save the Surface."

When You "Save the Surface"

You enhance the value, appearance and durability of your property. What more could you expect for a few cans of paint or varnish?

How Much Insurance Have You?

on your property, in the form of the protection afforded by paint and varnish? A small annual premium for paint will save big bills for depreciation.

Farmers Insure Their Crops

Why not insure barns, granaries, farm implements and other buildings with an investment in paint and varnish?

Fall is the Best Time

To paint all surfaces that need protection. You'll find weather conditions most favorable now for interior or exterior work.

A Real Investment

The outlay for a few necessary cans of paint and varnish is a real dividend-paying investment. No other investment offers such returns for a small outlay.

Mr. Farmer, You'll be Busy in the Spring

Now is the time to look closely over your property. Let us help you estimate the paint and varnish necessary to protect your barns, buildings, implements, etc.

Joy for Long Winter's Evenings

The long dark evenings are approaching. The home is used more by the family. Fresh, bright colors in the rooms add zest to winter's entertainments

CONVENTION OF CANADIAN WHOLESALE HARDWARE ASS'N.

(Continued from page 39)

Merchants to meet their brethren, the need of a better understanding between the French and English speaking peoples of Canada and the supressing of the agitators who constantly try to stir up strife between the people speaking two languages, was strongly urged by Mr. Prudhomme. He also referred to the devout loyalty of the French Canadian people and the great part which they are playing in the building up of Canada.

Better Times Coming

George Caverhill of Caverhill, Learmont and Company, Montreal stated that he was proud to be a Hardware man in Canada as the Hardware business is a great business playing an important part in the up-building of this country. Mr. Caverhill stated that better times are coming and improvement in business conditions is now evident. Hardware wholesalers, stated Mr. Caverhill, have taken their losses willingly, and are doing all they possibly can to get business back to as normal a basis as possible. Mr. Caverhill also spoke of the great pleasure which it gave the Montreal wholesalers, in meeting Hardware Manufacturers and Wholesalers from other parts of Canada.

Compliment Speakers

S. H. Alexander of Wood Alexander and James, Hamilton, complimented Sir Arthur Currie and Mr. Asbury on their splendid addresses, and referred particularly to Sir Arthur Currie's remarks regarding merchandising and manufacturing and the economic needs thus arising, and which were now receiving more attention from McGill University. In the past, stated Mr. Alexander, it had always seemed to him that there was a line of demarcation between the universities and the business interests, which now seemed likely to be overcome. In Mr. Alexander's opinion this change in the course of work of the Universities, would produce mutually beneficial results for all concerned. On behalf of the Ontario Hardware Wholesalers Mr. Alexander also referred to the pleasure it gave them to visit Montreal and meet their brother Hardware merchants from Quebec Province.

Among those present at the banquet were the following:

C. W. Asbury, The Enterprise Mfg. Co., Philadelphia; C. Adcock, Adcock & Brewer, Ltd.; Montreal; J. R. Anderson, John R. Anderson Co., Montreal; S. H. Alexander, Wood, Alexander & James, Hamilton; J. Arnold, Canada Foundries & Forgings Ltd., Brockville; F. Baine, Dowswell Lees & Co., Ltd., Hamilton; R. Bloom, Oneida Community Ltd., Montreal; M. J. Beatty, Beatty Bros., Ltd., Fergus, Ont.; D. J. Much Interest in Turpentine Market

Tendency to Question Stability of Market—Variable Quotations have Failed to Stimulate Confidence—Overseas Requirements a Deciding Factor

RECENT developments in the turpentine market attract specific interest when the marked increases in price are considered. A firm tendency has continued to prevail in southern primary sources of supply since early in September, and this decided stiffening has been reflected in increased prices on the Canadian markets.

The commencement of this upward trend in turpentine was generally looked upon as the beginning of another series of price fluctuations; and after the initial advance, the opinion was expressed by extensive dealers in the product, that further increases were not immediately expected, as the current demand was not then considered sufficient to warrant the higher price levels.

Shipments from the southern markets to European countries, however, served to maintain the firmer undertone; and instead of prices easing off a little, the upward trend continued. This situation in primary fields, served to supply repeated price advances to the Canadian trade, as stocks have generally been light, with dealers purchasing according to current requirements. The variable quotations that have existed on turpentine, naturally failed to stimulate confidence, and importers have adopted a careful policy of not being caught with a marked surplus on hand in the face of a diminishing demand, and expectations of future price fluctuations.

As pointed out in a previous issue of Hardware & Metal, producers in the south have been with-holding their stocks from the Savannah markets, claiming that there existed no profit in turpentine at the lower price levels. As a result, one of the marked causes for the existing increased quotations and stronger tone generally, is found in the smaller stocks available at primary centres. Added to this feature has been the noticeable increase in demand from various sources resulting in repeated price increases.

Such drastic changes are more remarkable at the present season, and in discussing this price trend with reliable dealers in turpentines, Hardware & Metal was informed that there is an inclination to question the healthy state of the markets arising out of the rapid rise. The feeling has been pronounced that further price advances are not likely to continue, and in this connection it it noted that while southern primary costs have eased off approximately half a point, the higher level is maintained on futures.

In addition to the European demands for turpentine which have figured rather prominently in the prevailing circumstances, there remain the winter needs of the paint and varnish manufacturers to consider. With expectations of an increased paint trade, and preparations for a banner year in its allied products, overseas requirements for turpentine on a similar scale with recent demands are stated as likely to be deciding factors in the maintainance of prices. Prevailing quotations are contained on the weekly paint market pages.

Weekly Paint Markets

MONTREAL

MONTREAL, September 29.—Interest is again attached to the paints markets this week by the continued strength of turpentine and the marked advance of 15 cents per gallon. This product has been decidedly firm in the past few weeks, but to continue with such a substantial price increase is a little surprising and the health of the present market is questioned by some well-informed dealers. Linseed oil quotations remain unchanged for the week, with a variation of prices existing among the different jobbing houses. The oil market has shown slight fluctiations with little material change resulting.

White lead in oil, putty and shellac remain unchanged both in quotations and market tendencies. Both former products are selling well, particularly putty, while shellac continues on a fairly firm basis. Window glass prices also remain unchanged at the Montreal net list.

Paint and varnish manufacturers report fairly active Fall demand. Added to this are the receipts of booking orders for next season's supplies. While yet early for this business, orders are coming to hand quite satisfactorily and in many cases for greater quantities than last year. These two factors cause the paint houses at present to again take on a busy appearance.

LINSEED OIL PRICES FLUCTUATE

Montreal.

With slight fluctuations during the week, linseed oil again settled at quotations of last week. There still exists a variation in prices quoted by the different jobbers, but 85 cents per gallon for raw in one barrel lots is the most general quotation. Last week 90 cents was given and some firms are still maintaining this price.

The oil market is seemingly very difficult to follow. Flax quotations fluctuate almost from day to day, with reports of crop conditions and demand being the two influences disturbing. For the latter it may be said a gradual improvement is noted, and a continuance of this, which will in all probability be shown, will be a decided factor in maintaining present levels. Paint manufacturers will require supplies for their next season's product, and during the fall and winter months it is felt that linseed oil will hold fairly steady around present figures. Following are prevailing prices:

LINSEED OIL—

	Raw.	Boiled.
1 to 2 barrel lots, per gal.	0 85	0 87
3 to 4 barrel lots, per gal.	0 83	0 85

Less barrels, add 10 cents per gallon.

TURPENTINE ADVANCES 15 CENTS PER GALLON

Montreal.

The strength of the turpentine market continues, and this week is followed by the substantial price increase of 15 cents per gallon, bringing present quotations of $1.12 in one barrel lots. The gradual increasing firmness in the two weeks previous did not cause undue interest among the trade, who considered it a tendency from the increase in demand from the low Southern stocks, but the health of the rapid rise this week is questioned by some well-informed dealers.

As stated stocks in the Southern markets are not heavy, and with the present spurt in demand the higher prices resulted. Paint manufacturers are now demanding supplies, this materially assisting towards the firmer tone in the market. Again, there is the European market which figured so prominently during the summer months. Therefore, while the rapid gain is thought to be a temporary position, it is felt that turpentine prices will continue fairly steady around the dollar figure at least, this leaving room for a decrease of 10 cents from the present high level. Following are present prices:

TURPENTINE—	Imp. gal.
1 barrel lots	$1 12
2 to 4 barrel lots	1 10
Broken lots	1 22

PUTTY SALES ARE INCREASING

Montreal.

The movement of putty is now commencing in earnest at the new lower prices announced the beginning of the month. Dealers' purchases are still of smaller quantities than in other years and an active market is anticipated well up to the approach of winter weather. Following are prices for all quantities:

PUTTY—

Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk barrels, 800 lbs. .. .	4 00	4 50	4 75
Bulk drums, 100 lbs. . ..	5 00	4 75	5 50
Do., or tins, loose, 25 lbs.	5 25	5 75	6 00
Drums or tins, cased, 25 lb.	6.00	6 50	6 75
1-lb. tins	8 75	9 25	9 50

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices

LITTLE CHANGE IN WINDOW GLASS

Montreal.

There is little change in the window glass situation to report. Stocks are being refilled, following the temporary shortage of the past few weeks, and by the time of the active season, there is little likelihood of any shortage. Montreal net list continues to be the selling basis for window glass, with a slightly better quotation offered by some jobbing houses for quantity buying. This is by no means general, and is offered to reduce stocks of some sizes. When these stocks are lowered it is expected the market will settle on a steady basis for the active season which is now approaching.

UNDERTONE FIRM IN SHELLAC

Montreal.

Current quotations on shellac remain unchanged with a very firm undertone. A gradual advance is reported on outside markets with a spurt at the close of last week. According to information from these sources, a general business pickup, with supplies not too ample, account for the advances made. Locally, the demand is seasonably fair with stocks in good condition to meet the present requirements. Unchanged prices are the following:

SHELLAC—

	Pure White.	Pure Orange.
In bbls., per gal.	$4 10	$3 60
Gal. jugs, per gal.	4 40	3 90

TORONTO

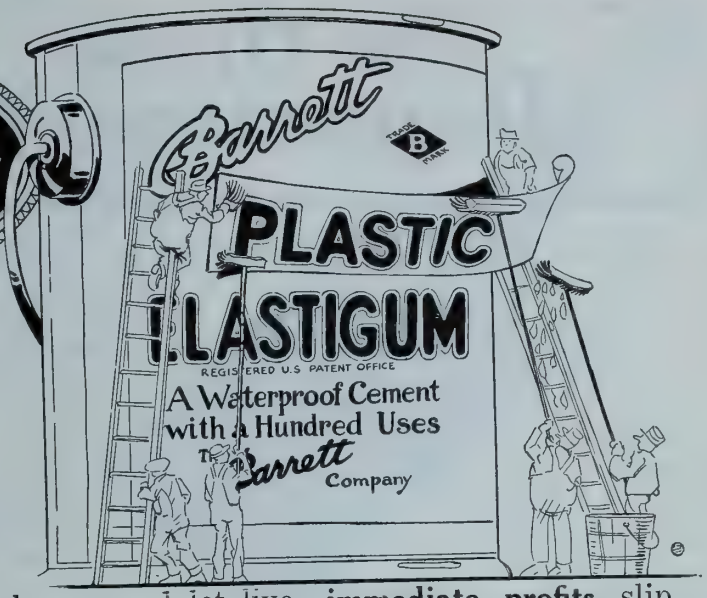
TORONTO, September 29,—Manufacturers and distributors of paint and the allied products report that the Fall movement is now under way. A gradual increase has been recorded in the volume of orders, and this is jointly attributed to the vigorous "Save-the-Surface" campaign, aided to some extent by the recent price reductions.

The higher price levels and the firm undertone recently attained in the turpentine markets, are still held; but the health of this upward trend is questioned in some quarters pincipally owing to the fact that southern producers, by withholding supplies from the markets, have caused an artificial shortage of turpentine, which in turn has been reflected in the advanced quotations.

Linseed oil prices remain unchanged this week, with flax seed holding its strengthened position, but the current demand for oil still being light. An improvement in this direction is looked for, principally aided by the expected demands from paint manufacturers in preparations for a big season in "paint & varnishes" next Spring.

(Continued on Page 64)

Barrett Roofings, Cements Industrial Paints etc.



Start these money-making cements to work for you to-day—

Don't sit back, waiting for the building boom, and let live, **immediate profits** slip right through your fingers. All around you are roofs—hundreds of 'em—in pressing need of patching and repairs. Don't miss this trick—don't pass up the profits in this roof-repair business.

Tell folks in your community how easy it is to renew their old roofs with Barrett Roof Repair Materials. Let 'em know your store is headquarters for these famous roof-repair materials. Go after this business hard, and then—watch the profits roll in.

Plastic Elastigum

A tough, elastic, waterproof, acid-proof cement with the consistency of thick molasses. There are so many uses for this ever-ready patching cement that it is known generally as "The Waterproof Cement with a Hundred Uses."

It is extremely easy to apply with trowel or putty-knife to any surface, wet or dry. It expands and contracts with surfaces of all kinds, whether metal, stone, concrete, wood, glass, glazed brick or terra cotta. Among its many uses, it is particularly useful—for flashing work of all kinds; for waterproofing gutters; for damp-proofing parapet and fire walls above flashings, for stopping leaks in roofs, around chimneys, skylights, etc.

Liquid Elastigum

A high-grade cement in liquid form, unequalled for recoating old and worn felt, metal, and "rubber" roofings. It actually gives new life to old roofs by forming a tough, weatherproof coating over the entire surface.

It not only seals cracks and small holes against moisture, but it is of sufficient body to level small hollows, and reinforce weak spots.

Liquid Elastigum is composed of non-volatile oils combined with asbestos fibre. It is applied very easily with brush or squeegee, and because of its fibrous nature spreads in a thicker layer than ordinary roof paint.

Liquid Elastigum is also very economical, one gallon covering from 100 to 250 square feet, depending upon the surface to be painted. Even after years of service it is still tough and elastic.

Dependable Products that Bring Big Profits

By carrying and recommending Barrett Plastic Elastigum and Barrett Liquid Elastigum you'll not only swell the total on your sales sheet, but you'll create genuine customer good-will by furnishing tested products that are sure to give satisfaction.

The Brush Department

Advertises Extensive Range of Brushes

Many Varieties, Sizes and Styles of Brushes Indicated in Large Local Advertisements Confined to this Line—Cash Proof that Such Advertising Stimulates Brush Sales

EVIDENCE of the extent to which the brush stock can be pushed, in the average hardware store, is found in the experiences of the J. H. Ashdown Hardware Co., Calgary, Alta. On this page is shown an advertisement by this firm, devoted to brushes, and arranged in alphabetical order. In seding to Hardware and Metal a copy of this ad., which appeared in a space two columns wide and full length of the page in a Calgary newspaper, this firm states:

"In view of the recent splendid effort put forth by Hardware and Metal in recent issues regarding the Brush Department, we thought the enclosed advertisement might be interesting. It is something different and we believe original in advertising a line where so many varieties, sizes and styles predominate. It has caused a great deal of comment and we have cash proof that it brought results."

Few people will realize that the brush stock in the hardware stock is so extensive as to justify so large a space. It is by the use of such ads that the readers will be convinced of the wide range and importance of the various styles of brushes now available for their use. The ad. is well illustrated and arranged in such order as to facilitate reference. A number of "special values" are particularly marked. Linked up with other selling effort in the Brush Department of this store, the result was to stimulate sales.

"I guess you're right, young fellow. I know my wife will be pleased if she has a much brighter kitchen, for that is where much of her time is spent," smiled the satisfactory customer.

Through adopting these progressive business methods, Tom and his salesman succeeded in showing a remarkable increase in the volume of trade brought to their store. And while bigger and more sales developed, there was also another important phase to the outcome, and that was in satisfied customers. In proving the facts that underlay Tom' sales talks through truthful application, he also succeeded in gaining their friendship. The "Save the Surface" department furnished numerous opportunities for this mutual line of endeavor, and the proportion of "repeater" sales consequently became one of the store's strongest features. These were only partial results accruing from the appication of a little extra effort to "Paint and Varnish" in the Fall, as well as during the Spring.

HALF A DAY IN JONES' PAINT DEPARTMENT

(Continued from page 55)

face" department, and had absorbed all the knowledge he could in reading, assisted by Tom's explanations and salestalks.

"How much green paint will it take for our kitchen ceiling? It is about 14 feet by 12," was the question of the next paint prospect.

"Do you wish to give it one coat or two?" inquired the young man.

"Just one, if I can get the same shade."

"A half-gallon would be plenty," was the answer. At the same time the salesman produced a color card.

"It is about this shade," said the man, pointing to a green that was altogether too dark.

"Save the Surface" arguments could hardly be used here, but the young man was equal to the occasion; where he believed a bigger sale could be made and a more satisfied customer.

"For a ceiling, don't you think that is a little too dark? While a lighter shade will require more paint to cover, I believe you would be satisfied in the end. With this shade (pointing to a silk green) on the ceiling, and a little darker one for the woodwork you would have a much brighter room for the long winter days. You know the women like a nice light kitchen, and this combination will work fine."

FLINT VARNISH CO. PLACE WAREHOUSE STOCK IN WINNIPEG

The Flint Varnish & Color Works of Canada, Limited, Toronto, have just placed a warehouse stock in Winnipeg, where they will carry a full line of their Varnishes and Specialties to take care of the trade in the Middle West. They now have warehouse stocks in Montreal, Winnipeg and Vancouver.

Boeckh's Brush News

Recognizing, as we do, the necessity of keeping in close personal touch with our customers, we have decided to issue a monthly letter. In this we shall endeavor to give the trade interesting articles that will helpfully promote the merchant's sale of Boeckh's Brushes to our mutual advantage.

We appreciate, fully, that the Retail Trade forms a strong connecting link between the Manufacturer and Consumer. It is our object, and our constant aim, to strengthen this powerful link through our co-operation.

We particularly invite attention to the fact that we are National Advertisers. It is hardly necessary to enlarge on the great assistance this must be to the Retail Trade in the selling of Boeckh's Brushes. An advertised article is not only easier to sell, but the buyer's mind is already favorably influenced. He is in the mood for acceptance when, upon his entering your store, you recommend Boeckh Products or his attention is called to them by a show-card, properly placed.

We also intend to make our Service Department of real help and service to you by close, careful attention to inquiries and prompt filling of orders. You may always feel assured that your interests, when intrusted to our care, will receive the earnest, close attention to which they are entitled.

It is our desire that each of the best Retail Hardware, and Paint and Oil Dealers in the Dominion, should regard himself, not only as in close relation to us, but as our agent for the sale and distribution of our products.

The Boeckh business has existed and prospered for over sixty-five years. Its success has been due to our policy of supplying an invariably honest and reliable line of goods, well advertised, and further assisted by good service and close attention to the requirements of both Dealer and Consumer.

The Boeckh Company, Ltd.

Toronto, Canada

Established 1856

TORONTO PAINT MARKETS

(Continued from Page 60)

TURPENTINE PRICES HOLD ADVANCED POSITION

Toronto.

The firm showing on the turpentine markets and the recent advanced quotations are maintained this week, and the local price remains at $1.15 per gallon in one barrel lots. While southern primary markets have now eased slightly from the height of the recent upward trend in quotations, yet futures still retain the advanced position, and no immediate decline to the previous existing price levels is generally expected. The momentum of the increase may temporarily have subsided, for the higher offerings have tempted producers to increase the volume of their market output, and if any marked movement should develop in this direction, this would relieve the present low condition of available stocks.

As was pointed out in a recent issue of Hardware & Metal, southern producers have been withholding supplies from the markets, stating that at the low prices which previously existed, there remained no profit in the trade. The suggestion was even made that cutting should cease for a given period in order that price levels may be readjusted upward through the consequent shortage of turpentine that would develop. Therefore, the present state of the southern markets is questioned by some prominent local dealers of turpentine, because of these facts underlying the prevailing situation.

The apparent shortage of turpentine on the markets, coupled with recent shipments to European countries, have assisted in producing the firmer tone in southern supply centres. With these elements has been added some slight increase in the general domestic demand, which in turn served to maintain the higher price levels. With local importers purchasing according to current requirements, these conditions have been reflected in price advances recently announced.

Following are the average local market quotations:

TURPENTINE—	
1 barrel lots, per Imp. gal.	$ 1 15
2 to 4 barrel lots, per Imp. gal.	1 14
5 gallon lots, per Imp. gal.	1 30

CURRENT DEMAND FOR LINSEED IS LIGHT

Toronto.

Quotations on linseed oil remain at the price level recently in effect, namely 92 cents per gallon for raw, and 95 cents for boiled in 1 and 2 barrel lots. Conditions governing the price on oil, have been practically unchanged, with flax seed holding the higher levels recently attained. The current demand for linseed, however, is light.

Increase business in oil is however, generally looked for in the future, and the requirements of paint manufacturers is expected to share in this connection. Preparations for a banner Fall season in paints has now been launched, and with another big season looming ahead next Spring, linseed oil should be one of the factors in winter manufacture. The definite effect of the season's flax seed crop on prevailing prices of oil, has not yet been established, for the estimates governing the Argentine crop are incomplete. Current local quotations follow:

LINSEED OIL—		
1 to 2 barrels lots, per gal.	0 92	0 95
3 to 5 barrel lots, per gal.	0 91	0 94
6 to 9 barrel lots, per gal.	0 89	0 92

Less barrels, add 15 cents per gallon.

FOR THE FALL LOCAL ADVERTISING

(Continued from page 57)

would be sold. This is another point which might be taken up in the advertising. For instance along with the definite suggestions made in the ads as to the refinishing of the veranda floor after the summer's scuffing, or the treament of floors as protection against the winter's ravages, some details could be given right in the ads as to the results obtained from certain combinations and possibly samples could be shown at the store of the results so obtained. There is no limit to the possibilities offered for writing effective copy on the subject of paints and varnishes.

The two sample ads shown herewith are designed in the one case to reach the city property owner and housewife, and the other is for the farmer. The ideas outlined could be changed if necessary to work in some local references.

ARRESTS FOLLOW FAILURE

(Continued from page 35)

contrary to law, being or acting in the capacity of an officer, clerk or servant of N. Brenner and Company, unlawfully and with intent to defraud did make or concur in making false entries in or did omit or alter or concur in omitting or altering material particulars from or in books, papers, writings, valuable securities or documents which belonged to or were in the possession of his em- the said N. Brenner and Comp- , or which had been received by him for or on behalf of his said employer, to the criminal code.

"That Gordon I. Blackford in the years 1918, 1919 and 1920, being or acting in the capacity of an officer, clerk, or servant of N. Brenner and Company, unlawfully and with intent to defraud did destroy, alter, mutilate or falsify books, papers, writings, valuable securities, or documents which belonged to or were in the possession of his employer, the said N. Brenner and Company, or which had been received by him for or on behalf of his said employer or conceived in the same being done, contrary to the criminal code.

Charges "Spite Work" on U. S. Interests

The vice-president of the company is alleged to have stated that the arrests are the result of "spite work" by interests in the U.S. The bookkeeper is said to have stated that a threat had been used by interests in the United States to close the firm up. His actual words were "Some Americans over on the other side tried to put it over the firm but they failed and of course they are peeved."

The statement of Meyer Brenner, vice-president of the company was as follows:—

"The company went into liquidation voluntarily. It had a large number of contracts outstanding for foreign exchange and the market went down. They think money was taken out, but that is not so." Mr. Brenner further stated that the firm did a large business in buying and selling of metals though their operations were confined largely to dealing in futures. At the same time, in connection with their trading in metals they were heavy dealers in exchange, and losses in metals, due to declining prices and to exchange transactions forced them to go into liquidation. The heaviest creditors of the company were said to be New York banks, prominent among them being the Shawmut Corporation. The claims of the banks are for losses on contracts. He stated that had the company not been forced to go into liquidation last November it would have recovered to a considerable extent, since contracts running into January, February and March would have shown a profit. One contract with the British Government for a large amount had to be abandoned, it was said.

Banks at Fault?

It is the opinion of an official of one large Toronto metal firm that the banks who constitute the heaviest creditors were much at fault in giving accommodation on such a large scale without better security.

The construction placed on the matter by this official, judging by a study of the charges, is as follows:—"The Brenner firm had evidently had big dealings in metals and exchange with overseas and other interests and had made certain profits to which the Brenners evidently thought they were entitled to apart from the business of N. Brenner & Co. Ltd. The company having subsequently failed, the cred- will probably endeavor to prove that the assets of the company were used in the making of the profits retained by the officials named. Had this been a partnership business, instead of a joint stock company, such profits could have been retained legally, but to offend the regulations governing the latter form of company organization is a serious matter."

Follow Nature's Example

Paint is to the House as Bark is to the Tree

Nature is mankind's greatest teacher—not only does she give free instruction in the art of decoration in color, line and form, but she is also the greatest living exponent of protection against decay and destruction.

A tree without its bark would rot and die through lack of protection against the elements—similarly all surfaces subject to wear and tear need the protection of a "surface saver."

Merchants who pass along this thought to customers during the winter months can do a lot to create new business for interior paint, oil stain, varnish, enamel.

Remember also that ever since the inception of the "Save the Surface" campaign, the B-H advertising has always very closely tied up with the movement. We realize fully that the B-H dealer represents us in his territory—so we put forth every effort to help him make the maximum number of sales. This is the sort of co-operation that helps the dealer. This effective dealer support, combined with highest quality goods, makes the B-H line highly profitable for any live dealer to handle.

Particulars of the B-H Agency Proposition will be gladly sent free on request.

How To Save the Surface Is the Important Point

Meakins Brushes

Are The Important Factor

Everyone admits the truth of the Surface Saving theory, but how shall the surface be saved? Paint or Varnish, is the natural answer. But a faulty coat of paint is no security. One defective spot in the protecting film of paint opens the way to weather attacks.

For successful surface protection it is essential that the paint should perfectly protect the surface, and Meakins Brushes, because of their superiority, are the best assurance of a perfectly applied protective film of paint.

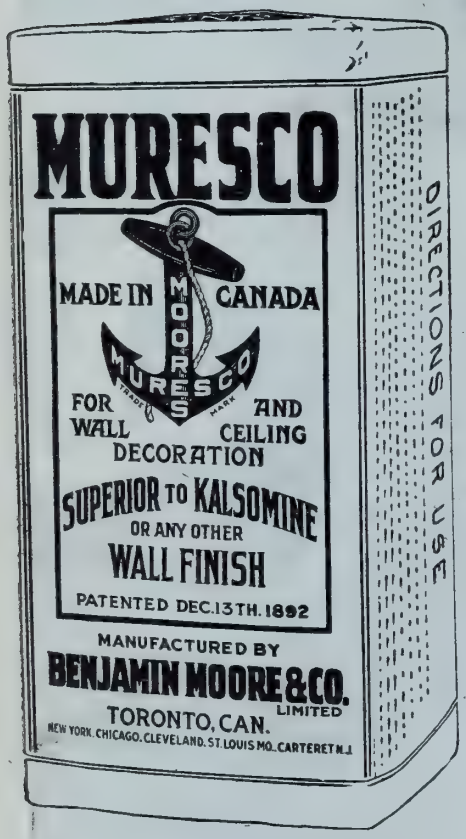
Sales Constantly Increase



Are You Cashing in on Muresco?

The enormous increase in the sales of Muresco for 1921 certainly prove the old adage, that, "Nothing succeeds like success."

The wonderful popularity and consequent increase in sales is multiplying in two directions. Consumers get such splendid results with Muresco, find it so easy to apply, and show it to so many admiring friends, that merchants find it more and more advantageous to feature Muresco in their window displays and local advertising.

If you are not yet cashing in on the paying popularity and constantly increasing sales of Muresco---do it now!

Write today and learn what Muresco can do for you.

MAIL ORDER
vs.
THE DEALER

Win out! You're right on the ground, amongst customers, friends and neighbors. The advantage is all with you! Why should the Mail Order house get a look-in if you have the goods and treat your customers rightly.

A full line of O.P.W. products will make all kinds of friends for you and you will keep the friends you make. O.P.W. stands behind you long after the paint is sold, and recommends you for the next job.

The O.P.W. lines are priced rightly. They leave you a generous margin for profit. Write us to-day. Don't let the mail order houses get ahead of you.

Ottawa Paint Works
Limited

Ottawa, Canada

Branches: Montreal and Toronto

CARTER'S

Your Paint Customers Know It.
CARTER'S GENUINE DRY RED LEAD.

Carter's has won the confidence of the Canadian paint user because of its never changing Quality. Recommend Carter's. It is made from the very best grade of Canadian pig lead, highly oxidized and very finely ground. Mixed with pure linseed oil it furnishes a free flowing protective paint for all manner of metal work.

Carter's Genuine Orange Lead, Genuine Dry White Lead and Litharge are three other Carter products worth stocking.

The Carter White Lead Co. of Canada, Limited, 91 Delorimier Ave. Montreal.

Boost Your Roaster Sales With Popular Viko Roasters

The big season for selling roasters is here. The popular Viko line of aluminum includes four types of roasters in different sizes—round and oval shapes—that are big sellers wherever they are shown.

Women prefer aluminum ware for cooking and roasting. VIKO, The Popular Aluminum, is durable and is priced to appeal to present day buying tendencies—big value at moderate price.

The Viko line contains utensils for every kitchen need. It offers you a good profit and builds repeat sales. To get your share of the Thanksgiving and holiday trade on roasters and other aluminum utensils take on the Viko line—now. For full information—

56 years of know-how.

Honest Wear

We stand behind every brush bearing the Simms trade-mark because we know it is an honest brush made of honest materials by honest workmanship. We know that it will give satisfaction and long honest wear.

TRADE SIMMS SET IN RUBBER MARK

Paint and Varnish Brushes

have been on the market for 56 years. Their quality is now so well known that experienced painters are learning to ask for them by name. You will gain added prestige for your store by displaying Simms' Paint and Varnish Brushes in your window and on your counter.

TINKER TOM'S TALKS.

Tinker Tom Talk
No. 332

October is the best month in the year for selling and using Galvanized Sheets. This October should be better than ever because so many have held off until the price came down and now they're buying.

Jobbers stocks are short and ours not as complete as usual due to the recent strong demand.

Anticipate your needs—order a few weeks' stock in advance.

Galvanized Sheets are a safe buy now and especially if you order the old reliable Premier—MADE IN CANADA.

TINKER TOM.

Hobbs Manufacturing Company, Limited.

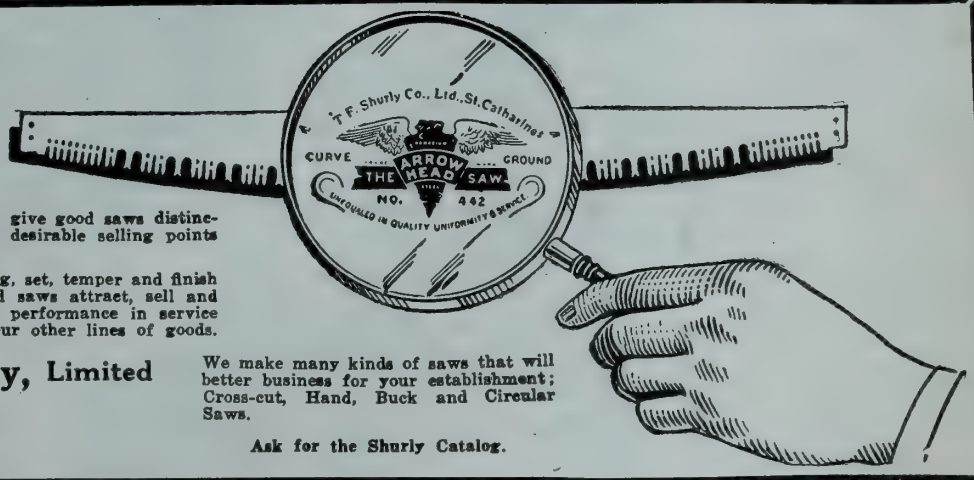
MONTREAL TORONTO LONDON WINNIPEG

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.



T. F. Shurly Company, Limited
St. Catharines
Ontario

We make many kinds of saws that will better business for your establishment; Cross-cut, Hand, Buck and Circular Saws.

Ask for the Shurly Catalog.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Beautify Walls Economically

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. The economical side of Silkstone, its beauty, its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably with mutual satisfaction to merchant and customer.

The satisfaction it gives is a delight to the conscientious merchant who tries to serve his customers well and build permanent trade. Silkstone fills the bill for the Canadian housewife. She has tried it and liked it, and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller. Let us show you what's in it for you—write.

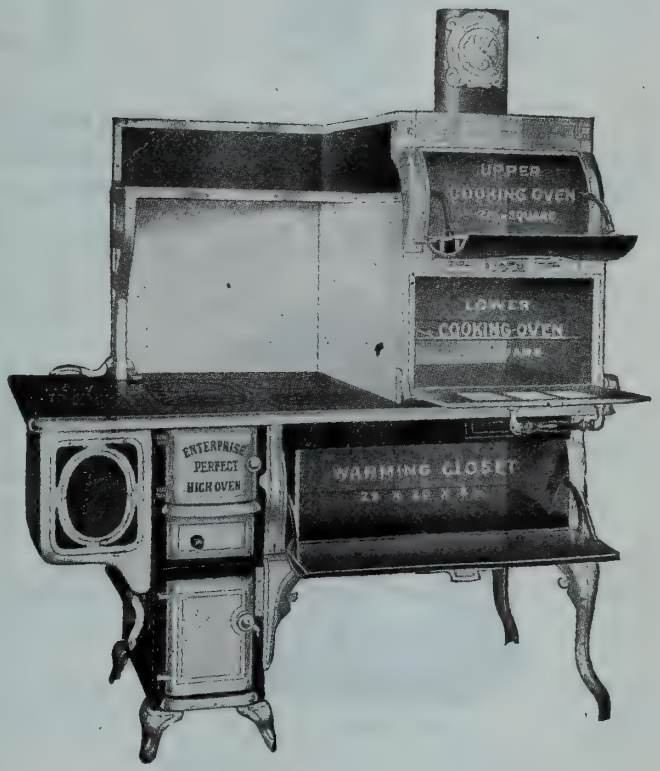
The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Ashdown's Selection of ENTERPRISE Stoves and Ranges



Here is an opportunity to help boost your Fall and Winter Stoves Sales. We have chosen these Ranges and Heaters for distribution on account of their high market value. Their proven ability of efficiency both to merchants and consumers is now recognized and steadily increasing.

The Range and Heater illustrated in this advertisement represent the high quality that the ENTERPRISE line of products possesses.

You can count on their good selling points to close repeat sales for you.

The ENTERPRISE "Perfect" Double High-Oven Range has two large 20" ovens. You will note that these are not merely one oven and a warming closet but TWO BIG FINE OVENS for baking and roasting—both are equally good. However there is a big roomy warming oven besides. Perfect satisfaction is assured through the special flue construction. Finishes in spotless white enamel and lustrous nickel, it is surely a range "de luxe."

When you see the name **"ENTERPRISE"** good quality and efficiency is there.

Cheerful Heater

In this Open Franklin will be found unlimited comfort. It can be opened at the front providing all the pleasure, and the grateful. pleasant, genial warmth and glow of an open fireplace. Point out to your customers the cheerful, comfortable benefit of this feature.

Closed, this makes a useful, effective compact heater suitable for office, parlor or bedroom. Made of high quality cast iron, trimmed handsomely with nickel plate. Fancy ornamental swinging dome top with flat cover underneath for tea-kettle, etc. Burns hard or soft coal equally well.

Enterprise Oak Heaters

These attractive and effective heaters are worthy of your closest investigation.

A strong sturdy type of heater in which finish and material are of the best, a combination that produces a stove of merit and reliability in which strength, lasting qualities and satisfactory service predominate.

The Blued Steel Body, Polished, Heavy, Cast Iron Legs, Highly Nickel-Plated Trimmings, Mica Front Swinging Door, and many other convincing selling points make these heaters a reliable source of Fall and Winter stove sales for the hardware merchant.

You are backed by Ashdown's 52 years of service.

A Sales Help That Costs You Nothing.

Most dealers today recognize that nationally-advertised goods are not only easier to sell, but they build up trade in other lines as well.
In Hack Saws, the advertised brand is the Star—the leader for 35 years.
Star Saws are still made in the same factory under the personal supervision of Geo. N. Clemson. They are now sold by the factory in Middletown, New York, and not through a selling company as formerly.
Don't be misled. Ask for the genuine Star Saws and insist on getting them.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Good Wholesalers Help Your Turnover

If you are following a policy of small stocks under present market conditions, your choice of a wholesaler takes on a much more important aspect.

Good wholesalers, who keenly realize how intimately their own success is bound up with yours, can help you greatly.

Prompt shipments, the right goods at the right time, and a friendly spirit of co-operation, that you find dependable and unvarying, enable you to turn your small stocks quicker and lose no sales by being out of stock. May we serve you that way?

KESTER ACID CORE WIRE SOLDER
FLUX IN POCKETS

—a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of solder. In great demand by all solder users because it saves half of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock solder.
Kester Rosin-Core Wire Solder is also manufactured for delicate electrical work.

Do You Read These Advertisements?

Every advertisement in this magazine is worth reading. It is the product of some concern that is using a modern method of making sales, viz., technical paper advertising, in order to present most effectively to you the leading features of its line.

These advertisers are making it easier for you to buy intelligently with the least waste of your time and theirs. They realize that a sales force cannot replace this service at equal cost. They know that advertising is good business, for the manufacturer who does not advertise cannot save the cost of advertising. Consistent advertisers are progressive merchandisers. They are saving your money and their own; and it pays to do business with them.

Don't miss your opportunities. These advertisements are interesting. Many are distinctly instructive, and a glance through them every month will keep you posted on the latest developments for machinery equipment.

To Our Customers:

Gentlemen:—Every ash sifter you sell offers you the opportunity of making a friend, also the chance of making an enemy.

As you know there are lots of different ash sifters on the market, some good, some fair, and some very poor.

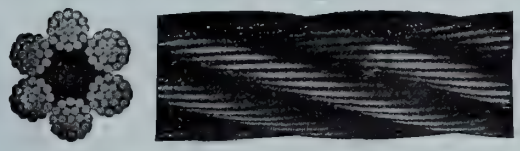
It is your business to see that your customers get the best, because every sifter you sell carries your recommendation with it directly or indirectly.

If the sifter makes good, if it does the thing expected of it, you have developed a friend. If it doesn't you have a dissatisfied customer, and that is a loss to you.

Why take chances then? Study and know for yourself without doubt. The manufacturers of the patented Dustproof Banner Rocker Ash Sifters stand back of you in recommending the Banner Ash Sifters. Besides you have the trademark as a double security.

THE BURROWES MANUFACTURING CO. 607-611 King St. West, TORONTO

WIRE ROPE AND FITTINGS



OF ALL CONSTRUCTIONS

The demand is steady. Are you getting your share of this business? We co-operate with you.

"CROWN" METAL SHINGLES

Fire-Proof, Durable, Ornamental

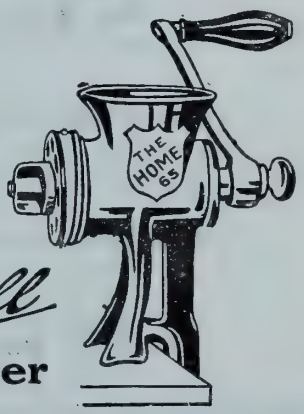
Most efficient because — storm and wind proof; strongest metal roof existing; requires no soldering, mallets, seamers, tongs, etc. expansion and contraction provided for in each shingle; one-sixth the weight of slate one-fourth the weight of wood it takes lighter framing; more durable and ornamental.

McFarlane-Douglas Co. Limited. Ottawa, Canada.

For information on any sheet metal problem, write above.

The Cash Register Tinkles—

Into the drawer goes the money — part cost — part profit. But how much further than immediate profit made do you figure? Follow the sale of a



Maxwell

Food Chopper

There is the generous sales profit on an article in constant demand—plus customer satisfaction! Isn't that what counts, after all? For it creates a mental effect which will reflect itself continually in your "Profit Account."

Do you realize the variety obtainable in Maxwell Food Choppers, and the particular features of each? Complete stock to order from—all Made-in-Canada, and better than any imported.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U. S. A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

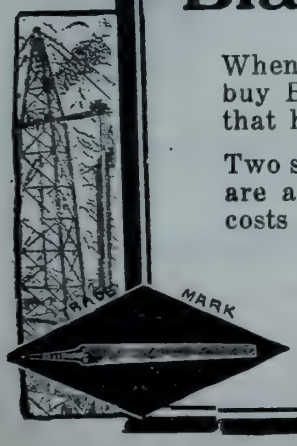
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works
G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.
Owned and Operated by Nicholson File Co.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

FOR SALE

HARDWARE BUSINESS FOR SALE IN GOOD sized Central Alberta Town, modern in every respect, conveniently situated on railway. Big territory, crop failure unknown, splendid crops this year. Stock and fixtures approximately twenty-two thousand, half cash, balance on terms. Box 189, Hardware and Metal.

MISCELLANEOUS

NICKEL PLATING—ORDERS EXECUTED promptly. Prices on application. Communicate with F. W. Higginson, 173 William St, Montreal. Telephone Main 8144.

HELP WANTED

WANTED, HIGH CLASS, AGGRESSIVE salesman for hardware store required for Eastern Townships town. Apply to Hardware & Metal, Box 118.

WANTED—IMMEDIATELY, EXPERT HARDware salesman to join me in buying good business. Box 50, Hardware & Metal.

"LIVE WIRE" REPRESENTATIVE TO CARry a well known line of soldering specialties. Exclusive territory. American Solder & Flux Co., 2910 N. 16th St., Philadelphia, Pa., U. S. A.

SITUATIONS WANTED

HARDWARE CLERK, TWELVE YEARS CITY experience, open for position; A1 reference; salary $20.00 per week. Box 131, Hardware & Metal.

FIRST-CLASS HARDWARE SALESMAN, 24 years old, single, nine years thorough experience, seeks position with progressive Western or Ontario firm. Box 338, Hardware and Metal.

CANADIAN

REPRESENTATIVES

Dorken Bros. & Co.

MONTREAL
QUE.

Practically all big buyers of hardware in Canada are readers of HARDWARE AND METAL.

It Pays to Read the Advertisements

The main thing an advertiser wants to do is to tell you plainly just how and why his goods are worthy of your consideration. You can learn a great deal from that alone, because many things you see advertised are the things you buy and use in your regular daily life. By reading advertisements you can learn the names and read descriptions of the things that are best and most satisfactory.

READER'S NOTICE *Regarding* CHANGE OF ADDRESS

A REQUEST FOR CHANGE OF ADDRESS must reach us at least thirty days before the date of the issue with which it is to take effect. Duplicate copies cannot be sent to replace those undelivered through failure to send this. Give your old address as well as the new one.

Good papers furnish A. B. C. reports to their advertisers.

Hardware and Metal is a member of the Audit Bureau of Circulations.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Metal Stamping and Press Work to Order

Also name plates, embossed trade checks, time checks, badges, steel stamps and stencils or anything in steel or brass lettered or embossed to order.

Why have those unnecessary delays? All kinds of Cash and Parcel Carriers.

Customers appreciate the feature made possible by the use of our Cash Carriers, viz.—that the salesmen are enabled to remain with them until transactions are completed. Time is saved to them, time and labor are saved to the salesmen, and the money is deposited in the office where it is in the custody of one person—the cashier—and where it is not exposed to the entire selling staff of a store. Is there any profit in this for the merchant? Let him consider it.

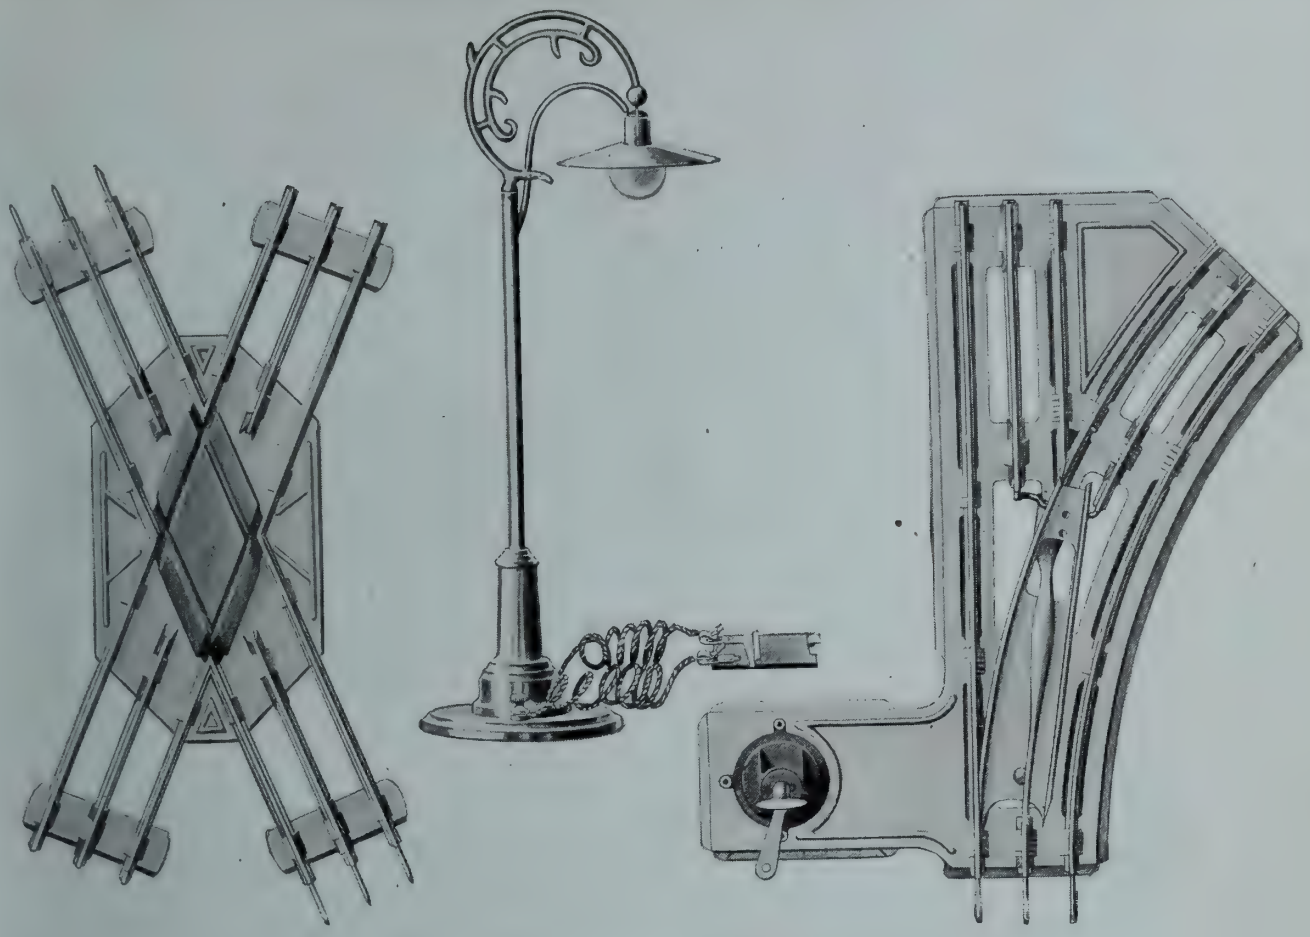
New Electric Equipment For "American Flyer" Railroads



The Ten Thousand Dollar Switch

Here are three new items of equipment which will make every real boy want an "American Flyer" Railroad and nothing else.

A strong sturdy "Crossover" with extra heavy base, all parts clamped together, an "arc light" with a "track connection" which can be attached to any part of the track and the wonderful "American Flyer" switch which cost $10,000.00 to design and perfect. The entire switch assembly is made without solder—all parts are die clamped on a strong pressed steel base—perfect electric contact all the time whether switch is open or closed.

Made in the U.S.A.

"Made in America" American Flyer

"The Train with the Guarantee" MINIATURE Registered U.S. Patent Office RAILROADS

The Manufacturer stands back of American made toys.

The above features indicate why boys and girls prefer the "American Flyer" Trains. We are building A REAL RAILROAD SYSTEM that is practical and yet which can be purchased at small cost.

Over 2,000,000 people saw the "American Flyer" Backyard Railroad in operation at the Chicago Pageant of Progress

American Flyer Mfg. Co., 2219 So. Halsted St., Chicago, Ill.

At your instant service

7623 PRICE Computations ready-made, mechanically accurate, satisfying.

Why not make several sales while you're working out

ONE PRICE Computation laboriously and possibly inaccurately with a pencil?

WHY burden human hands and human brains with any task that can be done ten times, one hundred times,—or even one thousand times—better by machine?

Modern high power machinery has banished old standards of output in industry — and old standards of service in merchandising. The greatest of high power machines in the field of modern merchandising is the Dayton Scale.

With an adequate "battery" of Daytons on your counters you can serve A DOZEN customers as compared with ONE under the outworn method of laborious, clumsy, inaccurate pencil computations of price and weight.

The Dayton lifts the deadweight of drudgery—and sets free human heads and human brains for more important work.

The clerk who is using a Dayton is not pre-occupied by anxiety over correct weights and prices—for he knows that the readymade Dayton computations are correct to a hair's breadth.

That is why the clerk in a Dayton Service Store can greet and converse with his customer with a free mind and a smile.

—and as business-bringer and a business-keeper, Mr. Merchant, what better asset can you have than the clerk with a smile?

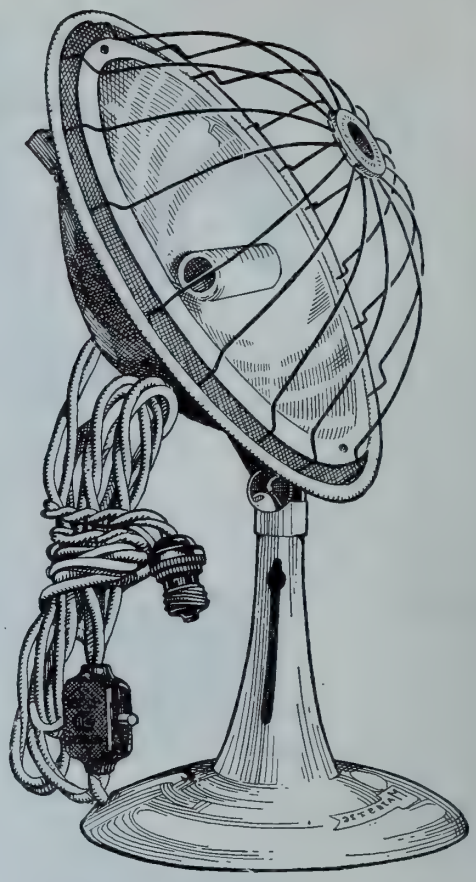
"Warm Up" to Your Customers



A seasonable line of conversation with your customers nowadays goes something like this:

"Nice day," says you.

"Yes; but Gee! It's getting chilly these mornings," says he, (or something like that). "We haven't got our furnace going yet. By the time I've shaved I'm blue right through."

"Why don't you get a Majestic Heater?" says you.

There's only one answer to that question.

. . . . . .

The Majestic Heater is the medium-priced heater. It is the popular electric heater.

The Majestic is the efficient heater—it shoots more warmth to the spot where it is needed.

And the Majestic is guaranteed for one year. Absolutely. Push it forward. There's business in it.

Predicts Advance in Iron and Steel

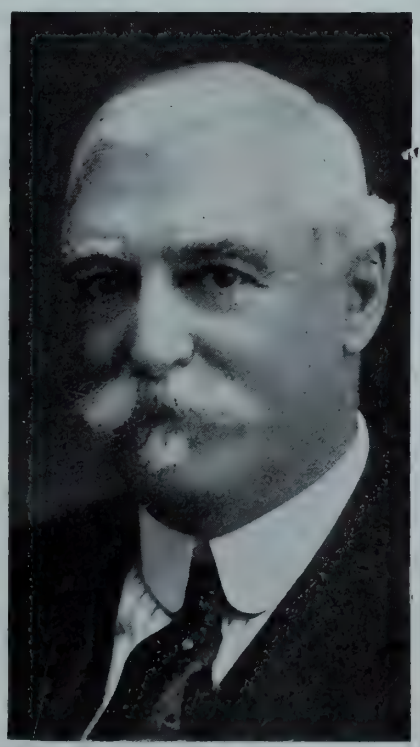
Firmer Tone in Iron and Steel Industry with Probability of Higher Prices on Pig Iron, Sheets, Plates, Bars, etc., Before End of Year —Gradual Increase in Production—High Wages on Railways and Building Industry Two Biggest Handicaps

(Based on interview of H. L Southall, of Hardware and Metal, with Robert Hobson, President The Steel Company of Canada, Ltd., Hamilton, Ont.

A FIRMER tone in the iron and steel industry of this continent combined with increasing prices on practically the whole range of products from pig iron to sheets, plates, bars, etc., was the prediction for the near future made by Robert Hobson, President The Steel Company of Canada, Ltd., Hamilton, Ont.. in reviewing conditions in this industry with Hardware and Metal this week.

Dealing generally with business conditions, Mr. Hobson is optimistic and is of the opinion that there have been increasing signs, within the last few weeks, that the low point of the lull in business has been passed and the upward swing commenced. There were said to be no indications that the expected improvement would be accompanied by any general outburst of enthusiasm, but that rather it would be a gradual tendency such as has been already noted. The recent improvement has been dissimilar from the previous "spurts" in that it has been more gradual and more consistent.

Dealing particularly with the iron and steel industry, Mr. Hobson pointed out that his company was now operating at about 50 per cent. capacity, a considerable improvement over the production percentage of a few months previous when the low ebb of about 30 per cent. was reached in Canada and as low as 18 per cent in some U.S. mills. It was shown that production of iron and steel could not be carried on profitably at the prices recently in effect. Mr. Hobson quoted an official of a large U.S. Independent Mill as having stated recently that pig iron at $20 per ton was a losing proposition. Due to the high wages of labor and high freight rates the costs in this industry were said to be out of all proportion to the prices which could be secured for its products during the conditions recently experienced. For this reason it was pointed out that mills were forced to operate on as small a scale as possible, virtually accepting only that business on which the losses would be reduced to a minimum. Now that an improvement is noted in production and with the outlook justifying the opinion that such increased production will be maintained, an increase of prices throughout the range of iron and steel products can only be expected. according to Mr. Hobson, who indicated that the recent advances on wire products and sheets was but an indication of a tendency which may soon spread further on these articles and include other mill products.



ROBERT HOBSON
President of The Steel Company of Canada Ltd., who predicts gradually increasing production in iron and steel industry with higher prices on its various products

Two Big Handicaps.

"High wages on the railways and in the building industry are the two biggest handicaps to better business which exist today," said Mr. Hobson, pointing out that the railway wages are of course reflected in high freight rates and that the existing tariffs on the railways are adversely affecting not only domestic but export trade. The possibility of lower freight rates following the present arbitration of the wage question was referred to but not held as likely to come in time to forestall the advances which are likely to be made in iron and steel products due to this and other causes. The opinion was expressed that no reduction in freight rates is likely to be effected before the commencement of the new year.

As to the potential requirements which justify predictions of gradually increasing production in the iron and steel industry, Mr. Hobson pointed out that there is a great need for the products of this industry in Canada at present. "The country has been starved for iron and steel for a considerable time," said Mr. Hobson, who pointed out that the big scale production in this industry during the war years was largely "shot off" or turned into other channels where its commercial usefulness in peace times is largely discounted. Attention was also drawn to the deplorable state of the railways due to the neglect of repairs in recent years.

"Sixteen per cent of the freight cars on our railways are sorely in need of repairs," said Mr. Hobson, pointing out that rails are also greatly in need for renovation and extensions. Rail orders are generally placed near the end of the year for spring delivery, and it was stated that considerable orders for such equipment were likely to be placed within the near future.

A factor which Mr. Hobson described as likely to have the effect of increasing

(Continued on next page.)

costs in some steel mills was the exodus of large numbers of steel workers from America and the settling of still others uvon farms. This tendency developed at the time when production in the mills was at so low an ebb as to necessitate the laying off of numbers of workers, and prospects were poor at that time for any resumption of activity. These workers are more or less skilled, and when operations again increase it was pointed out by Mr. Hobson as a possibility that the mills may find themselves short of skilled, and semi-skilled help.

Production of steel ingots and castings was increased during the months of July and August and acording to Mr. Hobson, this increase is likely to be continued gradually. August production of steel ingots and castings in Canada totalled 72,023 long tons, (the highest since November 1920) and nearly ten thousand tons more than the amount produced in June, the previous record month of the year.

Taxation has been a prominent factor in connection with the financing of mill operations during recent years, but due to care and the following of certain policies, the majority of mills are in very fair financial shape, according to Mr. Hobson, who cited some peculiar circumstances surrounding the taxing of a certain U. S. firm. The company in question had mapped out a certain mining area by diamond drilling around the borders of the deposits and then estimating the amount of ore available. The Government took these statistics and levied taxation upon the estimated output of ore from these deposits each year. It so happened when the lull in mill operations occurred that an average of only 250,000 tons of ore was taken out in a year whereas ordinarily four or five times that amount would be mined. The result was that the taxation against each ton of such ore mined during the low level of production was four or five times greater than it would have been had normal production been resumed. The matter is now the subject of some investigation, but it is an example of another phase of the difficulties upder which the iron and steel industry, in company with others, has been laboring. The satisfactory adjustment of such matters was described as an important factor in the readjustment of general conditions.

In conclusion, Mr. Hobson stated that the movements of the various industrial stocks in New York, and the price of seats on the stock exchange in that city were two good indicators of what conditions were likely to follow within the following six months in these industries in Canada. In this connection it is interesting to note that the recent strength in the cotton markets recently preceded the increase in various lines of cotton goods handled in the hardware trade. Oil stocks have also been showing strength recently, and steel stocks, significantly, have been following much the same tendency.

U.S. Tariff Will Affect British Steel

Sheffield Reports Improved Conditions, But Steel Trade as Whole is Quiet, Awaiting Lower Prices—Increasing Demand for Stainless Steel

THE outlook for the Sheffield steel trade is a little brighter, but signs of actual improvement are far to seek, says Lloyds Bank.

On the whole, the heavy steel trade of the city is only about half employed. Some firms are not able to work to more than a third of their productive capacity. None of them have more than about three or four week's orders in hand, and new business comes in very slowly. A reason put forward for this is the general anticipation of a substantial drop in coal prices, which would, of course, be followed by a reduction in prices of iron and steel. On this count buyers are holding their hands and placing orders for only such material as they must have for current needs. The fact that the demand for coal has fallen off and that collieries are finding it difficult to dispose of steam, slack, house coal, and coke alike is calculated to bring about the reduction in fuel rates which is held to be one of the principal factors necessary to a trade revival.

The railways steel departments, which have enjoyed very good trade, comparatively speaking, until recently, are now much depressed. There is a great demand for this material in the home country, and many other parts of the world, but few orders are coming in. The prices of axles, tires, and springs are considered much too high, and on this account a large amount of work has lately been placed in Belgium and Germany by South American and Indian companies which are in normal times regular customers of Sheffield. Manufacturers here are waiting with keen interest to see what policy of renewals the British companies will adopt when control ceases.

The crucible, steel trade continues very quiet, and not a few of the works which specialize in this branch are losing money week by week in keeping open and carrying their overhead expenses There are occasional instances of good orders coming to hand, but in the majority of cases the specifications are for oddments only, and the makers who can detect signs of improvement are only few in number. Moderate quantities of tool steel and alloy steel continue to go to the motor industry for constructional purposes There is an increasing demand for stainless steel, and for its new development known as stainless iron, which is softer and less difficult of manipulation The trade in files is one of the few satisfactory features of the situation All through the slump business has been maintained at a good level, and there is still a substantial flow or orders.

The U. S. A. Tariff Bill will have a serious effect on Sheffield trade with that country. Apparently it provides that the duty on best high-speed steels shall be from 60 to 70 per cent. which at present prices means something like 2s. in the pound. It is also proposed to increase the duties on nearly all classes of cutlery. The progress of the Bill is being carefully watched by Sheffield, and the steel trade has made representations with a view to getting the steel duties modified before the Bill becomes law.

UNIONISM vs MANAGEMENT

One of the wisest proposals which has yet come from the Typographical Union has just been made—the organization of a Printing Company composed of members of the Typographical Union now on strike. All other Unionists now on strike or dissatisfied with the attitude of their employers might try the same plan.

In this way the printers will be able to test their theory that the public will pay from thirty-six to forty per cent more for their printing. This is the real basis of the present strike.

The MacLean Company, and the large number of men and women who joined this organization after the Union members refused to work on the war scales, believe they understand the business situation better than the professional leaders of the Union. They believe that if an attempt had been made to increase the cost of printing from thirty-five to forty per cent., the public would go on strike and hundreds of printers would be thrown out of employment.

In manufacturing it is the selling not the producing end that has the hardest job.

Keeping Hardware Trade "At Home"

Methods Adopted by Baxter Hardware Co., Ltd., Windsor, Ont., To Hold Trade Which Otherwise Might Go to City Across the Border—Carrying a Well Assorted Stock and Giving Maximum Service—Interesting Fall Sport Enthusiasts.

EXTERIOR appearances do not make a store, but they do much to attract thereto customers, and R. G. Baxter, secretary-treasurer of the Baxter Hardware Company, Windsor, is a hardware merchant who realizes this fact. And so, during the season when busy housewives are engaged in preserving and Fall cleaning, Mr. Baxter seizes the opportunity to "dress up" the front of his store, situated on Pitt street east, in the heart of Windsor's business ditrict.

The Baxter store always presents a pleasing appearance from the front, such appearance having been immeasurably improved by the installation of a backing that is at once attractive to the eye and a fit setting for artistic window displays, a feature for which the company has made a name for itself. Whereas before the window backs were open, they are now in a tasteful white panelled effect, providing a background that helps greatly to sell the goods therein displayed.

Nor has Mr. Baxter been content to stop at dressing up his store. Taking advantage of the appeal of seasonable goods, he has arranged special selling features for the various seasons, whereby he gives his customers the advantage of the downward trend of prices of various lines of goods.

A feature which has proved eminently successful is a clearance sale of aluminum ware. This is a line which in the face of reductions is being cleared out in order to successfully compete with new stocks, bought at the reduced prices. The whole stock of utensils was placed on the market at the new price following recent reductions, thus serving both the interests of the store and the interests of customers, who may reap the advantages of the reductions before the new stock takes its place on the shelves.

Situated in a community that takes an unusual interest in sports, Mr. Baxter has equipped a very complete sporting goods department, displaying lines that are bound to appeal to the sporting public of the Border Cities. Carrying on business in a community where baseball is an important sport, his line of baseball goods is one which assures success for the venture.

Keeping Trade at Home

In all border towns, and particularly in Windsor, which is situated just across the river from one of the largest U. S. cities, there is a tendency among part of the buying public to make its purchases in the U. S. Even the unfavorable exchange rate has failed to effectually curb this tendency, which is probably due to the fact that, in the smaller Canadian community, it has occasionally been impossible to find complete lines of certain classes of goods. Sporting goods have been one of the chief lines to which this fact applies, and the Baxter Company's action in laying in a complete stock which will meet the needs of the most particular, bids fair to combat in no small measure the mania for buying abroad and to help in keeping Canadian money in Canada.

While this condition applies only to Canadian cities located near the border, yet the general principle is one which applies alike to many Canadian centres which suffer from competition in much the same form. In the case of the Baxter Hardware Co. in Windsor it is shown that the wide selection offered by a well assorted stock and the passing on of any price reductions to the customer, are two factors which help greatly to keep such trade at home. This is one of the best means for the hardware merchant in the rural and urban districts of Canada to secure the maximum amount of local trade, much of which may now go to the stores in the larger centres and the mail order firms.

What Merchant Must Do

People prefer to buy where they buy to best advantage and no one can blame them for that, but many of them are laboring under the hallucination that they can buy to better advantage in the larger centres, or in the case of Windsor, that better selection and prices can be secured by buying in the city across the

Preserving time and Fall housecleaning season call for many household utensils in graniteware, aluminumware, tinware etc., at this time of year, and window displays such as this by the Baxter Hardware Co., Ltd., Windsor, Ont., backed up with advertising and personal effort by the store salesmen help to sell such lines. Few housewives will not be interested in at least some of the articles shown in this window and the salesmen have studied the uses of the various utensils so that they are able to make many suggestions of a novel character to customers.

A wide range of sporting goods is claimed to be the secret of the success which has attended the sale of this line in the Baxter Hardware Co., Ltd. Windsor, Ont. This firm have found that a stock which offers a good selection is much desired by the average sporting enthusiast, and such a stock, combined with good service and satisfactory prices has been largely responsible for retaining much trade which ordinarily would go to larger stores in the city across the border. This solution may help the retail merchant in many of the smaller centres who is troubled with trade going to mail order houses or stores in the larger cities.

border. This tendency has developed from long practice but the day in which the distant merchant can give better service and prices than the local retailer has passed, generally speaking, and it is up to the retailer to show his local prospects that not only can they buy to equally good advantage in their home town, thus saving expense of purchasing from a distance, but they indirectly benefit themselves by increasing the volume of local trade. Of course to do this the store must offer a wide selection of up to date requirements. It is by following this plan that the Baxter Hardware Co. has saved much business from going across the border to a U. S. city, and it is by maintaining such a stock and by giving good service that every retailer can secure the maximum of local trade.

Studying Home Requirements

The window displays in the Baxter Hardware Co. are changed frequently and are always used as one of many selling helps to push seasonable lines. Thus publicity is given in local advertising to a line of kitchen utensils, for instance, and the window is dressed as illustrated in this article. This line is then given special prominence in the store interior and the store salesmen have a number of suggestions to offer to the housewife customer as to how she can use some of these utensils to good advantage at this season of the year. A study is made of the home requirements and from questioning a number of housewives a large list of suggestions is secured, many of which will be unique to many of those to whom the suggestions are extended. With the preserving season in progress and Fall housecleaning time approaching, a display of graniteware, aluminumware, tinware, etc., is very seasonable and backed up with such effort as has been outlined these lines should move rapidy.

In the dsplay shown herewith the various utensils are seen tastefully arranged some of them affixed to hooks in the panels which form the back of the window. Many wives will have use for at least some of these utensils.

Fall Sporting Trade

In the sporting goods department a wide range of requirements for practically every line of sport indulged in locally, is maintained for the purpose adready outlined. This includes tennis, baseball, fishing, boating, lacrosse, rugby, hockey, etc. In the picture shown elsewhere in this article will be seen a wide assortment of various sporting goods lines. Tennis is a popular sport in the cooler weather of early Fall and many fishing parties are being organized for the Fall expeditions to the hunting districts. The same plan of advertising and personal effort is used in connection with goods as with other lines, details of which have been given.

NEW FIRM FOR HAMILTON, ONT.

Hamilton, Ont.—Wallace Barnes & Co., of Bristol, Conn., has located here and will commence operations at an early date in the premises formerly occupied by the National Machinery & Supply Co. The new industry is capitalized at $300,000 and will employ about 150 hands. It will specialize on all kinds of screw machine products, springs, etc. The parent company in Bristol, Conn., is capitalized at $1,510,000 and employs 500 hands. Officials of the Canadian branch are: President, Fuller F. Barnes; Vice-President, Harry C. Barnes; Secretary-Treasurer, Freeman M Norton, and Directors, Carlisle F. Barnes and C. Victor Grantham.

NO SHADOWS FROM THIS ELECTRIC LAMP

A lamp that throws a brilliant shadowless light on the table is said to have been introduced into London, England, by Major J. P. Waller, who represents French makers. This lamp it is claimed does not cause the slightest shadow.

This is accomplished by means of a prismatic lens and a number of silvered minor reflectors. The light, a 50-candle power filament, is surrounded by the cylindrical lens which gathers up the diverging rays and throws them in a series of parallel beams on to the mirrors. From the 50-candle power filament an illumination of 3,000-candle power is obtained over the area on which the operator is working. There is no heat.

For the Man Behind the Counter

Co-operation of Employer With His Employee

Growing Importance of Such Co-operation —Employee Must Feel He is Part of the Business System—Handling of Customers' Complaints

WHEN a representative of Hardware & Metal asked G. V. White, Advertising Manager, for Summer Co., Hardware Merchants of Moncton, N.B., if he thought the matter of co-operation between employer and employees was given the attention it was entitled to, and the place it occupied in the success or failure of a business, Mr. White said that he had always considered it one of the most important factors in the successful operation of any mercantile business. "I think this is being recognized more and more each year especially among the larger concerns. The adopting of the Saturday half holiday, the shortening of working hours, the providing of athletic grounds, educational facilities, insurance opportunities, profit sharing plans etc., all have tended to show the increased interest taken by the employer in his employees as a whole, but while all these increase the good feeling they do not of necessity produce co-operation. The employee must be educated to feel that he is an actual part of the business system, that the company's interests are his interests, that its growth means his advancement, in other words that he is a working partner.

A Store Policy

"The developing and fostering of this company spirit should become a store policy in every establishment. Co-operation works both ways, from the bottom up and from the top down and must have its foundations on mutual interests and confidence. I once heard the manager of one of the large houses in the American West say 'I consider I owe a duty to those in my employ second only to that which I owe my own family,' and he demonstrated every day that he meant it and the loyalty and faithfulness of that staff to the company was one of its biggest assets. Conventions, annual banquets, outings or any form of a "get together" gatherings are productive of good, but none in my opinion are equal to the weekly store meetings, with the manager in the chair to set forth the aims and plans of the company and offer and receive suggestions as to the best ways for carrying them out. Here all meet on an equal footing and such questions as improved deliveries, the adding of lines called for but not in stock, methods for moving slow sellers, complaints of customers, opinions on makes of goods recently added, what customers say about them, why they prefer other makers' products, price comparisons, and all kindred subjects pertaining to the business are talked over and thrashed out.

"Buyers are called in to explain new lines they have bought and pass along to the salesmen the talking points in their favor, their uses, advantages over other makes, etc., in fact all the information they can give that will help those who are responsible for their sale. If still in town, the representative who made the sale to the company is also given an opportunity to talk up his goods. This results often in the salesman being able to create a demand for the article even before it is received and talk it intelligently after it has. Many a good line has remained on the shelves and became old and shopworn because this information had never been furnished. Often one of the hardest chasms to bridge is between the buying and selling ends of a business. Too many buyers resent suggestions and rely entirely on their own judgment forgetting that through daily contact with the buying public the salesman becomes very conversant with their needs. No two departments in a store should be so closely linked for they both aim for the same ends, the buyer to buy goods that will sell and the salesman to sell the goods that are bought, working together this can be accomplished, working separately standard goods often remain "out of stock" indefinitely, while new lines accumulate in the shelves unmoved. An employee should always be made to feel that as long as he is in the right he has the entire management back of him. I remember a piece of 'store literature' I once saw when in a large retail store in the West. It was in the form of a circular letter and ran something like this:

" "To the Salesmen of ———— Co.,

Gentlemen:

It has come to my notice that a mistake in an order recently involved one of you in an altercation with a customer in which he received considerable abuse and only succeeded in making the whole matter worse for both himself and the company and had to have it straightened out from this office in the end. Had he turned the matter over to Mr. ———, our floor manager in the first place he would have been saved an unpleasant situation and the adjustment would have been easier and more satisfactory to all. For those who have not been long enough in our employ to understand our policy in dealing with matters of this kind let us state it briefly. We have every confidence in our employees and will stand back of them when in the right, in all cases we will give them the benefit of the doubt and their word will have first consideration with us, (if we have not absolute faith in their truthfulness they cannot remain in this employ), errors of judgment are not criminal and are common to all, but where they lead to mistakes in filling orders we want the matter put at once in the hands of your floor manager; you will find him in such cases ready to adjust it for you or advise you what to do, this is part of his duties. Do not in any case conceal, cover up or try to straighten it out yourself. You are apt only to complicate the situation and endanger the good will of "our" customers. We expect you always to do the best you can and it is our experience that our salesmen seldom make the same mistake twice. When in doubt in filling an ord-

(Continued on Page 41)

IMPORTANCE OF "MEN BEHIND THE COUNTER"

"Every national advertising campaign stands or falls on the indifference or co-operation of the retail store clerks," said C. H. McIntosh, President of the Associated Advertising Clubs of the World in a recent address in Toronto. The speaker had much to say about the passing of the old-fashioned ideas of salesmanship pointing out that the day of merely tempting the public with the article on its price, had gone. There had come a realization that education was the solution of many of the merchandising problems. Retail store salesmen as an important link in the chain, should give due consideration to the study of salesmanship and the features of their local trade.

Hardware and Metal

Canada's National Hardware Weekly

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

SATURDAY, OCTOBER 8, 1921

Briefs

THERE IS a great deal of truth in the statement of C. H. McIntosh, President of the Associated Advertising Clubs of the World Meeting in Toronto this week to the effect that "every national advertising campaign stands or falls on the indifference or cooperation of the retail store clerks." The co-operation of retail salesmen, in company with certain other factors, was described as the means by which the distribution of merchandise was kept in motion. Otherwise the channel would become blocked.

IN CONNECTION with the recent tendency toward standardization in almost every line of manufactured product, it is interesting to note that a flashlight manufacturer found he could make just as many sales with a range of 36 products as with 80 various styles. A nationally known maker of clocks found that he could reduce his line from 650 to 80. In stamped metal lines it was established, during the war, that 4,250 lines were superfluous. In these days of necessary cost reduction the question of standardization becomes an all important one both in manufacturing and in the retail trade. The retail hardware merchant can concentrate upon certain standard lines to better advantage than spreading his effort over a wide range of products many of which would probably not repay the energy spent in educating customers to their use.

WHILE Canada's imports for the year ended in August, 1921, show a vast decline from the figures of last year it is interesting to note that they are still nearly $90,000,000 in excess of the figures for 1919. Exports from Canada during the three years have shown a decrease. Canada's imports from Germany during the year totalled $2,065,266 as against $370,765 last year and $10,655 in 1919. Canada's exports to Germany also show increase, amounting to $8,417,127 in year ending August 1921 compared with $2,402,122 for 1920 and $38,157 in 1919.

The Retail Salesman

HOW FREQUENTLY the true importance of the "man behind the counter" is overlooked in dealing with the problems of hardware and of other retail lines of business, under present conditions. There is no question that the retail hardware salesman can be a very important link in the merchandising chain or he can be the weakest link, and it should be kept in mind that the whole chain is no stronger than its weakest link. In the present condition of business the retail salesman can exert an important influence. He is the man in direct contact with the ones to whom the final sale of goods should be made. He is the one best fitted to size up the changing tendencies of buyers, of the obstacles which are apt to creep in to combat the retailer's trade, etc. In the conditions of retail trade now emerging from the melting pot of price reductions, bargain sales, and general depression the retail salesman is presented with an unique opportunity for displaying his true mettle. In some cases he is going to be called upon to show his real usefulness, for his employer is faced with the necessity of doing business on a most efficient basis to meet the stern competition for business which has been introduced. The slack ways of the boom years will have to be forgotten and the resourcefulness of every retail salesman brought to the fore to develop the maximum trade from local prospects.

A New Era

A NEW ERA is commencing in the hardware business of Canada. After the months of declining prices and reduced volume of trade there has come a firmer tendency in hardware prices with advances in some lines and indications of the probable spread of such advances to other lines. Simultaneously an improvement in general business conditions is noted, an improvement not so much in the nature of a fluctuation, as has been previously experienced, but a gradual, consistent improvement which shows signs of continuing. Iron and steel is a basic industry which, to a large extent, reflects general conditions. Hence it is interesting to note from details given elsewhere in this issue that the average production of the mills has within the past few months increased approximately from 30% to 50% of capacity. This gradual improvement is the reflection of more confidence on the part of buyers, of stocks reduced to a minimum in wholesalers' and retailers' hands, of railroad renovation becoming a necessity, of the ironing out of many of the wrinkles of the readjustment period in our industrial system.

There are yet some obstacles in the way, prominent among which are high wages on the railways and in the building industry, but is possible that these difficulties will be minimised shortly as the result of efforts now being made.

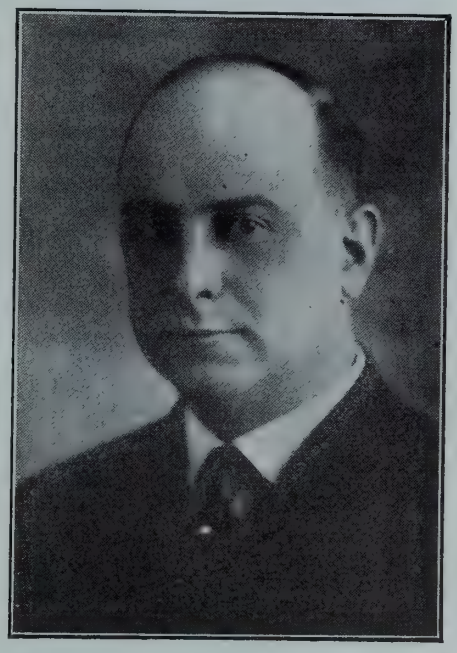
In this new era the hardware merchant who will operate successfully is the one who will give close attention to details of cost and turnover. As a matter of fact the average store trade of the hardware retailers in Canada has suffered little; the chief falling off has been in regard to factory and mill supplies, etc., which factories operating at a small percentage of capacity could hardly be expected to purchase. The return of this latter class of business will be gradual, but in order to get a good share of the regular household and construction trade it will be necessary to give close attention to the two subjects mentioned. Under prevailing conditions the hardware merchant may think it difficult to reduce costs when the various factors such as taxes, fuel, wages, etc., remain high. It should be borne in mind that the most effective way to reduce costs, on the per unit basis, is to increase the turnover of the existing organization. There are many phases of this problem to which the merchant should give close study at the present time, such, for instance. as the changing wants of customers, the competition of department stores, mail order houses, and the natural disinclination of people to buy anything new until they are actually forced to do it.

The adoption of adequate means of combatting these forces and of developing new sources of business demands a close study on the part of the merchant whose business will prosper in the new era at hand.

News of Western Canada

J. J. Corbett Now General Manager Of Miller Morse Hardware Co., Ltd.

WINNIPEG, Man. — Announcement is forthcoming from officials of the Miller Morse Hardware Company Ltd., of this city, that John J. Corbett, for ten years identified with the firm in the position of Credit Manager, has been appointed general manager of the company. Mr. Corbett assumed his new duties from the first of the present month and has received many good wishes from business associates in the hardware trade of Winnipeg and other Western interests, for his success in the position to which he has been promoted.



JACK WOOD

Retailer of Swift Current, Sask. elected 2nd. Vice President of the Dominion Board R. M. A. at the recent elections previously announced in Hardware and Metal in conjunction with the convention report.

WESTERN HARDWARE FIRMS SUFFER FIRE LOSS

Hatton, Sask.—Loss of over $300,000 was caused by fire which wiped out twenty-five places of business among which were McPherson's hardware; and Auger's hardware. During the progress of the fire there were some explosions from oil barrels.

WESTERN CANADA NOTES

Messrs. Dunbar and Ragan of Stettler, Alberta have sold their hardware store to Messrs. Cullis and McElhone. The new proprietors are well acquainted in Stetler.

F. Anderson of Carstairs, Alberta, has purchased the hardware business of J. H. MacNeil of Delia. Mr. Anderson has been in the hardware business for twenty years.

G. Cruickshanks of Hillcrest, Alberta, is opening a hardware department in connection with his store. This has necessitated the enlarging of his premises.

The B. D. Brown hardware store at Galahad, has been sold to J. Ledingham of Richdale, Alberta. The new proprietor purchased both the stock and business and the store has been closed recently to permit the taking of stock.

Mr. Ledingham will be in charge of the store but for the present Mr. Renwick of Calgary is managing the business.

Mr. Brown has been in ill health for some time and intends to take a trip to the coast for his health.

Rex. Simpson is assisting in the hardware store of Spiece & Sons, at Mirror, Alta., while Mr. Spiece, Sr. is away undergoing treatment at Rochester.

Fire broke out in the hardware store of Leonard Goheen at Mantaria and destroyed the building and stock. The loss was about $10,500 partly covered by insurance.

LEWIS C. MARR NO LONGER WITH MILLER MORSE HARDWARE CO.

Winnipeg, Man.—Lewis C. Marr, for several years manager of the Miller Morse Hardware Company, Ltd., is no longer associated with this firm.

CO-OPERATION OF EMPLOYER AND EMPLOYEE

(Continued from page 39)

er or dealing with a customer do not be afraid to go higher up for information or advice, we are always glad to give these—it is easier and pleasanter than straightening out mistakes. Always go to your immediate superior first with any personal matters you want to talk over to have adjusted, if you cannot get satisfaction bring it to the writer direct. In closing let me state again that we are with our employees first, last, and all the time and expect their attitude towards the company to be the same.'

"That letter was on a line then entirely new to me and made an impression I have never forgotten. They told me that in that company's experience the condition referred to in the last sentence had long existed and so I believe it will exist in any other where the subject is approached in the same way. Yes, Sir, I believe in co-operation, the smoothness with which this business here runs testifies to its value."

MERCHANTS WANT REPRESENTATION IN THE SENATE

Winnipeg, Man.—Recognition of the Retail Merchants as a class by representation in the senate has been advocated by the National Executive and approved by merchants organizations all through Canada, E. M. Trowern, national secretary of the Retail Merchants Association of Canada, stated recently on his return from an extended trip in the west.

"Merchants at every city and town in the west feel, since the present government is recognizing various classes, such as manufacturers and labor in the senate, the retail merchants are entitled to representation" he said.

WANT BY-LAW SUSPENDED

Winnipeg—A delegation of Winnipeg merchants, accompanied by J. H. Curle, Provincial Secretary of the Manitoba Association, have asked that the recently enacted by-law regulating the inspection of weight measure and size of package goods be suspended for the time being.

The argument put forward was that under its present wording the regulation could not very well be put into operation. This by-law required that all weights and measures be properly stamped, and also that with every article sold a ticket or invoice be delivered with the goods to the purchaser, showing the exact measure or count or net weight of the package.

The by-law is cumbersome and unworkable, say the merchants, as it would require keeping the customer waiting until an invoice giving the required particulars was made out, and this in a busy period of the day is almost an impossibility.

Events in the Trade

NEW FIRMS

Conestogo, Ont.—Huehn Bros. are commencing in the hardware and general store business.

FIRE LOSS

New Hamburg, Ont.—H. L. Albrecht, hardware merchant suffered recent loss by fire.

Ottawa, Ont.—Fire did several thousand dollars' worth of damage to the building and stock of the Leslie Tinware Co., Scott Street.

INCORPORATION

McFarlane Manufacturing Co. Ltd., has been incorporated in Ontario to manufacture woodenware. Head office in Toronto, capital of $100,000.

W. D. Shambrook & Co., Hamilton, Ont., have received a Dominion Charter and have changed the firm name to "Duro Aluminum, Limited." There will be no change in management or policy. W. D. Shambrook is president of the new company.

PERSONAL

Charles Hunter formerly with the Cowan Hardware Co., London, Ont., and recently secretary of the Western University Medical school has returned to his position with the hardware firm.

Robt. C. Holder of St John, N. B., has been apopinted representative for the Imperial Varnish and Color, Co., Ltd., in the Maritime Provinces.

H. Laughton, representing George Butler & Co., Ltd., manufacturers of cutlery and electric plate, Sheffield, England, called at the Montreal office of Hardware and Metal this week. Mr. Laughton is calling on the trade in Montreal, Toronto, Quebec and the Maritime Provinces before returning to England.

RETAIL HARDWARE EXHIBITS AT KINGSTON FAIR

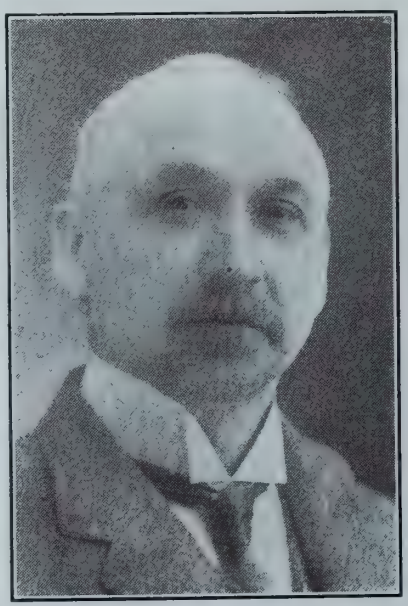
Kingston, Ont. — An exhibit that brought forth much comment at the Kingston Industrial Fair was that of Lemmon Bros. tinsmiths and hardware merchants. One of the features of the display was a combination coal and gas range. A pipeless furnace was also demonstrated.

Another exhibit at the fair worthy of special mention was that of the W. H. Cockburn hardware. The firm made a special feature of paints and varnishes and demonstrated this line. The firm had a miniature house showing to good advantage roofing and paint. In addition the store had a splendid exhibit of tools and cutlery.

DEATH OF ST. MARY'S MANUFACTURER

St. Mary's, Ont.—James Maxwell, President of the firm of Maxwell, Limited, and a prominent member of the Canadian Manufacturers' Association, died at his home in St. Mary's.

Mr. Maxwell was born in Paris, Ont., 64 years ago. He was educated in Paris High School and Dr. Tassie's Academy at Galt. About 36 years ago the family moved to St. Mary's, where his father had founded a firm bearing his name for the manufacture of agricultural implements, washing machines, churns and other woodenware. On his father's death Mr. Maxwell became President and had always been active manager of the firm's affairs.



LATE JAMES MAXWELL

President of the firm of Maxwell Ltd., St. Mary's, Ont. and a prominent member of the C. M. A. whose death is announced.

ALTERING HARDWARE STORE

McMann's Hardware Store, Yonge St. Toronto, is being altered by having the store front razed to allow for street widening.

WESTERN CANADA NOTES

Frank D. Scruton, traveller for the J. H. Ashdown Hardware Co., Ltd., Winnipeg, has just returned from the East where he has been enjoying his honeymoon.

C. W. SUMMERS MAY BE PRESIDENT LONDON HARDWARE ASSOCIATION

London, Ont.—There is little doubt according to officers of the London Retail Hardware Dealers' Association that Ex-Alderman Charles W. Summers will be elected president to fill the vacancy created by the death of President Thomas Jones. Mr. Summers has been appointed acting president and at the regular meeting to be held next Monday the appointment is likely to be made permanent.

One of the most important matters to be considered at the meeting will be price revisions. Local dealers have followed the markets with extreme care and are marking prices downward as the various reductions are made. They have in this way satisfied the buying public that they are giving them real reductions, this being obvious when comparison is made with former quotations, and at the same time by working together they escape the danger of having varying quotations on similar staple lines.

CHANGES IN STAFF OF COWAN HARDWARE COMPANY

London, Ont.—Howard Crummer has been appointed acting general manager of the Cowan Hardware Co., to fill the place made vacant by the death of President Thomas Jones. Charles McKerlie takes the position of store manager and assistant buyer.

The firm has been making some improvements in connection with the interior of the store and a handsome twelve foot wall case of plated ware has been built, right up at the front on the left of the main entrance. The case has all glass shelving and special lighting arrangements and when filled with various plated goods makes a most attractive showing.

"Our business in this line has developed steadily," said acting manager Crummer, to Hardware and Metal, "and it is now not only an all year seller but a big one. Sales at Christmas and during the wedding seasons are very heavy.'

Speaking of business generally, Mr. Crummer stated that it has been very fair.

"We have found it good policy," he stated "to watch collections closely. There have been quiet periods in the business but we find from our books that on the whole sales are averaging up pretty well."

TORONTO MERCHANTS WILL COMBINE IN ONE ASSOCIATION

A meeting is to be held next Monday, October 10, at the R. M. A. offices, of leading Toronto merchants from each section of the association for the purpose of forming a united Toronto branch, a combined organisation of all retailers' sections. There are between 1,500 and 1,800 members in Toronto, and it is the intention of the combined forces to interest themselves municipally, and they will endeavor to have some representatives to the Toronto City Council.

A meeting of the merchants on Yonge Street, Toronto, from King Street north to Dundas Street, was held in the office of the Retail Merchants' Association for the purpose of protesting against the increased assessment on merchants' property in this district. The increase amounts to more than three and a half millions, and at the meeting it was decided to engage the legal services of T. P. Phelan to go before the Toronto Board of Control to fight this increase.

BICYCLE OUTLOOK GOOD SAY DEALERS IN CONVENTION

The City of London, Ont., was selected by the Canadian Bicycle Dealers' Association, recently in convention at Chatham, Ont., as the convention city for next year. A number of speakers were heard during the convention among whom was J. B. Gibson, general manager of Canada Cycle and Motor Company, of Toronto, who told the delegates that the indications adready pointed to a resumption of normalcy in business.

D. Anderson, of the Dunlop Tire and Rubber Company, of Toronto, spoke happily of a coming business revival shortly. That there is an unlimited field for the securing of new business in Ontario was the opinion voiced by Secretary Wenige, the principal speaker, in an interesting discussion of the need for more printers' ink to aid bicycle sales.

"Our market is right here; we only have to go after it to get it," the secretary said. To stimulate bicycle sales he suggested more new ideas put forth to make the bicycle still more popular in the country.

OBITUARY

A. B. Petrie of Guelph, president and founder of the Petrie Mfg. Co., Hamilton, Ont., died at his home a few days ago. Mr. Petrie, who had reached the age of 80, started the Petrie Mfg. Co. some 20 years ago, the first factory being in Galt. The business was next moved to Guelph, then later brought to Hamilton about 16 years ago. This firm which manufactures cream separators, gasoline engines, and sprayers, will be carried on by the five sons, A. B. Jr. H. J.; P. S.; C. M. and G. R. Petrie, all of whom are interested in the business.

CHANGES IN CEMENT BOARD

Montreal—At a meeting of directors of the Canada Cement Company, Frank P. Jones, vice-president and general manager of the company, was appointed to the presidency to fill the vacancy caused by the recent death of Senator Edwards.

FRANK P. JONES

formerly vice-president and general manager of the Canada Cement Company who has been appointed to the presidency of the company filling the vacancy caused by the death of Senator Edwards. Photo by courtesy of International Press.

There was another vacancy on the board caused by the death some weeks ago of J. M. Kilbourn of Owen Sound, one of the vice-presidents. In view of the elevation of Mr. Jones, this left two of the vice-presidential positions vacant.

These were filled by the appointment of A. C. Tagge, an officer of the company who has been on the board for some years, and Henry Jones Fuller of New York, president of the Canadian Fairbanks Company, Limited.

The vacancies on the board were filled by the appointment of Gordon C. Edwards, Ottawa; and T. A. Russell, Toronto. Mr. Edwards has been associated with the lumber business of the late Senator Edwards since he was a boy. He is a director of numerous Ottawa companies.

BRISK BUSINESS IN HARDWARE

Sherbrooke, Ont.—J. S. Mitchell and Company make the following report: "We can report brisk business for the last two weeks. Seasonable Fall lines are moving in satisfactory volume; inquiries are more numerous in many lines; and while orders are not heavy, there are enough of them to keep our full staff employed. Indications point to a fair amount of business for the remaining months of the year."

November Will Be "Perfect Package Month"

All trades and industries have been asked to co-operate in the "Perfect Package Movement" to be inaugurated by the railroads, steamship lines and express companies in the United States and Canada, in November, which has been designated as "Perfect Package Month."

The purpose of the movement is to stimulate further public interest in good packing of shipments and to enable the carriers to improve the transportation service of the country. During November, an examination of all shipments sent by freight or express, will be conducted, to obtain information as to the best shipping methods carried on by the various trades and industries.

Comparisons of the records made by the various cities during November will be announced at the conclusion of the drive. The entire working forces of the railroad and express carriers, comprising some 2,000,000 men, will aid in the movement. The railroads through the American Railway Association, composed of practically all of the railroads in the country, are pushing the campaign, as a means of raising the standard of the service.

METAL SHINGLE VS. WOODEN SHINGLE

Ottawa, Ont.—Arguments for and against the use of wooden shingles for roofing were heard at the third annual meeting of the Dominion Fire Prevention Association. The conservation of the product of Canada's forests and the fire menace of wooden shngles on buildings were two of the points brought out on one side of the question. On the other hand speakers defending the wooden shingles pointed to the ruination of an important industry in Canada if wooden shingles were banned. From the standpoint of fire hazard it was agreed that the metal shingle was much to be preferred but it was stated that in many respects the metal shingle could not compete with the wooden one.

NOVEL DISPLAY HELPED FIREARMS SALE

Jos. Gagne & Fils. hardware merchants of Sherbrooke, Quebec, recently experienced good results from a somewhat novel window display of hunting goods. Four wall board panels were painted with a attractive landscape view and some foliage was used to give it a realistic touch. In the foreground were shown fishermon's hampers, rifles, ammunition, camp equipment, etc. The view showed a deer approaching the river from the cover of the dark forest, the landscape measuring 8 x 12 feet. The sale of firearms and ammunition was said to have been particularly aided by this window trim.

Hardware Letter Box

OIL BURNERS

F. C. Bishop, Hardware, Norwich, Ont.—Kindly advise the name of the manufacturer of oil burners for heating water for a hot water heating system.

Answer.—The Fess Oil Burners of Canada Limited, Toronto, Ont.

CORK WASHERS

The Collette Manufacturing Company, Collingwood, Ont.—Will you kindly give us the names and addresses of Canadian firms making cork washers?

Answer.—These can be secured from the Freyseng Cork Company, Ltd. Toronto, Ont.

Although not listed in this connection, we would also suggest that you try the Armstrong Cork and Insulation Co., Ltd., Montreal, Que.

WOODEN TANKS

Toronto & York Radial Company, 84 King Street, E. Toronto, Ont.—Could you supply us with a list of Canadian firms manufacturing wooden tanks?

Answer.—S. Anglin & Company, Kingston, Ont.; Bell Planing Mill Co. Ltd., Barrie, Ont.; The Barrie Planing Mills Co., Barrie, Ont.; W. E. Butcher, St. Mary's Ont.; D. Carkner & Co., Kenmore, Ont.; W. H. McElroy & Son, Blyth, Ont.; Christie Woodworking Co., Ltd., St. John, N.B.; The Dominion Well Supply Co., Ltd., Cargill, Ont.; W. C. Edwards & Co., Ltd., Ottawa, Ont.; Goold, Shapely & Muir Co., Ltd., Brantford, Ont.; C. N. Huehn, Waterloo, Ont.; J. & J. Kerr Co., Ltd., Petrolia, Ont.; J. Landreville & Son, Toronto, Ont.; Geo. M. Mason, Ltd., Ottawa, Ont.; Ontario Wind Engine & Pump Co., Ltd., Toronto; W. P. Plant, Hastings, Ont.; Woodstock Wind Motor Co., Ltd., Woodstock, Ont.; W. H. White, Ville St. Pierre, Montreal, Que.

HAY RAKES

J. L. Demere, Thetford Mines, Que.—Will you please quote us the name of the manufacturers of hay rakes?

Answer—The Rugg-Ball Manufacturing Company, Ltd., Ayers Cliff, Que.

SPORTING SUPPLIES

Messrs. Scriven & Rutherford, Tilbury, Ont.—Kindly give us a list of Canadian firms engaged in the manufacture of sporting supplies?

Answer.—Walter Bentley & Co., Ltd., Niagara Falls, Ont.; The A. J. Reach Co., Brantford, Ont.; Western King Mfg. Co., Ltd., Winnipeg, Man.; Harold A. Wilson Co., Ltd., Toronto, Ont.; Winnett and Wollinger Ltd., Toronto, Ont.

BUTTS AND HINGES

Stevenson Bros. Limited, 48 Colborne St., Toronto, Ont.--Kindly give us a list of firms manufacturing butts and hinges in addition to the name of the Canada Steel Goods Limited.

Answer.—Hinges--Butt, Tee Strap, Spring, etc. in Cast, Brass, Bronze and Iron.

Canadian Yale & Towne, Ltd., St. Catharines, Ont.; Dominion Machine & Tool Co., Ltd., Toronto, Ont.; The Hamilton Stove & Heater Co., Ltd., Hamilton, Ont.; Montreal Hardware Mfg. Co., Ltd., Montreal Que.; Peterborough Lock Mfg. Co., Ltd., Peterborough, Ont.; The Springer Lock Mfg. Co. Ltd, Belleville, Ont.; The Robt. Mitchell Co., Ltd., Montreal, Que.; London Bolt & Hinge Co., London, Ont. (Screen and strap hinges only); The Jas. Smart Mfg. Co., Ltd., Brockville, Ont.; Soss Invisible Hinge Co., Ltd., Toronto, Ont.; Acme Stamping & Tool Works, Ltd., Hamilton, Ont.; N. Slater Ltd., Hamilton, Ont.

"FAULTLESS" OIL COOK STOVES

C. Zilliax & Son, Hardware, Listowel, Ont.

In connection with your inquiry of recent date as to the present manufacturers of the "Faultless Oil Cook Stove."

We would refer you to the Faultless Stove Works, St. Charles, Ill., U.S.A.

The McClary Manufacturing Co., are listed as the makers of a "Faultless" wood base heater, but state that they are not making this at the present time. It is possible however, that repair parts for this class of heater can be obtained from this firm.

The Canadian manufacturers of Oil Stoves are as follows:— McClary Mfg. Co., Ltd., London, Ont. Perfection Stove Co., Ltd., Sarnia, Ont., and The Sheet Metal Products Co., of Canada, Ltd., Toronto, Ont.

MIRRORS

George Fraser, Riding Mountain, Man.—Kindly give me a list of firms handling mirrors.

Answer—We presume you have reference to the manufacturers of mirrors, and therefoe have pleasure in referring you to the following Canadian firms making mirrors of various kinds and sizes. Toronto Plate Glass Importing Co., Ltd., Toronto, Ont.; Consolidated Plate Glass Co. of Canada, Ltd., Toronto, Ont.; The Hobbs Mfg. Co., Ltd., London, Ont.; Hamilton Mirror Plate Co., Ltd., Hamilton, Ont.; The Prairie Glass Co., Ltd., Winnipeg, Man.; Imperial Glass Works, Toronto, Ont; Montreal Paint & Glass Co., Ltd., Montreal, Que.

NEW CATALOGUES

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

BANNER STOVES

Catalog No. 8, a new work on stoves and ranges, has been placed before the fall trade, by the Galt Stove & Furnace Co., Ltd., of Galt, Ont. The book is neatly bound, with attractive coloring, and contains a large number of comprehensive illustrations which practically place the products before the mental vision of the dealer. Adequate description as to sizes and types are also given, while in addition to these various details, some special rules are presented governing the setting up of stoves and ranges. This list of regulations is especially useful, both to the dealer and customer.

Among the "Banner" lines catalogued in this issue are the Banner Combination in various styles; the Dunamel Combination; the Banner Chieftain; the Rexall Banner; the Banner Blunos; the Canadian Banner; the Eclipse; the Monarch Cook; the Economy; the Art Banner; the Colonist; the Dandy; the Rambler; the Cyclone Banner; the Kitchen Heater and the Banner Compact Cook. Many of these stoves and ranges are made in different models.

Heaters for various purposes, kitchen, parlor and so on, also occupy a prominent place in the pages of this book. Among these types mentioned are Tortoise Heaters; the New Maple Banner; the Highland Oak; the Premier Oak; the Victor; the Dandy; the Strathcona; the Marvel; Colonial; the Acme Farmers Boiler, and the Champion Agricultural furnace.

The Galt Stove & Furnace Co., have announced that a separate catalog will be issued covering their line of furnaces. This firm will also mail a special booklet on the Majestic line of coal chutes and building specialties.

GURNEY'S NEW BOOK

A neatly-arranged and easily reviewed book on stoves and ranges has been distributed by the Gurney Foundry Co., of Toronto. The new catalog presents to the trade, both through illustration and description, the latest types of Gurney products in cooknig and heating service. It is a comprehensive book of 52 pages, interposed with numerous cuts, and places before the dealer various styles of stoves and ranges, adaptable for wood, coal and gas fuels; whlie a section is also devoted to the presentation of combination stoves. The book is finished in attractive colors, and numbered by the manufacturers, catalog S-212.

BELTING

The Main Belting Co., of Canada, 10 St. Peter Street, Montreal, have just issued a comprehensive publication setting forth the quality and merits of Leviathan and Anconda belting. The volume of 144 pages covers information with regard to power lems, motor drives, belting in pulp and transmission, solution of modern belt probpaper mills, and other industries.

A number of illustrations show the strength, durability, economy, efficiency, claimed for these products of the Main Belting Co. Users of belts in any form will find in the new publication, entitled, "Belting," a convenient work. An index is given which indicates where the data on power problems may be found. Special pages are devoted to the capacity of belt, elevators, centrifugal belt elevators, continuous belt elevators, etc., while particulars are furnished with respect to belt fasteners, clinching hooks, steel belt lacing, belt punches, cutting pliers, etc.

The new publication is arranged that any additional printed matter issued by the manufacturers can be added.

METAL SPRAYING PISTOL

One of the trade booklets recently to hand describes the Schoop process of metal spraying. This involves the principle of an automatic spraying pistol, the object, of course, being to produce a non-corrosive surface on iron and steel. In this Schoop process the coating metal adheres to the object chiefly by mechanical union. The metal is discharged in hot unpalpable particles, moving with high velocity, and these when directed upon a prepared surface, penetrate the pores of the object, and do so in the presence of reducing gas, which prevents oxidization at the junction of the metals."

It is claimed by the manufacturers that the process may be applied in five different branches of utility; protective coatings, bonding or junction coatings, electrical coatings, electrical coatings, decorative coatings, and detachable coatings.

The book is being distributed by the Metals Coating Co., of America, with head quarters at Philadelphia, Pa.

FIREPLACE FITTINGS

"The fireplace is an altar for sacrifice, for worship, for refuge, for love."

"Make, therefore, this altar the most beautiful place in the home."

With the above epigram in a prominent place on the fly-leaf, the Enterprise Foundry Co., of Sackville, N.B., have placed in the hands of the trade their Catalog No. 15, on Fireplace Fittings and Open Grates.

The new booklet presents in a quietly-refined manner, the various models and types of Electric grates; Open fire grates; Portable Basket grates; Andirons; Dome and Common Fireplace Dampers; Ash Dumps, and Pit Doors. There is also a closing reference to the Enterprise lines of stoves, ranges and furnaces.

Full details of these products as to size, weight, finishes, and special features are not overlooked. The various illustrations are clear-cut, and give a more or less accurate impression of the appearance and usefulness of these many fireplace appliances.

STORY OF GLASS MAKING

The Canadian Libbey-Owen Sheet Glass Company, Limited, Hamilton, will gladly send to readers of Hardware & Metal a booklet which they have issued entitled "The Story of Libbey-Owen's Flat Drawn Glass." This booklet describes the process of making flat drawn glass and should prove interesting to all hardware men.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

PRICE readjustments entailing both increases and concessions arouse keen interest in the current hardware markets. Another long list of commodities registering lower quotations includes brass and copper tubings, rods, and sheets; cast iron fittings; all kinds of plugs, malleable and cast bushings; unions of all sizes; black and galvanized malleable fittings; Canada plates; bolts and nuts; Beaver auger bits; Dover and Potts nickle-plated sad irons; knife-handled wrenches; the Combination line of screen and storm doors; also the Kasement make of doors; both the Joseph Rodgers, and McGlachan-Clark products in tableware and cutlery; lantern globes; lantern chimneys; horse rasps, twist drills ;halter, trace, breast, tie-out, and dog chains; electric weld coil chains; two lines of files; curry combs, and iron bench screws.

Increased quotations are noted on cotton lamp wick; sweat pads, and wire nails. The improved general tone of the steel industry has resulted in the appearance of higher prices on galvanized sheets. This advance in the cost of raw material has brought out another new list on range boilers, showing a higher price level throughout on all sizes.

There is fair seasonable activity in coil pipe and fittings; corrugated sheets, and lead and zinc goods. Cotton waste quotations are holding unchanged, at present. The recent revised list has renewed interest in wrought pipe. The general tone in ingot markets is better, with metal prices practically stationary. Only minor business is apparent in scrap metals.

MONTREAL MARKETS

MONTREAL, October 5—The hardware markets are again featured this week by numerous changes in prices. The revisions are both in the nature of price advances and declines, important commodities being affected in both directions. The outstanding revision is the new bolt and nut list, where a reduction is shown on all kinds of bolts and nuts. Probably the next in importance is an increase in prices when wire nails are advanced 25 cents per keg, and are now quoted higher, the list throughout being revised to higher quotations. The 30 gallon boiler will now sell for $9.25. Through changing the discount to 30 per cent off, twist drills show a substantial reduction. Curry combs, saddlery chains, and bench screws, also reduced to lower figures. A slight decline is announced on the Joseph Rodgers & Sons, Limited line of cutlery throughout.

There is a decidedly better feeling among the trade as regarding business for the last quarter of the year. This would particularly apply to the iron and steel trade, which has shown a great improvement in the past two weeks, leaving the market tendencies on such lines as sheets, iron and steel bars, boiler tubes, with a firmer tone.

NEW LOWER BOLT AND NUT LIST

Montreal.

A new list on bolts and nuts is issued to the trade, reducing the prices on all kinds of both bolts and nuts. Through the increasing of discounts, bolts are quoted lower, while by the reducing of extras added to list prices, the reduction on nuts is recorded. Following is new list effective from October 1.

BOLTS AND NUTS—
—Discount sheet applying to standard lists.

Carriage bolts, $1.00 list, ⅜" dia and smaller, 6 in. and shorter	40%
Do., longer lengths	30%
Do., 7-16 in. and larger	25%
Machine Bolts ⅜ in. dia. and smaller 4 in. and shorter	50%
Do., longer lengths	40%

Nuts, 2 in. and smaller, square Tapped, of list	Net list
Nuts 2 in. and smaller, Hexagon—Blank. Off list	Net list
Do., Tapped, add to list	0 50

Terms:—Cash in 30 days from date of shipment less 2%.

FIRMER TENDENCY IN BRASS AND COPPER

Montreal.

Brass and copper sheets, rods and tubing are unchanged in price this week, but the market is much firmer and slight price increases would not be surprising in the near future. Both metals are reported stronger on the primary markets, and mill prices on these finished products have shown slight increases. Local stocks are taking care of the demand for the present, but when further purchases have to be made prices will accordingly be made higher. Following are existing quotations:

	Base.
BRASS—	
Sheets, base	0 25
Rods, base ½ to 1 in., round	0 23
Tubing, seamless, base F. o. b. Montreal.	0 32
COPPER—	
Rods, ½ to 2 in.	0 30
Soft sheets, plain, 16 oz. and heavier lb.	0 30
Plain tinned, 16 oz. and heavier, lb	0 37
Polished and tinned, 16 oz. and heavier, lb.	0 42
Tubing, lb.	0 34
Above prices are full sheets and bars. Cut sheets and bars are 5c per lb. higher.	

WIRE NAILS ARE ADVANCED TO $4.25 BASE

Montreal

Wire nails are this week advanced 25 cents per keg, bringing the present base price to $4.25. It is only two weeks ago that the quotation was lowered to $4.00. This price was, however, the result of price-shading among the jobbing houses, and was considered too low in comparison with replacement costs. Cut nails remain at $4.85 base, f. o. b. Montreal.

SADDLERY CHAINS ARE LOWERED IN PRICE

Montreal.

A reduction of approximately 10 per cent is announced on the various kinds of saddlery chains, including halter chains, trace chains, breast chains, tie out chains and dog chains. Electric

welded coil chain, in 100 ft. lengths, is also substantially reduced.

GLOBE FILE DISCOUNT CHANGES

Montreal.

Locally, the discount on Globe and K. & F. files is changed. The new discount does not change the net prices to any extent, as the former discount was 62½ per cent and now changed to 60 and 5 per cent.

FOLLOWING IS NEW LIST ON WROUGHT PIPE

Montreal.

As was stated last week, a new list on wrought iron and steel piping was being issued to the trade, but was not available at time of going to press. Following is new list, No. 53:

Price List No. 53 September 22nd, 1921.

SHEET MARKET SHOWS MUCH IMPROVEMENT

Montreal.

The prediction that the last quarter of the year would bring an improvement in sheets, and the steel market generally, is now being realized. In the past two weeks in particular, strides toward a betterment in the situation have been very satisfactory. It would seem the improvement commenced when the announcement was made at the United States mills of an advance of $5.00 per ton in sheet prices. Immediately these new higher quotations became effective, the necessary confidence was apparently instilled in the buyers, for contracts were then forwarded for fulfillment.

Locally, business has taken on a different aspect from the quiet period extending all during the spring and summer months. More inquiries are coming to hand, and actual sales are more in volume. Prices are remaining unchanged for the present, but it is quite apparent that any further change made in quotations in the near future will be in the nature of an advance. Following are existing prices:

BLACK SHEETS

10 gauge	4 30 to	4 65
12 gauge	4 40	4 75
14 gauge	4 50	4 85
16 gauge	4 60	4 95
18-20 gauge	4 80	5 20
22-24 gauge	4 90	5 35
26 gauge	4 95	5 40
28 gauge	5 00	5 50

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS.

28 gauge	6 45	7 35
26 gauge	6 15	7 00
22-24 gauge	5 95	6 75
20 gauge	5 80	6 60
18 gauge	5 80	6 50
16 gauge	5 70	6 50
14 gauge	5 60	6 50
12 gauge	540	6 50
10 gauge	5 30	6 50

English Standard—	Queen's Head	Fleur-de-lis
28 gauge	8 50	7 75
26 gauge	8 25	7 50
24 gauge	7 65	7 10
22 gauge	7 30	6 65
18-20 gauge	6 60	6 50

NOTE.—These prices are full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. Extra for sheets 4 ft. wide, 50 cents per 100 pounds. Extra for sheets 3 ft. wide, 28 ga. and 10¾ oz. 25 cents per 100 lbs.

CANADA PLATES

Dull—	
18 x 24 x 52s	5 80 box
18x24 x 60s	6 00 box
18x24 x 75s	6 30 box

WELSH CANADA PLATES

Polished—	
18 x 24 x 52s	8 25 box
18x24 x 60s	8 50 box

ADVANCE IN PRICES OF COLLAR PADS

Montreal

An advance in the price of the cotton padded collar pads is recorded amounting from 7½ to 10 per cent. Ventiplex pads are unchanged in price.

BENCH SCREWS ARE QUOTED LOWER

Montreal.

Iron bench screws will now sell for less, a reduction being made in all sizes. Following are the new prices:

BENCH SCREWS—	
1 inch	$12 20 dozen
1⅛ inch	14 70 dozen
1¼ inch	16 90 dozen

TWIST DRILLS NOW 50 PER CENT OFF

Montreal.

A substantial reduction is made in twist drills when the discount now quoted is 50 per cent off list prices. Former discount was 35 per cent off. This applies to blacksmiths' drills, straight shank, wire, and taper shank.

MORE CONFIDENCE IN IRON AND STEEL MARKET

Montreal.

With a noticeable improvement in the iron and steel market, and the undertone changed to one of firmness rather than the past long-standing easier tendency, when almost from week to week lower prices could be expected, the question can now be asked; has the bottom been reached? It would appear so, at least for the present, from reports received from the mills. Up until now, advances have only been recorded in the sheet market; but to local dealers it would not be surprising if higher prices ruled in the near future on bars, and shapes.

The mills have undoubtedly been working under prices on their output that allowed little or no profit. This could not go on indefinitely, and now to all appearances, a revision is likely. Quotations locally remain unchanged for the present as follows:

Common bar iron, 100 lbs.	3 00	3 25
Refined iron	4 00	4 30
Irish finish machinery steel	....	3 45
Mild steel	3 00	3 40
Single reeled machinery steel	5 00	5 25
Band steel	3 00	3 40
Spring steel	....	6 00
Sleighshoe steel	3 00	3 40
Tire steel	3 00	3 60
Toe calk steel	4 00	4 30
Harrow tooth steel. per lb.	....	3 55
Mining both steel per lb.	....	0 23
Black Diamond tool and cast steel, per lb.	....	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

NO CHANGE IN CEMENT QUOTATIONS

Montreal.

Quotations on Portland cement remain unchanged since the revision in small quantities three weeks ago. The fall weather brings a slight increase in business and a good amount of activity is looked for from now until the winter sets in. Following are the unchanged prices:

CEMENT—

Car load lots—400 to 1000 bag cars.	
Per bag, f.o.b. cars	0 98
Per bag, delivered	1 05
Less car lots—	
Per bag, f.o.b., yard	1 09
Per bag, delivered	1 19
Less 5 per cent.	
Rebate 20 cents for empty sacks.	

PRICES ARE INCREASED ON RANGE BOILERS

Montreal.

This week brings the long expected revision in range boiler prices. Since mid-summer the market has been very unsettled among the different jobbing houses, and during the intervening months new prices were anticipated as it was generally believed that a revision was necessary to assist in stabilizing the market. Although it was expected that the revision would be in the nature of an advance, it was generally thought the price of the 30 gallon boiler would again sell at the $8.75 price. However, the list of prices is revised throughout, and the standard size will now sell for $9.25. It remains to be seen whether a strict adherence to present prices will be given, but it is hoped a steady market will now prevail. Following are the revised prices on all sizes;

RANGE BOILERS—	Standard.	Ex.Heavy
30 gallon	9 25	11 75
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00

BOILER TUBES ARE ALSO FIRMER

Montreal

As in all other iron and steel products, boiler tubes are now in an improved position, the tendency of the market being of a firmer nature than the easier tone that has been evident for some months past. More inquiries are now coming to hand, but unlike other iron goods, these have not as yet developed into actual sales to any extent. Following are existing quotations;

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	....
1¼ inch	24 50	....

1½ inch	24 00	....
1¾ inch	26 00	27 00
2 inch	24 50	22 30
2¼ inch	27 75	25 50
2½ inch	35 00	26 75
3 inch	42 50	34 00
3½ inch	54 50	39 00
4 inch	75 00	49 50

CURRY COMBS NOW 30 OFF LIST

Montreal

A reduction has been made in the prices of curry combs through the changing of the discount to 30 per cent off the list prices. Following are new net prices on some of the best known lines.

CURRY COMBS—	
No. 111	$1 85
No. 121	2 00
No. 127	2 65
CATTLE—	
No. 98	2 40
No. 100	3 35

RODGERS CUTLERY

Montreal

It is announced that a slight reduction has been made throughout in The Joseph Rodgers Sons, Limited line of cutlery.

CORRUGATED SHEETS ARE UNCHANGED

Montreal

Corrugated sheets are unchanged both in price and market tendencies, although if plain galvanized sheets are recorded with a firmer undertone, this would directly reflect on corrugated. Business is only fair, but it is thought it will continue steady during the fall months. Following are unchanged list prices and discount;

Corrugated.—	
No. 28 gauge	7 00
No. 26 gauge	7 50

INGOTS CONTINUE WITH A FIRMER TONE

The general tone of the ingot metal markets continues firm without any sensational advances being recorded. There has been an improvement in the volume of business and sentiment seems somewhat better.

TIN—This metal has been more or less marking time without any definite trend in either direction. The market is now fairly steady, and little marked change is looked for. Local market is firm at 34 cents.

COPPER—New York market is steady to firm, and there has been an appreciable increase in domestic consumption. Electro is quoted in New York at 12½ cents, and producers are firmer in their ideas. London market is also better and should continue to improve. Electro is quoted at 17½ cents, casting at 17 cents.

LEAD—The American market is quite strong and London is also steady. Consumption remains good and there is no apparent surplus of supplies. As however this metal did not touch the low point realized by other metals, there is not the same probability of an advance. Present quotations are 6¾ cents.

SPELTER—East St. Louis remains strong and buying in the past two weeks has been the best for some months. The situation in Europe is quite firm, although Germany is always an uncertain factor in this respect. The situation however, appears decidedly firm at present, with local price at 7½ cents.

ANTIMONY—New York market has stiffened during the week owing to higher prices being quoted for import. Buying has been on a much improved scale with the result that prices are one-half cent higher. Locally the market has not changed appreciably as the demand is still quiet, and 7½ cents is quoted for ordinary.

ALUMINUM—No developments are reported in the market for aluminum, and this metal remains the dullest on the list with quotations at 29 cents.

TORONTO MARKETS

TORONTO, October 6.—Many price adjustments to both higher and lower levels arouse special interest in the hardware markets this week. Another lengthy list of commodities registering price concessions include, copper and brass tubing, sheets and rods; various classes of pipe fittings such as cast iron fittings, all kinds of plugs, malleable and cast bushings, unions of all sizes, and also the black and galvanized malleable fittings; Canada plates, bolts and buts, Beaver auger bits, nickel-plated sad irons, knife-handled wrenches; one line of files; the Combination line of storm and screen doors; also the Kasement make of doors; both the Joseph Rodgers and McGlachan products in table cutlery; lantern globes, lantern chimneys, and also horse rasps.

The improved general tone of the steel industry has resulted in the appearance of higher quotations on galvanized sheets, while bar iron prices are also firming up. Other price increases are noted on cotton lamp wick, sweat pads, and wire nails. When the decrease recently occurred in the nail base, it was stated in Hardware and Metal, that owing to the strength of these products at mill centres, a further revision evening up these quotations was generally looked for. This information was apparently authentic, as the reaction has now materialized. Another new list of prices has been given on range boilers, showing a higher level throughout on all sizes.

SUBSTANTIAL REDUCTION ON COMBINATION DOORS

Toronto

A reduction of 20 per cent is now announced by the Sanderson-Harold Co., on their "Combination" line of screen and storm doors. The new revised quotation is given as $64.00 per dozen.

KASEMENT DOORS WILL BE PRICED LOWER

Toronto

New prices showing material reductions for the coming season's booking, are announced by the Kasement Skrene Dore Co., on their "Kasement" line of doors.

RODGERS TABLE WARE REDUCED IN PRICE

Toronto

A reduction of approximately 5 per cent is announced on the Rodgers line of table cutlery, butcher knives, pocket knives, and similar products.

SLIGHT REDUCTION IN CUTLERY PRICES

Toronto

Reduced prices are given on the MacLachlan Clark line of table cutlery, comprising the "Sevada" and "Oregon" grades, as well as the celluloid handled knives and forks.

HIGHER QUOTATION ON COTTON LAMP WICK

Toronto

Through a revision in the discounts, higher quotations are recorded on cotton lamp wicks. The new price is now 25 per cent off standard list, compared with the previous discount of 30/15 off.

LANTERN GLOBES TAKE LOWER PRICE LEVEL

Toronto

In conjunction with the current lower prices announced on lantern chimneys, lantern globes also take a lower price level. The revised quotations follow:

C. B. LANTERN GLOBES—	per doz.
1 dozen	$1 35
3 dozen	1 20
6 dozen	1 00

LANTERN CHIMNEYS NOW HAVE LOWER PRICES

Toronto

Lower quotations are announced this week on lantern chimneys. The revised prices are as follows:

"B,"	$8.80 per case.
"A,"	$10.40 per case.
"O,"	$7.80 per case.

REVISED DISCOUNT ON HORSE RASPS

Toronto

Through a revision in the discount, lower quotations are given on Hellers horse rasps. The new discount is 67½ per cent.

DOVER SAD IRONS HAVE LOWER QUOTATIONS

Toronto

In conjunction with the lower prices now given on other lines of sad irons, the Dover make also have reduced quotations. The new prices follow:

DOVER SAD IRONS—	per set
No. 60	$2 45
No. 70	3 00

NEW LOWER PRICE ON POTTS SAD IRONS

Toronto

Among the current price reductions are the Potts sad irons, which now have lower quotations on the nickel-plated sets. The new price is $1.95 per set.

NEW PRICES GIVEN ON KNIFE HANDLED WRENCHES

Toronto

Lower prices are announced on knife handled wrenches, the revised quotations being as follows:

KNIFE HANDLED WRENCHES—

	per doz. net
Size 8 inch	$15 60
Size 10 inch	18 60
Size 12 inch	24 00
Size 15 inch	32 40
Size 18 inch	40 80
Size 21 inch	49 80

ANNOUNCE HIGHER PRICES ON SWEAT PADS

Toronto

There has been another advance in quotations on sweat pads, this change reflecting the recent increases in the raw cotton markets, and also the higher price levels on certain lines of manufactured cotton goods.

The revised prices on sweat pads follow:

SWEAT PADS	dozen
B. B. 10 inch	$6 45
Do., 11 inch	6 75
R. E. yellow, 10 inch	7 00
Do., 11 inch	7 15
Do., 12 inch	7 35

NEW DISCOUNT GIVEN ON K. & F. FILES

Toronto

Quotations on K. & F. files are revised, through a change in discounts, according to current market announcements. The new quotation is 65 per cent off.

REVISED DISCOUNT ON BEAVER AUGER BITS

Toronto

Through a revision in discounts, lower quotations are given on Beaver auger bits, this week. The new discount is 35 per cent off list.

HIGHER PRICES APPEAR ON GALVANIZED SHEETS

Toronto

An advance in quotations on galvanized sheets to the extent of 15 cents per cwt, has been made by some of the local wholesale houses. The new prices given are based on $6.25 for the 28 guage sheets, and $6.65 per 100 lbs. for the 10-¾ oz. However, the increase is not yet generally applied, as the lower quotation of $6.10 base on galvanized sheets is still on the market.

Some advance in prices on a more general scale is predicted in reports from southern primary steel markets. Recent developments indicate that the higher level on sheets effective in U. S. circles—and noted in a recent issue of Hardware and Metal—will be reflected throughout all phases of the trade in the near future. At present there is evident a very strong market in sheets and plates, with more activity and a firmer demand than has been apparent for a number of months. In this connection, it is significant that one large Canadian producer has sufficient bookings on hand to keep the shop operating at full capacity for the next sixty days. The whole trend of the present market, is therefore, towards an increase; and, as pointed out, the following quotations have already been revised to a higher level in some quarters:

BLUE ANNEALED—

10 gauge, base	4 00	4 50
12 gauge	4 05	4 55
14 gauge	4 10	4 60
16 gauge	4 15	4 65
BLACK—		
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 10
26 gauge	4 65	5 15
28 gauge	4 75	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis.
28 gauge	9 50	8 75
26 gauge	9 25	8 50
24 gauge	8 65	8 10
22 gauge	8 30	7 65
18 and 20 gauge	7 60	7 50
Premier and Apollo.		
10¾ oz	6 50	7 00
U. S. 28 base	6 10	6 60
U. S. 26	5 80	6 30
22 and 24	5 65	6 15
18 and 20	5 50	6 00
16	5 35	5 85
12 and 14	5 20	5 70

An extra [illegible] lbs.

stone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

PLATES, CANADA—

IRON PRICES ARE FIRMER WITH BETTER OUTLOOK

Toronto

Reports emancipating from the southern primary steel markets indicate the feeling is fast spreading among the mills that prices on bars, shapes and plates, have now been fully liquidated. As a result, steel producers are said to be contemplating an advance in quotations on these products in the near future.

On the other hand, leaders in the steel trade speak more confidently of larger mill operations and increased volume of business, that was not apparent a month or six weeks ago. The trend of prices on the primary steel markets generally has been toward a higher and firmer level. This stiffening is reflected in the Iron Trade Review weekly composite average of iron and steel product prices, which is again higher this week.

Local quotations on bar iron and steel, however, generally remain unchanged, as follows:

Mild Steel bars, base	3 25	3 50
Mild steel bands, 3-16 in. base	3 75	4 00
Bar iron, base	3 25	3 50
Angle iron, base	3 35	3 60
Horseshoe iron	....	4 10
Tire steel	4 70	5 95
Spring steel	9 50	.11 5[illegible]
Crucible cast sheet steel	30 00	.35 00
Mining drill steel	18 50	18 50
Cast tool steel, high grade	20 00	23 00
Cast tool steel, high grade	30 00	36 00
Sleigh shoe steel	4 10	4 50
Hoop steel	4 50	4 75
Toe caulk iron	5 40	6 40
Norway iron	....	15 00

WIRE NAIL BASE PRICE ADVANCED TO $4.25

Toronto.

As outlined in a previous issue of Hardware & Metal, the recent reductions in the wire nail base price, have failed to hold for any length of time, and the reaction to higher levels has now set in, an increase of 25 cents being recorded this week. This advance brings the current quotation to $4.25, and is parallel with the increases noted on southern primary markets, to which reference was made by Hardware & Metal in a previous report covering this situation. On the strength of Pittsburg base prices, the evening-up revision was more or less expected; and the recent declines mainly indicated a local situation on Canadian wire products markets.

NEW LOWER LIST ON BOLTS AND NUTS

Toronto.

A new revised list is now effective on bolts and nuts, showing reduced prices on both products. The decline on bolts averages approximately 10 per cent, this change affecting carriage, machine and miscellaneous bolts; while the similar lowering in quotations on square and hexagon nuts, both blank and tapped, amounts to $1.00 per 100 lbs.

The new discounts are enumerated on the current market pages.

CANADA PLATE PRICES AGAIN LOWERED

Toronto

Another 30 cent reduction has been announced in the prices on Canada plates this current change bringing the prevailing quotations on dull, 60 sheets, to $5.65 per box; and on the ordinary, 52 sheets, to $5.60.

MANY PRICE CHANGES ON PIPE FITTINGS

Toronto.

Following on the price revision in wrought nipples and couplings recently enumerated in the market reports, quotations on other classes of pipe fittings are also changed. These current price adjustments are chiefly to lower levels, attained through revised discounts. Cast iron fittings; all kinds of plugs; malleable and cast bushings; and unions of all sizes are affected; while prices on the black and galvanized malleable fittings in classes A, B. and C, have all registered additional changes.

Current sales of pipe fittings are quoted as fair, with orders continuing of the small variety, but more numerous. Following are the prevailing discount revisions:

PIPE FITTINGS—

	Per cent.
Cast iron fittings	25%
Plugs, cast iron	28%
Do., solid	28%

Do., countersunk	28%
Bushings, mall	28%
Bushings cast	28%
Unions ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged Unions	25%
Dart Unions, blk., ¼ to 2 in.	29%
Do., ⅛ in., 2 to 4 ins.	40%
Do., galvd., add to black	30%
Nipples, blk., and galvd. ⅛ to 4 in., close and short	50%
Do., 4½ in. and larger	40%
Do., long, ⅛ in. to 4 in.	60%
Do., 4 in. and larger	50%
Do., running thread	30%
Couplings. 4 in. and under	30%
Do.. 4¼ in. and larger	10%

MALLEABLE FITTINGS—

	Black	Galvanized
Class A	0 55	0 68
Class B	0 23	0 33
Class C	0 15	0 23

SUBSTANTIAL DECLINES ON BRASS AND COPPER

Toronto.

Substantial reductions are again recorded in prices on copper and brass goods. Following on the recent declines of approximately 2 cents per lb. on sheets, rods and tubing, these products now take further extensive reductions varying from 3 to 7 cents per lb. The southern primary markets have recently developed easier prices, and this tendency has now been reflected on the local markets with the consequent current reductions. Following are the new list prices:

BRASS—	
Sheets, base, per lb.	$ 0 22
Rods, base, per lb.	0 20
Tubing, base, per lb.	0 25
COPPER—	
Rods, base per lb.	0 26
Soft sheets, plain, 16 oz. and heavier, lb	0 28
Do., plain tinned 16 oz. and heavier, lb	0 35
Do., polished and tinned 16 oz. and heavier, lb.	0 40
Tubing	0 27

ANOTHER NEW LIST ON RANGE BOILERS

Toronto.

The recent higher price levels on galvanized sheets have been reflected in another new list of increased quotations on the galvanized range boilers. This latest change supersedes the revision on these products recently recorded on the local markets and is mainly attributed to the slightly improved general business conditions, coupled with the advancing costs of the sheet material. As manufacturers have claimed there remained no profit in the low prices that have been evident on the markets during the last two months, the increase in prices at the steel mills afforded an opportunity to stabilize the current quotations on range boilers in an effort to steady the market.

Prices on the 30-gallon standard size are now 50 cents higher than the previous list of two weeks ago, and give a total advance of $1.00 from the level at which this boiler was being recently quoted. Quotations all through the list give a general increase, varying from 75 cents to $2.00 and $3.00 on the different sizes. Following are the revised quotations:

RANGE BOILERS—

	Standard	Ex. Heavy
30 gallon	$ 9 25	$ 11 75
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00
144 gallon	.....	76 00

ONLY MINOR BUSINESS IN SCRAP MATERIALS

Toronto

Business of a minor character is still the main feature of the scrap material markets, and no marked revision has been recorded. Prices remain unchanged and the general conditions have not yet developed the upward trend which dealers generally anticipate. The following price averages are more or less nominal for large quantities:

SCRAP MATERIALS—

No. 2 busheling	.....	11 00
Heavy melting steel, gross ton	9 50	10 00
R. Rd. wrought iron, No. 1, gr. ton	10 25	11 25
Scrap pipe, gr. ton	6 00	7 00
Stove plate, net ton	11 00	12 00
No. 1 machinery cast, net ton	15 00	16 00
Heavy lead	3 75	4 00
Tea lead	2 00	2.50
Red brass	....	9 00
Yellow brass	5 00	6 00
Light brass	3 00	3 50
Heavy copper	9 25	10 00
Scrap zinc	3 00	3 50
Old rubbers, boots and shoes	2 00	2 50
Lumberman's rubber boots	1 25	1 75
Auto tires	0 50	1 00
Solid tires	0 75	1 25

BETTER GENERAL TONE IN INGOT MARKETS

Toronto.

With the general tone now much better in ingot markets, a fractional improvement in practically all metals is reported. The opinion that ingots have now touched the bottom of depression, has been substantiated to a slight extent by recent developments, and dealers quote the general trend as beginning to go back to normal in an average sense.

COPPER—Quotations on copper generally remain unchanged on the local markets. Although a firmer tone is manifest, and an increase of sales recorded on the United States primary markets, there is still said to be large quantities of copper available, and quotations have failed to advance in any marked degree. The local price is around 17 cents.

TIN—The apathetic state of the tin markets has resulted in a gradually easing off in quotations, especially when applied to trading centres. Both London and United States tin markets have continued to recede in a moderate way, but the low price levels have succeeded in arousing some interest among consumers, and prospects for sales in this metal are said to be better now than for some time past. The local quotation is unchanged at 35 cents.

LEAD—It is said that statistically, lead is practically the firmest metal in the markets. This is probably due to the fact that consumption, at present, is exceeding production, and as a consequence, the stocks on hand have been considerably lowered. This material reduction in available supplies has led to the expectation, in some quarters, that an advance in price may develop. Locally, however, the quotation on $6.75 is being maintained.

SPELTER—Producers of this metal are now said to be curtailing their output, and surplus stocks, instead of being augumented on the primary markets, as was the case up to quite recently are now beginning to diminish. An increase in inquiry and more interest in futures, is also reported, but this is attributed to the galvanizing trade. If a portion of solid business results from these conditions, a steady improvement in spelter may result, as galvanizers have been out of the market for months, and their return would indicate that supplies have now almost been consumed and stock replenishments are likely in order. $7.00 continues to be the chief local quotation.

ANTIMONY—The antimony market does not present any new features, and the general aspect also remains unchanged. Consumers still show very little interest in offerings, and the prices remain locally from 8 to 10 cents. No revision is reported from primary markets.

ALUMINUM—Sales of aluminum have been very light, but an occasional inquiry is reported to have been received. Quotations continue unchanged from previous levels.

LONDON MARKETS

LONDON, October 5—A substantial list of price revisions is quoted this week on many hardware lines. These adjustments in quotations cover bolts and nuts; files; wrought iron pipe; ice cream freezers; cut light glass; and the Joseph Rodgers line of cutlery. Higher prices are noted on wire nails; sweat pads, and also on double-diamond glass.

Business continues good, with an increasing demand now evident for Fall lines. These include stoves, and stove accessories; furnaces; nails, and roofings; ash sifters; window glass; building papers; lanterns; buck saws, and axes. Collections are reported in good shape.

WIRE NAIL BASE PRICE IS NOW HIGHER

London, Ont.

The recent lower prices on wire nails have not been maintained for any length of time. Higher quotations are now announced, the current base price being advanced 25 cents per keg thus bringing the prevailing quotation to $4.25. Cut nails remain at $4.95 base.

Revised discounts giving new lower prices are now announced on bolts and nuts. The extent of the decline averages approximately 10 per cent on bolts, and the lower level on nuts is $1.00 per 100 lbs. Following are the new lists:

BOLTS AND NUTS—

Carriage Bolts ($1.00 list) ⅜ in. dia. and smaller, Lens. 6″ and shorter	40%
Do. ⅜ in. dia. and smaller, longer lens	30%
Do., 7-16 in. dia. and larger	25%
Machine bolts, ⅜ in. dia. and smaller, Lens 4″ and shorter	50%
Do., ⅜ in. dia. and smaller, longer lens	40%
Do. 7-16 in. dia. and larger	40%

Sleigh Shoe Bolts	25%
Coach and lag screws	50%
Square head blank bolts	40%
Bolt ends	40%
Plow bolts Nos. 1, 2 and 3 head	35%
Do., all others .... 35% discount Plus	20%
Elevator bolts, large head	25%
Do., corrugated head	55%
Fancy head bolts	25%
Step and shaft bolts ($3.00 list)	25%
Whiffletree bolts	25%
Tire bolts	50%
Square nuts, blank Off net list $0.50 per 100 lbs.	
Square nuts, tapped	Net list
Hexagon nuts, blank	Net list
Hexagon nuts, tapped—Add to net list $0.50 per 100 lbs.	

TURPENTINE HOLDS AT HIGH PRICE LEVEL

London, Ont.

Quotations on turpentine are now holding at the recent higher level, with a fair volume of sales. There has been no further change announced, and prices remain as follows:

TURPENTINE—	Imp. Gal.
1 barrel lots	1 15
2 to 4 barrel lots	1 14
5 gallon lots	1 30

NEW NET PRICE LIST ON WINDOW GLASS

London, Ont.

New prices are now in effect on window glass, the net price list having been generally adopted. This shows an advance in some sizes of double-diamond; while a correspondingly slight lowering is recorded on some sizes of single. Following is the new net list:

NET GLASS LIST—	Single	Double
Up to 25 in.	5 50	9 05
26 to 40 in.	6 90	11 40
41 to 50 in.	7 65	12 55
51 to 60 in.	7 75	13 05
61 to 70 in.	8 35	13 65
71 to 80 in.	8 80	14 40
81 to 84 in.	10 30	17 70
85 to 90 in.	10 85	18 55
91 to 94 in.	....	20 80
95 to 100 in.	....	22 60

REVISED DISCOUNTS ON CUT LIGHTS

London, Ont.

In conjunction with the new net glass list, revised lower prices are now in effect on cut lights window glass. The new discount is list less 75 per cent, compared with the previous quotation of 70 per cent.

REVISED LOWER PRICES ON WROUGHT PIPE

London, Ont.

A new pipe list has now been issued, thus superseding No. 52, of July 11. The revised table, No. 53 dates from Sept.-22, and shows a reduction of approximately 7½ to 10 per cent, in the prices on wrought iron piping. The new list is contained in the current market quotation pages.

LOWER PRICES ON ICE CREAM FREEZERS

London, Ont.

Ice cream freezers now have lower prices for next spring booking. The new range of quotations shows a fairly substantial reduction. Following are some of the revised figures:

ICE CREAM FREEZERS—	
Blizzard Line, 2 quart, each	3 60
Do. 3 quart, each	4 25
Do., 4 quart, each	5 25
Do., 6 quart, each	6 50
Do., 8 quart, each	8 70

PRICES REDUCED ON RODGERS CUTLERY

London, Ont.

A reduction of approximately 5 per cent has been announced on the Joseph Rodgers line of butcher knives, table cutlery and pocket knives. Following are the new net prices on some of the most popular lines:

BUTCHER KNIVES—	doz.
1707 x 5 in.	5 88

3¾	15 10

GLOBE FILES AND RASPS HAVE NEW DISCOUNT

London, Ont.

A new lower price is now effective on Globe files. This change is made through revised discounts, the new quotation being list, less 65 per cent.

Globe horse rasps also have revised quotations, the new discount being list less 75 per cent.

SWEAT PADS NOW HAVE HIGHER QUOTATIONS

London, Ont.

Among the various price adjustments announced this week, are the higher quotations on sweat pads. The revised price on the Old Gold Red Edge, is $6.50 per dozen.

WINNIPEG MARKETS

WINNIPEG, October 5—Current price revisions on the hardware markets offer adjustments to both higher and lower levels. The advanced quotations are effective on manufactured cotton goods, such as sash cord; seine twines; cotton rope and clothes lines. This increase is attributed to the higher costs of the raw material.

Among the most noticeable price reductions are the lower lists on wrought iron pipe, and the concession on wire nails. Trimo pipe wrenches and also the Elgin line of wrenches are substantially lower in price, while a revision in the discounts on brass butts, complete an important week of price changes.

LOWER PRICES ON TRIMO PIPE WRENCHES

Winnipeg

Trimo pipe wrenches are now quoted at 40 per cent off the list, and Trimo wrench parts at 35 per cent off. The above discounts make a reduction of approximately 15 per cent.

SUBSTANTIAL REDUCTIONS ON ELGIN WRENCHES

Winnipeg

A substantial reduction is made this week on Elgin wrenches, and No. 7 are now quoted at $20.50 per dozen. Extra jaws $5.10 per doz. Thread attachments $20.50 per doz. Extra dies $10.25 per doz. Elgin wrench sets $9.00 each.

REDUCTION IN PRICES ON BRASS BUTTS

Winnipeg

Approximately a 7 per cent reduction is made this week on Brass Butts, and following are the new prices.

BRASS BUTTS—	advance
Narrow	20%
Middle	20%
Broad	20%
Desk	20%

REDUCE BASE PRICE ON WIRE NAILS

Winnipeg

A further reduction is made this week in the price of wire nails, and the base quotation is now revised to $4.75 at Fort William, and $5.40 at Winnipeg. Cut nails remain unchanged at $7.25 f. o. b. Winnipeg.

Nails have been moving steadily during the summer months and a slight improvement has been reported in the past few weeks.

INCREASED QUOTATIONS ON SASH CORD

Winnipeg

Owing to the recent strength of the cotton markets, and higher cost of raw material, prices have advanced on Sash Cord to the extent of 5 cents per pound. The revised prices are as follows:

SASH CORD—	per pound

HIGHER PRICES GIVEN ON SEINE TWINES

Winnipeg

Following the advance in prices of other cotton goods, seine twine is quoted at higher prices this week. With these new prices now given, it is stated that a further advance would not be surprising in the next week or so, as the cotton market has apparently not yet settled on a steady basis. Following are the revised quotations:

SEINE TWINE—	per lb.
No. 9	0 65
No. 12	0 65
Nos. 15 to 60	0 65
Nos. 72 to 120	0 65

SLIGHT ADVANCE IN COTTON ROPE PRICES

Winnipeg

A slight advance has been announced in the prices of cotton rope. This increase is attributed to the higher price of cotton on the raw material markets, and coincides with recent advances quoted on other lines of manufactured goods.

Following are the revised prices:

3-16 inch	51c per lb.
1-4 inch and up	49c per lb.

COTTON CLOTHES LINES ALSO QUOTED HIGHER

Winnipeg

As other cotton goods have been advanced due to the increased cost of raw material, the prices of cotton clothes lines have been automatically increased. The following prices are now quoted:

48 ft.	$3 46 per doz.
60 ft.	4 32 per doz.

QUOTATIONS HOLD ON LINSEED OIL

Winnipeg

The new reduced prices on linseed oil quoted two weeks ago, are still maintained. The present quotations are: Raw $1.10 per gal; and boiled $1.13 per gal. in barrel lots.

TURPENTINE PRICE REMAINS UNCHANGED

Winnipeg

There has been no revision on turpentine prices this week.

The prevailing level of $1.20 per gal. in barrel lots is still generally maintained.

PITTSBURGH MARKETS

PITTSBURGH, October 6.—The great decline in steel prices having very nearly ended last July, while in the past three or four weeks wire products and sheets have definitely advanced, the three "heavy rolled products," bars, shapes and plates, are now the center of interest in the matter of prices. The demand for these products, in proportion to the productive capacity has been much smaller than the demand for lighter products, including wire products, sheets, tubular goods and tin plate, otherwise they would have experienced little difficulty in striking a low point in price and then rebounding. A demand would help both movements. A decline would be facilitated, for when there is open competition it is through large inquiry, not by miscellaneous carload buying however extensive, that prices are pushed down, while when mills become reasonably well filled up prices rebound with no effort.

For a couple of weeks past it has been evident that some of the producers, including the Steel Corporation, have been making a particular effort to round up tonnage in bars, shapes and plates in the hope of so strengthening their position that they could put up prices. It looks now as if the movement will be a success in the very near future. Repeatedly in the past few months the Steel Corporation has officially stated that it is meeting competition, and thus it cannot have formal prices, rigidly adhered to. For it to do that would be simply to "hold the bag" for independents. A peculiar announcement was made as to the Steel Corporation on September 26, to the effect that its prices were 1.65c on bars and $1.75c on shapes and plates. The peculiarity was that it was not plain whether such prices meant an advance or a reduction. There had been no formal statement as to prices since the corporation announced 1.75c on bars and 1.85c on shapes and plates. From this viewpoint the new prices would be a reduction of $2 a ton. From prices the corporation and others had actually made on sales, 1.60c and occasionally less, the newly announced prices would be an advance. At the moment the condition seems to be that the majority of sellers, including the Steel Corporation, are making a strenuous effort to book orders with the intention of firming up as soon as possible to 1.65c for bars and $1.75 for shapes and plates as absolute minimum. In most cases orders only are accepted, with specifications attached, though the seller is willing to distribute deliveries, not requiring the buyer to take deliveries, as fast as the mill could make shipment. While the fact is not admitted, it is possible that some of the independents would take business without the entire tonnage being actually specified at the time.

As a result, while the sheet market is naturally quiet now with the higher prices ruling the sheet industry is operating at about 75 per cent of capacity, its best rate for nearly a year, and the best rate shown for any finishing branch of the steel industry. The various wire mills, also aided by a recent advance which had brought in tonnage at the old prices, are running at 50 to 75 per cent. The pipe mills in most cases are running at 40 to 50 per cent. Tin plate mills are running at 50 to 60 per cent, or at fully double the rate of last July, when there were large stocks of tin plate at mills, also large stocks of various goods packed in tin plate containers.

With percentage rates like these obtaining it is nevertheless the case that steel ingot production is running at only 33 to 35 per cent of capacity. The rate of steel production is held down by the low production of bars, shapes, plates and rails, which count much more from the mere tonnage standpoint than do the lighter lines.

Expectations are that steel production will continue to increase during the next few weeks. Much ground has really been covered already, since ingot production dropped just under 20 per cent at the middle of July, and an increase to 33 per cent is good enough for a trifle over two months. By the end of November the rate should be between 40 and 50 per cent. Unless there are unexpected developments in railroad buying and buying for large construction jobs generally the rate will hardly go above 50 per cent this year, and a little backset in December and January, which are usually dull months in the steel market is to be expected. Then, by early spring, a general and important further revival in steel demand and mill operations is confidently expected.

NEW FIRMS

Long Branch, Ont.—Chas McFarland has commenecd a retail hardware business here, with store located on the Toronto-Hamilton Highway.

"Save The Surface" Pointers For the Fall Paint Campaign

TIMELY openings for selling paints and varnishes are perhaps more numerous during the fall period than at any other time during the year, because the opportunities for engaging in painting activity are more presentable and suitable to the customer and the individual. The retail merchant will, upon suitable investigation, locate an extensive range of ideas and selling arguments which can be offered in a very favorable light during the fall months, because such talking points are applied to suit the peculiar needs of those seasonable endeavors. Following are a few suggestions which retail hardware merchants throughout the country should be able to use as aids in furthering their own local "paint & varnish" campaigns, thus largely increasing the turnover in the "Save the Surface" department and making it one of the most profitable sources of income in the business.

Featuring Price Reductions To Boost Paint Sales

ONE of the strongest selling points now placed directly into the hands of merchants, is the recent downward revision that has been made by the paint manufacturers in prices on these various products. The 50 cent per gallon decline on ready-mixed house paints is a persuasive weapon of incalculable value, especially in these days of severe price competition. No more timely reduction could possibly have occurred from the retail merchant's standpoint than this substantial lowering of quotations on the eve of a national selling campaign. The fact that flat wall colors will now cost less, opens up a wide vision of future sales for these lines. And now that floor enamels are also reduced in price, the dealer is enabled to enter into fall "paint and varnish" activity with a powerful lever for featuring the advantages of "Save the Surface."

Farmers Financial Standing Helps Fall Selling

MERCHANTS in rural towns and those whose chief business scope lies among communities where farming activities form the principal occupation, should now be prepared to take full advantage of the fact that the farmers are usually much better off financially during the fall, than at any other season of the year. If the "sons of the soil" have not the actual cash at their immediate disposal, they usually have the equivalent in the shape of stored stocks in the granaries, and as a consequence their credit is good. The average crop report for 1921 has been fairly satisfactory, and as a result, the purchasing power of the agricultural element in our communities has again been largely restored.

Agriculturists Have More Time For Painting

ANOTHER factor leading towards increased paint business is contained in the natural selection of the Fall as the farmers' leisure season. With crops harvested, and the grains either sold or stored, the bulk of farm labor is much easier from then on until the following season. This leaves the farmers, both individually and as a class, with more time at their disposal for Fall painting. While many farmers devote this season of the year to fall plowing, yet the preservation of property and the rejuvenation of the home, both interior and exterior, are of great importance. The months of September, October, and, where and when the weather permits, November, can be looked upon by the farmer as golden opportunities for painting and decorating, whereas, in the spring, there is not only plowing to be done, but also cultivating, seeding, etc.

Visible Returns When Money Is Spent In Paint

THE leisure time of the farmer during the Fall can be commercialized by the progressive salesman in paints and varnishes from still another viewpoint. Extensive journeys to the cities, visits to distant relatives, and much travelling of varied description and with different objectives, is frequently indulged in by the farming class during the last quarter of the year. Rural people, spending their money in this way, often spend far more than would pay for the cost of painting the entire farm property. Moreover, whereas there is a big outlay and no visible returns when money is spent in transportation rates, a smaller outlay in the local hardware store will give commesurate interest and show manifold results in preserving value and in enhancing appearance.

"Moving" Presents Many Chances To Sell Paint

WHILE sales openings of this nature are not so numerous in the hardware stores of the larger cities, yet the universal problem of "moving" presents suitable sales openings to all retail merchants with paints, varnishes, brushes and paint sundries on their shelves. It is generally admitted that there is approximately just as much furniture moving and home changing taking place during the Fall, as in the Spring; and wherever the average family or person change their abode, the inherent consequent desire for homelike surroundings creates the need for some progressive hardware dealer to sell them floor finishes, stains, varnishes or wall colors. Brushes are also a vital consideration in connection with selling paint,

and many sundries such as putty, linseed oil, turpentine and kalsomine, contain the attributes of decoration and beautification aspired to in the home.

More Economical To Paint Than Buy New

MERCHANTS who make a point of keeping a mental tabulation upon the movements of residents in their vicinity or business district, will locate many prospects for Fall paint sales through such methods. This particularly applies to families who return from vacations, beach resorts or summer camps. The various discrepancies of their winter dwellings are then more prominent, and while the fallacy of the saying "it's cheaper to move than pay rent" has been exposed by experience, yet the truth of the assertion that " it is cheaper to paint than buy new" has many times been proven. If a home has been vacant during the summer, or whether the domicile had been rented to tenants for these few months, in either case the interior is undoubtedly neglected, and the need for decoration has arisen. The merchant who advances with a live campaign for fall painting, thus steps into the breach and fills the want created by circumstances.

Make Home Presentable For Winter Evenings

MANY housewives spend a large amount of time and effort at this period of the year in making the home as presentable as possible for the coming winter months. The longer evenings now show up the worn surfaces of floors and walls, and spots that need retouching with paint and varnish are fast becoming more noticeable. Deep in the heart of the average housewife, there exists a keen desire to have the home in first-class condition, so that the many winter visitors, afternoon teas, evening parties, and so on, might be suitably housed. The natural pride in clean and attractive-looking homes is not alone confined to womanly instincts, and the senior member of the family can frequently be sold on fall painting activity through his liking for the best in home-life that his circumstances will afford.

"Home, Sweet Home" Fully Realized Through Paint

INSIDE and out, from basement to attic, the poorest looking cottage, humblest dwelling or oldest building can be rejuvenated and given new life through the aid of paint and paint products when frequently and properly applied. The exterior can be made to look spick and span, while the interior will again appear cosy and comfortable when refreshing paint is allowed to perform its natural function of "saving the surface." The purifying colors of high-grade modern paints, preserve as well as rejuvenate, and "home, sweet home" is only realized to its fullest extent when the highest available effort has been made towards perfecting that individual dwelling, however large or small it may be. The retail hardware business man who senses these pyschological aspects, will ultimately reap rich dividends in increased business, gain good-will, self-respect, better prominence in social standing, and a steady and more insistent hum to the musical ring of the cash register.

Diminishing Outdoor Recreation Gives Time For Painting

THE diminishing proportion of outdoor summer activities, both in commercial life, and also in the realms of sport, afford a lively chance to "paint and varnish" during the fall. Much of this painting activity can be accomplished by younger members of the family. The lad in his teens is often weary of the long and tedious athletic season and the youthful enthusiasm can easily be switched to house painting, either inside or out. The lad thus engaged will be proving far more useful to both himself and his family, than if confining his sole ambition to athletics. There is usually a similar diminishing of other outdoor recreations which affect the leisure time of the more elderly male, and both the merchant and the customer can "cash in" on putting this spare tme to advantage. With the plowing matches disposed of for another season, the golf championships once again settled, and the lawn bowling club titles in safe keeping until next year, no more suitable method of bridging the interval between summer and winter recreations can be found than in stimulating the Fall painting idea.

Protect From Winter Weather By "Coats" of Paint

ONE of the primary reasons why painting is preferable during the fall months, is found in the meaning of "Save-the-Surface." Protection and preservation of houses, barns, and buildings of any description can be skilfully promoted through encouraging the application of these various liquid colors. Even as humans protect themselves during the cold weather by heavier clothing or more personal coverings suitable to the season, so the surfaces of buildings—whether they be homes or commercial structures—can be given extra "coats" to guard against the destructive elements usually experienced during the winter months. The damage often done by winter storms to appearance of property, can be reduced to a minimum when the surfaces are adequately protected; while the ravages of ice, snow and sleet, can not only be overcome but may be circumvented through the scientific application of the right kind of paint covering.

Most Favorable Paint Weather Experienced During Fall

HAVING convinced the prospective purchaser of colors and varnishes that painting should be done as a means of 'Saving the Surface", the next step is to "sell" the prospect on the idea as to why this work should be done during the fall. The more favorable weather conditions existing, enjoyed or experienced during that period is a most potent consideration. The temperature is much more even during these months than at any other time, and therefore it can truly be said that from the painters' viewpoint the atmospheric conditions are then ideal. There is less rain, and as a consequence less moisture in the air, than during the springtime, which also means quicker drying on a more even surface. The outside work done during this season is not subjected to the spasmodic bursts of strong sunshine as in the earlier months of the year, and the irritable results of "blistering" are consequently not apparent.

No Dust Laden Winds To Spoil Drying Surfaces

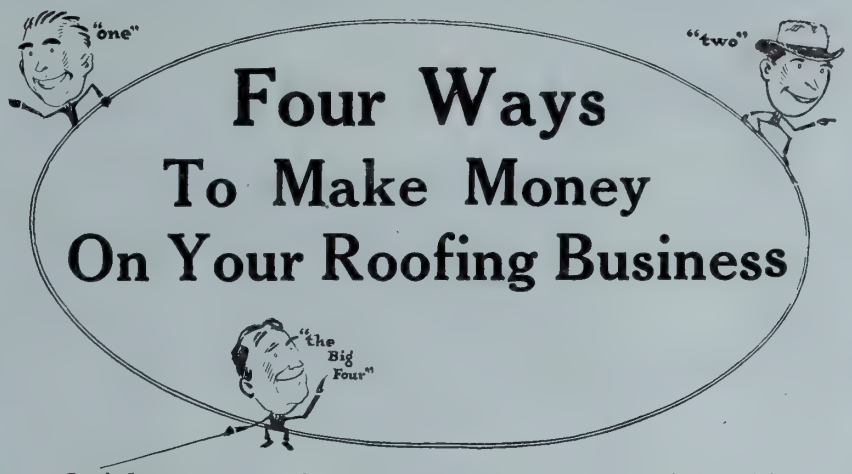
WHAT more disappointing picture can be conceived than the housewife who has spent much labor and time in beautifying the home, finding the results marred through the dust-laden winds of March and April alighting on the surface before it is thoroughly dry? Or what could dampen the ardour and enthusiasm of the householder and farmer to a greater degree, than to have to repeatedly "retouch" his work because of similar blemishes appearing on the wet surfaces. These things are minimized during the fall months and the fact that gnats, bugs, flies and such insects are numerically smaller and weaker at this season, will appeal strongly to those who have experienced these annoyances. Perfect results in painting endeavour, especially by the "novice", will bring satisfaction to the customer, and reward to the merchant through "repeat" sales.

Keep Hubby at Home By Making Interior Attractive

TO back up various other reasons why the interior of the home should be given special "coats", as well as the outside, an appeal to the housewife will be a valuable aid. What loving wife, under normal circumstances, does not want to keep her husband at home during the long winter evenings? The appeal of the fireside loses more than half its charm if the surroundings are dingy and out of harmony. And what tender-hearted Mother, does not yearn to keep her youthful boys and girls away from questionable pleasure jaunts? By taking a pride in the appearance of the home, the family appeal will be materially strengthened, because its appearances are equal or even better than other places. If these results can be accomplished by making "paint and varnish" the allies of the wife and mother, who would not be willing to give the Fall painting idea an open trial from this purpose alone? "How to promote happiness in the home through the aid of paint", is an appeal which can be described vividly by illustration, literature and demonstration.

Everlastic
"Rubber" Roofing

This is one of our most popular roofings. A recognized standard among "rubber" roofings. Famous for durability. Made of high-grade waterproofing materials, it defies wind and weather and insures dry, comfortable buildings under all weather conditions. Tough, pliable, durable and low in price. It is easy to lay, no skilled labor required. Nails and cement in each roll.



Four Ways To Make Money On Your Roofing Business

Quick turnover is the surest way to profits. You can't afford to tie up your money in stock and then "store" it or take a chance on an unknown quantity when you can buy roofings that are widely and favorably known—roofings that sell themselves.

All types of Barrett Everlastic Roofings are self-sellers. Over half a century of roofing experience vouches for their quality. Advertising throughout the Dominion argues their superiority to every roof purchaser. Satisfied customers become enthusiastic boosters. And every dollar you invest makes additional dollars for you.

Barrett Everlastic Roofings **move**—to the tune of profits.

Everlastic Slate Surfaced Roofing

A high-grade roll roofing surfaced with genuine crushed slate, in two natural shades, red or green. Needs no painting. Handsome enough for a home, economical enough for a barn or garage. Combines real protection against fire with beauty. Nails and cement with each roll.

The Barrett Company
LIMITED

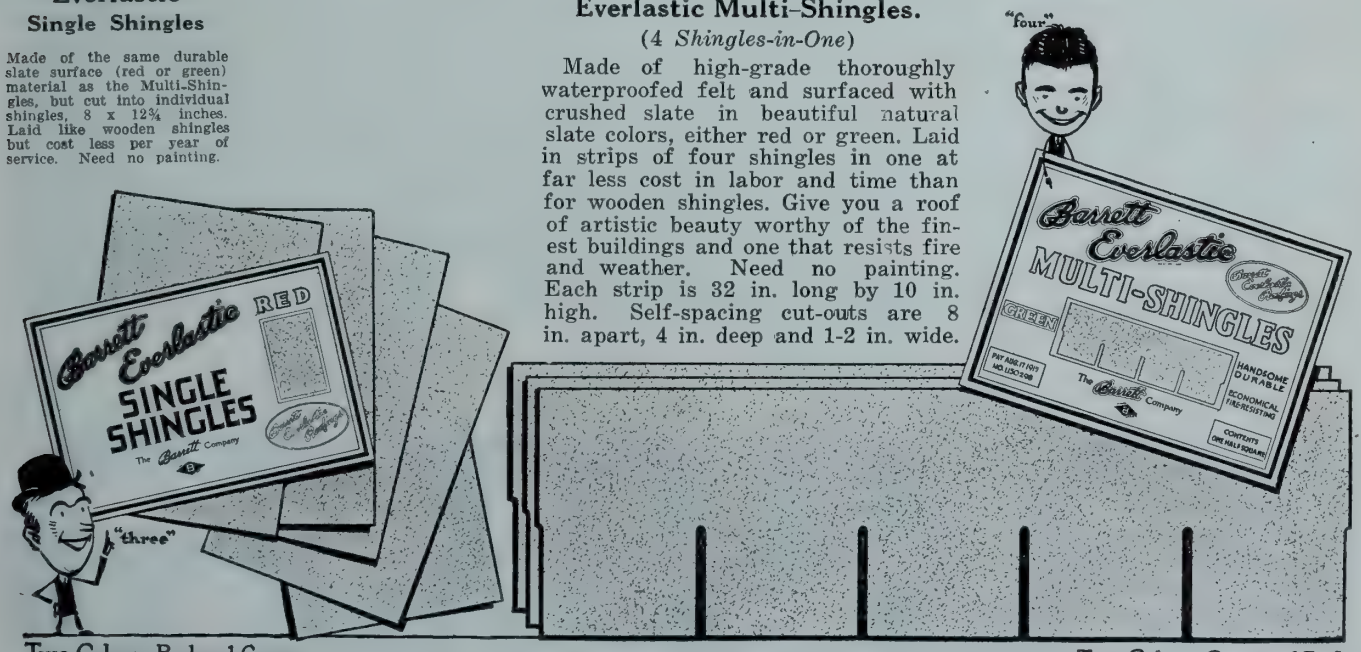
MONTREAL TORONTO WINNIPEG
VANCOUVER HALIFAX, N. S. ST. JOHN, N. B.

Everlastic
Single Shingles

Made of the same durable slate surface (red or green) material as the Multi-Shingles, but cut into individual shingles, 8 x 12¾ inches. Laid like wooden shingles but cost less per year of service. Need no painting.

Everlastic Multi-Shingles.
(*4 Shingles-in-One*)

Made of high-grade thoroughly waterproofed felt and surfaced with crushed slate in beautiful natural slate colors, either red or green. Laid in strips of four shingles in one at far less cost in labor and time than for wooden shingles. Give you a roof of artistic beauty worthy of the finest buildings and one that resists fire and weather. Need no painting. Each strip is 32 in. long by 10 in. high. Self-spacing cut-outs are 8 in. apart, 4 in. deep and 1-2 in. wide.



Two Colors~Red and Green

Two Colors~Green and Red

Weekly Paint Markets

MONTREAL

MONTREAL, October 5—According to information given this week, the paint markets are now in a fairly healthy condition; this, notwithstanding a slight weakening in the turpentine market and the present uncertainty of linseed oil. Taking the industry as a whole, the undertone of the market is quite satisfactory for this season of the year; many raw materials for the manufacture of paint, varnishes and specialties have firmed up in the past few weeks. Coupled with this is the receipt of an encouraging amount of Fall business, and with every appearance of activity during the winter months for next year's requirements. Early bookings for these supplies are in most cases in excess of those of last year.

Turpentine did not hold the gains of recent weeks, but is this week quoted 5 cents per gallon lower. This is not surprising for, as pointed out in our last issue, the health of the rapid rise in the three weeks previous was questionable. Linseed oil is locally unchanged in price, the market remaining very uncertain although somewhat weaker owing to the recent reports of crop conditions. Shellac quotations are advanced from 55 to 60 cents per gallon in barrels and one gallon jugs, this increase in price furnishing the featured change in quotations this week. The undertone of the shellac market has been decidedly firm for some weeks past and previous gains in prices have been made in outside markets. White lead in oil and putty are practically unchanged, both selling seasonably well at present. Window glass and plate glass prices are remaining unchanged, window glass selling at net list and plate at 60 off list prices. A further price concession however, is offered on window glass, in the nature of an additional discount, for quantity buying.

LINSEED OIL EASIER: NO PRICE CHANGES

Montreal.

Although the undertone of the linseed oil market is a little easier, current quotations locally remain unchanged. The general price of raw oil, in one barrel lots, is 85 cents, but the higher price of 90 cents is held forth in some quarters. Continued fluctuations seem to furnish the feature in the oil market and the present easier tone is thought, by some in authority, to be only a temporary condition. Encouraging in this direction is the recent improvement in demand from large contracts now being placed. This will lend great assistance to the market, and offset any tendency toward a marked slump through the report of greater quantities of seed for future than were at first anticipated.

From present indications there is every likelihood of some shortage of seed, notwithstanding the Argentine crop now looks more promising. The American and Canadian crops will not meet demands, and the latest Canadian estimate is placed at 5,590,000 bushels, a shortage of nearly a half-million bushels. This will mean an extra call on the Argentine. Local quotations at present are:

LINSEED OIL—

	Raw.	Boiled
1 to 2 barrel lots, per gal.	0 85	0 87
3 to 4 barrel lots, per gal.	0 83	0 85

Less barrels, add 10 cents per gallon.

TURPENTINE PRICE DROPS 5 CENTS

Montreal.

The recent strength and price advance in the turpentine market did not hold, and this week a price recession of 5 cents is reported, bringing present quotations locally down to $1.07 in one barrel lots. To many, this is not surprising as the health of the rapid rise of the previous three weeks was questionable. According to one large importer, a further easing may still follow in the next week or so, but it is expected to be of a slight nature and the market will then be in a favorable position in regard to price. With present Southern conditions, a local quotation around $1.00 would still leave the market in a satisfactory state. The demand is seasonably fair, and an improvement rather than a slump is looked for as the season advances. Present quotations are the following:

TURPENTINE—	Imp. gal.
1 barrel lots	$1 07
2 to 4 barrel lots	1 05
Broken lots	1 17

WHITE LEAD BECOMES FIRMER

Montreal.

Fall buying in white lead is now very satisfactory. The orders coming to hand are still of a small nature, but this is expected as outside dealers will only purchase for their requirements this season, leaving next Spring's business to take care of itself at a later date. The revision in prices last month has undoubtedly offered a stimulus to buying. The trade were looking forward to lower prices, and when these were realized it offered a great selling point for the dealer customer. A steady market is looked for now throughout the following months, the market for raw materials in the manufacture of white lead is stiffening and every indication is to a firmer market than formerly, with the new lower prices. Present quotations locally are $12 in five ton lots, $12.75 in one ton lots and $13.10 in less quantities.

ACTIVE DEMAND FOR PUTTY

Montreal.

The Fall movement of putty becomes more active each week, and as the season advances sales increase both in number and volume. There is practically no change in the market since the recent revision in quotations, and following are the new prices:

PUTTY—

Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk barrels, 800 lbs.	4 00	4 50	4 75
Bulk drums, 100 lbs.	5 00	5 50	5 75
Do., or tins, loose, 25 lbs.	5 25	5 75	6 00
Drums or tins, cased, 25 lb.	6 00	6 50	6 75
1-lb. tins	8 75	9 25	9 50

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices

SHELLAC PRICES ARE ADVANCED

Montreal.

Quotations on shellac, both white and orange, are advanced from 55 to 60 cents per gallon this week. Orange shellac in one gallon jugs will now sell for $4.15 per gallon, white at $4.65. There has been a firmer tendency in the shellac market for some weeks past, therefore these higher prices do not come as a surprise. Advances have been previously made in outside markets, and the local market has held off very well without a change in prices to higher levels before this. Shellac sales are fair although a great amount of activity is not looked for at this period of the year. Following are the new prices:

SHELLAC—

Orange shellac, in barrels	$4 15
Do., in one gal. jugs	4 50
White, in barrels, or 5 gal. jugs	4 65
Do. in one gal. jugs	5 00

UNCERTAIN OUTLOOK FOR WINDOW GLASS

Montreal.

The current market for window glass continues to improve, and orders for Fall requirements are now coming to hand. These orders are not as large as in past seasons, and dealers are still holding off in their large purchases. There is again some little discord amongst the different supply houses relative to prices. The Montreal net list

"Save the surface and you save all" Paint & Varnish

Glidden finishes possess all the qualities necessary to a satisfactory result—they *look well* and *wear well.*

This ability of "making good on the job" is attracting thousands of friends to the Glidden line every year. The name Glidden has become known as representing the highest type of paint and varnish materials. It's this reputation, in every part of the Dominion, that is creating profitable business for dealers everywhere.

You can get your full share of this business with little effort. If you're really in earnest about the paint question we have a proposition that will interest you. Write us for particulars.

THE GLIDDEN COMPANY, Limited
Toronto, Ontario

Branches at Montreal and Winnipeg

is most general, but some jobbing houses are offering an additional 5 per cent., and even 10 per cent., for quantities. With the busy season now approaching a settlement in prices was hoped for, but whether this will materialize, or whether the market will again become unsettled, remains to be seen. Stocks are now in good shape to take care of the increased business usual in the following months.

TORONTO

TORONTO, October 6—Price changes to a lower level in both the turpentine and linseed oil markets, occupy the feature attraction in paint circles this week.

Turpentine quotations have registered a drop of 5 cents per gallon, attributable to a lack of demand, and the slight easing in the strength of turpentine markets. The reasons behind the recent skyward movement of quotations on the primary markets were not immediately apparent, and consumers showed no inclination to buy heavily at the higher values. The bulk of current purchases at southern producing centres cover the actual trade needs, and buying of this nature continues from week to week irrespective of the range in primary market quotations. However, the majority of consumers are reported as carrying very little supplies on hand, and consequently the fluctuations apparent on the Savannah markets are more sharply reflected in local prices.

The concession in linseed oil prices is attributable to the easier prices on flax seed, while current trade in linseed oil has not improved to any noticeable extent. The fact that seed prices are again lower, has discouraged buying, and the prevailing demand for oil is described as conservative in character, with small orders general. A 2 cents per gallon reduction in prices on both raw and boiled oil has developed.

HIGH TURPENTINE PRICES FAIL TO HOLD

Toronto

A five-cent per gallon decrease has been announced in the current quotations on turpentine. This decline brings the new price level to $1.10 per Imperial gallon in 1 barrel lots, and conforms to the trend of this market as outlined in a previous issue of Hardware & Metal.

The attitude of consumers was questionable of the healthy state of the recent skyward move of prices on southern primary centres, and very few orders were filled at the higher quotations. The strength of turpentine markets consequently eased a little during the week, and the lack of demand contributed to the lower price given. The new quotations follow:

TURPENTINE—

1 barrel lots, per Imp. gal.	1 10
2 to 4 barrel lots, per Imp. gal	1 09
5 gallon lots, per Imp. gal	1 25

LINSEED OIL PRICES LOWERED TWO CENTS

Toronto.

Following the recent fluctuations in the prices of flax seed, linseed oil quotations have been lowered two cents per gallon this week. This change brings the prevailing price on oil to 90 cents per gallon for raw, and 93 cents for boiled, in 1 to 2 barrel lots. The current demand for linseed oil has also assumed a dull tone, and the easier prices have consequently developed on the local markets. Following are the new quotations:

LINSEED OIL—

1 to 2 barrel lots, per gal.	0 90	0 93
3 to 5 barrel lots, per gal.	0 89	0 92
6 to 9 barrel lots, per gal.	0 87	0 90

Less barrels, add 15 cents per gallon.

FIRMER TONE EVIDENT IN SHELLAC MARKETS

Toronto.

Current quotations on shellac have attained a firmer tone, and the shellac market generally has recently shown signs of a gain in strength. This is mainly attributed to the firming up of prices on the primary shellac gum markets, but whether the higher level on gum will be maintained for any length of time is questioned by well-informed dealers in the paint industry. Locally, the prices given on shellac are now more general than was hitherto noted, and the average quotations are given on the current market pages.

ACTIVITY IN PAINT CIRCLES

Toronto.

Sales of paint, varnishes and specialties, are now quite satisfactory for the fall trade, and paint producers are convinced that a good amount of business will be forthcoming during autumn and early winter months. While the new lower prices are not thought entirely responsible for the activity, they offer an important factor. Much outside painting remains to be done which will help the sale of both white-lead-in-oil and ready mixed paints.

While shipments are not at present being forwarded, booked orders for next season's requirements are now being received. These are also very satisfactory and in many cases for greater quantities than last year. Between the two, present and future deliveries, paint houses have again put on an appearance of activity.

OUTDOOR PAINTING BOOSTS DEMAND FOR WHITE LEAD

Toronto.

Current demands for white lead in oil have recently recorded some increase. This tendency is expected to be more pronounced during the next weeks, as painting looked for during the Fall period, a marked degree of activity should be reflected in white lead. The price reductions, materially assist in this stimulation. Following are the prevailing quotations on white lead in oil:

WHITE LEAD IN OIL—

	5-ton-lots.	1-ton lots.	Less quantities
Per 100 lbs.	$12 70	$13 20	$13 55

EXPECT FAIR SEASON IN WINDOW GLASS

Toronto.

With the new net glass list now generally in effect, preparations for the anticipated Fall season in window glass are now well away. In some quarters a slight increase in the current movement has already been noted, and in this connection, some distributors have stated that stocks on hand throughout the country are irregular, being light in most sections, with moderate supplies in others. However, with a normal demand for window glass, manufacturers and distributors look for a fair season. The increase in the volume of Fall building activity, is a contributory feature. Any shortage in specific sizes of double- diamond, are expected to be replenished prior to the general Fall demand, by shipments now in process of arriving. The net glass list is contained on the current quotation pages.

PUTTY MOVEMENT IMPROVES

Toronto.

The expected acceleration in the current movement of putty has now been slightly evident. The recent easier price levels are expected to share more or less prominently in stimulating this activity. The increase in the volume of Fall building, coupled with the gradual improvement in window glass sales, are contributory factors. Following are the recently revised putty quotations:

PUTTY—

Standard, per 100 lbs.	5-ton-lots	1-ton lots.	Less
Bulk bbls	$ 4 45	$4 95	$5 25
100-lb. drums	5 45	5 95	6 20
25-lb. irons	5 70	6 20	45
Bladders in bbls.	6 70	7 20	7 45
Do., less quantities . ..	6 95	7 45	7 70

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices for similar quantities

CANADA'S TRADE WITH U. S. IN PAINTS, VARNISH, ETC.

Paints to the value of $4,095 were imported into the United States from Canada during the month of July, 1921. U. S. exports of colors, oil etc., during the month were as follows: Dry colors, carbon, bone, lamp-black, $17,008; all other colors $20,782. Red lead 19,279 lb. valued at $1,651. White lead 20,059 lb. valued at $1,520; Linseed oil 736 gallons valued at $564

Exports from the U S. to Canada of ready mixed paints, varnish, zinc oxide, etc., were as follows: Ready mixed paints 4,285 gallons valued at $6,654; Varnish 2,095 gallons valued at $6,569; Zinc oxide, 360,470 lbs valued at $29,-902; All other paints etc., valued at $50,583.

The City Council of Montreal intend installing new boilers in their pumping station on Craig St. It is expected that these boilers will cost around $15,-000. Bids will also be called shortly for four new pumps for the Rielle St. pumping station, and the latter will also cost about $15,000.

A *Selling* Price —

Recent reductions in the price of Imperial Polarine Motor Oils are all in favor of the dealer. Buying has been greatly stimulated. Turnover has increased and profits have mounted correspondingly.

Despite price reductions the quality of Imperial Polarine Motor Oils remains the same. Your margin of profit is even greater than before when you figure it from the stand-point of turnover.

You can meet any competition with Imperial Polarine Motor Oils. Imported oils, no matter how much they cost will not give more lubrication than this Canadian product made by Canadian workmen in five great Canadian Refineries.

Start pushing Imperial Polarine Motor Oils harder than ever and "cash in" on this profitable line. Details regarding the attractive Imperial Polarine dealer agreement will be furnished you by the Imperial Oil Salesman. Write to 56 Church Street, Toronto.

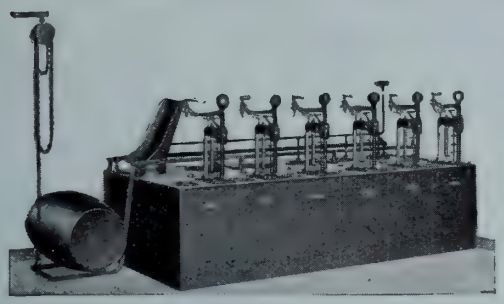
Eliminate Waste in Handling Paint Oils

Too much waste is incurred when paint oils are handled in the old fashioned way. Install Bowser Equipment and you will eliminate leakage, gumming and spillage in transfer—there can be no waste with Bowser.

Bowser Tanks are all-metal and leak-proof and the Piston-Type Measuring Pumps deliver the *exact* amount required of *clean* oil.

Similar advantages recommend Bowser Equipment for handling Burning Oil.

Bowser Gasoline Equipment stores gasoline economically and safely.



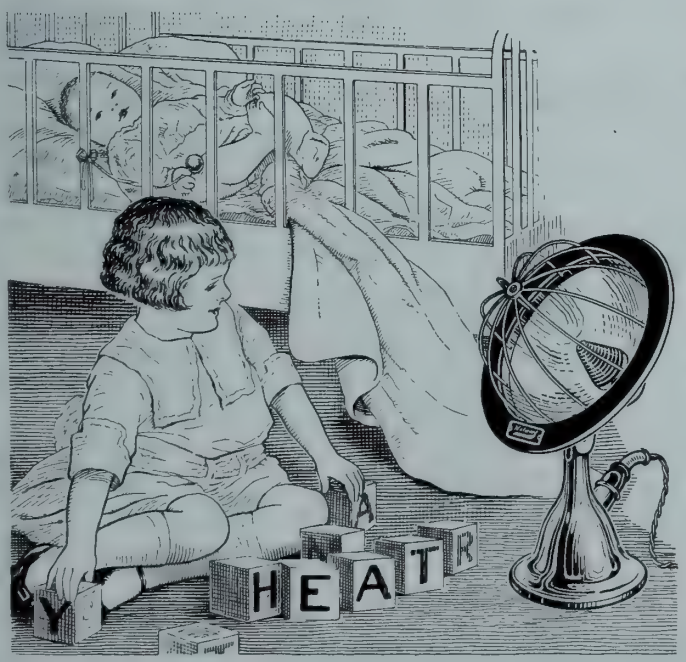
Write for Illustrated Booklet *C-16*

Bowser Equipment is MADE IN CANADA by

S. F. BOWSER CO., LTD.
1668 Frazer Street, Toronto, Ontario

BOWSER
ESTABLISHED 1885
PISTON-TYPE MEASURING PUMPS

Safe, Healthful Electric Heat for the Nursery---for any room



AS harmless and healthy as the genial rays from the sun—the Heatray uses up absolutely no oxygen from the air. It is electric heat.

In the nursery, bathroom—anywhere—you can enjoy this splendid heat the moment you want it by simply carrying the Heatray to the spot and putting the plug into the receptacle

The

National ELECTRIC HEATRAY

has **extra** heavy cast base beautifully nickeled. It is hard to tip, but if it does tip, the safely secured guards make it entirely free from danger.

Link up with national consumer advertising now running in daily papers throughout Canada, by displaying National Heating Heaters in your windows.

The National Electric Heating Company, Ltd., Head Office and Factory, Toronto

249 Mountain St., Montreal 52 Albert St., Winnipeg 627 Vancouver Block, Vancouver

Makers of Electrical Appliances only—National Electric Ranges, Grates, Circulation Water Heaters, Toaster Stoves, Irons, etc.

"Premier Leader" STEEL RANGE

When talking Stoves and Ranges to your customers always remember that the name "Davidson" is an absolute guarantee of satisfaction. The "Premier Leader" Range has a body of heavy polished steel, protected by asbestos and hand riveted with cone-headed rivets, cast iron tops, centers and covers ribbed.

A contact reservoir can be supplied to attach to either left or right end. Steel Persian closet at top is an extra convenience.

A very moderately priced range of thoroughly reliable quality.

Ask for Booklet No. 2

The Thos. Davidson Mfg. Co. Limited

Head Office: Montreal
Branches: Toronto and Winnipeg
Steel Foundry Division: Lachine Canal, Turcot

TRADE MARK J.M.T. REGISTERED A GUARANTEE OF QUALITY

True Economy
Stack Heater

The Stack Gas Water Heater will heat water in one minute.

The almost perpendicular copper pipes in the Stack Heater offer no hindrance to the natural tendency of water to rise when heated.

Take notice of the small size and large number of coils; this means quick heat. The numerous small pipes will naturally heat water quicker than one big pipe because of the greater heating surface offered.

More hot water with smaller consumption of gas—that's true economy.

Send for a Stack Heater Display Card

TINKER TOM'S TALKS.

Talk No. 333

Sheet prices have been falling for the past year, but like all falling objects they reach bottom at last.

The mills not only donated their services free, but have handed out large "gobs" of surplus. Sanity has regained control, prices have advanced lately and although no one would buy when the decline was on, they are all buying now.

Delivery is again most important. Your jobber can give you a close-to-bottom price and prompt shipment if you do it now, and specify Premier —Made-in-Canada.

Tinker Tom

If interested tear out this page and place with letters to be answered.

Wa-Ko-Ver Stain
Beautifies All Woodwork

Not only does it beautify, but it wears like iron. You will find it pays in future sales always to recommend Wa-Ko-Ver Stain whenever your customers have worn floors or scratched woodwork to renovate. It restores the freshness of the floors or woodwork, pleases your customers, and makes permanent business for you. The established reputation of this effective, serviceable stain makes it a pleasure to sell. Good displays in your windows, on your counters, or other conspicuous places, remind visitors to your store, and people that would otherwise be "passers-by," of their need for Wa-Ko-Ver stain. This sales-maker will handsomely reward a little sales-effort on your part.

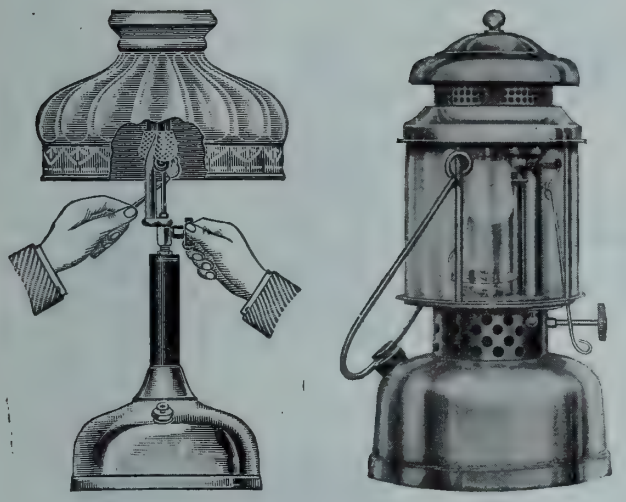
The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND
A
ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

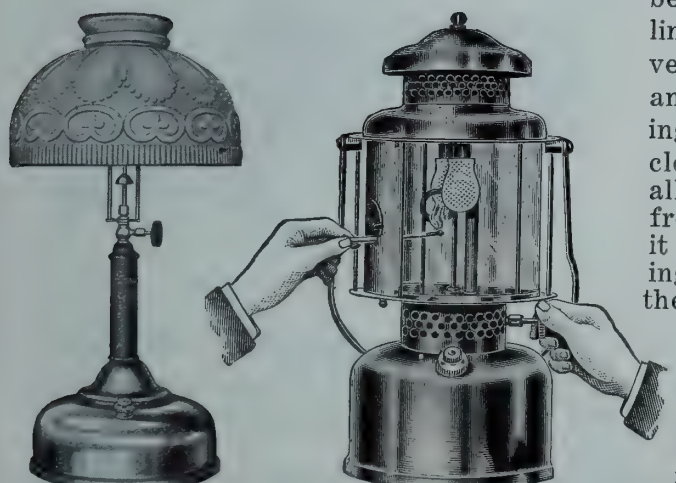
FOR GOOD SALES---

Look over These Ashdown Offerings



No. CQ329 Quick-Lite holds 3 pints and burns 18 hours on one filling. One in carton complete with shade, mantles, pump, wrench, hanger, cleaning pick and extra generator. Shipping weight, 9 lbs. A handsome, attractive lamp. Popular with users and easy to sell. It gives the greatest satisfaction in use and leads to many other sales. Ask for detailed information about this interesting lamp or any of the others shown here.

The Storm King Lantern—the most efficient, safe, reliable, powerful and economical light on the market; simple in construction and operation; easy to light and extinguish, and absolutely storm proof; can be taken apart in a few seconds if desired. The ideal lantern for campers, hunters, and summer resorts.



The Nulite Reading Lamp is pronounced by users to be the last word in Gasoline Lamp Perfection. It is very neat and convenient and has automatic cleaning device which not only cleans the tip automatically, but prevents Lamp from clogging, also aids it in starting lamp, making it possible to generate the gas in twenty seconds.

The LQ. 327 Quick-Lite Lantern, with match generating burner, is the handiest outdoor lantern made. Gives same brilliant pure white light of 300 candlepower at same cost. Is wind-proof, rain-proof and bug-proof. Holds a quart of fuel, enough for 12 hours' use on one filling. Just the thing for farmers, nightwatchmen, plumbers, garages, builders, campers, auto-tourists, etc.

Dealers who have used or sold gasoline lamps will quickly recognize the big advantage a match-lighting lamp has over the torch-lighting styles

JOHNSON Ideal HALTER Co. Sarnia, Ont.

KESTER ACID CORE WIRE SOLDER

FLUX IN POCKETS

—a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of solder. In great demand by all solder users because it saves half of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock solder.

Kester Rosin-Core Wire Solder is also manufactured for delicate electrical work.

CHICAGO SOLDER COMPANY

4225 Wrightwood Ave. **Chicago, U. S. A.**

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worth-while buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

Ash Sifting Season!

"I can sift ashes now."

The season is here when you can sell ash sifters as fast as the proverbial "hot cakes"—if you have a clean, dustless

Samuels Dustless will convince your customers. It is clean, effective, and will not rust. There's only one Samuels Ash Sfter, and you may have it if you write today for the agency. We may not be fully represented in your town.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

RELIABLE

WANTED BY OLD ESTABLISHED ENGlish Varnish Manufacturers—A Live Agent for the sale of their goods throughout the Dominion, in which their Trade Mark has been known for years. In reply give full particulars as to ground covered, number of representatives employed and state Commission required. Box 100—Hardware & Metal. 88 Fleet Street, London, England.

Practically all big buyers of hardware in Canada are readers of HARDWARE AND METAL.

It Pays to Read the Advertisements

The main thing an advertiser wants to do is to tell you plainly just how and why his goods are worthy of your consideration. You can learn a great deal from that alone, because many things you see advertised are the things you buy and use in your regular daily life. By reading advertisements you can learn the names and read descriptions of the things that are best and most satisfactory.

READER'S NOTICE
Regarding
CHANGE OF ADDRESS

A REQUEST FOR CHANGE OF ADDRESS must reach us at least thirty days before the date of the issue with which it is to take effect. Duplicate copies cannot be sent to replace those undelivered through failure to send this. Give your old address as well as the new one.

Good papers furnish A. B. C. reports to their advertisers.

Hardware and Metal is a member of the Audit Bureau of Circulations.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Metal Stamping and Press Work to Order

Also name plates, embossed trade checks, time checks, badges, steel stamps and stencils or anything in steel or brass lettered or embossed to order.

★ UNIVERSAL

HIGH-GRADE CUTLERY

No. 04411½
Carving Set

The trade you get doesn't worry you. The trade that gets away is what causes you sleepless nights. Cutlery users haven't vanished from earthly scenes. Their needs are as numerous as ever. They are ready to spend freely—to buy **savingly.**

The sure way to coax money out of reluctant purses is to feature both the fine quality and lower prices of "Universal" Cutlery. Holiday shoppers are bestirring themselves. Buyers with bargain-sharp eyes are looking for real values at prices that make buying a **saving.**

Advertise "Universal" Cutlery for every cutting need. Display "Universal" Carvers, Kitchen Cutlery, Razors and Shears. Feature Hunting Knives that are needed now by all sportsmen. Above all else, advertise, display and talk "Universal" lower prices. Then the stand-offish trade will hasten to buy—**savingly.**

Write for "Universal" Cutlery Window Trim. It is new, wonderfully attractive--just the thing for holiday use.

Hatch

Garage Door Outfits

To be reliable, serviceable and efficient, a set of garage hardware doesn't have to cost almost as much as the automobile. The Hatch Garage Door Outfit has all the qualities the heart could desire in a dependable outfit—yet it is low priced. Low priced, that is, for the high quality. Try it on your own garage; then you'll realize why the customers are delighted.

The Set Includes:

3 Special Swivel Door Rollers; 22 feet of Track; 3 Pairs Special Garage Door Hinges; 3 Stay Rollers (floor guides); 2 Extra Heavy Garage Door Handles; 1 Safety Hasp (for fastening doors outside); 1 Hook and Eye (for hooking back swinging section inside).

The track comes in separate bundles—two 8-foot and one 6-foot lengths. Screws and bolts for everything. Japan finished and all neatly packed in a wooden box. Ask for prices and details.

BUNDLES OF PROFIT

THERE is a market for Aloxite Cloth as far reaching as industry itself.

There is a demand for it in every factory, plant, shop and garage, big and little—everywhere.

Mechanics use it for finishing parts; in smoothing and polishing metal work in general—for rubbing paint filler. They are using it on any work where they once used the old time emery cloth.

Aloxite Cloth—The Cloth That Cuts

Works so much faster—lasts so much longer—leaves a more uniform finish because it is coated with Aloxite, one of the most efficient of all artificial abrasives—because it is uniformly coated with uniformly graded grain on a strong, flexible, backing.

Right now we are running a big Trades Paper advertising campaign featuring this product. Better be prepared. Stock up with Aloxite Cloth in the Economy Rolls and in Reams.

DISPLAY IT IN YOUR WINDOWS—LET 'EM KNOW YOU HAVE IT

Adjustable and Swivel

Garage Door Set, No. 150

For Sliding Garage Doors Around the Corner to the Side Wall

No. 150 Adjustable and Swivel Garage Door Set

Here is a Real Money Maker for Every Dealer

This Outfit is a little better than any other outfit on the market today. The No. 135 Hanger, supplied in this outfit, is not only swivel but is adjustable both ways. If the door drags or binds when erected, it can be adjusted, without taking off the door, by simply raising or lowering the adjustment bolt as required.

ALL PARTS JAPANNED

No. 150 Set for 3-door outfit, as illustrated above, includes 22 feet of Track, 3 No. 135 Adjustable Hangers, 3 pairs of Heavy Strap Hinges, 2 Heavy Door Pulls, 1 Safety Hasp, 3 Stay Rollers. Packed 1 set, complete, in box, with necessary screws for attaching, and illustration showing how to apply.

EVEREADY

announces to the trade and the public a sweeping reform---a revolutionary development---in Flashlight Batteries

UNIT CELLS

Unit Cells are made in two sizes only, 1¼ inch and 1½ inch, and they fit all tubular flashlights. This will be welcome news for the dealer—it simplifies the keeping of battery stocks by reducing all tubular battery replacements to only two sizes of Unit Cells instead of various sizes and lengths as heretofore. Flashlight batteries are now standardized—only two sizes to fit all tubular flashlights.

NEW AND ATTRACTIVE COUNTER DISPLAY CASE

Placed on the counter, this attractive Display Case will sell Unit Cells for you. Saves shelf space. Saves keeping a big stock of various-sized batteries. Increases turnover and profits. Place an order for Unit Cells with your jobber to-day. No. 935 for 1¼ inch cases, No. 950 for 1½ inch cases.

Washing Machine Motors

If the Motor isn't good the Machine is no good

There isn't room to say anything more except that we have designed a motor that is particularly and definitely adapted to run appliances used by women.

The main object in the manufacture of this motor has been to make it *trouble-proof in every way.* It is so certain that this purpose has been achieved that it is really worth while for any woman to be sure she gets a Westinghouse Motor on any appliance she buys.

Ford Lubrication

Why Gargoyle Mobiloil "E" belongs with your other Ford Specialties

MULTIPLY the Ford Cars in your section by 10 or more gallons per year and you get an idea of the local sales possibilities of Gargoyle Mobiloil "E."

Gargoyle Mobiloil "E" rarely fails to show surprising advantages over other oils in a Ford engine. Some of these are—

New freedom from carbon. The carbon of Gargoyle Mobiloil "E" is a light, dry ash, practically all of which is expelled through the exhaust.

New freedom from overheating. Yes, even in hot weather, even through a hard day on heavy roads.

New Economy of gasoline and oil consumption. Engineering tests show that the body of Gargoyle Mobiloil "E" forms the proper seal for the pistons and rings, maintaining compression and increasing power. First-time users are repeatedly surprised at the longer lasting qualities of Gargoyle Mobiloil "E" and its ability to conserve gasoline.

The opportunity to sell Gargoyle Mobiloil "E" was never as great as it is **to-day.** Be sure to have plenty of Gargoyle Mobiloil "E."

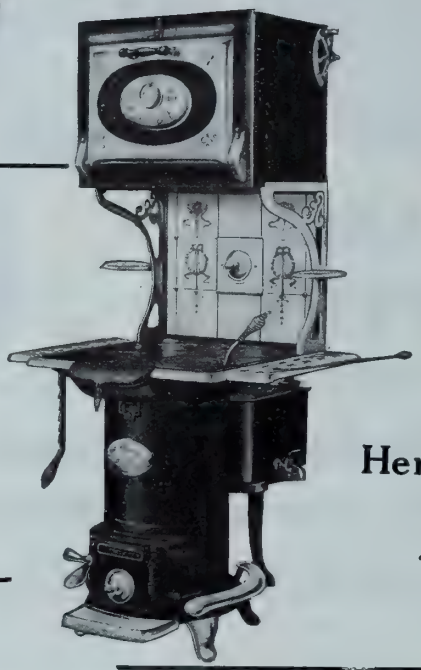
The Maple Leaf Dealer
Needs No Alibis!

The 'Thatsit'

A six hole top Quebec range of great capacity and wonderful thoroughness, it is graceful and attractive in design, and is the newest member of our big "Quebec" line.

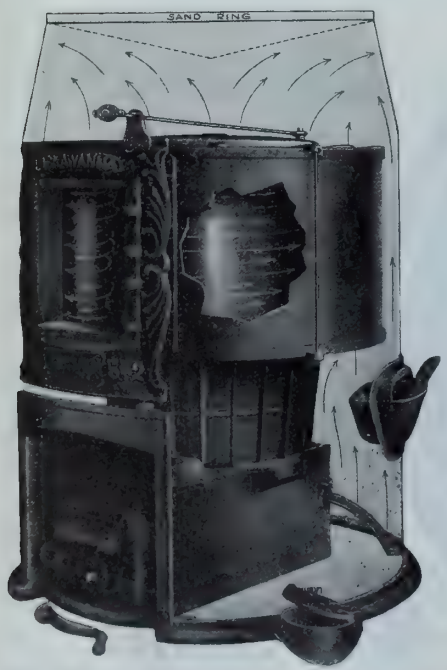
THE FORTUNATE merchant who handles Maple Leaf ranges, stoves, heaters, and furnaces never needs to make apologies or excuses. Because this brand of fire and heat controlling machines always fully "backs up" all your statements and claims with the grand net result of complete satisfaction to the client and much profit and pleasure to yourself.



The Composite

A Maple Leaf Quebec Range which has no equal — It cooks, bakes and heats with equal facility — It saves space and fuel --It is good to look upon, it pleases fully.

Here's Three Timely Maple Leafs on which you can "Go the Limit"



The Lackawanna Furnace

For the even, gratifying complete heating of the home or store or building of any sort, the Lackawanna acknowledges no peer. It is made in sizes to heat spaces ranging from nine thousand to seventy thousand cubic feet. It is foolproof, efficient and economical. The dealer will make no mistake in recommending or selling the Lackawanna. For every one installed is a working salesman always on the job.

IF YOU want to join the big family of Maple Leaf dealers write us today for full particulars. If you are already a Maple Leaf dealer--have you our latest catalog and prices? Write us anyway.

Vernier Depth Gauge

This is one of the tools that takes care of the difficult and "hard to get at" measurements. It is used in obtaining the depth of holes, recesses in dies, distance from a plane surface to a projection and in many other unusual places.

It is a fine precision tool and is bought by mechanics who realize the value of Brown & Sharpe Machinists' Tools.

Westclox

—that's Big Ben's family name

Let your window talk

IF YOU could buttonhole every person in your town who has read the latest Westclox advertisement and tell that person that you believe in and recommend this line of good timekeepers, you'd certainly sell a lot more of them, wouldn't you?

Any good merchant would.

Now, by rigging up a good, attractive display of Westclox during the week the big Westclox advertisement is appearing in the Saturday Evening Post you will get much the same kind of attention for your line from customers who might otherwise walk serenely past your store.

A trial will prove this for you in very short order. Let your window do a little Westclox talking for you during the week of October 22nd when Sleep-Meter and Pocket Ben have the stage in the Post.

Get these two good sellers on display. See what a bright, attractive window they will make with their smart, orange-buff Westclox tags.

It's bound to show some good cash-register results, both in the sale of alarm clocks and other merchandise.

Western Clock Co., Limited, makers of Westclox

Peterborough, Ontario

A Good Proposition For Jobbers and Dealers

VICTOR

Improved Wood Snow Shovels

Think of VICTOR Shovels for all-the-year-'round sales. Why not have the additional money coming in instead of storing them all summer down cellar?

VICTOR Shovels will not damage the floors of stables and barns, as steel shovels do.

Display them and push them throughout the year VICTORS are made broad or narrow—several sizes. Children's sizes are plain or painted red. All are oiled to prevent snow sticking, and supplied with top ferrule, or top and bit ferrule.

There's Money in No 4

HERE'S the new Klein No. 4 assortment—made up of **sure sellers!** Only the quick-selling sizes and shapes go to make up this assortment. The whole proposition is carefully proportioned. There will be no left-overs to sell at a sacrifice and it's backed by year-round advertising to your trade.

And the assortment is priced lower than even our present prices on the separate items. We know the past success dealers have had with No. 4 and we're making it in quantities as a specialty.

Every item is priced right to sell—priced to meet the demand for high quality at lower prices!

No. 4 comes packed away in a single box with enameled door signs, counter folders, the striking blue display board, and all manner of sales helps.

Of course, the fine quality, the rigid factory inspection, and the absolute guarantee against all defects in manufacture are the same that have made Klein Pliers standard for over fifty years!

Here's substantial profit—real quality—and right prices.

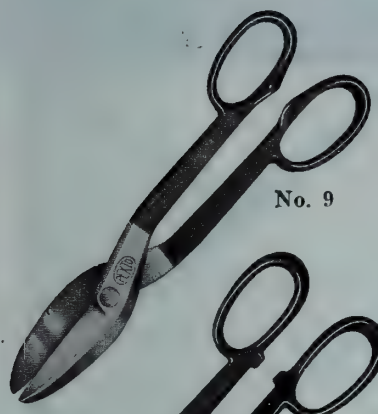
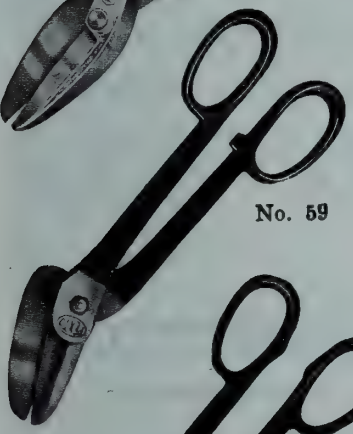
PEXTO GUARANTEED SNIPS

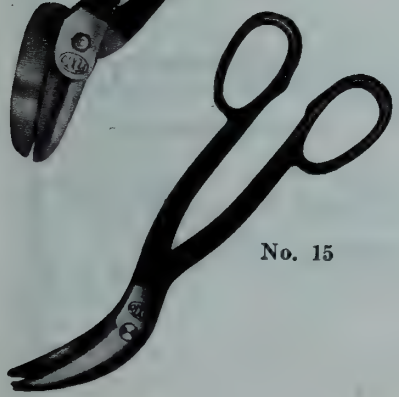


No. 9

No. 49



No. 59



No. 15

Are You Getting Your Share of Snip Sales?

If you are not, it may be because you do not stock a large enough variety of styles.

There are more than a score of styles of PEXTO Snips in various sizes and finishes.

The 1819 Original is without question the highest grade snip made and is backed by more than a century of experience in snip manufacture.

The Samson Snip is second to none, excepting the 1819 Original.

There are uses and customers for all styles and sizes, and the attractive display board does most of the selling work.

WORTH WHILE TOOLS

THE PECK, STOW & WILCOX CO.
Southington, Connecticut, U.S.A.

If interested tear out this page and place with letters to be answered.

The dealer who stocks files that are accepted as the standard among file users avoids the necessity of active selling efforts.

Such files sell themselves.

File users ask for them, and accept them without question.

This is the experience of dealers who carry one of the following five brands, accepted as the standard of file quality for over fifty years:

Kearney & Foot
Great Western
American
Arcade
Globe

Made in Canada by

Nicholson File Company

Port Hope - Ontario

The steadfast quality, dependable accuracy, and continuous advertising of Starrett Tools, has made the name "Starrett" —the strongest selling feature a precision tool can have.

The Booklet — "The Tools Mechanics Buy" — will help you build precision tool sales.

Good Tools——
Make better Sales

YOUR customers will appreciate the good points of Williams' Superior Drop-Forged Nail Hammers, for they mean efficient service.

Their heads are hard, dense and tough. The special split and pitch of the claws give a fast, powerful draw; nails can be drawn **point** first. The tapered eye and special wedges anchor the handle permanently. Its flared grip prevents all hand-slip. Their perfect balance assures increased striking power.

One good tool sells another and Williams' Hammers — made in Canada—will help to move other lines. All patterns and sizes. Catalog on request.

Birkett Salesmen See Many Retail Problems
Maybe They Can Solve Yours?

Birkett Salesmen are on the move. They come in contact with many men, in many businesses, in many towns. It is not extraordinary that they should, in this way, acquire much useful information and knowledge about the experience of other merchants in solving problems.
Perhaps just such a difficulty in merchandising, advertising, accounting, buying, or some phase of the complex retail store confronts you now.

It is to your interest, to our interest and to the Birkett Salesman's interest that your difficulty be overcome; so, ask the Birkett Salesman. He'll help you all he can.

Boost Annual Net Profit

Where does Annual Net Profit come from? It is the total of all the real profits of the year.

Quick turnover of investment, or rapid operations, on small margins bring greater annual net profits, as a rule, than slow turnover of investment with large profit. "Fast nickels beat slow dimes." To increase the number of operations—in other words, the number of small margin profits that make up the annual net profit—use Brown, Boggs Sheet Metal Working Tools. They are especially designed to increase your annual net profit. Investigate! Write today and let us show you how more money can be made in your shop.

OUR SECRET OF HIGHER QUALITY

In no other factory are hack saws produced by the same methods that are used in making Star Hack Saws.

Exclusive machinery and methods, invented and still supervised personally by Geo. N. Clemson, allow us to produce Star Saws by large-scale production, and maintain a higher uniform quality than can be made by old-fashioned methods.

Star Saws are now sold by the factory in Middletown that has always made them.

JARDINE TOOLS

Tire Upsetter No. 2.

TIRE UPSETTER NO. 2. This durable machine has a very quick grip. Both the eccentrics being raised and lowered by one lever. It has a strong and sure grip. The eccentrics and jaws are faced with tempered steel. The tire cannot slip.

It is extremely durable, because it is made of heavy castings, strong enough to stand the very heavy work for which it is designed. All the pivot pins are of steel; the eccentric strap is a heavy forging. In fact, the whole machine is well and substantially made throughout.

This machine upsets tires up to four inches wide. We have on hand repair parts to replace those worn out in use on this and other Jardine Tools.

Ask for Catalogues.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

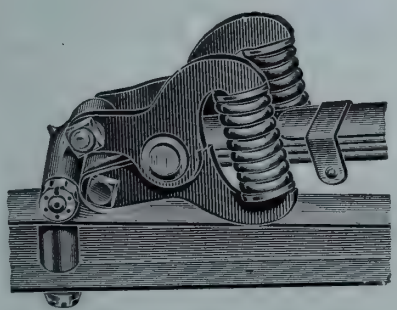
Star W-X Shock Absorber FOR FORD CARS



Star W-X Shock Absorber for Ford Cars. Simple and easy to attach without extra tools; merely put in place of the removed shackles. Rigid against end or fore-and-aft movement, but offers no interference with regular Ford spring mountings.

Gives a greater flexibility of action from normal to full load because of changing fulcrum of levers. This, together with two high-grade compression springs at each corner of the car, insures easy riding and prevents breakage.

Prices within reach of every Ford owner, and the device is easily installed by owner.

This is the Supreme Test of the Waterproof Quality of

Canuck Shot Shells

From December, 1919, until January, 1921, an old canvas bag containing 100 Canuck Shot Shells lay in the remote wilds of Sidney Island. Winter rains drenched these shells. Summer's hot sun beat down relentlessly upon them. Heat, cold, and moisture, the winds of the Pacific—all the elements that rot and decay—sought to destroy these shells, but **they stood the test.**

They Chambered, They Fired, They Patterned

Here's the story as told in a letter by Mr. F. W. Stevenson, broker, of Victoria, B.C.:

> "While shooting at Sidney Island in December, 1919, my companion had the misfortune to mislay and lose a heavy canvas bag containing about 100 Canuck Shells. In January this year, at the same place, another friend of mine recovered this particular bag and after allowing these shells about six months to dry out, I found to my surprise that apparently these shells, after two seasons, in all kinds of weather, are as good as ever, as far as shooting qualities are concerned."

Tell your customers this story of the waterproof qualities of Canucks. It will help you to build a permanent trade of satisfied customers.

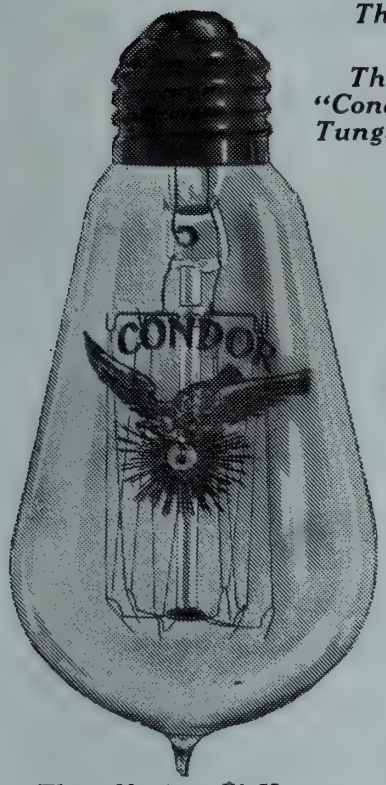
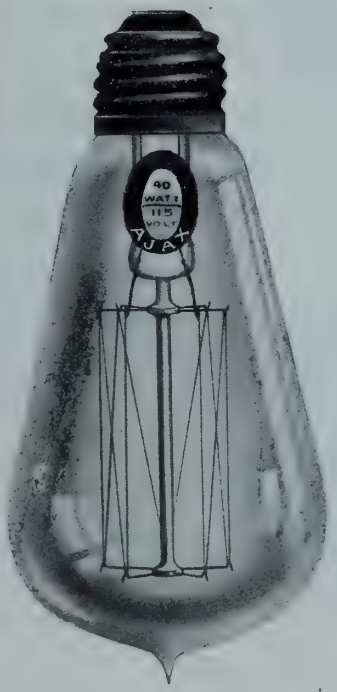
'RICE LEWIS' NEWS

The "Majestic" Heater

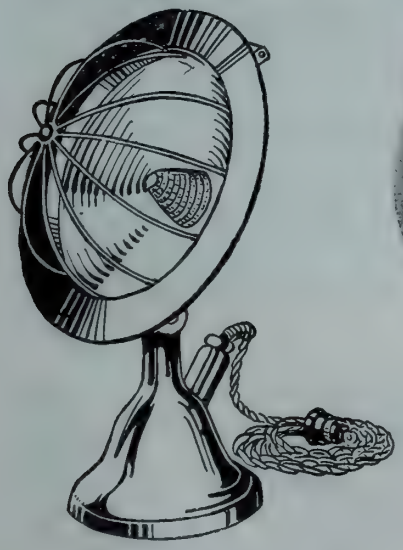
The "Condor" Tungsten



The Ajax Tungsten



The "National" Heatray



The Canadian Winter Home Needs Plenty of Heat and Light

Electric Lamps — With the lengthening evenings comes the increased demand for better lighting. Place your orders with us for "Ajax" and "Condor" lamps in either Tungsten or Nitrogen styles.

Electric Heaters — This Fall will bring an unprecedented demand for Electric heaters. We can supply you with the "National" or the "Majestic"—two popular lines of proven worth.

Electric Heating Pads — Winter with its cold nights and various epidemics always increases the sale of these comforts. We sell the Hotpoint disc and flexible styles.

Charcoal Foot Warmers — Even in the home these Foot Warmers are serving a useful purpose, especially in country homes. Their primary use is, however, for driving. The "Taplex" can be supplied by us on short notice.

Weather Strip — The cold kept out and the heat kept in means much to the coal bin. We stock tried and proven styles, of metal, felt and combination wood and felt door and window weather strips.

Door Checks — Another source of heat leakage is the door that's left ajar. The "Corbin", "Yale", "Sargent", and "Richard Wilcox" door checks meet all requirements. We supply them.

Eveready Flashlights — Though not home lighting in the sense electric lamps are, the flashlight is a home necessity of every day use. We carry a complete range of "Eveready" Flashlights."

The "Taplex" Foot Warmer

The "Hotpoint" Heating Pad

BIG BUSINESS FOR DEALERS IN ENAMELED WARE THE CLEAN WARE

DON'T BE STAMPEDED by mushroom growths of other styles of kitchen ware. Do just a little quiet sleuthing in kitchens where you have the entree, kitchens where you have the entree and you will find that, after all, there is nothing in the kitchen so dear to a sensible housewife as her enameled ware cooking utensils.

It's Woman's privilege to change her mind now and then, but it does not stay changed long when she takes a sudden flare for other styles of kitchen utensils.

She'll come back to enameled ware sooner or later, considerably wiser after her experiment.

Enameled ware carrying the **SMP** trade mark of quality is to be found in three-times-a-day use in every nook and cranny of the Dominion.

And the time is rapidly approaching when **SMP** Enameled Ware—Pearl Ware, Diamond Ware and White Ware—will be sold in ever-increasing volumes to the great army of appreciative, sensible women.

There's **good** profit, **steady** profit, **well-earned** profit for you as a dealer selling **SMP** Enameled Ware to your women clients.

The lines include every article any woman could ask for, in the sizes and shapes she has found best suited to her needs.

Speed-up enameled ware! Be fair with your women customers and recommend the ware that will serve them best and longest—Enameled Ware—the Clean Ware.

Which Sold the Best ?

During the re-adjustment period, the worst of which is over, did you find that advertised goods were the mainstay of your business? Is it true that unadvertised lines became dead stock and a loss? Have you determined, with other leading dealers, that in future goods must be well known to your customers before you will stock them?

In Western Canada goods are not as well and favorably known to farmers as they should be until they are advertised in The Nor'-West Farmer. Forty years of service as the pioneer, practical farm journal, have given this paper a special place in the homes of the West's best farmers who are buyers of 85% of the goods sold by retailers. They look to its pages for farming and buying guidance.

The firms listed on this page have advertised their products to the farmers of your district through our pages during 1921. They have helped you sell when selling was hardest. Their goods will produce quicker turn-over and bigger profits during the fall and winter trade revival.

Advertising in The Nor'-West Farmer is business insurance for you on which the manufacturer pays the premium. Select the best sellers by watching its pages.

Yes, Decorative Wall Burlaps Are Lower Than They Have Been FOR YEARS.

This, Mr. Dealer, is an excellent selling argument for you right now. For you realize full well that every would-be purchaser has "held off" buying because he argued prices were too high.

DECORATIVE WALL BURLAPS

should be kept prominently displayed where every prospect will see them and where their merits can be readily described. Your assortment will take up only a few square feet of space and many more sales will result when they are so shown.

Lay the foundation NOW for a big sale of these wall coverings this fall. Put in a stock of the widths you prefer—they will not call for a big investment—and stimulate your Builders' trade.

These sizes are now available in three shades—green, drab and white;—Length of rolls 30 and 60 yards and widths 30, 36, 45, 54, 60, 72 and 90 inches..

LET US SEND YOU OUR BURLAP SIGN—IT'S FREE

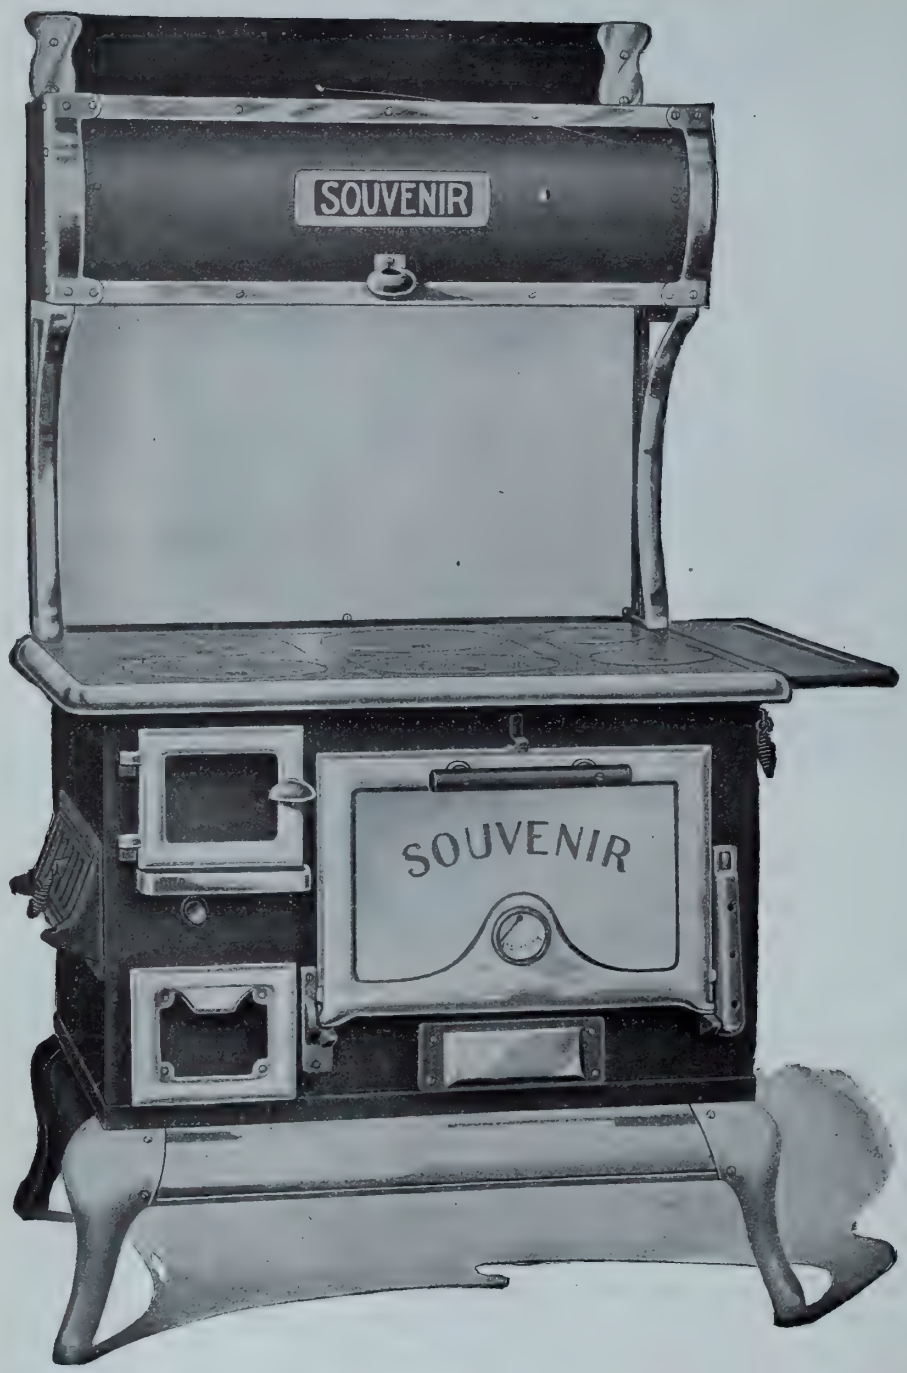
MONTREAL



THIS week we illustrate another "Souvenir" winner, known as the Briton Souvenir Steel Range which is in a class by itself for making quick sales owing to its exceptionally low price.

Although low in price, the Briton has the usual Souvenir quality and appearance built into it and will satisfy every requirement of the person who buys it.

If desired we can furnish it with reservoir and fancy high closet with white enamel splash back, tile effect; and with mirror over warming closet.

Order a sample Briton Souvenir to-day. We feel sure it will please.

Write for Catalogue No. 78 showing complete line of stoves, ranges and heaters. Also large attractive stove hangers used for store and window display. Catalogues, hangers, circulars, prices free on request.

Also write for folders describing our famous New Idea Warm Air Furnaces, pipe and pipeless styles.

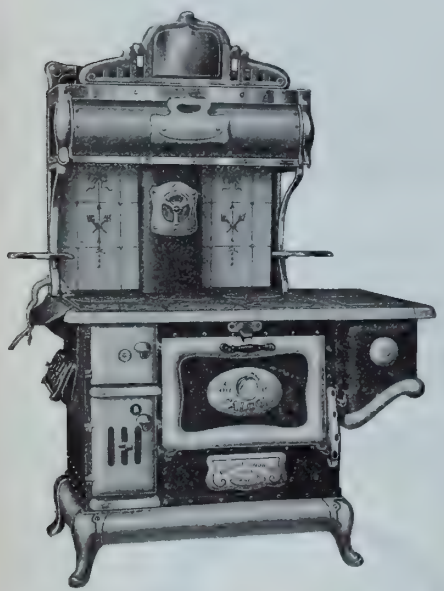
The Maple Leaf "Thatsit" Range

A side-oven, 6-hole "Quebec" range that leaves nothing to be desired. The heat units are so controlled by the new undertop that the fire must pass under all six covers. The oven is 14 x 20 x 11 ½ inches deep with balanced spring type drop door, friction catch, non-heating handle and thermometer. It has a broiler lift and a pouch feed door. It can be fitted either with a hot water boiler or copper reservoir and with or without warming closet. This is a stove that is hard to beat.



The Maple Leaf Falcon Range

An aristocratic steel range that will back up every claim you can make for it. It is made in several handsome designs which makes it an ornament in any kitchen. It gives perfect satisfaction at all times. The Falcon is both a money-maker and a friend-maker for the dealer.

IT'S EASY to stock up with merchandise--but the only kind worth the investment of your time, energy, floor space and capital is a variety that sells readily, pays a good profit and gives complete satisfaction.

The famous Maple Leaf line of stoves, ranges and heaters is a line of merchandise which completely fills this bill. We have been making stoves and ranges for eighteen years. Early in the game we decided that as we could not make all the stoves, ranges and heaters that were wanted we would make only the best. We concentrated our energies on improved designs and to-day the completed Maple Leaf line is a testimonial to the wisdom of our proceeding.

To keep up with the demand it was necessary to build a larger plant, enlarging our capacity three times. And the Maple Leaf dealer has the satisfaction of knowing that he has behind him all of these resources and the best line of stoves and heaters that can be procured anywhere.

In selling Maple Leaf heat producers you are following the line of least resistance in the way of profits.

The securing of the Maple Leaf agency for your town will be one of the wisest moves that you have ever made.

Get in touch with us today. Let us send you full particulars, catalogues, price lists and terms.

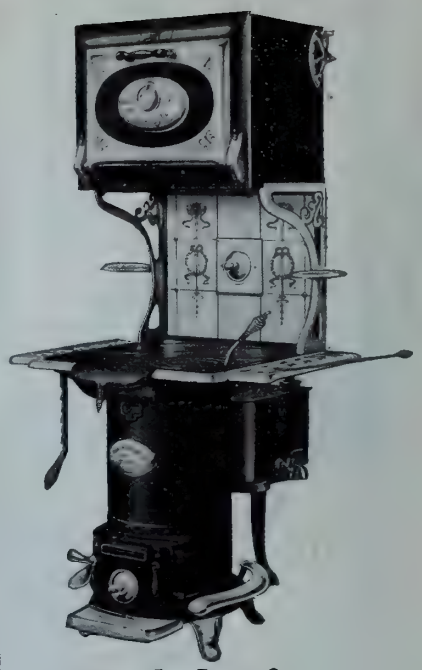
Branches in Winnipeg and Vancouver



Maple Leaf Composite

This range is unique--there is nothing like it on the market. There never will be, because of its patented flue system which makes the high oven possible. It is the peer of all "Quebec" heating, cooking and baking ranges. It occupies only a small floor space. It has all the modern attachments. It burns all kinds of fuel and every woman who buys one will help you sell others.

Maple Leaf Quebec Heaters

There has never been a heat-making machine invented for this northern climate that excels in simplicity and efficiency the so-called "Quebec". It burns any and all kinds of fuel—consumes it completely — extracting every last heat unit. Maple Leaf "Quebecs" are made in many sizes and many designs—all of them are winners.

The Lobsterman Knows that

Rope is something more than spun and twisted fibre.

For unless a real appreciation of the work the rope or twine must do governs the selection and preparation of the fibre, the rope itself will fail to give the greatest service.

Wherever lobsters are caught, it will be found that most of the traps are headed with Plymouth lobster twine, and as Plymouth Specialties are always preferred by those who know, so Plymouth Commercial Manila Rope gives a longer life of service than most buyers expect.

Your customers will receive that unexpected service that insures permanent satisfaction if you supply them with Plymouth—

Trying to cut down expenses

New business conditions have forced every merchant to face the problems of reducing expenses.

Thousands of merchants have solved the problem by using new model National Cash Registers.

These cash registers reduce costs of selling, delivery, and bookkeeping. They stop expensive leaks and losses. They also point the way to other economies by giving merchants, every day,

necessary business facts

1 Sales made by each clerk.

2 How goods are moving in each department.

3 Amount of capital tied up in outstanding accounts.

4 Volume and profit on credit business compared with volume and profit on cash business.

5 Total of money paid out.

These facts show how, when, where, and how much to reduce expenses.

National Cash Registers pay for themselves out of part of what they save.

A National Cash Register is the only machine that issues a receipt, indicates, adds, prints, classifies, and distributes records *at the time of the sale*, all in one operation. No figure work. No delays. No mistakes. Just read the totals

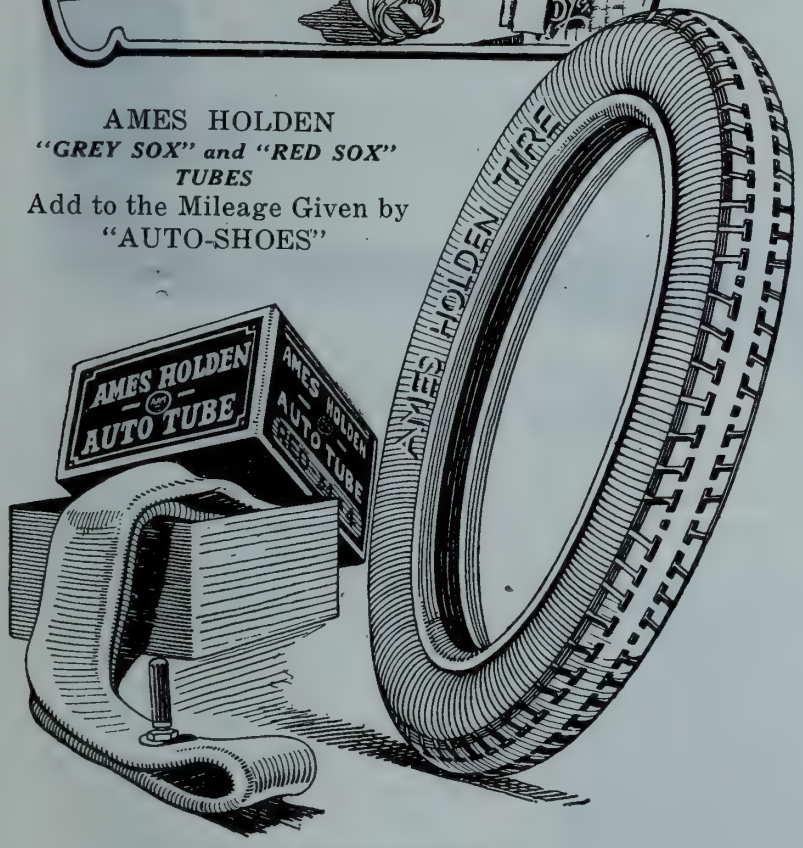
AMES HOLDEN
"GREY SOX" and "RED SOX" TUBES
Add to the Mileage Given by
"AUTO-SHOES"



AHM System

To Know Tires —Make This Test

Try one AUTO-SHOE on the southeast wheel of your own or a friend's car. Put your present best selling tire on the other wheel. After five, ten and fifteen thousand miles—compare the wear—if the other tire is still in service. Let the speedometer show you the sales possibilities AUTO-SHOES offer you.

Many AUTO-SHOES that have run over 15,000 miles are still in service—good for thousands of miles more. This better mileage means the better tire value that will increase your tire business if you are recommending AUTO-SHOES.

Your customers are learning about AUTO-SHOE lesser cost per mile—and cost per mile is the basis on which they are buying tires.

More mileage, the "satisfied customer" guarantee and the unusually generous dealer policy should interest you. Ask our nearest Sales Office to tell you about the opportunity there is, in your district, for bigger tire business with

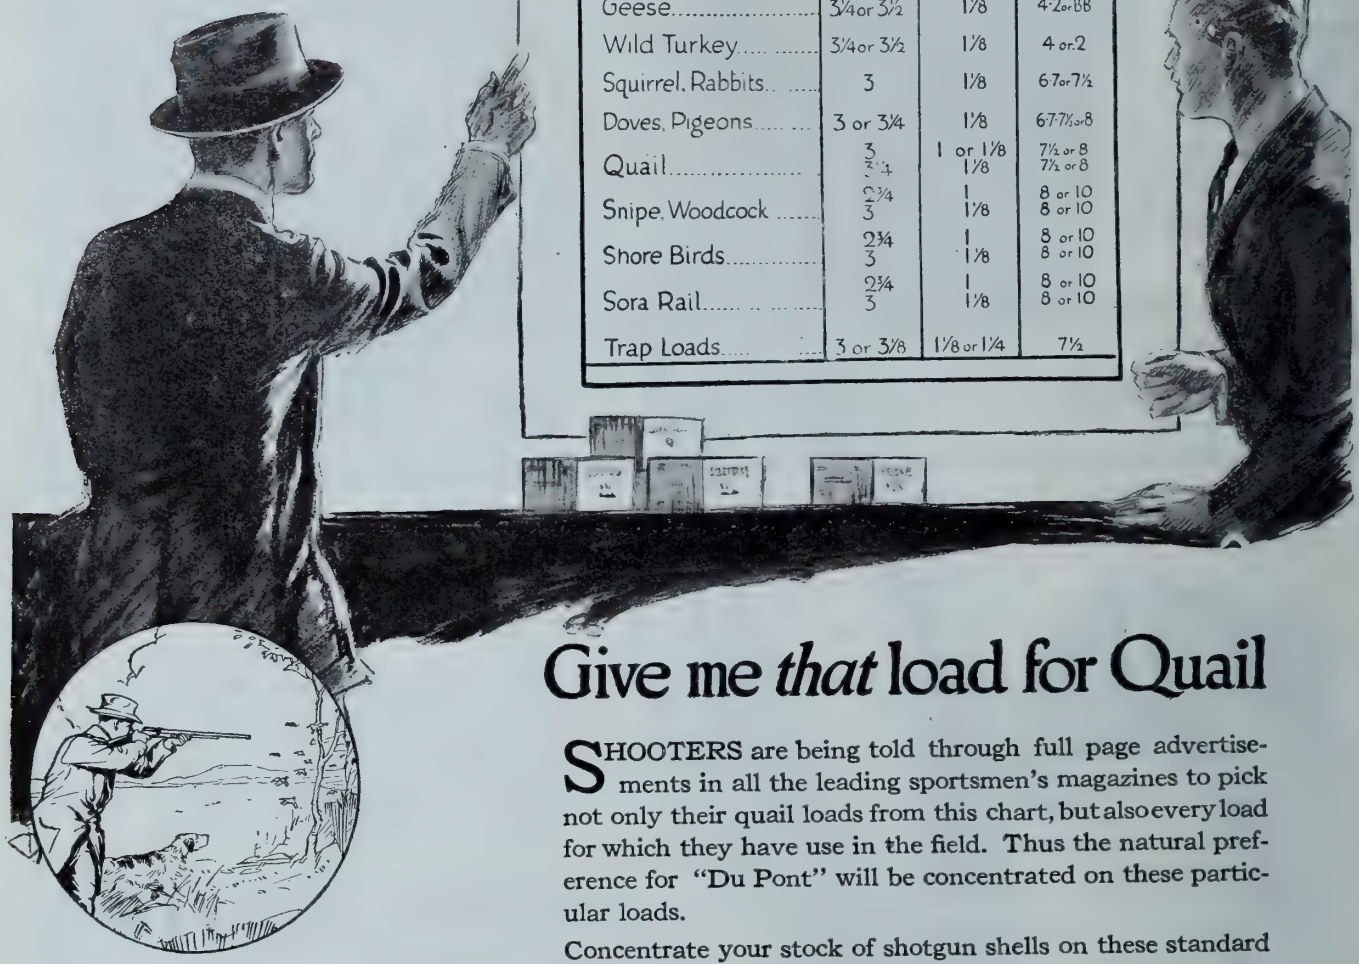
"IT'S exactly what I need and I've proved it by years of good shooting. Used to try a lot of special loads but I gave that up when I found that I could get the best results by sticking to Du Pont Standard Loads as shown in that table."

DU PONT

STANDARD 12 GAUGE LOADS

	DU PONT SMOKELESS Drams	OUNCES Shot	SIZE Shot
Large Ducks	3¼ or 3½	1⅛ or 1¼	4-5 or 6
Small and Medium Ducks	3 3¼	1⅛ 1⅛ or 1¼	5-6 or 7½ 5-6 or 7½
Grouse, Partridge, Prairie Chicken	3 or 3¼	1⅛	6 or 7½
Pheasants	3	1⅛	5-6 or 7½
Geese	3¼ or 3½	1⅛	4-2 or BB
Wild Turkey	3¼ or 3½	1⅛	4 or 2
Squirrel, Rabbits	3	1⅛	6-7 or 7½
Doves, Pigeons	3 or 3¼	1⅛	6-7-7½ or 8
Quail	3 2¾	1 or 1⅛ 1⅛	7½ or 8 7½ or 8
Snipe, Woodcock	2¾ 3	1 1⅛	8 or 10 8 or 10
Shore Birds	2¾ 3	1 1⅛	8 or 10 8 or 10
Sora Rail	2¾ 3	1 1⅛	8 or 10 8 or 10
Trap Loads	3 or 3⅛	1⅛ or 1¼	7½



Standard Quail Loads:
Powders: Dupont, 3 or 3¼ drs.

Shot: Ounces 1 or 1⅛
Size: 7½ or 8

Give me *that* load for Quail

SHOOTERS are being told through full page advertisements in all the leading sportsmen's magazines to pick not only their quail loads from this chart, but also every load for which they have use in the field. Thus the natural preference for "Du Pont" will be concentrated on these particular loads.

Concentrate your stock of shotgun shells on these standard loads, and watch your turnover speed up. No dead stock of freak loads to carry over—storage and shelf space cut to a minimum—less investment and, naturally, a material increase in your profits.

We are furnishing a counter display and a steel bound card (for use by your clerks) featuring the Du Pont table of standard loads. Write for yours if you haven't already received both.

53 YEARS AGO Marks the Beginning of the Old English Gray Ware of TO-DAY

Is it any wonder Old English ranks throughout the civilized world as the highest quality gray ware—the standard by which all gray ware is judged?

Did you ever put a piece of Old English alongside some other gray ware and note the high gloss, the uniform mottle, and the light, clean gray color of the Old English?

Did you ever test the tenacity of Old English enamel along with some other gray ware?

If not, do so.

You have a great sales advantage in selling a different line of enamelware than your competitor.

You can now buy Old English Gray Ware, made in Canada by Canadian workmen. You save all of the duty and much of the freight. Get in touch with your jobber or write us, giving your jobber's name.

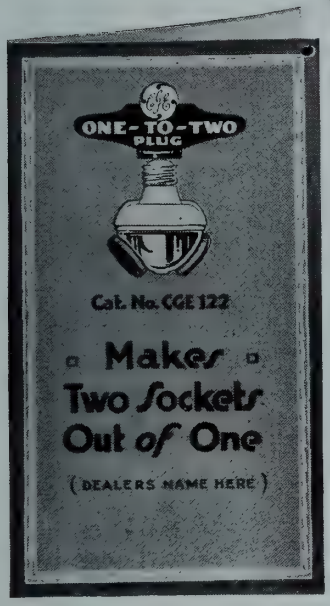
Attract Attention— Arouse Interest— Stimulate Desire



The Three Functions of a Good Display

The C.G.E. One-To-Two Plug, conforming to the C.G.E. Merchandising policy of packing wiring devices in individual and artistically labelled cartons, is meeting with an enthusiastic reception everywhere.

C.G.E. Wiring Devices, with their distinctive orange and blue labels, practically sell themselves. For example, by dressing your window with One-To-Two Plugs, you cannot help but develop an excellent display which will have its effect on your cash register. The striking design of the cartons showing the adaptation of the plug to one or more of its many uses and the message that it makes "Two Plugs out of One" will attract attention—rouse interest and stimulate desire.

A supply of imprinted folders will be forwarded upon request.

"Please send me," he said,

And we mailed him the book. This is the letter he wrote us:

Dayton, O., June 2, 1921.

"Henry Disston & Sons Inc.
Philadelphia, Pa.

"Gentlemen:—I want to thank you for your 'Saw; Tool and File Book,' which I received several days ago, and with which I am very much pleased.

"Your Book is just what I need, I have six of your saws, but the way I have been filing them I think I shall need a jointer.

"I feel very good toward you for your courtesy to me! in fact, I think you are just about as fine as your saws. I don't think that I could pay you a higher compliment.

"I am fifty-five years old, and in all my years I have heard only two men praise any but the 'Disston Saws.'

"I am not familiar with your other tools, and, frankly, I didn't know that you made any others, but I shall get acquainted with some of them very soon.

"In conclusion let me again thank you for the Book; it has so much valuable information in it, and so many fine illustrations that I hardly know which to praise more—its utility or its art. I like both, and am immensely pleased.

Yours truly,
WM. BENZING,
1220 Wyoming Street."

When a man gives us a compliment like that, do you wonder that we want to talk about it? We wish you would read the book. If you would like a copy, or several for your clerks and customers, write your name and address on this page, and mail it to us. Address the envelope to Desk No. 2. We will send you the book free of charge.

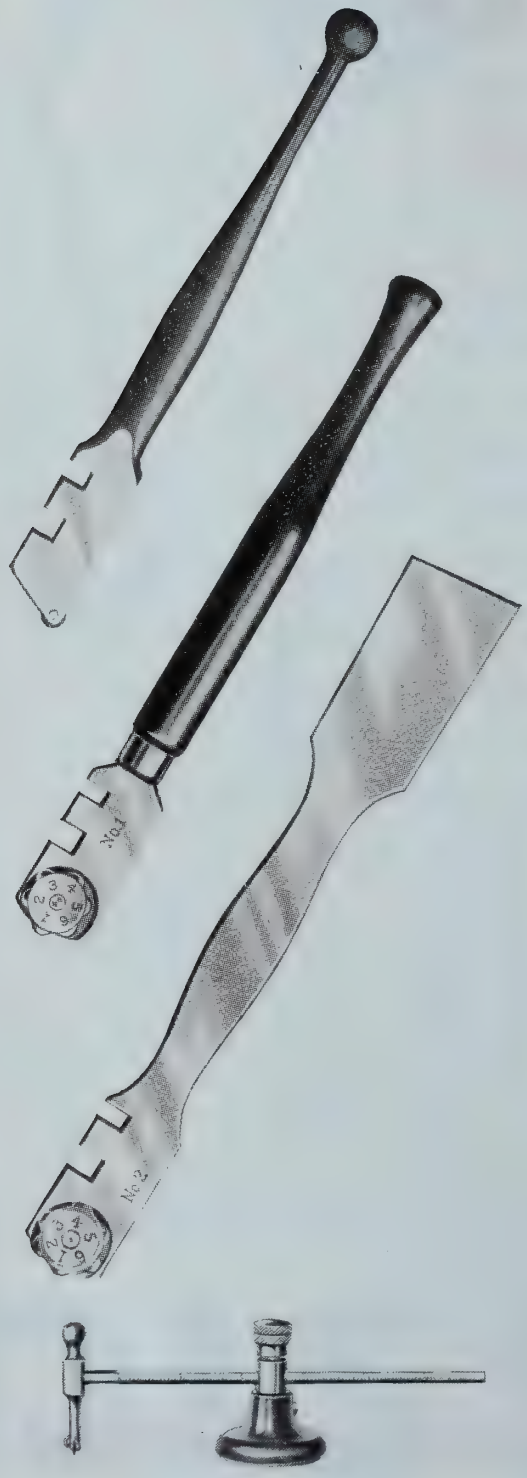
GOODELL-PRATT
1500 GOOD TOOLS



The Store with a Stock Will Sell the Tools

In these days of hand-to-mouth buying, most of the tools are sold for rush repair jobs—jobs that can't wait. If you have the tool in stock, the sale is yours: if not, the buyer will go elsewhere and you may lose his future business.

You cannot afford to let your customers go out unsold but you should hold their trade and increase your own reputation by carrying a good assortment of high grade tools to give your customers satisfaction.

Take Glass Cutters for instance; the large glass factories both in America and Europe know that there is nothing better than a Goodell-Pratt Glass Cutter Wheel for satisfactory results and long service. These same wheels come in single wheel or turret head cutters to meet all requirements of your trade.

All Prices Guaranteed Against Our Own Decline up to December 31, 1921.

Think of all the many jobs Columbia Batteries do—

Ring doorbells
Buzz Buzzers
Ignite gas engines
Furnish Ignition for Fords when starting
Give current for Ford headlights and tail lights
Provide ignition and lighting for motor boats
Fire blasts
Run toys
Light tents and outbuildings
Make telephones talk up

Think of all the Columbia Batteries that are needed NOW to do these jobs! This is the biggest Columbia month of the year. New users and old users force sales up to the peak. Demand this year will be heavier than ever before!

Do two things now to get your share of Columbia profits: Make your store say to every customer, every passer-by "Here's the Columbia Battery you want!" In other words, feature Columbias prominently in your windows and about your store.

Secondly—order enough stock of Columbia "Hot Shot" Batteries, Columbia "Multiples" (waterproof), No. 6's and Bell Ringers to meet every customer's needs.

JARDINE TOOLS

In this reliable, dependable machine all the rollers are geared. These powerful rollers are grooved for two thicknesses of iron for bending edgewise. Unless otherwise ordered we supply grooves for 3-8 inch and 1-2 inch iron.

This useful machine will take iron up to six inches wide. It bends up to four inches by one inch, or it will bend wider iron of proportionate thicknesses. It gives service for circles by bending up to one and three-quarters by five-eighths inches edgewise. The top roller is removable. All Jardine Benders have the center roll removable.
We are enabled to offer this machine at an extremely low price, only because we produce them in large volume.

Retails in Collapsible Tubes, size as illustrated.

Something Every "Shooter" Needs

And buys when it's explained

Every man who owns or uses a gun, rifle or revolver hates the unending struggle against the chemical action of modern, high-power, nitro-powder ammunition. When the firearm is used, carefully cleaned and put away it will be rusted the next day. This corrosion nuisance is the bane of modern shooters.

B.S.A. Safetipaste ends this trouble. A little Safetipaste on a flannelette patch run through the bore prevents all trouble from chemical action. The rifle may be put away with perfect safety and cleaned later, or it may be thoroughly cleaned at once. In either case a film of Safetipaste left in the bore protects the steel, and the lands of a rifled weapon from the ravages of the powder.

You can sell Safetipaste to every customer who uses firearms.

Retails in tubes, as illustrated, and also in ½ lb., 1 lb., and 5 lb. tins. Don't miss these sales and the good-will of the delighted "Shooters." Many of them already know Safetipaste and want it.

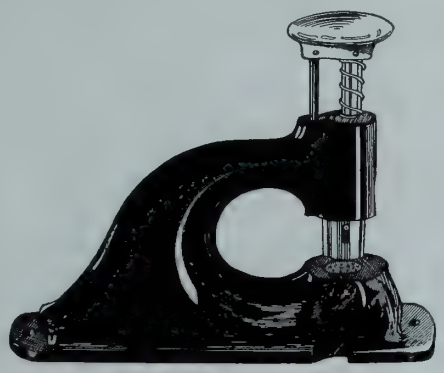
Perforating Machines Being Re-Sold

Toronto Department Store Selling Surplus Perforators for Fifty Cents Which Were Bought at $2.00 Under Luxury Tax Regulations—Many Retailers Returned all Machines When Order Was Issued, and Secured No Refund on Surplus Perforators Specially Purchased—Bad Precedent Set for Government—May Put Machines on Sale at Bargain Prices Which Cost Country $77,695.75.

AN ECHO of the Luxury Tax fiasco has developed since the official demise of this unpopular measure on December 20 of last year. This development has to do with the disposition of the perforators which were purchased by the Govenrment and one of which was loaned to retail merchants for the purpose of perforating the stamps affixed to invoices in payment of the luxury taxes.

On passing through the stationery department of a large Toronto departmental store this week, a representative of Hardware and Metal noted a considerable display of perforating machines closely resembling those which the retailers were forced to use in connection with the Luxury Taxes. On closer examination this impression was more or less confirmed, as the machines were identical in construction and bore the serial numbers stamped in the same place and manner as was the case with the Government machines. On enquiry Hardware and Metal was informed that the machines were on sale at a price of fifty cents each. It was further established that this group of perforators had but recently been placed on sale, and that they were being recommended for various office uses, such as cancelling of stamps, marking of correspondence, invoices, etc., for any special purpose decided upon. The perforations are nine in number, being three each way.



Surplus Luxury Tax perforators purchased by retailers from the government for $2.00 each are now bringing 50 cents or less in the market. Numbers have been turned in and no refund allowed.

Many Perforators Not Returned

With a view to establishing whether or not the Government was disposing of these machines in this manner, the matter was referred to the local Collector of Customs and Inland Revenue, who advised Hardware and Metal that these perforating machines had been officially called in after the termination of the Luxury Tax, but that all the machines had by no means yet been turned in. When the attention of the Collctor was drawn to the large number of perforators being sold in the department store in question, it was stated that those machines represented ones which had been purchased in addition to the one supplied with the license by the Government, and that they were the property of the store, and it was quite legitimate for them to be placed on sale at any price decided upon by the store.

Asked if this plan of retaining surplus perforators and placing them on sale was being followed by all retail firms which had found it necessary in the interests of facilitating selling to purchase a number of machines to supplement the one supplied by the Government, the Collector pointed out that a large number of such firms had returned all their perforators when the call went out from the various Collectors' offices throughout the country, for the return of the machines. Asked as to whether these firms were given any allowance for the surplus machines returned in this manner, the Collector replied that such was not the case.

Merchants Wondering Where They Stand.

It is evident from the foregoing that those firms which returned their surplus perforators and received no alowance from the government, might better have retained them and sold them for office purposes as this department store in Toronto is doing. Of course, even at the sale price of 50 cents these machines represent a loss of $1.50 each, because they cost the retailer $2.00 each for ones purchased apart from the one supplied with the license. This particular store had approximately 150 of the machines in stock, which are now being cleared out. The average hardware store would not lose in the same proportion, but a large number of hardware firms employed a group of these machines in order to facilitate the work of perforating stamps when each sale was being made, and many such merchants have no doubt been wondering just where they stood in regard to these machines.

Hardware and Metal understands that when the returns have been completed the Government may consider the bulk sale of the machines. Should such prove to be the case the establishing of a precedent by the sale of these machines in Toronto at a price of 50 cents each may not prove very helpful to the securing of a fair price for the ones which the Government may put on sale. In this connection it is interesting to note the fact that these perforators, which cost the government $77,695.75, will represent almost a total loss if the price secured by the Toronto department store is an indication of what they will bring in the present market, due to their restricted usefulness.

During the operation of the luxury tax from May 19 to December 20, 1920, stamp perforators to the number of 49,965 were purchased by the Government at a cost of $77,695.75. The price for the first 25,000 was $2.00 each; on quantity in excess of 25,000 a price of $1.55 each was secured. According to the Government, the $2,00 fee secured from each merchant was for his license, to pay the cost of administra-

Higher Prices on Galvanized Sheets

Recent Developments in Steel Industry Reflect Turning Point in Prices—Higher Quotations Forecast on Sheets and Plates—Upward Price Tendency on Bars and Shapes May Develop in Near Future—Sheet Market Very Strong

RECENT developments in the steel industry indicate the firming of prices, and the stabilization of markets which have been experiencing unsettled conditions. Higher prices are forecast on sheets and plates in the near future, and a possibility of a slight upward tendency in bars and shapes may develop in this connection, according to current opinions from well-informed sources in the steel trade.

Advanced prices on black and galvanized sheets appeared on the United States markets during September, and not only is this increase expected to hold, but further increases are anticipated in some quarters owing to the very strong sheet market that is looked for during the balance of the present year. The firmer tone is also evident in Canadian sheet circles, and quotations have already begun to reflect the higher market prices.

Should the contemplated further increases materialize on the southern primary markets, the tendency to a higher price range is stated as most likely to develop throughout all phases of the trade. From being one of the weakest divisions of the industry, wherein price cutting activities have developed for several months past, these products have now heralded the return of an average degree of stability in the trade. Confidence has been revived; inquiries have been more numerous; orders have materialized, and shipments have been of larger volume. Recent heavy bookings on sheets and plates have placed producers in a stronger position as regards the capacity of output, than at any time during the present year; and as a consequence, the stabilization of these markets has resulted

It is noted that present bookings at the mills cover October and partial November deliveries, and that any impending advance is likely to be effective on November or December business.

Bars, Shapes and Plates May Advance

In view of the advances in prices on sheets, the steel mills regard the prevailing low price levels as representing a full liquidation on bars, shapes and plates. From this situation it has been concluded in some quarters, that a slight increase in these quotations is among the possibilities of the near future. Other sources go so far as to predict the spreading of higher prices throughout all phases of the steel and iron industry.

This advance in sheets is stated as being merely a reaction. Producers are firmly of the opinion that the last decline should not have occurred, as it was not borne out by the ratio of operation costs, nor substantiated by the volume of tonnage that was secured by cutting prices. The sheet market has been highly competitive during recent months, and accordingly is said to have gone too far in this direction. As a result of the price-cutting activities between producers, direct losses by mills during the month of August reached an alarming total, both through deflation and operation.

EXPECT FURTHER ADVANCE IN U. S. SHEET PRICES

One of the most reliable Canadian sources of sheet market information advises that practically all sheet makers in the United States have decided to place a further $5.00 per ton advance on prices of both black and galvanized sheets. This change brings the Pittsburg base prices to $3.25 on black, and $4.25 on galvanized. It is also stated that this revision will most likely become effective on October 15. Sheet mills are said to be sold up from four to six weeks ahead; and consumers, having been advised that higher price levels are imminent, are booking requirements for future delivery. Predictions that higher sheet prices would shortly prevail, have been numerous, but this is the initial report received from well-informed sources in Canada on the subject.

"This condition", stated A. T. Enlow, President of the Dominion Sheet Metal Corporation, Limited, to Hardware and Metal, " has been on top of a steady loss for every month of the year up to that time, the same being largely due to deflation, and also secondarily based on the fact that their production was so low, it would not "kill" the overhead."

May Be Second Advance

It is easily understood that after eight months of these conditions in the trade, the mills have reached the point they are now willing to respect the prices quoted by their contemporary producers, wherever any producer has sufficient acumen to name a quotation that would enable the mill to break even. The advance of $5.00 per ton on sheets, has therefore developed; and as the producers now find that they are swamped with orders, the natural surmise is that the present is the right time to put on another advance, which will not only make the first one good, but will give the mills an opportunity to recover some of the losses they have been forced to assume during the dull months previous.

Importing English Sheets

With regard to English sheets being brought in, Mr. Enlow continued that there was always this possibility, but the experience of those who have imported them this year has been such a bitter one, and the loss invariably following each purchase was so heavy, that it is doubted very much whether imports will amount to a great deal prior to the closing of navigation, and after that, of course, they generally fall off in any event.

Mr. Enlow further stated that there is every indication of the present higher prices holding on both black and galvanized sheets, and that there seems to be a distinct probability of a further advance. The strong tone in the sheet markets is expected to continue for the balance of the year, and the plant of the Dominion Sheet Metal Corporation, at Hamilton, has sixty days work booked ahead with the shop in full operation; this being the first time such a condition has happened during the present year.

Quotations on wire and wire products generally, have also been revised in U. S. centres and while the Canadian prices are still holding the former levels, distributors state that there is no indication how long this condition will be maintained. It is pointed out that domestic quotations on wire products, are, in comparison, below the United States level. Added to this is the fact that U. S. prices advanced during September. Keen domestic competition is given as the reason for adhering to the prevailing market levels.

On the whole, the present situation is summed up by authorities in the steel industry, as indicating the turning point in prices. The reaction in the volume of trade, and also in the ratio of production, are already apparent. Coupled with these factors are the elimination of competitive price shading, and the consequent firming up of quotations generally.

PERFORATING MACHINES BEING RE-SOLD

(Continued from page 37)

tion, etc., and that the perforator was still the property of the Government and merely loaned. This being the case the failure of the Luxury Tax measure leaves the Government with 49,965 perforators to collect and dispose of, under the somewhat unfavorable conditions which have now developed.

Copper Improvement May Not Last

Current Advances in Copper Bring About Division of Opinion as to Whether it is Temporary Flurry or Indication of Gradual Improvement — Financial Side Influenced by Exchange — Increased Demand for Copper Recently, but Large Surplus to Be Reduced

Based on interview of Hardware & Metal with G. T. Pepall, M. & L. Samuel, Benjamin & Co., and W. Brymer, General Manager Canada Metal Co., Toronto.

FOLLOWING a lengthy period of price depression and slack trade, ingot copper is now showing signs of improvement. Quotations on both U. S. and British markets have recently advanced, and this change is heralded in some quarters as a definite upward move in this commodity.

On the other hand, this upward trend apparent in the copper market, has also been described as but another flurry, according to some expressions secured by Hardware & Metal.

"It is doubtful whether the present improved tone of copper is of a permanent nature which will be sustained and reflected in future operations," stated G. T. Pepall, Samuel Benjamin & Co., Ltd., Toronto, who pointed out that principles of finance and the relation of exchange, enter largely into these market conditions, owing to the fact that foreign purchases of metal for future delivery or acceptance must be covered at the time through buying the corresponding amount of exchange. Although prices on some metals, including copper, have recently advanced on both the U. S. and London markets the variation in exchange rates, when worked out to a uniform basis, shows a practically unchanged primary condition.

This is given as the reason why domestic ingot quotations have been maintained at the levels recently existing, and have not yet reflected the higher tendency of other foreign markets.

Increased Trade in Copper

"There has recently been some slight increase in demand," continued Mr. Pepall, "but whether this degree of improvement will be maintained, is hard to say because for this buying movement to be sustained, entails the necessity for purchases to be absorbed through the devious channels of consumption. This latter factor, which is a requirement for permanent betterment, has not yet developed."

No further market increases in prices on copper are expected in certain quarters, nor is a sustained movement in this direction generally looked for. One dealer stated that the present gains may be held, but whether the current rise will be followed by repeated advances is considered questionable. It is noticeable that market fluctuations have occurred on ingot copper for some months past, and indications point towards the present rise being chiefly of a reactionary nature after the recent depression.

Stocks of ingot copper are still said to be ample to meet current requirements, while in addition, the presence of large quantities of scrap copper is a considerable factor in this connection. Quotations are well below the levels which prevailed one year ago, while prices existing two years ago, were almost double the figures quoted during the August depression. One authority points out that copper prices are still lower than during pre-war days, namely in 1913, so that any change for the better might be seized upon as an index of further benefits

(Continued on page 58)

Predict Higher Prices On Oil Products

Fuel Oil Prices Already Higher—Recent Increase in Coal Oil Maintained—Gasoline Quotations Hold—Oil Markets Firmer

AN early recovery of the oil markets, with the possibilities of higher prices on gasoline, coal, lubricating, and motor oils, are indicated by recent developments in crude oil. Quotations on petroleum at primary oil centres have recently advanced and brisk trading in oil shares on the stock markets, has stimulated interest in oil activities.

In discussing the probable effect of these latest trends in the oil situation, an official of the British-American Oil Co., stated to Hardware & Metal that with the prices on crude oil now advancing, this was generally considered likely to result in higher quotations on the refined oil products.

Higher Prices on Refined Products

How soon this price development can be expected was not definitely stated, but when interviewed by Hardware & Metal, the Sales Manager of the Imperial Oil Co., admitted that the higher cost of crude oil would force camparative increases on the various refined products. The recent improvement in demand for crude, coupled with an apparent decline in the volume of production, were stated as the primary factors governing the market trend.

Leading the movement in the direction of higher prices is fuel oil, which has advanced one cent per gallon. In this connection it is interesting to note that coal oil prices recently were increased one cent per gallon also; while gasoline quotations have held at the present level for several weeks. These factors are interpreted as indications that the oil markets are not only firming up, but that a revival of the industry is heralded.

The active season for motor oils and gasoline is now considered almost completed, while the stronger demand for coal oils, fuel oil, and industrial lubricants is now commencing. The heavier call on the raw product, which is necessary in order to cover the larger requirements of refined oils, is naturally reflected in the prevailing market demand.

Reports from southern oil fields convey the information that crude is now in a much better position, as demand is stronger, while the output has been lighter. Consequently, a gain in prices has been recorded, but whether the prevailing situation contains possibilities of further general increases, is yet too early to determine. Stocks are still said to be plentiful in some quarters, and while generally, refined oil products are moving a little more freely, the total volume of gasoline consumption is reported as a little disappointing. A strike of oil field workers in California, has not helped the production of petroleum; and other southern states are also registering a falling off in output. These factors influence the prediction of prices due to restricted supply. Whether the industry as a whole will experience a revival with its consequent reflection in an upward trend of prices, is chiefly dependent upon the results attained by the activities of the various producers. In this connection, it has been pointed out that the resumption of operations by large companies signify that oil quotations have reached the bottom of the present economic cycle. These endeavours towards increasing tank storage; the placing of new barrel orders; the sinking of fresh wells, and the re-opening of old; coupled with preliminary activities in new fields and similar experiments, are factors pointing towards the increase in production at present values, and the consequent storage of the product against future trade developments.

Price Cutting On Oil Heaters Starts Early

Toronto Department Store Advertises Low Quotation On Oil Heaters—Widely Varying Prices of Last Year May Be Repeated This Fall

A WIDE range of prices exists on oil heaters. It will be recalled that last year the question of price cutting on oil heaters was one of the topics at the hardware convention. One of the lowest quotations that has come to the attention of HARDWARE AND METAL this fall is that shown in the above advertisement in which a Toronto department store advertises oil heaters stated in the advertisement to be made by the Perfection Stove Co., No. 525 Black Finish, $8.75 value, on sale at $5.95. Heater No. 530 Nickle Plated Trimmings, $9.75 value, is advertised at $6.95. Oil heater Wicks on carriers are advertised as regular 60c on sale at 9c. Some Toronto hardware retailers are meeting these prices.

It will be recalled that last year in various parts of the country, widely different prices were being quoted on the same article by department stores and hardware retailers. From present indications, it would look as though the coming fall and winter will see the same unsettled conditions so far as the oil heater business is concerned.

KINGSTON FIRM GETS CONTRACT

KINGSTON, Ont.—J. Lemmon and Sons. local hardware dealers and plumbing and tinsmithing contractors, have been awarded the contract for the work of this nature on the new Jock Harty rink here, the contract price being in the neighborhood of $5,000. Work has been commenced on the preliminary ground operations.

INCOME TAX RULING APPLIES TO COMMERCIAL TRAVELLERS

Montreal,—A ruling upon the status of commercial travellers under the income tax laws has just been issued by the Department of Finance at Ottawa as a result of complaints lodged by various Commercial Travellers' Associations throughout the Dominion as to the manner in which the taxation branch was treating their travelling expenses in connection with the income tax returns.

Under the new ruling, commercial travellers must show all moneys received by them from their employers. They will be allowed as a deduction from the moneys so received all expenses actually and necessarily incurred in the conduct of their business.

From such expenses there will be deducted the sum of $1 for each day's travelling, this amount representing personal and living expenses, which, although usually included in a traveller's expenses, are not directly attributable to his business.

Monthly News Sheets Stimulate New Hardware Business

LONDON, ONT.—Monthly news sheets featuring seasonable offerings are proving a real business help for Russell H. Beattie, when backed by attractive window displays and prompt service in the way of delivery. Mr. Beattie is a thorough believer in advertising but the location of his store is such that he deemed it inadvisable to pay high space rates in the two local daily papers to cover territory that he cannot reach.

After giving considerable attention to the problem he decided to try out a monthly news sheet to be distributed to the homes in his immediate section. The store is the only one in a section of the city occupied by approximately 10,000 people. Many of the homes are those of well to do people.

"I arranged for this area to be completely covered by the news sheet," said Mr. Beattie to Hardware and Metal. "Not a home, I believe, missed. The sheets have been a real success. This is proven by the number of people who come in and ask for the articles mentioned. Very often they bring the sheets with them and show us just what they want. I find it a good plan to quote prices not only of the lines mentioned in the news sheet but also of everything shown in the windows. It saves time and argument in selling. When people see the price they know right away what they would have asked first if they had to come into the store. When they see the figures in the ad. or in the window they come in with that amount fixed in their mind and there is no time lost arguing about it. Besides that, giving the price makes for confidence, especially with women buyers. It takes away all fear that a high price will be asked, the dealer being prepared to drop if forced to do so. Women hate to have to do that kind of bargaining. They like to know right away just how much they are going to be charged."

Mr. Beattie aims to build up especially a home trade, and believes that his monthly news sheets are going to be a big factor in doing this, Already he points out his monthly news sheet is expectantly awaited in many homes, the buyer for the household going over it carefully to see what is offered and what the prices are.

This season Mr. Beattie made a start in selling auto accessories. His sales, have been so good that he plans to considerably increase his lines and add to them again later as increasing business warrants. One of his first moves will be to put in a special display case right up near the front door and keep it filled with accessories. He also plans window displays of these lines.

The news sheets referred to are 9x12 inches, and illustrate a number of hardware lines. In one of the most recent sheets were advertised seasonable Fall lines, such as oil heaters, lanterns, stove pipes, pipe enamel, brooms, coal scuttles, electric light bulbs, ash sifters, floor wax.

Helping to Sell Fall Sporting Goods

Linking Up With Current Sporting Events Helps to Attract Interest of Sport Enthusiasts to the Store—Use Booths at Fall Fairs to Demonstrate Sport Goods—Score Board Gives World Series Baseball Results.

REALIZING that a good window trim is one of the best advertisements a store can have, and that it makes "passers by," "comers in," it has long been the policy of W. H. Thorne and Co., Hardware Merchants, of St. John, N. B., to devote special attention to this form of publicity. For several years this company has had on its payroll an employee whose duty it is to look after the trimming of the seven or eight windows facing King street and Prince William street. Although every trim receives considerable thought and attention, once in a while a hit is made, and the display declared to be a masterpiece by the many patrons of this-up-to-date store. When the trimmer makes a "hit," the company has a photograph taken of it, and the picture shown is the very latest one taken.

Some months back Messrs. Thorne, Ltd., went to considerable expense and had a scenic back-ground painted, as shown in our illustration, and considering that it can be used for many trims, has proved to be a good investment. It would be impossible to have a more appropriate background for a fall hunting window trim, and the well known figure of a sportsman and dog, adds a touch of life to the scene. One of the specia features of this neat window display is a variety of duck decoys. These are manufactured especially for Thornes. Moose-calls are also featured. These are made by Indians.

The guns and rifles shown represent samples of the large stock carried in the sporting goods department.

A good selection of hunter's accessories is also shown including a complete line of axes, knives, compasses, oils, gun cleaners, match-boxes, etc. A large volume of business is done in the equipment line, and Thornes make special efforts to always have on hand everything needed by the hunter of big game.

For more than fifty years W. H. Thorne & Co., has devoted special attention to their sporting goods department, with the result that they now have a large and most up-to-date sporting department all the year round. The department now has a fall-winter aspect. Summer goods are being replaced by fall goods, and in the course of a few weeks snow shoes, toboggans, skiis, skates, hockey sticks, etc., will make their appearance. A large business is also done in gymnasium supplies and a most comp'ete stock is always on hand.

At the recent St. John Exhibition, Thornes' occupied no less than three booths and made an exhibit of sporting goods, automobile accessories and phonographs. These exhibits brought many visitors to the store, and fully recompensed the firm for the amount of money expended.

This firm erected a large score board on the outside of their Prince William street premises in order to show the results in the World's Series. This service to the public was also carried out last year and was much appreciated. Special telephone arrangements were made with the Te'egraph company, and a special telephone operator was detailed to answer calls from enquirers. He was kept busy, too.

GENERAL SIR ARTHUR CURRIE IS PRINCIPAL OF McGILL UNIVERSITY

General Sir Arthur Currie was referred to as Dean of McGill University in connection with the report of the meeting of the Canadian Wholesale Hardware Association in Montreal, as appearing in October 1 issue of Hardware and Metal. This report omitted to state that General Sir Arthur Currie is Principal and Vice-Chancellor of McGill University of Montreal.

Fall sporting goods window arranged by W. H. Thorne and Co. Ltd., St. John, N.B., which aroused considerable comment. The panel at the back was painted for this firm with the idea of it lending itself to use in various window displays. The trees at the side give a realistic touch borne out by the figure of the sportsman with rifle. Camping equipment of all kinds with moose calls, rifles, ammunition, axes, thermos kits, decoys, etc., is shown effectively. Dates of open seasons are always featured prominently.

News of Western Canada

Discuss Margin on Tire Sales

Western Dealers and Tire Manufacturers Get Together to Decide on Policies—

PLANS are under way for a conference of representatives of dealers from the prairie provinces and tire manufacturers to decide on certain policies, particularly in view of the hostility of the merchants toward the recent reduction in margin allowed on the sale of this line. In this connection it is interesting to note that the B. C. Automotive Section of R. M. A. have a standing agreement with the manufacturer's branch houses in that province as follows:

"On Monday December 6th an agreement between the following manufacturers and wholesale distributors of automobile tires and the automotive section of this association became effective.

The Dominion Rubber System, Ltd. Pacific.

The Gutta Percha & Rubber Co.; The Dunlop Tire & Rubber Goods Co., Ltd.; The Goodyear Tire & Rubber Co., of Canada; Messrs. Ames-Holden-McCready Co.; The Hill Tire Co., of Vancouver; The Auto Supply Co., Vancouver, the Boultbee Tire Co. Vancouver. (Last three named are wholesalers.)

The agreement provides that in consideration of the manufacturers and distributors, specified above, having agreed to confine sales of tires at wholesale prices to a list of firms and corporations which have been approved by the Automotive Section of The Retail Merchants' Association, each individual member of this section agrees to observe strictly the price list for the resale of tires, as published by the manufacturers from time to time. It is agreed to by the Automotive Section that any dealer who fails to observe this price list shall be given due warning by the manufacturers, whose preducts he sells, and in the event that he disregards this warning that such manufacturer or distributor will place him on the consumers' list for a period of three months, and, further, that his persistent refusal to observe the resale specified in the manufacturers' lists will have the effect of having such dealer placed upon the consumers' list permanently."

MARITIME NAIL CO. APPOINTS WESTERN REPRESENTATIVE

B. T. Elkin of Montreal, Quebec, Western Sales Manager for the Maritime Nail Co., Limited, spent a few days visiting the Western and Winnipeg Hardware jobbing trades. Before leoving for headquarters in Montreal Mr. Elkin appointed as representative for Manitoba, Saskatchewan and Alberta. Harry Cunningham who will look after their interests. The Maritime Nail Co., Ltd., have placed a storage at the head of the Lakes, a complete line of nails from which immediate delivery may be had to fill all requirements.

NEW HARDWARE STORE IN RIDGEVILLE, SASK.

Simmons and Irvine are opening a hardware store in Ridgeville, Sask. Ridgeville is a new town on the C. P. R. running north of Melford, Sask. Mr. Irvine has been in business in Elrose, Sask., and recently sold out. S. A. Simmons is also from Elrose, having been employed in the Irvine store there for a number of years. Mr. Simmons will be the active partner in the business.

FIND VALLEY OF IRON IN ALBERTA

Edmonton, Alta.—A whole valley of almost pure iron is said to be lying on the shores of Lake Athabasca, with deep water right to the claims.

Analysis of the claims is said to show that it is 64.36 per cent. pure iron. One hundred and fifty million tons have been measured off, while 5,000,000 tons in the shape of loose blocks are said to be lying on the surface of the ground close to the lake ready for shipping with out mining operations being necessary.

MARKET FOR NICKEL SHOWS IMPROVEMENT

Sudbury, Ont.,—Home from Britain, where he was in consultation with the head office, C. V. Coreless, General Manager of the Mond Nickel Company's operations in Canada, stated that mining and smelting operations of the Mond will not be any further curtailed. The company believes that the corner has been turned in the present state of the metal market and world conditions generally, and if things don't get any worse the company proposes to "fight it out."

WESTERN CANADA NOTES

Dinsmore, Sask.—The Morgan-Jones Co., has been taken over by The L. E. Jones Co. They carry complete line of hardware and auto accessories.

Samuel Chapman, accountant at Vicker's Hardware store, Drumheller, Alta., accompanied by Mrs. Chapman is spending three weeks holiday in Saskatchewan.

Saskatoon, Sask.—G. D. McGash who formerly owned a hardware store at Brock, Sask., bought out the J. A. Isbester business 2nd Avenue, Saskatoon, in Aug. Mr. McGash has rearranged the stock and made several changes to the building.

The Watt Hardware Company, at Innisfail, Alberta, has moved to new premises in the town. The new premises give them better accommodation. Their former store will be transformed into a general store and be managed by Mr. Hart, formerly of Delia, Alta.

R. D. Shiells of Chilliwack, B. C., who was formerly in the hardware business at Taber, Alberta, spent a few days at Taber recently. Mr. Shiells is just returning home after visiting his mother, who is quite ill, in Ontario.

Messrs. Clark Bros., general merchants of Waterous, Sask., have disposed of their stock and trade and leased their store for a term of years to J. H. Brown. Mr. Brown has been in the general merchandise business in Humboldt, Sask., for a number of years.

Elbow, Sask.—L. P. Woodhams, hardware merchant Elbow, Sask., is selling out. What is left of the stock when the sale ends will be taken over by the Elbow Grain Growers Assn., who will also take over the store now occupied by L. P. Woodhams.

Arthur Leith, partner in Leith Bros., Hardware, Prince George, B. C., has just returned with his bride, from a honeymoon taking in Winnipeg and U. S. cities. The happy couple have now taken up residence in Prince George.

Burglars entered the hardware store of Currie & Milroy, Bassanno, Alta., and secured a shot gun, a rifle, a case of ammunition and thirty dollars in cash. Entrance to the building was secured by breaking the skylight. Some time ago an effort was made to rob the store but on that occasion the attempt was unsuccessful.

Combating Mail Order Trade in B. C.

Rich Territory for Hardware Trade in Mill, Mining and Ranching Supplies Formerly Served only by Mail Order Catalog—Stearn's Hardware, Burns Lake, B.C., Can Meet Catalog Prices and Have An Average Profit

"SORT up a general order from your mail order catalog, and I'll fill it here," says the proprietor of the Stearns' Hardware Store at Burns Lake, to customers who think mail order prices are lower than those of the local merchants.

"The mail order houses make great inroads into our territory unless we combat them," said R. S. Stearns to Hardware and Metal. "In the earlier days, there were not the merchants in every town to give service to the settlers scattered throughout the districts, and the mail order houses got a great foothold with the farmers. It is easy now for them to sit down and order by mail; they have been educated to do it, and they will do it unless the merchants get busy and not only SAY but PROVE that the local merchant can give as good service—or better, and meet the price. I don't say that the dealer in Telkwa or Burns Lake can deliver a high class sporting rifle that costs him $44 to a customer at $29, (the price quoted in a recent mail order catalog). I do say however, that if a customer is making up a general order of hardware, he can make it up from the catalog and the dealer can fill it AT A PROFIT.

A Case In Point

"I'm not guessing: I know.

"The other week one of my customers asked me a few questions about various lines and it made me think that he was merely checking prices. I asked him if he were making up an order, and he rather shame-facedly confessed that he was. In fact he had it written out. I asked him if he would let me fill it at the same prices if I could. He said 'Yes, gladly.' I looked it over. It amounted to $210. I filled it from stock and made an average profit on the deal. I will say that a customer could select some leaders from the catalog that you couldn't equal; but on a fair, general order, the country merchant, in spite of his exorbitant freight rates can give the mail order house quite a run for its money, if he wants to."

Active Hardware Trade

Burns Lake, in the B. C. interior, on the Grand Trunk Pacific section of the National Railways is a very lively little trading centre. It draws tribute from the Francois and Aatsa Lake districts in the South, and the famous Babine district in the North, as well as rich ranching, mining, and tie cutting territories to the East and West. The tie camp and trap lines show their effect on the hardware stock carried. Rifles, ammunition and traps are much in evidence, and peevies, cant hooks, saws and axes tell the story of the railroad sleepers. It is a big territory to "rescue" from the great metropolitan mail order houses.

Making History in Western Canada

Interior view of E. D. McAvoy Co., Ltd., hardware store at Eldersley, Sask.

THE reputation of being the first hardware store in town, falls to the new firm of E. D. McAvoy Co., Ltd., at Eldersley, Sask., which was opened early in August. The town has been in existence for some time but only recently is said to have reached the stage where activity justifies the establishment of such retail stores as the one shown here. The town was originally named Asquith Junction but was recently changed.

Eldersley is a thriving town serving a farm trade for a radius of forty miles. To give the class of service necessary for such trade it is necessary for the McAvoy store to carry a complete range of farm requirements. Despite the fact that the bulk of trade is with farmers who visit town only periodically, the stock is arranged in a neat and effective manner as will be noted from a reference to the interior view shown herewith. Carpenter's tools, which form an important part of trade in this store are shown displayed on a wall fixture within easy reach and prominently displayed. The shelf stocks are easily accessible and a special case divided into small sections is used at the rear for fittings and other small goods. Harvest tools are kept in racks at the rear. A glass showcase in a prominent location is used to show various cutlery lines, shaving utensils, etc. Rope samples are drawn up from the basement and suspended through the front of the counter.

The owner of this business has been in the district for twenty-three years, having previously been engaged in the lumber business. H. E. Dick who is in charge of the store has been in the hardware business for some years, recently with the Manville Hardware Co., Prince Albert, Sask. A complete line of hardware, paints and auto accessories is carried in stock, and a gasoline filling station is now being installed as a medium of attracting trade in auto accessories.

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Busines Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

SATURDAY, OCTOBER 15, 1921

THE MONTHLY tonnage reports of the U.S. Steel Corporation are looked upon as an important trade barometer by various authorities on the steel industry and on general business conditions. It is therefore interesting to note that for the first month in some little time the report just made public shows an increase in unfilled orders. It shows 4,560,670 tons of unfilled orders on hand September 30, an increase from unfilled orders on August 31, which were 4,531,926 tons. This is the first increase in unfilled tonnage since July, 1920.

PRICES are now dropping less rapidly in Canada. Last November and December wholesale prices were falling about 13 per cent. each month. The average monthly decline for six months ending April 30 was 10.65 per cent. For the three months following, the average decline is shown to be but a fraction over 5 per cent. This would seem to indicate that the period of sharp and drastic declines has been, at least temporarily, terminated.

THAT THE United States imports iron and steel from Canada is news to many readers, yet in the month of August of this year, the United States imported from this country 3,004 tons of iron ore and steel, consisting of 2,874 tons of rails, 94 tons of pig iron and a small balance of other products. Canada was the largest exporter of iron and steel to the U.S. in that month, closely followed by Belgium.

AS IS usually the case with all governmental rulings, there is some misunderstanding in regard to the latest regulations governing the sale and ownership of firearms. Magistrate Hunt, of St. Thomas, Ont., claims that British subjects cannot carry firearms without permits. His attention has been drawn to the latest regulations, as outlined previously in Hardware and Metal, showing that British subjects can carry rifles or shotguns without permits, but must have a hunting license. Only aliens are compelled to secure a permit to purchase or carry any firearms.

THE LINKING up of Ontario farms with various provincial developments of water power has begun and will be continued until most of the farmhouses in the power zones are supplied with electricity. Some five hundred miles of transmission lines are to be constructed at once in Ontario, and along these lines contracts will be made with approximately 2,300 consumers, each of whom, it is estimated, will require about three horsepower to do the work required on the farm. This development enlarges the field of prospective business in electrical supplies for the hardware merchant.

FURTHER reductions which have taken place in building materials should help to stimulate activity in this important industry. The ltaest reduction is one of 3.6 points in the wholesale price of 48 building material lines, which makes a total of 25.1 per cent. from the high mark of May 1920. While building for the first eight months of this year was below that of the same period last year, yet building done in August of this year shows an increase of $13,000,000 over the same month last year. This may indicate that recent declines in building material costs may have had some stimulating effect.

The Income Taxes

A NUMBER of complaints have recently been made to the Income Tax officials by merchants and others who state that there is discrimination between a limited liability company and a partnership in the levying of the tax. According to authorities on the subject there is little valid reason for making a distinction between profits and dividends, for purpose of income taxation, and investigation shows that the protested measure is likely to be abolished in Ontario at the next session of the Legislature. It is only fair that either partnership profits should be made taxable or dividends made non-taxable as they are similar, in that they each represent earnings on capital invested. The Government has been very dilatory in collecting these taxes, being only now enforcing collection of 1919 taxes, and this has caused much confusion among the trade. Under the circumstances those who are honestly trying to meet their obligations should be shown some consideration rather than strictly enforcing penalty clauses as has been done in many cases.

Its Wings Being Clipped

IN THIS issue appears an interesting article showing how a hardware merchant in a small British Columbia town is successfully combating mail order house competition, in a district where the latter was firmly rooted before his store opened. He has found, like many other merchants, that the leaders which the catalogue houses use are the only bargains offered, and that on a general order of hardware he can meet the catalogue house price, make a fair profit and give customers a more satisfactory deal by letting them see the goods before purchasing, and give them quicker delivery on their order, to say nothing of keeping the money circulating locally for the benefit of the district. In order to combat this competition the merchant must first establish how much of it is going on, who are the chief local converts to the system, and then use every means of indicating to these catalogue house customers the advantages of dealing locally. In the majority of cases a little education applied at the right time and place is all that is required. At the present time while mail order houses are laboring under difficulties due to having to carry heavy stocks on a declining market, high transportation charges, etc., is a good time for the merchant to get in his most effective work.

A rather unique, but perhaps questionable, plan for cleaning out the local neighborhood of mail order catalogues, was used by merchants in a southern U.S. town recently. Hundreds of such catalogues were secured and then burned. They were secured in response to an advertisement that such catalogues would be accepted at the local motion picture theatre in lieu of the usual admission, and that cash prizes would be awarded to those presenting the oldest catalogue. A complaint of unfair competition was subsequently lodged by the mail order firm as a result of which the merchants have been given thirty days in which to answer.

No recommendation of the above plan is being given here, but the hardware merchant is provided with many good and legitimate ways of offsetting this form of competition. The readiness in which hundreds of people parted with their catalogues for a paltry admission to a moving picture theatre indicates that their mail order house connections are not as solidly cemented as some merchants think.

Events in the Trade

BUSINESS CHANGES

Aylmer, Ont.—Calvin Brown & Co., hardware has been succeeded by Calvin B. Brown.

Glencoe, Ont.—J. W. Edwards has disposed of his hardware business to L. O. Charlesworth, of Wheatley, Ont.

OBITUARY

Frank W. Esmonde, Ottawa representative of the Gurney Foundry Company, died suddenly in Ottawa. His only survivor is his wife. Mr. Esmonde was in his 53rd year, and had lived in Ottawa since he was a boy.

The sudden death at Timmins, Ont., of Henry Nathan, a commercial traveller is announced. Deceased was a member of the firm of MacAuley, Pope & Co., Dominion Bank Chambers, Toronto, Canadian representatives of the Wilkinson Wire & Rope Co., Eastwood, England.

PERSONAL

George Bell of Stratford is moving to Thedford where he has taken a position as tinsmith in Scrivens Hardware.

H. Hart, general-manager, Paint and Varnish, Limited, Montreal, is calling on the trade in the Maritime Provinces.

Col. R. Starke and Gordon Seybold of Starke-Seybold, Lmited, Montreal, will attend the National Hardware Association Convention in Atlantic City, October 17 to 22.

Fayette R. Plumb, president Fayette R. Plumb, Inc., Philadelphia, called on the Montreal trade on his return from a fishing trip at St. Maurice Fish and Game club.

T. M. Birkett, president of the Wholesale Hardware Association will officially represent that body at the coming convention in Atlantic city of the National Hardware Association.

E. D. Reed has resigned his position as Sales and Advertising Manager of the domestic paint and varnish department of Scarfe & Company, Ltd., Brantford, to accept a position with Dalley & Company in Hamilton.

F. B. Leslie, sales-manager, A. C. Leslie & Co., Ltd., Montreal left this week on a month's trip to the West. Mr. Leslie will touch the principal centres in the prairie provinces and British Columbia.

C. J. Walker, Montreal, is now representing E. T. Wright, Co., Ltd., Hamilton, also the Wentworth Manufacturing Co., of the same city, in the province of Quebec. Mr. Walker was formerly connected with the Ontario Lantern & Lamp Co., of Hamilton, as their eastern representative.

FIRE LOSS

Whitby, Ont.—Flames destroyed two stores on Dundas street, and, had it not been for the good work of the firemen the whole business section might have been burnt down. Both stores were occupied by H. A. Lebar, a hardware merchant and implement agent, who values his stock destroyed at $7,000 or $8,000.

W. D. SHAMBROOK

Who, as announced in last week's issue of Hardware and Metal, is President of Duro Aluminum Ltd., Hamilton, Ont., which has succeeded the firm of W. D. Shambrook and Co.

"DICK" TERRILL MARRIED

Montreal.—An interesting wedding took place on October 11th in Stanley Presbyterian church, Westmount, when J. R. Terrill of Caverhill-Learmont & Co., Ltd., familiarly known to a host of friends as "Dick", was united in marriage to Mrs. Winnifred Knight Marshall of Westmount. After the ceremony Mr. and Mrs. Terrill left on a three weeks' tour. "Dick's" confreres at Caverhill-Learmont & Co., Ltd., took advantage of the occasion to present him with three paintings by well known English artists. J. W. Dowling, general-manager, made the presentation with a few appropriate words, speaking of the high esteem in which the groom was held by his fellow members of the staff. Mr. Terrill in reply felt that words failed him to express his gratitude, and confirmed the warm feeling that existed between him and his fellow employees.

FENCE FACTORY FOR HAMILTON

Hamilton, Ont.—The Cyclone Fence Company of Canada, Limited, which recently secured a Dominion charter, has selected Hamilton for the location of its Canadian factory. The Canadian Company is a branch of the Cyclone Fence Company of Waukegan, Ill., said to be one of the largest manufacturers of ornamental and industrial wire and iron fencing in the U.S. The parent plant is capitalized at $1,500,000 and has an annual turnover of approximately $5,000,000.

FORM TORONTO BRANCH R. M. A.

Retail merchants of Toronto held an organization meeting this week when a Toronto branch of the Retail Merchants Association was formed. The new branch will operate with its own officers under the provincial section. Officers are to be elected within the next two weeks.

By a unanimous vote the Toronto section of the Retail Merchants' Association decided to protest against any increased rates being granted to the Bell Telephone Company, and announced their intention to fight the case before the Dominion Railway Board when it comes up for hearing.

D. A. Clark, Treasurer of the association, moved that the Provincial Government be asked to appoint a commission to take over the Bell Telephone Company in Ontario and to operate it as a Governmental department, but this did not meet with the approval of the gathering. The company was denounced by individual members in no uncertain voice.

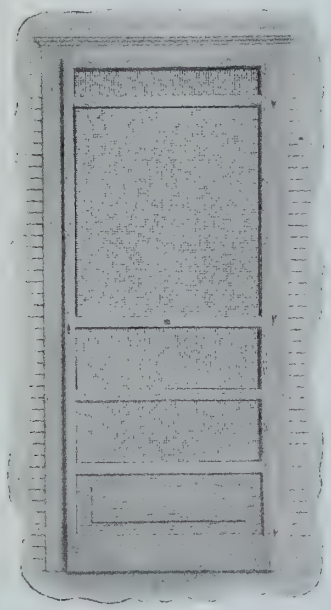
"We are not making 8 per cent., and I venture to say that no merchant in the Dominion is making 8 per cent. who had to carry over stock bought at high prices. On these grounds the Bell Telephone Company is very unjust, very unfair and displays a grabbing spirit in trying to make 8 per cent. on a falling market. The company cannot be in such financial straits, because you cannot buy its stock. People are holding on to it as a good thing," said one merchant.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

NEW "KASEMENT" DESIGN

The Kasement Skrene Dore Co., of 269 Richmond Street, W. Toronto, announce that they are putting on the market a new design in "Kasement" doors, the principal feature of which is a solid bottom panel. This added improvement, claim the manufacturers, not only gives to the door a more substantial appearance, but will prevent damage usually done to the wire screen through the habit of kicking the door open. The solid wood panel at the bottom is also intended to add years of life to the product itself, as well as give better service where small children are continually running in and out of the home.



Improved "Kasement" Door.

This design will be known as No. 5 in oak finish varnished and No. 6 in natural finish varnished—made in four sizes: 2 ft. 6 in. x 6 ft. 6 in.; 2 ft. 8 in. x 6 ft. 8 in.; 2 ft. 10 in. x 6 ft. 10 in. and 3 ft. x 7 ft.

The new door is constructed on the same plan as heretofore, with genuine mortise and tenon joints and will have the distinct exclusive "Kasement" feature of the "ledge" on the inner face, which provides an easy means of planing down to fit any unevenness of the door casing.

All "Kasement" doors including the new design will be supplied with complete sets of "Kasement" hardware.

ASBESTONOS BRAKE LINING

An asbestos brake lining, named "Asbestonos," is being produced by the Asbestonos Co., of East Broughton, Quebec. The Canadian selling agents are Messrs Richardson & Bureau, of Montreal, and it is announced that samples can be secured of both the raw white and finished black products.

Several special claims are made for Asbestonos by the manufacturers, among these being that it is made in Canada, from Canadian raw materials. Futhermore, the fact is featured by the selling representatives that the Canadian producers are catering to the Canadian markets. The wearing life of Asbestonos is also a prominent factor, the makers claiming that this can be depended upon, and it is made from the best asbestos fibre produced, and the yarn is interwoven with a double fibre brass wire to give it additional strength. The processes of manufacture continue after the weaving operation to the stage where Asbestonos is thoroughly impregnated with a special compound which, it is said, renders the product impermeable to oils, and greases.

SIGNS FOR SAVE THE SURFACE DEPARTMENT

Dominion Oilcloth & Linoleum Co., Ltd., Montreal, are offering to the hardware trade a handsome and practical counter display sign showing Decorative Wall Burlap. The sign is attractively framed, and shows samples of Burlap, and also gives their directions for applying Burlap to plastered walls, rough walls, etc. These signs will be supplied free to the hardware trade. Requests should be forwarded to Dominion Oilcloth and Linoleum Co., Ltd., Montreal.

FREE LANTERN SLIDES

Coleman Lamp Co., Ltd., Queen St. and Davies Ave., Toronto, are providing a series of lantern slides for hardware merchants. Readers of Hardware and Metal may secure slides and complete information by writing the above company.

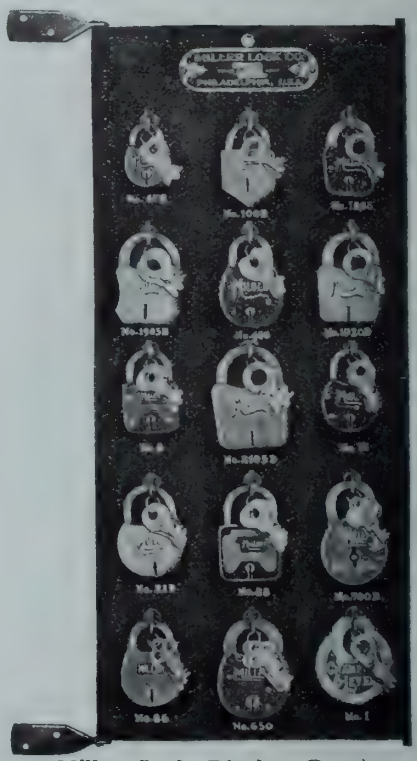
NOW ROLLING ANGLE IRON

Peck Rolling Mills Ltd., are now equipped to roll angle iron up to 4 inch at their plant in Montreal. They are able to roll both hard steel and mild steel, and claim to be the only mills, with the exception of Hamilton, turning out these products in Canada.

NEW LOCK DISPLAYS

The Miller Lock Co., of Philadelphia, Pa., U. S. A., have recently offered to the Canadian hardware market an assortment of "15 Best Sellers" sampled on a display panel. This panel is of dark green in color, and finely finished. It has hinges attached to swing to the right or left, and can also be screwed flat to the wall, or hung by means of a hole placed near the top of the panel, against the wall as a permanent fixture.

Three assortments are offered with the display panel as follows: No. 930 assortment consists of steel panel and 1¼ dozen padlocks attached.



Miller Lock Display Panel.

No. 931 assortment consists of steel panel, together with 6¼ dozen padlocks, (including the 1¼ dozen on the panel itself.)

No. 932 assortment comprises the steel panel with one dozen each of the fifteen different padlocks, also including the 1¼ dozen on the panel.

The fifteen padlocks are attached as shown in the illustration herewith. Two keys accompany each padlock, and these may readily be unlocked and detached from the panel by the dealer, as sold. Adcock & Brewer, Limited, of Montreal, are the Canadian selling agents.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

NUMEROUS price developments embracing both recessions and advances feature the current hardware markets. Lower quotations appear on Lufkin measuring tapes and rules; while prices on Oneida Community tableware and cutlery products have also been reduced. For the third occasion this season, quotations on various lines of building papers and sheathings are lower. Other reductions announced this week cover the Sanderson-Harold line of refrigerators; screen doors and windows; cistern and cottage pumps, both closed and open spouts; steel and brass jack chain; corrugated fasteners, both plain edge and multiple point; pressed spikes; tie-out chains; shoe findings; Kiddie Kars; the Victor line of wood mouse and rat traps; picture wire, both tinned and gilt; Dr. Williams' fly oil; fuse plugs; bit stock and round shank jobbers' drills.

Higher quotations appear on fuel oil, this change reflecting the recent gains in crude oil circles. The copper market is firmer, and this strength is reflected in copper products generally. Eastern markets report a slight rise in quotations on copper sheets, tubing and rods; while soldering coppers have also been increased in price.

Stove manufacturers report brisk activity in ranges and furnaces; yet it is pointed out that this satisfactory volume of seasonable business is mainly composed of orders which are usually apparent during the period of July and August, and which failed to materialize this season until the present Fall trade.

MONTREAL MARKETS

MONTREAL, October 13.—Interest is attached to the hardware markets this week by the announcement of price adjustments both in an upward and a downward direction. The list of changes, while not as lengthy as last week, covers many important lines. Chief among the recessions are lower prices on some lines of sheathings and building papers. The lower prices do not cover all grades and weights, but the list is quite extensive. At this period of the year, another important revision is the lower quotations on Community and Par plate ware, this coming at an opportune time considering the approach of the Christmas season. Cistern and cottage pumps, in closed and open spout, are now quoted lower, while chimneys and lantern globes have also been reduced. Picture wire concludes the list of reductions.

The condition of the copper market, where strength and a rapid rise is recorded on the primary markets, has reflected on copper rods, sheets and tubing, these being advanced in price this week. Soldering coppers are another product featured by higher prices. Copper wares do not record an advance, but are much firmer this week.

The improved tone of the steel industry has not lost any ground this week, but local quotations on both sheets and bar iron have failed as yet to show an advance in quotations. Both products are very firm with a change to higher levels imminent. The improvement has also reached the scrap market, dealers reporting a much better feeling. Ingot metals are generally firm, with advances recorded on some metals.

LAMP CHIMNEYS ARE AT LOWER PRICE LEVELS

Montreal

Lower quotations are announced on lamp chimneys this week, and following are the revised prices on the two best selling sizes;

A	$10.65	per case of 8 dozen.
B	8.90	per case of 6 dozen.

LANTERN GLOBES MARKED LOWER

Montreal.

Accompanying the lower prices on lamp chimneys is a reduction in prices of lantern globes, and new prices are as follows;

LANTERN GLOBES—	Doz.
1 dozen	$1 35
2 dozen	1 25
3 dozen	1 20

REDUCTION IN PAPERS AND SHEATHINGS

Montreal.

Some lines of building papers and sheathings are reduced in price this week. The reduction in papers applies to the No. 2 quality, which amounts from 5 to 15 cents per roll. In the heavier sheathings, 25 cents per 100 lbs. is made. Carpet felt shows the largest price decline when now quoted at $3.90 per 100 lbs., formerly being $6.00 Following are the revised prices;

PAPERS—	6
Dry fibre, No. 2 Anchor	$ 0 70
Tarred fibre, No. 2 Anchor	1 00
Do., No. 2 Elephant	1 00
Surprise fibre	0 80
Stag sheathing	0 80
Joliette sheathing, dry	0 70
Do., tarred	1 00
Straw sheathing, heavy dry, 100 lbs.	3 50
Red Star heavy tarred, straw, 100 lbs.	3 80
Scythe brand straw, 100 lbs.	3 50
Carpet felt, 100 lbs.	3 90
Tarred felt, 7, 10 and 16 oz.	
Tarred felt, 7, 10 and 16 oz., 100 lbs.	4 00

BETTER FEELING IN SCRAP MARKET

Montreal.

A somewhat better feeling now exists among dealers of waste materials. The actual business turnover is still light, although slightly improved in the past two weeks, but enquiries and the general tone of the market now lend encouragement. As one dealer stated "where there is smoke there is fire." The improvement follows immediately the better tone in the iron and steel market, and it is noticeable that the betterment now is noted on ferrous and non-ferrous metals. The scrap market has been very dull for a long period, but present indications of an improvement are

thought to be a genuine feature, and better market conditions are anticipated. Following are nominal local quotations.

Automobile tires		0 75
Rubber shoes		0 02½
Yellow brass		0 05
Red brass		0.08½
Light brass		0 04
Scrap zinc		0 03½
Lead, heavy		0 04
Lead, tea		0 02½
Light copper		0 07¾
Heavy copper		0 10½
Wrought iron, R. Rd., No. 1 per gr. ton		10 50
Malleable scrap (ton)		10 50
Pipe scrap (ton)		7 00
Heavy melting steel	7 50	8 00
No. 2 busheling,		4 00
Boiler plate		8 00
No. 1 machinery cast		20 00

RANGE BOILERS HOLD AT REVISION

Montreal.

No further price developments are recorded in range boilers since the issuing of new prices last week. It is yet early to determine the effect these higher quotations will have on the buying movement, but a better tone is looked for as the market is now on a steadier basis than has heretofore been in evidence. While the new prices are slightly higher than was at first anticipated, considering the low quotations the 30 gal. boiler was selling at, manufacturers state that the firmer tone of raw materials recently, offers a steadier boiler market. Following are revised prices of last week:

RANGE BOILERS—	Standard.	Ex.Heavy
30 gallon	9 25	11 75
52 gallon	21 00	26 00
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00

LEAD GOODS MARKING TIME

Montreal.

Current quotations on the various lines of lead products remain unchanged, but the tendency is decidedly one of firmness. The metals chiefly used in the making of these products are slowly gaining on the primary markets, and a reflection on the finished articles is probable at any time. This would apply particularly to solder prices. It has been considered for some time that quotations on these products were at the lowest level possible, and for the past two months any change that was thought likely was of an upward nature. Zinc sheets show a price increase for import, leaving the local market very firm on these. Following are present quotations:

LEAD PIPE—	
Lead pipe	0 12½
Lead waste	0 13½

Note.—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10 per cent. off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Do., 3 to 3½ lbs., sq. ft., lb.	0 10¼
Do., 4 to 8 lbs.	0 09½

Cut sheets ¼c lb extra and cut sheets to size, ¾c lb. extra.

Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 35
Zinc, sheets, casks	0 11½
Do., broken lots	0 12

FIRMER TONE ON COPPER WARES

Montreal.

The situation on wares, insofar as articles of copper manufacture, are this week recorded with a much firmer tone. This would apply to such articles as copper boilers, nickelplated tea kettles and tea pots in particular. The state of the copper market, which has developed into one of decided firmness in the past ten days to two weeks has reflected on these articles, although no price change is yet announced.

Tinware, graniteware, and aluminum ware are said to be on a fairly steady market at present. Sales are fair nd altogether seasonable. At the last recession in prices of wares generally, it was said a further prices reduction would not be surprising in the closing months of the year. However, with the recent improvements now noticeable in copper and sheets, it would seem the chances of a revision to lower levels is now more remote.

COPPER SHEETS, RODS AND TUBING ADVANCE

Montreal.

The strength on the copper market in the primary stage is reflected this week on rods, sheets and tubing. Sheets show the most marked advance when they are quoted from 1 to 3 cents per pound higher. The situation of copper in the last ten days has been one of interest, as the gain had been steady until the beginning of the week when advances became of a more rapid nature. The heavy stocks, accumu'ated since the close of the war when both the virgin metal and scrap have been in over abundance on the market, caused quotations on copper to drop to the low level of 11½ cents in the U. S. A. The price of 13 cents is now reached, this advancement taking place in the past few weeks. Brass goods of the same nature are also said to have firmed in the past week but not to the same extent as has copper. Following are the revised quotations:

BRASS—	Base.
Sheets, base	0 25
Rods, base ½ to 1 in., round	0 23
Tubing, seamless, base	0 32
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 30
Soft sheets, plain, 16 oz. and heavier lb.	0 33
Plain tinned, 16 oz. and heavier, lb.	0 38
Polished and tinned, 16 oz. and heavier, lb.	0 43
Tubing, lb.	0 34

Above prices are full sheets and bars. Cut sheets and bars are 5c per lb. higher.

CISTERN AND COTTAGE PUMPS REDUCED

Montreal.

Cistern and cottage pumps, both in closed and open spout, are this week reduced to lower prices. Winged pumps, however, remain unchanged. Following are the new quotations on the best selling sizes;

PUMPS—	Pitcher Spout.	Closed Spout
No. 2	2 85	3 10
No. 3	3 15	3 10
No. 4	3 75	4 10
No. 70		$6.00 each
No. 80		$8.00 each

NO FURTHER CHANGE IN FITTINGS

Montreal.

There has been no further change in the prices of the various kinds of pipe fittings since the recent revision to lower levels. The market for these continues with sales recording little change, being of a slow but steady nature. Following are the revised discounts of last week:

FITTINGS—		
Cast Iron fittings		20%
Bushings, cast		27½%
Do., malleable		25%
Flanges		37%
Plugs		27½%
Flange unions		22½%
Malleable unions		42½%
Dart Unions, black		29%
Do., galvanized		8%
Nipples, ⅛ to 4 in, close and short		50%
Do., long		60%
Do., 4½ to 8 in., close and short		40%
Do., long		50%
Couplings, 4 in. and under		30%
Do., 4 in. and longer		10%
Class A	0 53	0 65
Class B	0 21½	0 28¼
Class C	0 14	0 21½

NO CHANGE IN CORRUGATED SHEETS

Montreal.

No further development in the market for corrugated sheets is announced since the revision to lower levels a few weeks ago. For some time past, the tendency has been in a downward direction, but with the recent strength of plain galvanized sheets it is now stated that any further change may be in the nature of an advance. However, there is no indication at present that would tend to record higher prices and the market is continuing fairly steady with sales seasonably fair. Fol'owing are present list prices and discount;

Corrugated.—	
No. 28 gauge	7 00
No. 26 gauge	7 50
No. 24 gauge	10 50
No. 22 gauge	12 50
No. 20 gauge	14 00
No. 18 gauge	18 50

Less 7 ½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

BOILER TUBES UNCHANGED BUT FIRMER

Montreal.

Although no actual price changes are yet given out on boiler tubes, they are now firmer along with other lines of iron and steel. With the market continuing to show strength, it is a question as to the time necessary before prices locally will show a change, but it is thought these will not record advances as readily as other lines, such as bar iron, and sheets. Present quotations are the following;

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	....
1¼ inch	24 50	....
1½ inch	24 00	....
1¾ inch	26 00	27 00
2 inch	24 50	22 30
2¼ inch	27 75	25 50
½ inch	25 00	26 75
3 inch	42 50	34 00
3½ inch	54 50	49 50
4 inch	75 00	49 50

COAL OIL AND GASOLINE PRICES HOLD

Montreal

Quotations on both coal oil and gasoline hold at previous levels, coal oil selling at 19½ cents per gallon, gasoline at 31 and 34 cents.

SOLDERING COPPERS ARE SLIGHTLY HIGHER

Montreal.

In line with copper goods in general, soldering coppers are this week recorded with new higher prices. The advances are slight, but demonstrate the trend of the copper market. Following are the new quotations;

SOLDERING COPPERS—

	Per pr.		Per pr.
1 lb.	0 50	4 lb.	1 60
1½lb.	0 70	5 lb.	2 00
2 lb.	0 85	6 lb.	2 40
2½lb.	1 10	8 lb.	3 20
3 lb.	1 25		

SHEET PRICES STILL HOLD

Montreal.

Notwithstanding the continuous improvement in sheets, and the recent advances made in other markets, prices locally remain at former figures on all kinds. It would not be surprising, however, if an advance was made at any time, especially on the galvanized sheets. These seem to hold the centre of attraction, with the demand also showing an increase in the past two weeks.

There are no new developments at the mills since the advance in prices of a few weeks ago, but the improvement continues, and the future trend seems assured. Following are unchanged local quotations;

BLACK SHEETS

10 gauge	4 30 to	4 65
12 gauge	4 40	4 75
14 gauge	4 50	4 85
16 gauge	4 60	4 95
18-20 gauge	4 80	5 20
22-24 gauge	4 90	5 35
26 gauge	4 95	5 40
28 gauge	5 00	5 50

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

No 1	4 20
No. 2	6 30
25-foot coils—	
No. 1	1 60
No. 2	2 20

COMMUNITY AND PAR PLATE SHOWS REDUCTION

Montreal.

Of interest now when the Christmas season is fast approaching, is the announcement of a reduction in price of both Community and Community Par plated ware. The higher grade shows a reduction of approximately 11 per cent. Par plate 20 per cent. For example, the Community tea spoons which formerly sold for $5.74 a dozen, are now quoted at $5.14. Par plated spoons formerly at $2.56 will now cost $2.06.

IRON AND STEEL PRICES UNCHANGED, BUT MARKET FIRM.

Montreal

With the undertone on iron and steel remaining firm, prices locally are unchanged this week. It was thought in some quarters that while no changes were recorded at the mills, or in the primary markets, there was little likelihood of an increase locally. Following are existing prices:

Common bar iron, 100 lbs.	3 00	3 25
Refined iron	4 00	4 [illegible]0
Irish finish machinery steel	....	3 45
Mild steel	3 00	3 40
Single reeled machinery steel	5 00	5 25
Band steel	3 00	3 40
Spring steel	....	6 00
Sleighshoe steel	3 00	3 40
Tire steel	3 00	3 60
Toe calk steel	4 00	4 30
Harrow tooth steel. per lb.	....	3 55
Mining both steel per lb.	....	0 23
Black Diamond tool and cast steel, per lb.	....	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

INGOT MARKETS ARE MUCH IMPROVED

Montreal.

The firmer tone recorded last week in ingot metals is still maintained, and while no broad advance is recorded at present, there is every indication of a better tone and a stiffening of prices generally. The volume of business is improving to some extent.

TIN.—This metal is lagging somewhat as compared with others, and there is stil an opportunity to buy at a reasonable price. The market is in that condition that any indication of a real buying movement would be followed by some advance in prices. The strength of sterling exchange is also an important factor. The local market is firm at 35 cents.

COPPER.—The strength shown by New York is a prominent factor in copper markets. The volume of buying has broadened considerably both for local and export consumption. Locally copper is strong at 17¾ cents for electro, and 17½ for casting.

LEAD.—There is no particular change to report in this metal. Both London and East St. Louis being at about the same level. The demand continues good and there is no sign of any weakness. Local price is slightly higher at 7 cents.

SPELTER.—The advance still continues in the U.S.A. and the position appears very firm. It would not be surprising, however, if a quieter period ensued as the advance has been rather rapid after a long period of dullness. It is difficult to buy at less than $4.62½ for spot with a premium for futures. Producers are more or less indifferent at these prices. The English market also remains very firm. Local price 7¾ cents.

ANTIMONY.—The market in New York is somewhat quieter after the recent advance, but without any evidence of weakness. Locally the market is firm at 7½ cents for ordinary brands and 8¼ for high grade English.

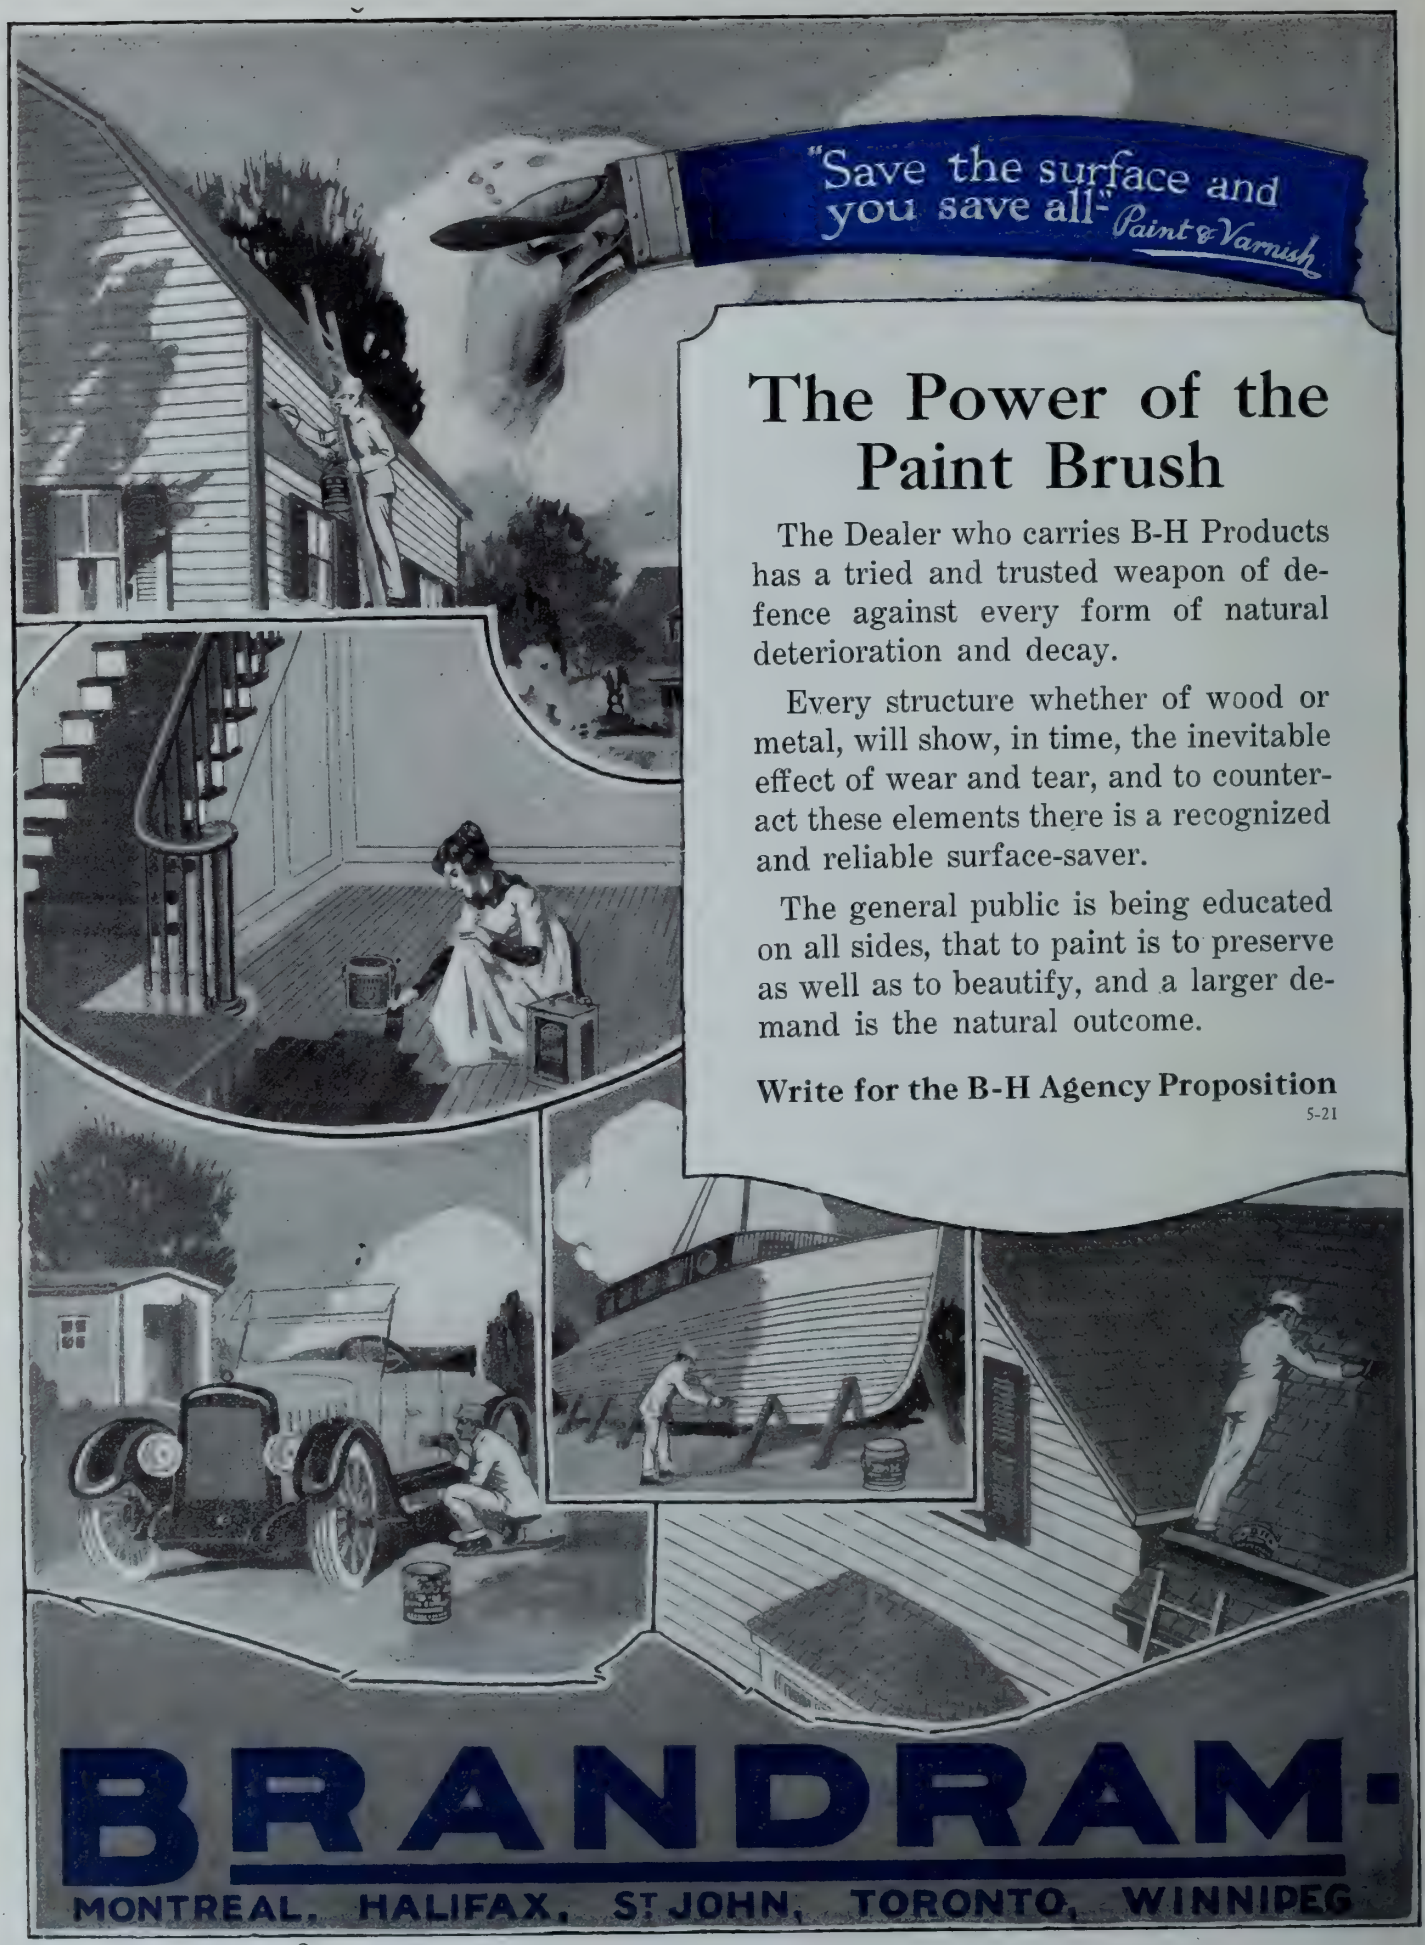
ALUMINUM.—This metal has an easier tone and the market is dull with quotations lower at 28 cents.

TORONTO MARKETS

TORONTO, October 13.—Another extensive list containing both important and minor price revisions which are generally of a downward nature, features developments on the current hardware markets. For the third successive time this season, quotations on various lines of building papers and sheathings are lower. Prices on Oneida Community tableware and cutlery have been reduced; while new lower prices are also given on Lufkin measuring tapes and rules. Revised lower quotations now appear on the Sanderson-Harold line of refrigerators, these being practically 20 per cent. lower. A similar decline is noted on screen doors and windows for next spring booking. Other reductions announced this week cover steel and brass jack chain; pressed spikes; corrugated fasteners, both plain edge and multiple point; Kiddie Kars; tie-out chains; the Victor line of wood mouse and rat traps; and a new list effective on shoe findings.

Higher quotations are given on fuel oil, the extent of the increase being 1 cent per gallon. This reflects the recent recovery of crude oil prices. A firm market is reported in copper, and this stronger tone is noted in copper products generally. There is also a better outlook in scrap materials; while slight improvement has appeared in some ingot markets. There is a stronger tone in cotton wastes, with prices holding unchanged. The condition of dealer's stocks is a contributing factor to prevailing prices on boiler tubes.

(Continued on page 52.)



The Power of the Paint Brush

The Dealer who carries B-H Products has a tried and trusted weapon of defence against every form of natural deterioration and decay.

Every structure whether of wood or metal, will show, in time, the inevitable effect of wear and tear, and to counteract these elements there is a recognized and reliable surface-saver.

The general public is being educated on all sides, that to paint is to preserve as well as to beautify, and a larger demand is the natural outcome.

If interested tear out this page and place with letters to be answered.

TORONTO MARKETS

(Continued from page 49.)

TARRED FELT PRICE IS AGAIN REDUCED

Toronto.

Quotations on tarred felt are now reduced to the extent of another 15 cents, according to current announcements from the manufacturers. This change brings the prevailing price down to $4.00 per 100 lbs. The present degree of business in roofings is stated to be of a fairly satisfactory nature, with a big volume of orders, which are mainly of small proportions. The total quantity, however, registers a marked advance over the trade figures of the summer months.

REVISED DISCOUNT SHOWN ON JACK CHAIN

Toronto.

A new discount has been given covering prices on jack chain. This change is applicable to both the steel and brass chain, and the revised quotation is list less 15 per cent.

LOWER QUOTATION ANNOUNCED ON PRESSED SPIKES

Toronto.

Prices on pressed spikes have been changed, and are now quoted at the following new lower levels:

⅜ in. dia. and larger ..	$5.25 per cwt.
¼ in. and 5-16 dia.	5.75 per cwt.

CORRUGATED FASTENERS TAKE NEW DISCOUNTS

Toronto.

Corrugated fasteners are included among the commodities whch have lower quotations this week. The change affects both the plain edge fastener, which is now quoted at list less 45 and 10 per cent; and the multiple point or saw edge product, which takes a quotation of 25 per cent off. These new prices on corrugated fastners are f.o.b., Toronto, Hamilton, London, and Montreal, in shipping quantities.

NEW LIST PRICES ON KIDDIE KARS

Toronto.

The current quotations on Kiddie Kars now take a new lower list, the revised prices being as follows:

No. 2	$2.25
No. 3	2.75
No. 4	3.25

NEW LIST PRICES ON TIE OUT CHAINS

Toronto.

New net prices are now given on tie out chains. The revised list quotations follow:

TIE OUT CHAINS

No. 1 x 30 feet, per doz,	9 25
No. 1 x 50 feet, per doz.	15 00
No. 0 x 30 feet,	9 75
No. 0 x 40 feet	13 25
No. 0 x 50 feet	15 25

VICTOR MOUSE TRAPS REDUCED IN PRICE

Toronto.

Among the minor reductions announced this week, are the new lower prices on the Victor line of wooden rat and mouse traps.

K & F HORSE RASPS HAVE REVISED DISCOUNTS

Toronto.

Following the announcement last week of lower prices on the Hellers horse rasps, the K & F made of horse rasps have also revised discounts. The new quotation is list, less 75 per cent.

LUFKIN TAPES AND RULES HAVE LOWER PRICES

Toronto

A decline in prices is now recorded on rules and tapes. The general revision of prices has been announced on the Lufkin line of measuring products, which shows a lowering in quotations varying approximately between 10 and 15 per cent. Following are the revised prices on a number of the Lufkin tapes:

TAPES, MEASURING (LUFKIN)

No.	Dscription.	Each.
263—50	ft. Challenge, Steel	4 95
103—50	ft., Reliable Junior, Steel	5 25
243—50	ft., Rival, Steel	4 40
553—50	ft., Steel	3 95
1243—50	ft., Rival Junior, Steel	4 06

FURTHER ADVANCE POSSIBLE IN SHEET QUOTATIONS

Toronto.

As recorded in last week's market report, the spread between the different local quotations on galvanized sheets is still evident. Some wholesalers are giving a base price of $6.25 on the 28 while other warehouses are holding unchanged to the base figure of $6.10.

Local reports indicate that the current volume of business has been slightly increasing, with orders more numerous, but generally of small proportion. It was admitted in one quarter that should the further advance in prices materialize—which has been predicted on the primary southern markets—local dealers may be forced to follow suit with increased quotations.

The prevaling situation in sheets at the U. S. mills, is stated to be the result of greater consumption, with its consequent betterment in demand the higher quotation now apparent represent the difference between the liquidation price which formerly prevailed, and the replacement figure which is based upon the mill's production costs. Following are the average prices, showing the spread between the various houses:

BLUE ANNEALED—

10 gauge, base	4 00	4 50
12 gauge	4 05	4 55
14 gauge	4 10	4 60
16 gauge	4 15	4 65

BLACK—

18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 10
26 gauge	4 65	5 15
28 gauge	4 75	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis.
28 gauge	9 50	8 75
26 gauge	9 25	8 50
24 gauge	8 65	8 10
22 gauge	8 30	7 65
18 and 20 gauge	7 60	7 50
Premier and Apollo.		
10¾ oz	6 50	7 00
U. S. 28 base	6 10	6 60
U. S. 26	5 80	6 30
22 and 24	5 65	6 15
18 and 20	5 50	6 00
16	5 35	5 85
12 and 14	5 20	5 70

An extra 40c per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

ONEIDA COMMUNITY REDUCE TABLE WARE PRICES

Toronto

The Oneida Community Co., have announced price reductions on their various lines of table ware and cutlery. Spoons which were formerly quoted at $9.00 per dozen, are now reduced to $8.00 per dozen. All other pieces have been lowered in proportion, it is stated.

BUILDING PAPERS AGAIN SHOW PRICE REDUCTIONS

Toronto

A further downward revision in prices on building papers has now been announced by the manufacturers. This current change is the third successive decline that has appeared in quotations on these products, and brings prices on many of these lines to the lowest level that has prevailed for some time. The current revisions affect dry fibre No. 2,; Tarred fibre No. 2,; Surprise fibre Stag sheathing; and tarred felt. Folowing are the new quotations:

PAPERS AND SHEATHINGS—

Dry Fibre, No. 1, Anch.	$1 35
Do., No. 2, Anch.	0 70
Do., No. 2 Elephant	0 70
Tarred Fibre, No. 1, Anchor	1 45
No. 2, Do.	1 00
Elephant brand, tarred, No. 2	1 00
Surprise Fibre	0 80
Empress Dry Sheathing	1 45
Stag Sheathing	0 80
Cyclone, dry	1 35
Do., tarred	1 45
Joliette Sheathing	0 70
Do., tarred	1 00
Straw Sheathing, heavy dry	3 50
Red Star heavy tarred straw	3 80
Ssythe Brand dry straw	3 50
Carpet felt	3 90
Tarred felt, 7, 10, and 16 oz.	4 00

STRONGER TONE NOTED IN COPPER PRODUCTS

Toronto.

The reduced quotations announced last week on copper and brass sheets, rods and tubing, are still maintained on the local markets. With the recent gains in ingot copper, the strength of this market was expected to be reflected in prices on copper products, but up to the present no change has resulted. Increases, varying from 1 to 2 cents per lb, are however, reported from other centres on copper goods. The local prices are included in the following list, but one dealer stated that there is a possibility of the higher levels developing in the near future.

BRASS—	
Sheets, base, per lb.	$ 0 22
Rods, base, per lb.	0 20
Tubing, base, per lb.	0 25
COPPER—	
Rods, base per lb.	0 26
Soft sheets, plain, 16 oz. and heavier, lb	0 28
Do., plain tinned 16 oz. and heavier, lb	0 35
Do., polished and tinned 16 oz. and heavier, lb.	0 40
Tubing	0 27

IMPROVED BUSINESS IN LEAD AND ZINC GOODS

Toronto.

The market on lead and zinc goods has remained steady during recent weeks, and prices on these products have held firmly. This condition has been supported by an improvement in the current demand, with the volume of fall business showing a seasonable activity. The recent lower price levels on the various grades of solder are still being shown, and the following list of quotations remains generally unchanged:

LEAD AND ZINC GOODS—

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subjected to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 29
Do., strictly, lb.	0 22
Do., commercial, lb.	0 20
Do., guaranteed, lb.	0 24
Do., wiping, lb.	0 20
Zinc sheets, per lb.	0 13

LOWER PRICES HOLD ON COMPRESSION WORK

Toronto.

In contrast with the many recent revisions that have been recorded, prices on valves and compression work generally remain unchanged this week. Some new business has been reported at the new lower quotations, but any general improvement is said to be very slight, as trade is only described as fair for this season of the year. Following are the prevailing discounts:

VALVES—

Compression work, standard	43%
Fuller work, standard	30%
Bath cocks, compression	32%
do., Fuller	25%
Flat way stop and waste cocks, standard	46%
Round-way stop and waste cocks, standard	40%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	20%
J. M. T.	20%
J. M. T. C.	25%
J. M. T. Gate Valves	25%
Gate or straightway	16-10%
Jenkins Globe	10-10%
Radiator valves, standard	58%
do., removable disc	58%
Emco. Check Valves	20%
Webber Gate Valves	20%

BASIN COCKS—

No. 0 and 1, Fuller pattern	30%
Quick opening No. 3633	43%

RENEWED INTEREST IN WROUGHT PIPE

Toronto.

The new pipe list, No. 53, has resulted in renewed interest in wrought iron and steel piping. Some markets report an increased demand developing during the past two weeks, while the production ratio at the mills has registered no change. The bulk of the buying in pipe consists of seasonable orders, according to immediate needs. Following is the new list;

Price List No. 53. Sept. 22, 1921

Standard Buttweld Pipe S/C
Per 100 feet.

Size	Steel Blk.	Steel Galv.	Gen. Wrot. Iron Blk.	Gen. Wrot. Iron Galv.

REVISED LIST EFFECTIVE ON SHOE FINDINGS

Toronto

Some revision has been made in the list on shoe findings, but the changes are only slight, affecting the slow moving products. The new list is effective from October 10, 1921.

CONDITION OF STOCKS GOVERNS TUBE PRICES

Toronto.

There has been no apparent change in the current situation on boiler tubes. The demand has failed to exhibit signs of any strong activity, while prices still reflect the conditions of present stocks, and are made according to the state of liquidation. No marked improvement in this situation is anticipated, while the buying movement is at its present depressingly low state, when compared with normal seasonable demands. It is considered speculative in some quarters, whether the betterment in this class of tubular goods will develop during the winter or early spring months.

Following are the current average quotations on tubes:

	Seamless.	Lapweld.
1 inch	26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	25 00
2 inch	28 00	22 00
2¼ inch	32 00	25 00
2½ inch	40 00	27 00
3 inch	44 00	35 00
3½ inch	60 00	40 00
4 inch	75 00	50 25

BETTER OUTLOOK IN SCRAP MATERIAL MARKETS

Toronto

The outlook in scrap materials is beginning to be a little more encouraging from the dealer's viewpoint. Iron and steel scrap consumers are inquiring more freely, but demand has not yet recovered to any extent. Local dealers are hopeful of firmer prices in the near future, as quotations on waste materials in the American markets have recently been advancing. Local quotations, at present, remain unchanged. Following are the averages of dealers' buying prices for large quantities, which are more or less nominal:

SCRAP MATERIALS—

No. 2 busheling	.....	11 00
Heavy melting steel, gross ton	9 50	10 00
R. Rd. wrought iron, No. 1, gr. ton	10 25	11 25
Scrap pipe, gr. ton	6 00	7 00
Stove plate, net ton	11 00	12 00
No. 1 machinery cast, net ton	15 00	16 00
Heavy lead	3 75	4 00
Tea lead	2 00	2.50
Red brass	....	9 00
Yellow brass	5 00	6 00
Light brass	3 00	3 50
Heavy copper	9 25	10 00
Scrap zinc	3 00	3 50
Old rubbers, boots and shoes	2 00	2 50
Lumberman's rubber boots	1 25	1 75
Auto tires	0 50	1 00
Solid tires	0 75	1 25

FUEL OIL QUOTATIONS ADVANCED ONE CENT

Toronto.

Quotations on fuel oil have been advanced to the extent of one cent per gallon, this change bringing the price up to 9 cents per gallon for fuel oil in barrels. A similar increase is noted in the price for tank cars. This revision is attributed to the recent higher prices on crude oil, and the firmer tone throughout the oil markets generally.

ANNOUNCE NEW REFRIGERATOR PRICES FOR 1922

Toronto.

A reduction of approximately 20 per cent is announced by the Sanderson-Harold Co., on their line of refrigerators, for the 1922 season booking.

LONDON MARKETS

LONDON, October 12.—Several important price changes to a lower level again appear on the current hardware markets. Among lines registering revisions in this manner are building papers, lamp chimneys, lantern globes, the Sanderson line of screen doors and windows, turpentine, linseed oil, mouse and rat traps, sad irons, fuse plugs, bit stocks and round shank jobbers' drills, and horse rasps, while there is also a new lower quotation for spring booking on fly oil.

During the past week a decided improvement was recorded in the hardware business. Fall lines are now all in good demand, with stove and stove accessories leading in this respect. Collections are in good shape.

HIGH TURPENTINE PRICE NOT MAINTAINED

London, Ont.

Turpentine quotations are recorded five cents gallon lower this week, the revision bringing prices down to $1.10, in one barrel lots. Following are the changed quotations:

TURPENTINE—	Imp. Gal.
1 barrel lots	1 10
2 to 4 barrel lots	1 09
5 gallon lots	1 25

LINSEED OIL PRICES DECLINE 2 CENTS

London, Ont.

Revised lower quotations also appear on linseed oil this week, the latest price being 2 cents per gal'on less than the recent level. The new quotations follows:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrels, per Imp. gal.	0 90	0 93
3 to 5 bbls., per Imp. gal.	0 89	0 92
6 to 9 bbls., per Imp. gal.	0 87	0 90

Less barrels add 15 cents gallon.

SOME BUILDING PAPERS HAVE LOWER PRICES

London, Ont.

New lower prices are given on some lines of building papers. The changes are chiefly apparent on tarred fibre No. 2; dry fibre No. 2; stag sheathing, and tarred felt. Following are the current revised quotations on these lines:

BUILING PAPERS—Tarred Fibre, No 2, $1 00 roll; Dry Fibre, No. 2, 70c roll. Stag Shathing, 80c roll; Tarred Felt, $4.50 per 100 lbs.

FUSE PLUGS AGAIN LOWER IN PRICE

London, Ont.

Fuse plugs are again reduced in price; the current announcement giving the new quotations on 10 ampere, 15, 20, and 25 ampere fuse p'ugs as $5.25 per hundred.

NEW LOWER PRICES ON POTTS SAD IRONS

London, Ont.

Among the current price reductions are the Potts sad irons, which now have lower quotations on the nickel-plated and plain sets. The new quotations follow:

Plain ..... $2.00 per set..
Nickel-plated ..... $2.10 per set

REVISED DISCOUNT ON BIT STOCK DRILLS

London, Ont.

Through a new discount quotation, lower prices are given on bit stock and round shank jobbers drills. The new lower quotation is, list less 45 per cent.

PRICE REVISION AGAIN APPEARS ON TRAPS

London, Ont.

Another new price has been announced on the Victor line of wood mouse and rat traps. The new lower quotations are:

Mouse traps, 25 cents per dozen, or $2.65 in gross lots.

Rat traps, ... $1.20 per doz.

GLOBE FILE DISCOUNTS

London, Ont.

The new quotation on Globe files should read 60 and 5 per cent. off list, in place of the 65 per cent. discount given last week.

LOWER PRICE ON FLY OIL FOR SPRING BOOKING

London, Ont.

New lower prices for spring booking now appear on the Dr. Williams line of fly oil. The revised quotations follow:

In 1 gallon cans, ...$12.00 per dozen.
In ½ ga'. cans, ...$8.00 per dozen

REVISED DISCOUNT ON HORSE RASPS

London, Ont.

Through a revision in the discount, lower quotations are given on Hellers horse rasps. The new discount is 67½ per cent.

SUBSTANTIAL REDUCTION ON COMBINATION DOORS

London, Ont.

A reduction of 20 per cent. is now announced by the Sanderson-Harold Co., on their "Combination" line of screen and storm doors. The new revised quotation is given as $64.00 per dozen.

LANTERN GLOBES TAKE LOWER PRICE LEVEL

London, Ont.

In conjunction with the current lower prices announced on lamp chimneys, lantern globes also take a lower price 'evel. The revised quotations follow:

LANTERN GLOBES—	Per doz.
1 dozen	1 45
3 dozen	1 30
6 dozen	1 20

LOWER PRICES ON SCREEN DOORS & WINDOWS

London, Ont.

Reductions are also given this week for spring booking in quotations on the Sanderson-Harold make of screen doors and windows. The extent of the decline is approximately 20 per cent.

LANTERN CHIMNEYS NOW HAVE LOWER PRICES

London, Ont.

Lower quotations are announced this week on lantern chimneys. The revised prices are as follows:—

LAMP CHIMNEYS—	
A, 8 dozen to case, per case	10 75
B, 6 dozen to case, per case	9 15
Rochester, No. 2, per dozen	2 00
Electric Slim, No. 2, per dozen	2 00
Rayo, per dozen	2 00

BOOKED ORDERS FOR ICE SKATES BEING TAKEN

London, Ont.

Booked orders for ice skates are now being taken. There has been no change in quotations for the coming season, prices on the Starr make remaining at, list less 30 per cent.

NEW HOCKEY STICK FOR COMING SEASON

London, Ont.

A new hockey stick is now on the market for the coming winter season. This is the Munro line, and prices are as follows;

Munro Professional, $9.50 per dozen.
Munro Hand Made, $13.50 per dozen.

REPORT BRISK SALES FOR BUCK SAWS

London, Ont.

The annual season for buck saws has now arrived, and dealers general'y report a fair movement in these products. Prices are unchanged at the following levels:

Happy Medium, ...$15.50 per dozen.
Prince Rupert, or equal, $20.50 per dozen.

SEASONABLE MOVEMENT IN STOVE BOARDS

London, Ont.

Stove boards are now selling well, according to the recent reports from both wholesalers and merchants. This seasonab'e movement is now more satisfactory. Prices are holding well at the following:—wood lined, list less 15 per cent.: paper lined, list less 30 per cent.

FURNACE SEASON CREATES NEED FOR SIFTERS

London, Ont.

Ash sifters are another of the seasonable products now registering marked sales. With the commencement of the furnace period, the demand for sifters has recently increased, and reports generally indicate a fairly active movement. Prices remain at following levels:

Common wood sides, $2.40 per dozen.
Banner, No. 2, ...$3.10 each.
Banner, No. 3, ...$2.10 each.

WEATHER STRIPS SALES SHOW FAIR START

London, Ont.

Fall sales have now commenced for weather strip, and a seasonable period of activity is looked for in this line. Fo'lowing are prevailing prices:

Frost King Felt, ...$5.00 per dozen.
Wood King felt, ...list less 55/5 per cent.

WINNIPEG MARKETS

WINNIPEG, October 12.—Many lines in hardware commodities have lower prices this week. With the exception of manufactured cotton goods, the revisions are all lower. Reduced prices featuring the market this week are those quoted on square and hexagon nuts, corrugated iron, blacksmiths' hammers, carriage and machine bolts and linseed oil. The cotton market is still unsettled, and further higher prices are quoted this week on cotton twines, sash cord and cotton clothes lines.

NEW DISCOUNTS GIVEN ON CARRIAGE BOLTS

Winnipeg.

Lower prices are quoted on carriage bolts this week, and the new discounts are as follows:—

3-8" and smaller 6" and shorter 32½%
over 6" 20%
7-16" and larger 15%

NEW LOWER PRICES ON CORRUGATED SHEETS

Winnipeg.

Lower prices are recorded this week on corrugated sheets. Following are the new prices:—

CORRUGATED SHEETS—

Galvanized medium:	
28 gauge, per 100 lbs.	7 20
26 gauge, per 100 lbs.	7 88
Painted medium:	
28 gauge, per 100 lbs.	5 85
26 gauge, per 100 lbs.	6 75

BOLT DISCOUNTS ARE GENERALLY REVISED

Winnipeg.

Prices have been reduced on plow bits, elevator bolts; sleigh shoe bolts; bolt ends; shaft bolts; step bolts; and coach screws. Following are the new discounts:—

BOLTS—

Plow bolts	25 per cent.
Elevator bolts	47½ per cent.
Sleigh shoe bolts	12½ per cent.
Bolt ends	25 per cent.
Shaft bolts	12½ per cent.
Step bolts	12½ per cent.
Coach screws	42½ per cent.

SQUARE AND HEXAGON NUTS LOWER IN PRICE

Winnipeg.

Prices have been revised this week on square and hexagon nuts, and are now lower. Following are the new quotations:—

NUTS—

	Square Plain. Case Lots, per 100 lbs.	Square Tapped.
¼ inch	14 75	17 25
5-16 inch	14 25	16 45
⅜ inch	12 45	14 05
7-16 inch	11 85	13 25
½ inch	11 00	12 25
9-16 inch	10 85	11 95
⅝ inch	10 55	11 55
¾ inch	10 35	11 25
⅞ inch	10 25	11 15
1 inch	10 45	11 35
1⅛ inch	10 15	11 05
1¼ inch	10 15	11 05
1⅜ inch	10 25	11 25
1½ inch	10 25	11 65

Less than case lots, $.00 more per 100 lbs.

	Hexagon Plain. Case lots ,per 00 lbs.	Hexagon Tapped.

1⅜ inch	11 25	112 00
1½ inch	11 65	12 30

QUOTATIONS ON HAMMERS ARE NOW REDUCED

Winnipeg.

A slight reduction is made this week on the price of hammers. Following are some of the latest quotations:

HAMMERS—

Masons—3 to 4½ lbs., 28c per lb.; 5 to 20 lbs., 22½c.

Double Face Spalling, 22½c per lb.

Striking—3 to 4½ lbs., 22½c per lb.; 5 lbs., and over. 16c per lb.

Stone Sledges, 8 lbs. and over, 16c per lb.

Blacksmith's Sledges—4 lbs., 22½c per lb.; 5 lbs. and over, 16c per lb.

SOLDERING COPPERS HAVE NEW LOWER PRICES

Winnipeg.

Prices have been reduced this week on soldering coppers. The new prices are as follows:—

SOLDERING COPPERS—

1 lb., 49½c per lb ; 1½ lbs., 45½c; 2 lb., 42c; 2½ lbs., 41c; 3 lb., 39c; 3½ lbs., 39c; 4 lb. and over, 38c.

LINSEED OIL PRICES AGAIN LOWERED

Winnipeg.

A further reduction is given on the current linseed oil quotations. Oil is now selling for $1.05 per gal. for raw and $1.08 for boiled in barrel lots.

FURTHER INFLATION OF WRAPPING TWINE PRICES

Winnipeg.

Further increased prices on wrapping twine are announced this week and are as follows:—

Cotton Twine

In balls:—	
3 ply	50c per lb.
4 ply	52c per lb.
In Cones:—	
3 ply	46c per lb.
4 ply	48c per lb.

QUOTATIONS ALSO LOWER ON MACHINE BOLTS

Winnipeg.

Prices have been reduced on machine bolts and the new discounts are as follows:—

3-8" and smaller, 4" and shorter 45%
over 4" 32½%
7-16" and larger 32½%

TURPENTINE QUOTATIONS HOLDING UNCHANGED

Winnipeg.

Turpentine is still selling at the level which has recently prevailed, and no further change has been announced. The current quotation therefore is $1.20 per gallon in 1 barrel lots.

ANNOUNCE REDUCTION IN LAWN MOWER QUOTATIONS

Winnipeg

Quotations on lawn mowers have been reduced, and new prices are announced for the 1922 season's trade. Following are the revised levels:—

LAWN MOWERS—

Daisy, 12 in., $7.50 each; 14 in., $7.75, 16 in., $8.00.

Woodyatt—12 in., $9.75 each; 14 in. $10.50; 16 in., $11; 18 in., $11.75; 20 in., $12.25.

Empress—14 in., $12.50 each; 16 in., $13.25; 18 in., $14; 20 in., $14.50.

PITTSBURGH MARKETS

PITTSBURGH, October 13.—Conditions in the iron and steel trade have changed very little in the past week. Prices have shown no important movements, and the volume of demand is not materially altered.

The railroads announce a reduction of 28 per cent in iron ore freight rates, balancing the 40 per cent increase August 26, 1920, so that rates will be down to where they were before that advance, being still well above the level of 1914. The announcement is that the reduction will be only to December 31, but the trade assumes that the reduction will be permanent. The rate from Lake Erie dock to valley furnaces will decrease from 91 cents, to 65 cents, but so far as known there is no reduction scheduled in the dock charges.

While the blast furnacemen have been anxious to see rate reductions they are not particularly pleased with this move because of all reductions it is the one that will do them the least good. They are moving very little ore now and the reduction will hardly encourage them to move more. They have large piles of ore at furnaces. What the furnacemen consider an unfortunate feature of the matter is that the reduction will encourage pig iron buyers to look for lower prices on pig iron, whereas for some time to come it will cost just as much to make pig iron as formerly, since the ore piles have to be used.

If the reduction had been made on coke the case would be different, for the furnaces are moving coke every day. Doubtless the railroads realized the circumstances in picking on ore for the first reduction, and accordingly some furnacemen call the ore rate reduction "a play to the galleries." When the ore reduction really counts it will mean about 47 cents on the amount of ore needed to make a ton of pig iron. The freight on a ton of Connersville coke to the valleys is $2.52, and a 28 per cent. reduction on this would be 70 cents, or about 77 cents on the amount needed to make a ton of pig iron. Doubtless this will come some time, but the railroads would like to have it at once.

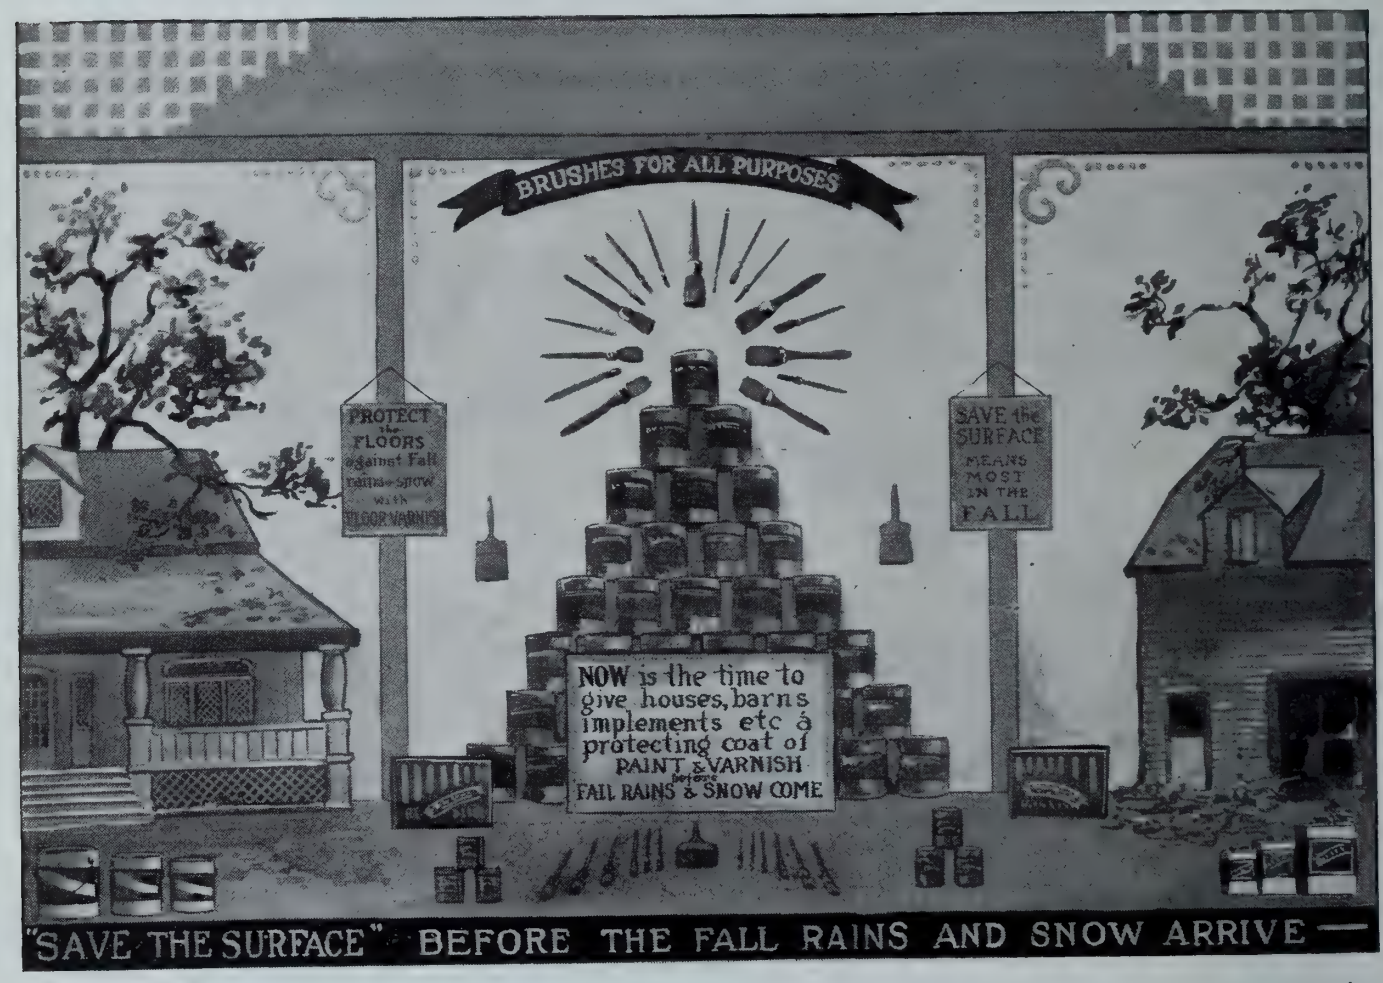
Production of pig iron in September was at the rate of about 12,000,000 tons a year, this comparing with rates of about 11,200,000 tons in August and 10,000,000 tons in July, the low month. Production now is probably at fully 13,000,000 tons.

Production of steel ingots is at 33 to 35 per cent of capacity, against 30 per

(Continued on Page 62.)

Fall Appeals in Paint Displays

General Arrangements of Paint Window Displays Supplanted With More Effective Arrangements With Definite Appeals—"Save the Surface" Particularly Important in Fall Months—Urban and Rural Dwellers Susceptible to Forceful Arguments for Fall Painting



THE WINDOWS provide the hardware merchant with one of the most effective mediums which it is possible to command in connection with stimulating Fall interest in paint, varnish, etc. A few years ago the average customer of the hardware store was in the habit of seeing paint displays in the windows of the store for a few weeks during the Spring season, and with such an influence at work how could the result be anything else but that paint trade would concentrate around that season and be very scant in volume during the rest of the year?

The change of sentiment which has taken place in recent years is evidence of the effectiveness of the hardware merchant's efforts in his own locality. By the use of window displays of paints at all times of the year, the use of newspaper space to sound forth the advantages of painting at other seasons than in the Spring, and the special personal effort put forth by the merchant and his salesmen, the tendency has been changed until now much painting is done in the fall and even in the cold weather. Customers have been brought to a closer realization of the value of "Saving the Surface" in the Fall.

As an aid to hardware merchants in taking the utmost advantage of the help which the window provides, a suggested arrangement of a Fall window is shown herewith. There are a great number of arguments in favor of painting at this time of year, as will be found from a close perusal of the pages in this section, and the windows provide a good means of setting forth these arguments to local prospects. There are other means of bringing these arguments to the notice of prospective customers, but it will be found that the windows will be very helpful in this respect and frequently they can be made to support effort expended in other directions.

An analysis should be made of local trade to ascertain the proportions of urban as compared with rural customers so that due attention may be given to each. Then the number of days in which the windows can be used for paint displays should be considered. With this information the merchant will know what arrangement to follow in the arrangement of the window and when to change it. Directness in appeal will be one of the most important elements in making the paint window a success and therefore special arrangement will be necessary to secure the interest of various types of prospects. The farmer will be interested in knowing that he can greatly lower the overhead charges on his plant and equipment by keeping buildings and implements well preserved with paint, varnish, etc. The housewife with a small family will be interested in knowing that there are floor finishes which will be unmarred with the tracking in of wet boots from the fall rains and winter snows. For the fall housecleaning the housewife will also be interested in wall finishes which can be easily applied, and the property owner will be interested in the value of paint in protecting property exteriors in view of continued high costs of construction. These points can all be effectively illustrated in the window displays and attention to them will be fully justified by results.

Sell the Home Shelf Idea

There is a constant need for paints, varnishes and finishes around the home. Furniture becomes scarred, linoleum gets dull; woodwork fades, stovepipes rust—and many other surfaces about the home need frequent refinishing.

You can make this business a source of great profit for you. Sell the housewife on the idea of always having some on hand for immediate use. That's the way she saves upkeep expense and keeps things about the home spick-and-span—always. Glidden Jap-a-lac is just the thing for this purpose. It is made in a variety of practical colors, ready for immediate use.

Write to-day for complete line and other information.

Russian Bristle Industry Improving

Some Supplies From Ukraine Sold at Reduced Prices, But Unsorted—Russian Bristles Bringing High Prices, But Quantity is Small

(Continued from September 17th issue)

COUPLED with the elimination of Russian bristles, came the ravages of the Chinese famine, which partially crippled the hog industry in China. This condition is now being recovered to some extent, however, and the improvement has been coupled with the resuscitation of the Russian industry. Some shipments of bristles from the Ukraine have been sold to dealers at reduced prices merely because such supplies were unsorted. The majority however, are bringing record prices, and the Russian bristles are commanding higher prices, the same as before the war, owing to their superiority. The finest grades come from Siberian districts, where the bristles grow longer, because of the fact that the pigs spend most of their time in the fresh air, subjected to the comparatively cold climate.

The famine now reported to be raging in Poland, Ukraine, and western Russia, has again practically exterminated the pig from those regions, so that future supplies of Russian bristles can be only small for some time to come when compared with the quantity available to the trade in pre-war days. The bright side of this feature of the situation is found in the report that there are fairly large stocks of bristles on hand in Poland, but that their export has been forbidden by the Polish Government, as it is the intention to encourage local brush manufacturing; hence the embargo.

The method of collecting the bristles from the peasants, especially in northeastern Russia where isolated villages are scattered over vast areas, affords on interesting study. Means of transportation over the plains have always been inadequate, therefore the peasants have been in the habit of holding their small stocks of bristles until a travelling purchaser calls at the vilage periodically. In some countries, such a character would be termed a "pedler." Through this source they are passed on to dealers, who have adopted the plan of collecting bristles at the various annual fairs conducted throughout the country.

The assortment and preparation of the assembled bristles has been chiefly in the hands of the Jewish population of Russian cities; and because of the essentially Jewish character of the Russian bristle industry, Leipsig in Germany, became one of the chief marketing and distributing points. It is said that the Jewish traders were permitted to enter Leipsig free of restrictions, while various rules and regulations existing in Petrograd, prevented the Jews from having the same easy access to that city. From Leipsig, the bristles reached the world's markets by way of London, England, and while the war eliminated Leipsig from among the prominent factors in this industry, yet London still remains the principal world market for Russian bristles.

A. Ramsay & Son Co. Hold Conference

Montreal—An interesting and instructive conference of branch managers and distributors for A. Ramsay & Son Company, was held at their head office in Montreal. Each day those attending gathered to discuss the questions relative to paint and varnish salesmanship, and many interesting topics were presented from the different districts. As to present prospects, it was unanimously agreed upon that the outlook for 1922 was exceedingly bright.

While the programme embodied talks and discussions of a very educative character, it was not devoid of amusement and entertainment. A theatre party and banquet offered these, in the relaxation from the business of the gatherings held each morning and afternoon.

Those attending represented the different branches of the company from coast to coast, and those from out of town included: H. C. Douglas, W. E. Greer, J. D. McDonald, H. S. Duncan, R. J. Sirman, and J. R. Simmonds.

COPPER IMPROVEMENT MAY NOT LAST

(Continued from page 39)

to come, whereas the brighter tone is merely getting back again to normal.

There is undoubtedly a better aspect existing at the present time in copper, but even should present gains be held, considerable time would elapse before the upward revision could be reflected on copper products in the hardware field. This viewpoint is substantiated to some extent by the recent recessions appearing in quotations on copper tubing, sheets and rods.

"Owing to the firm nature of the copper market, coupled with the recent higher prices of this metal on the primary centres, any further advance in quotations at ingot mills would necessitate similar increases on the local market," stated W. Brymer, General Manager of the Canada Metal Co., in discussing the recent developments in the ingot copper with Hardware & Metal.

All Metals Are Firm

The demand for copper has greatly improved," said Mr. Brymer, "and it is to be hoped that the better tone of the copper situation today, will prove of a permanent nature; although it is yet too early to make conclusive statements. The degree of confidence which consumers have in the market, coupled with a continuance of the present buying movement, will most likely be the chief factors in determining the temporary or permanent nature of these prevailing copper developments. At the present time, all metals are firm, while business is generally better."

A Toronto representative of one of Canada's largest importing and distributing houses for ingot metals, stated to Hardware & Metal, that any increase in demand for copper, or revival of normal trading activity, is more or less bound to be reflected in an improved market tone, and higher prices generally. This was said to be because copper had been in the dumps for so long a period, that the consequent price deflation and trade depression had brought quotations down to a point where the metal was selling even below the cost of production.

Must Reduce Surplus Stocks

In the case of the copper industry, it is said that any permanent increase in demand, would uitimately lead to an expansion of operations in the mining districts. These have recently been greatly restricted. Any such improvement however, is only likely to develop after the prevailing surplus stocks have been reduced in quantity. The experience of the past has been that fluries of buying and price fluctuations in copper have been without a firm foundation.

Reports recently received from the American markets indicate that copper has been firming up steadily, with the demand holding very strong. Quotations for November futures are also holding very strong levels, with Germany and Japan supplying the present foreign demand.

The firm tone in copper on the primary market, the subsequent price development in sheets, rods and tubing and the anticipated change in quotations on finished articles has been an attraction in the hardware market in the past ten days. The trend on the market becomes more pronounced from day to day and this week the reflection is on sheets, rods and tubing when an advance of 1 to 3 cents a pound base is recorded. From the situation of this

The Boeckh Co. Ltd.,
166 Adelaide Street W.,
Toronto, Ont.

Attention Advertising Manager.

Dear Sirs:—

Will you please accept this entirely unsolicited testimonial to the excellence of an article of your manufacture, namely, a shaving brush bearing the name and date, "Boeckh, 1916."

This brush was evidently originally supplied by you to the Department of Militia and Defence, as it was issued to me while in the army, early in 1917.

It has been in daily use ever since, and has certainly received no particular care, yet its efficiency seems quite equal to that when new.

I have been given several supposedly "superior" brushes since, but they have never been used, as I prefer to stick to one of proven qualities, and familiar pattern.

I am telling you all this because I believe in both commending and recommending a worthy article, and because goods, supplied under army contract, so often bear an unfair suspicion of inferiority.

Yours very truly,
Name Supplied on Request.

Weekly Paint Markets

MONTREAL

MONTREAL, October 13th—Although no actual price changes are evident in the current paint markets this week, the markets are by no means featureless. Both linseed oil and turpentine are much easier with price changes in a downward direction imminent. The cause of the continued weakness noticeable in linseed oil during the past two weeks, but more pronounced this week, may be attributable to an improvement in crop conditions and an assurance of no lack of seed on the domestic market. The turpentine market is found wanting in demand. The recent spurt accompanied by considerably higher prices did not find consumers in the buying mood, and the market is now one of dullness. As stated, all products are holding unchanged in price.

Conditions in shellac are the reverse. Market tendencies are decidedly firm, but with the marked advance of last week, no further revisions are anticipated unless the firm attitude continues. Both white lead in oil and putty remain steady with an active demand showing, particularly on the latter. Window glass becomes a better seller from week to week with no noticeable change either in prices or market tendencies.

CHANGE IN LINSEED OIL PRICES IMMINENT

Montreal.

With quotations on linseed oil holding for the week, price recessions are imminent. Prices ruling at present are 85 and 87 cents for raw and boiled oil respectively in one barrel lots. While the current demand in most quarters is reported as fair, the chief reason for continued fluctuation, and easing off, is the assurance from present indications that there is little liklihood of a shortage of seed, on the domestic market. It is also pointed out that ruling quotations on Western seed are at a reasonably high figure in comparison with present wheat prices, and a lowering in this direction would still leave the flax seed at a favorable price in comparison. The demand, as stated, is fair for the season, although the long termed contracts from manufacturers of paint are not in evidence as in past years. Following are the ruling quotations:

LINSEED OIL—

	Raw.	Boiled.
1 to 2 barrel lots, per gal.	0 85	0 87
3 to 4 barrel lots, per gal.	0 83	0 85

Less barrels, add 10 cents per gallon.

LOWER PRICES ANTICIPATED ON TURPENTINE

Montreal.

Current quotations on turpentine also hold unchanged this week, with the market decidedly easier. A price of $1.07 in one barrel lots is still given, but a lowering in the near future would not be surprising. The recent marked strength on this market failed to be accompanied by any interest on the part of buyers, this lack of demand is stated to be the reason for the easing off. Just how far prices will recede in the anticipated revision is unknown, Any distinct lowering is hardly thought probable because of the attitude of producers in the Southern market who are loath to market turpentine at further reduced prices. Present prices are the following:

TURPENTINE—	Imp. gal.
1 barrel lots	$1 07
2 to 4 barrel lots	1 05
Broken lots	1 17

SHELLAC CONTINUES FIRM

Montreal.

The situation in shellac is one of firmness. Although the demand locally, as is usually the case at this season of the year, is only fair, stocks are by no means heavy. In outside markets the demand is said to be in excess of production, with primary markets continuing very firm. Last week a marked advance was shown on both white and orange shellac; thus, unless the present strength of the market continues, it is not anticipated that further revisions will be made in the meantime. However, it is a question just how long this firmness will have to be in evidence before another change in quotations is made. Following are the existing prices:

SHELLAC—		
In bbls., per gal.	4 65	4 15
Gal. jugs, pr gal.	5 00	4 50

STEADY MARKET FOR WHITE LEAD LOOKED FOR

Montreal.

Current demand for white lead in oil continues satisfactory, outside painting being carried on to a good extent in all districts. This will continue in all probability, as reports from outside dealers state that the fall painting movement has gained ground this year and this will have its reflection on white lead. The undertone of the market is one of firmness, raw materials holding steady to firm on the primary market. With these conditions prevailing, a steady outlook is expected both for the present and next season's movement. Prices locally are $12.00 in 5 ton lots, $12.75 in 1 ton lots, and $13.10 in less quantities.

GOOD DEMAND FOR PUTTY

Montreal.

Current demand for putty has increased from week to week, and while sales are comparatively small with past seasons, the movement is one of satisfaction to manufacturers and jobbers. While the recent easier price levels share to an extent in the present activity, they are not considered the chief factor, as the present season usually demands activity of this product. Following are prevailing prices:

PUTTY—	5-ton lots	1-ton lots.	Less
Standard, per 100 lbs.			
Bulk barrels, 800 lbs. .. .	4 00	4 50	4 75
Bulk drums, 100 lbs.	5 00	5 50	5 75
Do., or tins, loose, 25 lbs.	5 25	5 75	6 00
Drums or tins, cased, 25 lb.	6 00	6 50	6 75
1-lb. tins	8 75	9 25	9 50

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices

TORONTO

TORONTO, October 13 — Once again turpentine quotations furnish specific attraction on the local paint markets. This week see-saw tactics have developed, with prices again rising to the high level of $1.15 per gallon in 1 barrel lots, which prevailed a short time since. Last week's decline was based on the easier tone at southern primary supply centres, and attributed to lack of consumers demand. Similarly, the current increases are reflecting the return upward trend of Savannah prices, caused through the uncovering of immediate requirements, and some reports of foreign buying. The mediocre condition of local stocks is said to be a primary factor in causing quotations to closely follow the range and fluctuations apparent on the southern markets.

TURPENTINE PRICES PLAY SEE-SAW; ARE AGAIN BACK AT HIGH LEVEL

Toronto.

Local quotations on turpentine have again risen in sympathy with the higher quotations on the southern primary markets. This increase amounts to 5 cents per gallon, and places prices back at the peak recorded two weeks ago, namely $1.15, in one barrel lots.

The recent sudden rise in turpentine quotations, found consumers unwilling to purchase at the inflated levels. As a consequence of this development, prices on the Savannah markets receded somewhat, and resulted in the local reduction recorded last week. However, the general condition of stocks forced evidence of consuming demands, and the

SIGN OF MERIT
BEST B&M CO MADE

"Muresco Creates a 'Homey' Feeling
When Applied to Wall or Ceiling"

A Brush Worthy of Muresco

We are interested in seeing the consumer get the utmost satisfaction from the use of Muresco. This means greater sales and distribution, greater profits for the merchant, and better business for us. To encourage the use of a good brush, we are offering this reliable brush especially suited to Muresco. The price is merely nominal.

This is a brush of absolutely pure Chinese Bristles. There is absolutely no horse hair used, or other hair of any kind. As can be seen, it is a broad, full, generous brush, suitable in every way to get the best results from Muresco with consequent satisfaction to all concerned.

Muresco has established, and maintains, an enviable record for quality. It will not peel, crack or rub off; it is very economical in use, artistic in appearance, durable and sanitary.

If your business is not yet enjoying the benefits of Muresco sales—investigate. Muresco is made in white—16 tints—and 16 colors.

Write to-day for color cards and prices.

The Moore Line Consists of:

MURESCO: The best wall finish.
HOUSE COLORS: A pure linseed oil paint.
FLOOR PAINT: "Can't be beat for under feet."
TILE-LIKE: Varnish and stain combined.
MOORAMEL: Perfect flowing enamel.
SANI-FLAT: A non-poisonous flat oil paint.

PAINT MARKETS

(Continued from Page 60.)

trend of primary markets is again upward. Local dealers have generally been buying as current requirements dictated, and as pointed out in a previous issue of Hardware and Metal, this condition reflects the Savannah fluctuations more sharply.

Germany is reported to be among the foreign purchasers of turpentine on the southern markets, the demand from these quarters being classed as one of the primary factors in the present stronger tone, and recent price gains. This condition of affairs has been more or less accentuated by the estimated deficiency in the French crop, when compared with last season's volume.

Local dealers with any stocks of turpentine on hand, are inclined to adhere to the figures quoted last week of $1.10 per gallon in barrel lots. Owing to the increased cost of laying down the product on the local market, however, the average quotations have generally advanced to the following levels:

TURPENTINE	Imp. gal.
1 barrel lots.	$1 15
2 to 4 barrel lots	1 14
5 gallon lots	1 30

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal, but freight may be equalized from any of these points.

Car loads of oil of 70 bbls. Price on application.

Less than 1 barrel lots, 15 cents per gallon additional.

LINSEED OIL LEVELS REMAIN UNCHANGED

Toronto.

Quotations on linseed oil generally remain at the lower level recently in effect. This easy tendency is attributed to the current lack of demand, combined with more complete estimates of the current season's flax seed returns. These improved crop reports have cultivated the opinion that no lack of seed should develop on the domestic markets. Estimates governing the American seed, while also registering a shortage when compared with last year, are considered fairly satisfactory. It is yet a little early to record Argentine crops, but it has been stated that any average returns should favor an adequate seed supply, as southern producers held over large quantities from last season.

Following are the unchanged local quotations on linseed oil:

LINSEED OIL—		
1 to 2 barrel lots, per gal.	0 90	0 93
3 to 5 barrel lots, per gal.	0 89	0 92
6 to 9 barrel lots, per gal.	0 87	0 90

Less barrels, add 15 cents per gallon.

STEADY MARKETS EXISTS FOR WHITE LEAD IN OIL

Toronto.

With current demands fairly good, a steady market exists for white lead in oil. It is reported that Fall painting activities are generally increasing, and the improvement in this direction is reflected in the current movement on white lead. Prices remain unchanged as follows:

WHITE LEAD IN OIL—	5-ton-lots.	1-ton lots.	Less quantities
Per 100 lbs.	$12 70	$13 20	$13 55

PITTSBURG MARKETS

(Continued from Page 55.)

cent in August, and about 12 per cent in July the low month. There has been no material change in the rate of production in the past two or three weeks, though there is some reason to believe that there is a slight tendency towards increased production.

Semi-finished steel is very sluggish, there being scarcely any interest in the market. Mills generally are holding sheet bars at the recently advanced price of $32 but it does not appear that the price has been paid thus far. Sales a few weeks ago were at a trifle under $30. In billets there is no action at all, and some mills do not have even a nominal asking price. Rods are supposed to be $41, by the recent advance, but the market has not been tested.

Bars, shapes and plates continue sluggish. The Carnegie Steel Company recently announced its prices at 1.65c for bars and 1.75c for shapes and plates. So far as known the company is adhering to these prices and that is not easily understood since some independents are ready sellers at 1.60c for all three products. The 1.60c price, however, seems to be the minimum, and if so the market is firmer than a few weeks ago.

Hoops and bands are in very poor request, but mills seem to be adhering to a price of 2.25c, to which they recently advanced, probably on the theory that they can secure one price as easily as another.

Wire products show nothing important marketwise, since the distribution is almost wholly on old orders, booked before the advances of September 12, $2 on wire and $3 on nails, present prices being 2.60c on plain wire, 3.10c on galvanized wire and $2.90 on nails.

A little business is now being booked by sheet mills at the $5 a ton advance of some three weeks ago, but of course the chief operation is against the old orders. Whether the new prices will hold indefinitely is a question, but already some of the mills are discussing the prospects of another advance. Present prices are: Blue annealed, 2.50c; black, 3.00c; galvanized, 4.00c.

Demand for pipe mill products has been increasing slowly right along, but there is little improvement now. For standard steel pipe, demand is quite fair, but there is little being done in line pipe or oil country goods. Crude oil prices have been advancing rather sharply in the past ten days, and this would encourage drilling were the season not so far advanced.

Tin Plate is Active

Tin plate continues to make an altogether remarkable showing for this time of the year, since week by week production increases, 65 per cent or more of the tin plate mills being in operation, against about 25 per cent last June. The increased production is due partly to increased demand and partly to liquidation of mill stocks. Prices are quite irregular.

Pig iron is firm in the local market but distinctly inactive, transactions being light, and inquiry as well. The market is quotable at $20 for Bessemer, $19.25 to $20 for basic and $21 for foundry, f. o. b. valley furnaces. Quite a divergence of opinion has developed as to the future of the iron and steel market over the next three months. In some quarters the opinion has arisen that all the improvement to be expected for this year has already occurred and that there may even be a recession of demand by December. In other quarters it is held that general business is going to increase steadily, bringing a larger consumption demnad for iron and steel week by week, and that by early spring everything will be quite active again.

CORRECTION.

In our last issue it was stated that Robt. C. Holder of St. John, N.B., had been appointed representative for the Inperial Varnish and Color Co., Ltd. in the Maritime Provinces. This was an error, Mr. Holder will represent Paint & Varnish Limited, Montreal.

COPPER IMPROVEMENT MAY NOT LAST

(Continued from Page 58.)

metal now evident in the primary stage, it would seem reasonable to state that higher prices are altogether probable on finished articles of copper manufacture such as copper boilers, tea kettles, and tea pots, etc.

America is known as the chief source of supply for copper, turning out between 70 and 75 per cent. of the world's supply. Before the war, Europe was her chief customer, and she became even a greater buyer during war years, munitions alone requiring enormous supplies. It was at this time that production was doubled, or tripled. The war suddenly came to an end leaving enormous stocks. These were made greater by the accumulation of scrap, that can be salvaged and used in almost any circumstance as the virgin steel. With stocks so heavy, it has taken practically three years to bring them back to normal, and during this period the low level of 11½ cents was reached. Supplies are now nearing normal, buyers are realizing that the low figure would not hold, Europe is again in the market regaining her former standing as chief customer, and it is today doubtful whether copper can be bought for 13 cents, according to authorities. The normal price is said to be around the 15 cent figure, and if the strides recently made are continued, it is only a question of time until this figure is reached. Whether it will be surpassed is a question, but dealers hope the gains are not too rapid, leaving the health of the rise questionable.

Manufacturers of copper goods state the recent strength in the primary market has not yet had time to realize itself in the finished product, but with a continuance of the present tone it would not be surprising to see a subsequent advance in quotations.

The House Next Door

Next-door neighbors paint their houses. One man buys his paint from you—the other from your competitor.

Two years from now, whose house will look the better—your man's or the man's next door? Would you bet on your customer's job—make a bet of real money with your competitor?

Real money is involved! The dealer who supplied the paint for the winning house will get two orders next time and the orders for whatever paints and varnishes are required for inside work.

The O.P.W. Lines are winners every time and there is an O.P.W. product for every purpose. Prices right.

TINKER TOM'S TALKS.

Talk No. 334

For several weeks I've wanted to boost the Boy Scouts in this talk, but orders were scarce and the Scouts had to wait.

Now with enough actual orders for Premier Galvanized Sheets to run full until Christmas, the Scouts get the space.

You business men throughout Canada can do a good turn, just as the Scouts do every day, if you will give your support and encouragement to this great cause. Canada's future depends on her youth of today, and the Scouts have every chance to become good loyal citizens—Boost the Boys—and don't wait too long to be asked.

Tinker Tom

GLASS

YOU needn't worry about receiving prompt shipments of Glass. Greater now than ever before are the advantages to the Dealer in having a near-by and dependable source of supply, whether it be for *one* light of Glass or car-lots.

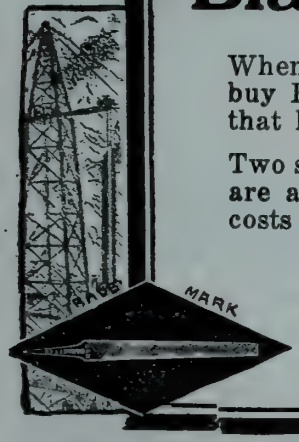
We are receiving quantities of Window and Plate Glass and can quote you very attractive prices for immediate deliveries or for import shipments. We stock or manufacture Plate, Bevelled Plate, Mirrors, Figured, Leaded, Wired and Prism Glass.

Write, Wire or Phone for Prices

Hobbs Manufacturing Company, Limited.

MONTREAL TORONTO LONDON WINNIPEG

Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Beautify Walls Economically

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. The economical side of Silkstone, its beauty, its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably with mutual satisfaction to merchant and customer.

The satisfaction it gives is a delight to the conscientious merchant who tries to serve his customers well and build permanent trade. Silkstone fills the bill for the Canadian housewife. She has tried it and liked it, and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller. Let us show you what's in it for you—write.

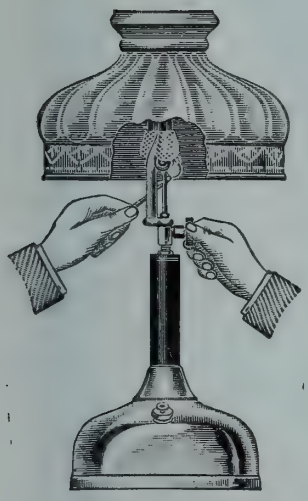
The Trade Mark behind the "Hardware House of Quality"

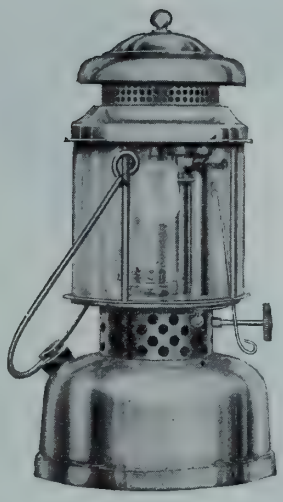
DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

FOR GOOD SALES---

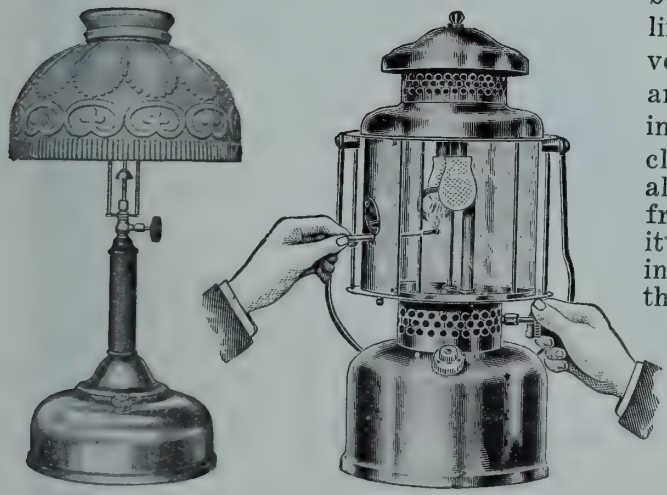
Look over These Ashdown Offerings





No. CQ329 Quick-Lite holds 3 pints and burns 18 hours on one filling. One in carton complete with shade, mantles, pump, wrench, hanger, cleaning pick and extra generator. Shipping weight, 9 lbs. A handsome, attractive lamp. Popular with users and easy to sell. It gives the greatest satisfaction in use and leads to many other sales. Ask for detailed information about this interesting lamp or any of the others shown here.

The Storm King Lantern—the most efficient, safe, reliable, powerful and economical light on the market; simple in construction and operation; easy to light and extinguish, and absolutely storm proof; can be taken apart in a few seconds if desired. The ideal lantern for campers, hunters, and summer resorts.



The Nulite Reading Lamp is pronounced by users to be the last word in Gasoline Lamp Perfection. It is very neat and convenient and has automatic cleaning device which not only cleans the tip automatically, but prevents Lamp from clogging, also aids it in starting lamp, making it possible to generate the gas in twenty seconds.

The LQ. 327 Quick-Lite Lantern, with match generating burner, is the handiest outdoor lantern made. Gives same brilliant pure white light of 300 candlepower at same cost. Is wind-proof, rain-proof and bug-proof. Holds a quart of fuel, enough for 12 hours' use on one filling. Just the thing for farmers, nightwatchmen, plumbers, garages, builders, campers, auto-tourists, etc.

Dealers who have used or sold gasoline lamps will quickly recognize the big advantage a match-lighting lamp has over the torch-lighting styles

The Brush that took 56 Years to Perfect

No good article was ever perfected in a day. It takes years of experimenting and of actual usage before all defects can be corrected and every detail of construction brought to its climax of perfection.

T. S. Simms & Co. Limited have been making paint and varnish brushes for 56 years. The result of their years of research is that

TRADE SIMMS SET IN RUBBER SIMMS MARK **PAINT and VARNISH BRUSHES**

are the best brushes that have yet been produced. Painters who have used them know that they are the best, —that they will give longer and more satisfactory service than any other.

Order from our nearest branch

BRANCHES

MONTREAL, TORONTO, LONDON, WINNIPEG.

(Brush actual size)

Full size, hand-fitting hardwood handle, smoothly finished and correctly balanced.

Handle shaped and sized to give perfect balance and eliminate wrist strain.

Indestructible rubber setting, reinforced with a strong steel ferrule. The bristles cannot come out.

Selected non-curling bristles, short and long, correctly apportioned for even spreading and smooth finishing.

Center thickness just where it is needed to prevent the brush wearing to the objectionable "fish-tail" shape.

If interested tear out this page and place with letters to be answered.

Tommy and Betsy Will Call on You!

MANY a Tommy and Betsy will call on you for Vitralite, *the Long-Life Enamel,* after having read in the quality magazines how Vitralite, in porcelain-like White or enchanting tints, transforms and beautifies chairs, tables and innumerable things about the house.

A dip of the brush into the creamy Vitralite reveals *how different* it is from common, ordinary, "painty" enamel colors.

Sales are being made for you right now through those compelling Tommy and Betsy advertisements appearing in Atlantic Monthly, Century, Harper's, Review of Reviews, Scribner's and World's Work.

Be ready to meet these sales! Write *today* for the details of the special introductory proposition on Vitralite, *the Long-Life Enamel,* in White and tints.

The Barrett Money Makers on parade—

Rum-tum-tum! Here they come—
Barrett Carbosota and Elastigum,
Creonoid and Everjet—so black and sleek—
Everlastic "Rubber" Roofing and Nox-Aer-Leek,
Everlastic Liquid Roofing Cement too,
Every one is on the run to bring the "Mon" to you.

Listen to the drum! Rum-tum-tum!
Sounding Barrett Specialties from here to "Kingdom Come."
Everybody knows them, everybody's wise
To the merits of the products—so everybody buys.
Customers are satisfied, and Barrett dealers grin
As they watch the cheerful dollars from the Specialties roll in.

Rum-tum-tum! Listen to it pound!
Will **you** be in the grandstand when they pass the profits 'round?

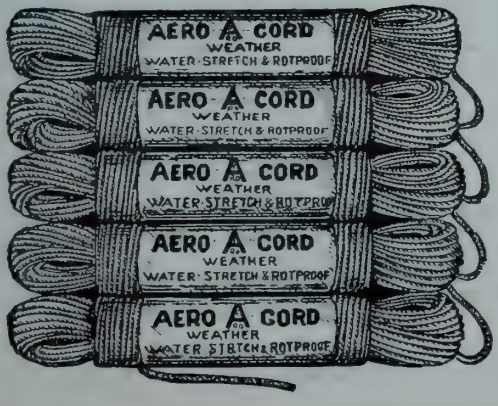
CARTER'S

Your Paint Customers Know It.
CARTER'S GENUINE DRY RED LEAD.

Carter's has won the confidence of the Canadian paint user because of its never changing Quality. Recommend Carter's. It is made from the very best grade of Canadian pig lead, highly oxidized and very finely ground. Mixed with pure linseed oil it furnishes a free flowing protective paint for all manner of metal work.

Carter's Genuine Orange Lead, Genuine Dry White Lead and Litharge are three other Carter products worth stocking.

The Carter White Lead Co. of Canada, Limited, 91 Delorimier Ave. Montreal



Your trade is entitled to the best article procurable for a given purpose, price being equal

AERO

AERO SASH CORD

WEATHER ROT AND STRETCH PROOF, will meet all requirements and more. Superior in strength and durability.

Seventy Years' Experience In Brush Making Goes Into

MEAKINS BRUSHES

Recently, in August, we reduced the prices on Meakins' Brushes. There will be no further reductions before July 1922, if then.

There is an unusual popular desire to paint and "fix-up", this fall, and already much inside work is being laid out for winter.

A careful examination of the Meakins 1922 Catalogue and a well-planned order at the new lower prices will prove good business for hardware merchants.

See New 1922 Catalogue of Lower Prices

Meakins & Sons

TRADE MARK

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use, reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but, for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

A NEW SERVICE IN THE ACCESSORY FIELD

THE Nicolson Sales and Service Company have taken over the automobile accessory business of Walker-Vallance, Limited, of Hamilton, Canada.

One hundred per cent. service will be the watchword of the new organization. Nothing but automobile accessories will be handled and the business will be exclusively wholesale. While a comprehensive stock of all accessories of merit will be carried, the policy of the new company will be to specialize in the leader in each line. In this way, dealers are sure of obtaining articles in greatest demand and shelf-warmers are eliminated.

Your business will be appreciated

BALE TIES

Prevent Broken Bales And Commercial Loss With

Laidlaw

Laidlaw Bale-Ties have had a long and thorough test, resulting in their general choice by buyers throughout the Dominion—in fact throughout the world.

Laidlaw Bale-Ties mean prevention of broken bales and severe commercial loss. Laidlaw Bale-Ties are superior in material, design and manufacture.

The Laidlaw Bale-Tie Company
Limited
Hamilton, Canada

Agencies:

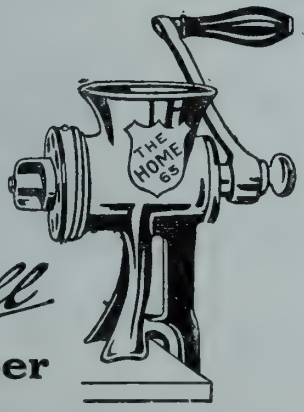
THE GRAHAM NAIL WORKS

Operated by the CANADA METAL CO., Ltd.
TORONTO

The Cash Register Tinkles—



Into the drawer goes the money — part cost — part profit. But how much further than immediate profit made do you figure? Follow the sale of a

Maxwell

Food Chopper

There is the generous sales profit on an article in constant demand—plus customer satisfaction! Isn't that what counts, after all? For it creates a mental effect which will reflect itself continually in your "Profit Account."

Do you realize the variety obtainable in Maxwell Food Choppers, and the particular features of each? Complete stock to order from—all Made-in-Canada, and better than any imported.

MAXWELLS LIMITED

St. Mary's, Ontario

An Idle Boast?

Think you our statement that you will receive a 50 per cent. dividend at expiration of your policy are mere words?

Look then at the following figures, bearing in mind that in addition to accumulating these amounts we have paid the dividends advertised on each and every policy.

July 30th, 1921.

Assets	$4,388,698.08
Net Cash Surplus	2,219,241.51
Increase in Surplus since Jan. 1-1921.....	367,469.84
Total Insurance in force 7-30-21	301,459,564.00

If we can increase our surplus and still pay 50 per cent. dividend on hardware and implement risks, does it not stand to reason there is excessive profit in your business for the old line companies who return to you nothing?

It's time you investigated!

THE BANNER FAMILY
PATENTED
TRADE MARK REGISTERED

Five minutes concentration of thought on Ash Sifters will convince you that the

BANNER ASH SIFTERS

are superior and more satisfactory than others.

First, the dusty, back-breaking shaking is eliminated by the easy and simple rocker motion. Besides, all weight is carried on the pressed steel rockers. Sifts quickly and cleanly. Convenient height. Cannot clog. And all parts fit tight.

The No. 1 sifts the ashes twice, the finer screen saves fuel that is lost by other sifters. It is the only sifter with a closed in scuttle. Cinders transferred without opening sifter. The screens can easily be renewed. **STOP AND THINK!** has any other sifter these talking points?

It's like a third hand that applies the right amount of the right kind of flux at the right time.

Why *a Kester Solder Sale Means a Succession of Repeat Orders*

Solder business grows fast when you sell a solder of which you can truthfully say, "all you need is this solder and heat—*no flux.*" There is just one such solder—

KESTER ACID CORE WIRE SOLDER
FLUX IN POCKETS

The drawing above tells the simple story of soldering without separate fluxing. The scientifically prepared acid flux is contained in small pockets located at the center of the genuine tin-and-lead wire. Just before the solder is melted the flux is released—result: exactly the right amount of flux at the right time, producing a hold-fast bond every time.

You'll know why every Kester sale brings repeat orders when you try a free sample of this solder. Just send the coupon. When you see how "self-fluxing" cuts soldering time in half, you'll decide to *let this better solder build a profitable solder business for you.*

Sold in one lb. cartons, and on one, five and ten lb. spools.

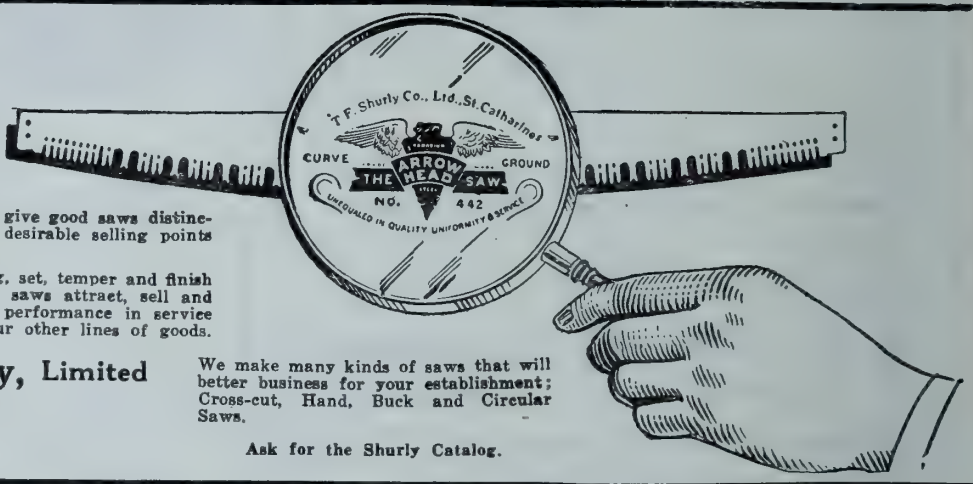
Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.



T. F. Shurly Company, Limited

In design and construction it is the best torch of this type on the market to-day.

Detroit Torch

Takes Little Space

Our No. 42 Auto or Electricians' Torch has oblong tank and is very popular with mechanics desiring a tool that will take up little space in a kit.

Tank is made of heavy brass throughout. Supports on bottom of tank prevent torch from tipping over when placed on bench—not in the way when torch is not in use. Fitted with patented tapered burner, with hook and support for soldering coppers. Valve wheel is of wire and always cool, giving operator full control of flame at all times. Automatic pump of simple construction forms the handle.

Birkett Salesmen Want To Co-operate With You

Many retailers are warm, personal friends of ours and of our salesmen. Even if you are not yet one of these, even if you are just beginning to deal with us, co-operation is extremely valuable to us, to you, and to our salesmen. The instant you become a distributor for the goods we sell we become interdependent upon each others' success.

So, you see, with all sentiment or questions of friendship eliminated, it is very much to our interest and to our salesmen's interest for us to co-operate with you.

"Super-Service" Garbage & Ash Cans

DEALERS!

Save money on duty and exchange by purchasing your heavy weight Garbage and Ash Cans in Canada.

REED'S "SUPER-SERVICE" line is a winner.

These cans are made of 22 to 18-gauge galvanized steel (depending on size and style).

Every can is hand rivetted and stoutly reinforced. All joints are hand soldered — NOT galvanized HOT.

The "ECONOMY" Rotary Ash Sifter was created to meet the demand for a sifter of this type which would LAST. It's built on the same lines as the "Super-Service" Cans. Fits any can or barrel 16 to 18 inches in diameter.

There's a good margin of profit on these lines. Write or wire us for prices.

Geo. W. Reed & Co.

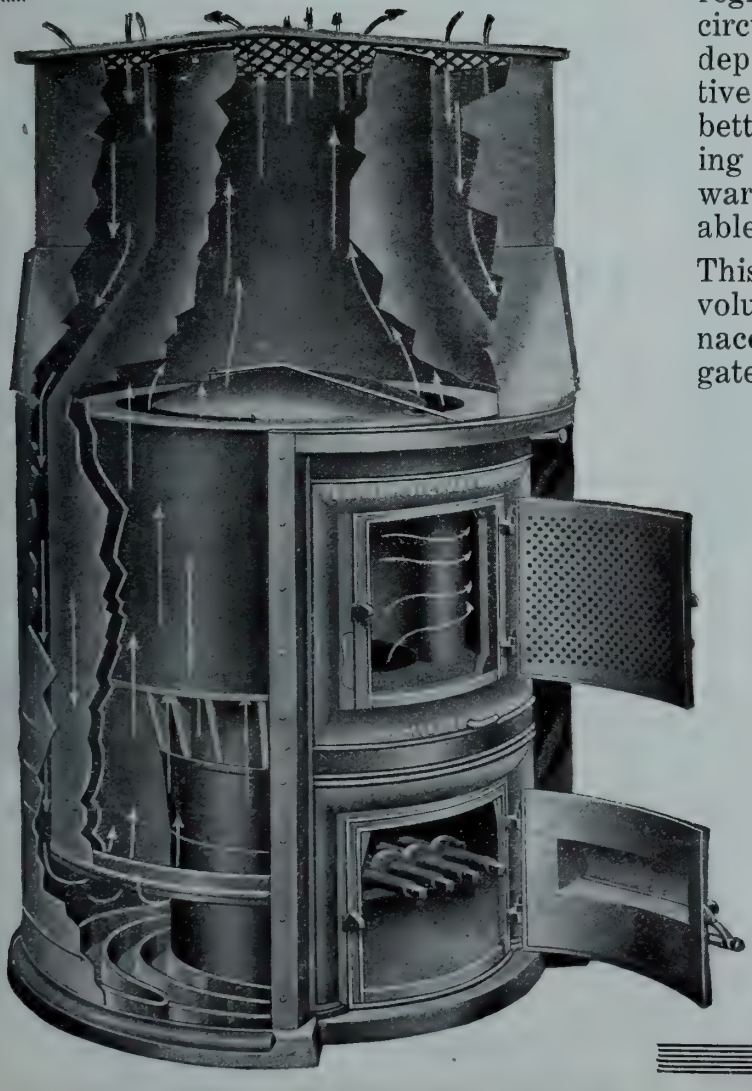
A Money Saver For Farmers or Rural Men

JEWEL

Pipeless Furnace



Easy to install, and therefore, not expensive. Any good mechanic can put it in, in less than a day. There are no complicated, cumbersome pipes—only one hole to cut for the register. In design, the principle of air circulation, on which all Pipeless Furnaces depend, has been applied in the most effective manner possible. No furnace could be better designed to efficiently receive returning cool air, and heat it to go forth again, warming every room to a genial, comfortable warmth.

This is an opportunity to enjoy the same volume of sales and profits that Jewel Furnaces have brought to merchants—Investigate!

TWEED SANITARY CLOSETS will find a ready sale

Our No. 1 Tweed Sanitary Closet with mahogany finished seat and lid with nickel-plated hinges. Every Tweed is built on similar lines and guaranteed to give satisfactory service.

These Tweed Sanitary Closets will find ready customers among farmers, suburban dwellers, or any class of people who live in a locality without city conveniences and it is among these people that you can do a profitable business.

The Tweed is simple to install, absolutely dependable, sanitary and inoffensive, and can be used in any room in the house. The Special Tweed Chemical used in connection with the closet destroys all trace of odor. No plumbing of any description is needed. The Tweed solves the problem of putting city conveniences into country houses at a fraction of the cost.

Let us tell you more about the Tweed as a selling proposition. Write us for price lists and literature describing Tweed Sanitary Closets, Tweed Baths and other home conveniences manufactured by us.

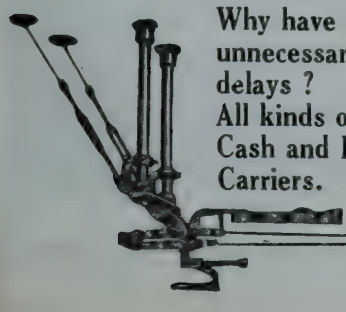
FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.



Why have those unnecessary delays ? All kinds of Cash and Parcel Carriers.

Customers appreciate the feature made possible by the use of our Cash Carriers, viz.—that the salesmen are enabled to remain with them until transactions are completed. Time is saved to them, time and labor are saved to the salesmen, and the money is deposited in the office where it is in the custody of one person—the cashier—and where it is not exposed to the entire selling staff of a store. Is there any profit in this for the merchant? Let him consider it.

Your Salesman—

HAVE you a place in your store for a purely "Canadian Made" product that will bring you an excellent trade each year?

Your customer sees many points of superiority as you talk. The wire is tough and elastic—drawn to proper size and well galvanized in our factory at Hamilton—The Frost Lock—the strongest part of the fence, the evenly spaced uprights and the strong lateral wires are material for a selling talk that is bound to convince.

When you sell Frost Fence you make these purchasers of it regular customers, the reason being: they get something that measures up to their idea of what they ought to have.

Frost Fence is that kind of a product. It gives the kind of satisfaction that breeds goodwill and not only brings your man back for further purchases but makes him a booster for your store.

Frost Fence is an asset to your business.

The finest of all equipment for the Hardware Trade

DAYTON

The Scale that counts and computes

Use the best and keep your money at home

Why is the Dayton Hardware Scale the **BEST?** Because it is the product of the brains and hands of the world's most skillful and experienced scale-builders. It represents the fruits of thirty years of research and experiment on the part of the great pioneer scale-manufacturing house. If a better scale could be devised, Dayton workmen would be building it. The Dayton Hardware Scale brings to your Service **AT NO EXTRA COST** new and **EXCLUSIVE** advantages which rid you of drudgery, speed up your store service and assure you of absolute accuracy in weights and price computations.

A representative will be glad to call upon you and explain the features which make the Dayton pre-eminent. The Counting Scoop, which automatically counts bolts, screws and other small articles, is a time saving device which no hardware store can afford to be without. The Wire Rack, another exclusive Dayton feature, enables you to weigh quickly and easily coils of rope, wire or rubber hose.

A card today will bring one of our demonstrators. **You incur no obligation in sending it.**

The Stamp of Success is the Ruberoid Man

"See that Ruberoid Man, George. He's the best salesman the boss ever had. I've carted more Ruberoid Roofing this year than ever before and the customers come back for more."

Ruberoid Roll-Roofing has had actual tests lasting over a quarter century. It will not fail the purchaser and, like all Ruberoid Weatherproofing Products, establishes confidence in the line of roofing as well as in the dealer himself.

A dealer who handles Ruberoid Weatherproofing Products has hitched his roofing business to success. We shall be glad to send you information on how to become a Ruberoid Distributor. There is protection to the dealer in our Merchandising Plan for it eliminates competition. Write for it **today.**

UNIVERSAL

Every Advantage For Dealers Who Sell "Universal" Useful Gifts

MILLIONS are spent every year for holiday gifts that are about as useful as a cook book to a hungry hobo. Gift buyers this year will be case-hardened, sound-proof and air-tight to offerings of articles that serve no practical purpose. This places every "Universal" dealer in an advantageous position. The quality, variety, usefulness and reasonable prices of "Universal" Home Needs will put gift giving on a sound, sensible basis. It means more sales and easier sales for the dealer who stocks the "Universal" line.

THE "Universal" Business Boosting Campaign will be in full swing during the holidays. "Universal" advertising will run in Good Housekeeping, Ladies' Home Journal and other great publications. Special Advertising and Selling Helps have been prepared for dealers. Write for particulars. Know what has been done and will be done to increase your sales.

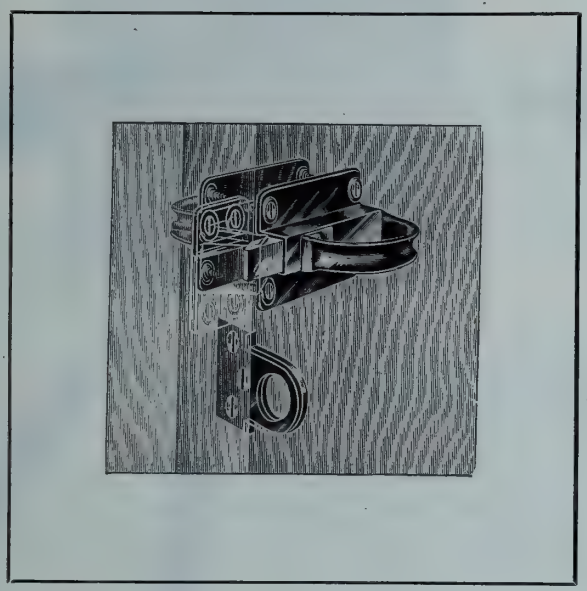
The Door to Prosperity Opens with C.S.G. Co.'s Latches



No. 1240 Barn Door Latch

opens all doors quickly and easily, just as it performs all the other duties of a latch, even the duty of selling readily and with a profit for the merchant. A durable, commonsense latch with Japanned frame and handles, tinned bolt and a Sherardized spring of piano wire that cannot rust. Packed one-quarter dozen in a carton, including padlock eyes. Weight, 175 lbs. per case.

The "Challenge" Latch

has opened a new door to profit for many a shrewd dealer, for it possesses more points of quality and value—selling points—than any other thumb latch on the market; for instance, it is made entirely of wrought steel and it is absolutely impossible for the thumb piece to work loose or get out of place. Packed one-half dozen in a box, 12 dozen in a case. Weight, 180 lbs. per case.

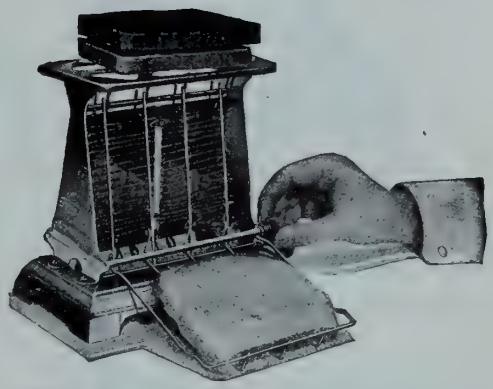
Westinghouse
Electric Irons and Toasters



Type H Iron

Tell your customers that this iron is practically indestructible, having very few parts, and no delicate pieces to get out of order.

Explain that heat radiation from the top is prevented by dead air space between the heat storage plate and the iron shell, so that most of the heat is retained at the ironing surface, and what ever heat is not being taken by the ironing surface is stored in the heat storage plate; this retention of the heat making the iron stay hot longer.

Turn-Over Toaster

Also tell your customers about the Turnover Toaster; how it makes toast right on the dining-room table; how the toast turns by simply turning an insulated knob, there being no danger of burning the fingers.

Demonstrate this turn-over feature making it unnecessary to touch the bread from the moment it is put on the Toaster until it is taken off, toasted.

Mention how the flat surface on top may be used to keep the toast hot, or to heat plates; keep the coffee pot warm, etc.

IMPERIAL
Polarine
FRICTION REDUCING
MOTOR OILS

Quality maintains economy. No matter how much you pay "per gallon" for other lubricating oils, you get more lubrication "per dollar" when you buy Imperial Polarine Motor Oils.

Advertising That Brings Business —

The above paragraph points out most convincingly the quality and economy of Imperial Polarine Motor Oils. It is the keynote of a gigantic advertising campaign now running in every important city, town and village in Canada.

No other line of motor oils is as extensively advertised as Imperial Polarine. This advertising *does bring business* to Imperial Polarine dealers and has developed confidence in both Imperial Polarine Motor Oils and Imperial Polarine dealers.

The number of exclusive users of Imperial Polarine is constantly increasing. The dealer who is tied up closest to our advertising benefits most in increased turnover and greatly increased profits.

Identify your store with our advertising. If you are not already an Imperial Polarine dealer our Salesman will gladly explain our profitable Imperial Polarine dealer agreement to you. Write to 56 Church St., Toronto.

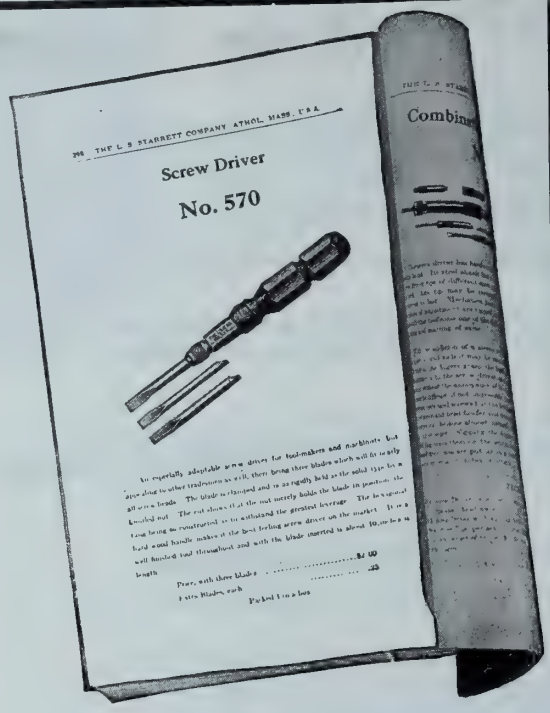
ST. THOMAS, ONTARIO

New Tools You Should Know



SCREW DRIVER

NO. 570

A new and very practical screw driver for toolmakers, machinists and general use. With its three blades of different sizes, this screw driver can be effectively used in driving nearly all screw heads. A knurled nut and specially designed tang holds the blade firmly in position, enabling it to withstand the greatest leverage.

The hexagonal handle affords an excellent grip, an advantage that will be appreciated by all who have much occasion to drive screws. Consult page 298 in the Starrett Catalog No. 22 "MA" for description and illustration of this new Starrett screw driver. If you have no copy handy, write for one. And also ask for the Starrett booklet—"The Tools Mechanics Buy." Free on request.

122 Hilton Ave., Toronto, Ont.

OUR SECRET OF HIGHER QUALITY

In no other factory are hack saws produced by the same methods that are used in making Star Hack Saws.

Exclusive machinery and methods, invented and still supervised personally by Geo. N. Clemson, allow us to produce Star Saws by large-scale production, and maintain a higher uniform quality than can be made by old-fashioned methods.

Star Saws are now sold by the factory in Middletown that has always made them.

CLEMSON BROS., INC.

Middletown, N. Y.

Makers since 1883.

QuikwerK TOOLS

Blacksmith Tongs

QUIKWERK Tongs are forged *without weld* from a single solid piece of steel. And *carefully* forged—smoothly, uniformly, with handles correctly proportioned and tapered. The excellent quality of high carbon steel gives a fine "springyness" to the reins. After gripping they will always take their original shape without spreading the jaws.

Ask your Jobber for the Tools with the Quikwerk Trademark

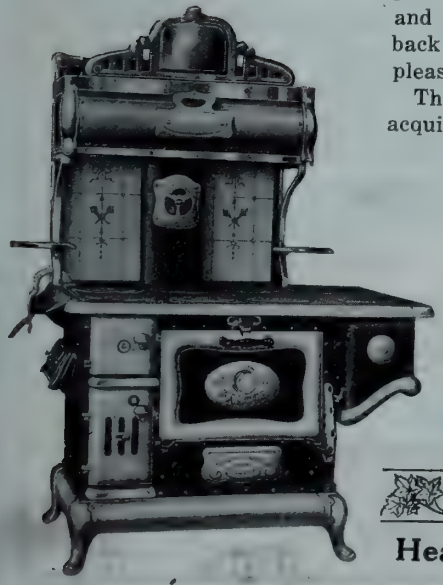
Confidence Begets Confidence

It is an old adage for those who would be salesmen that, in order to convince others, you must first be convinced yourself. If you are sincere you will be believed.

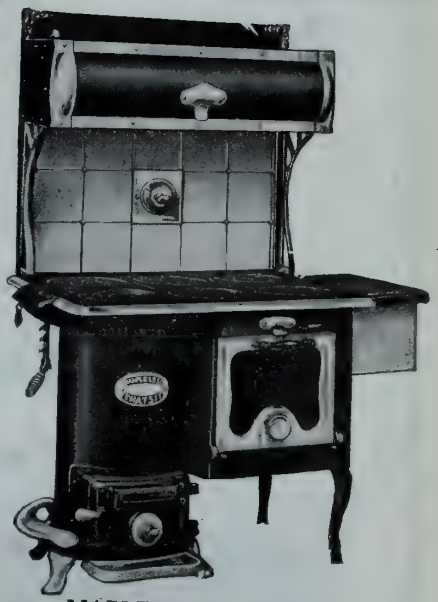
In heat making machines, the Maple Leaf line of stoves, ranges and heaters are creators of confidence. They will back up every statement that you make—they will please your clients—they will make money for you.

The Maple Leaf agency for your town is a valuable acquisition. Write us to-day for full particulars.



Maple Leaf Falcon

An aristocratic steel range that will back up every claim you can make for it. It is made in several handsome designs, which makes it an ornament in any kitchen. It gives perfect satisfaction at all times. The Falcon is both a money-maker and a friend-maker for the dealer.



MAPLE LEAF "THATSIT"

A side-oven, 6-hole "Quebec" range that leaves nothing to be desired. The heat units are so controlled by the new undertop that the fire must pass under all six covers. The oven is 14 x 20 x 11 1-2" deep with balanced spring type drop door, friction catch, non-heating handle and thermometer. It has a broiler lift and a pouch feed door. It can be fitted either with a hot water boiler or copper reservoir and with or without warming closet. This is a stove that is hard to beat.

TRADE MARK J.M.T. REGISTERED A GUARANTEE OF QUALITY

True Economy

Stack Heater

The Stack Gas Water Heater will heat water in one minute.
The almost perpendicular copper pipes in the Stack Heater offer no hindrance to the natural tendency of water to rise when heated.
Take notice of the small size and large number of coils; this means quick heat. The numerous small pipes will naturally heat water quicker than one big pipe because of the greater heating surface offered.
More hot water with smaller consumption of gas—that's true economy.

Reduce Production Cost

Even if there were no increase in production, reduced production cost would add greatly to your profits. But Brown, Boggs Sheet Metal Working Tools not only reduce the cost of production, by doing certain operations in less time, but they greatly increase output by enabling you to perform more units per hour or day at any given cost per hour or day. Brown, Boggs Sheet Metal Working Tools are specially designed to make more money in Sheet Metal Working Shops. That includes yours, so why not write today to see how we can save you money?

"They're *the* Best rules made
—I've carried mine *for* many a year"

STANLEY
"ZIG ZAG" RULES

A rule must be STRONG, ACCURATE and LEGIBLE. It is subjected to the hardest kind of usage and must "stand up" under the most rigorous wear and tear. STANLEY Zig Zag Rules will not wear away and loosen at the joints. The Concealed Joint Type has patented strike plates at each section—the Rivet Joint Types have a specially made rivet that acts as a strike plate. Made in several different styles of markings.

They are made with an especially fine and durable finish. Among other invaluable and special features are the patented direction arrows enabling the user to tell at a glance which end of the rule to begin using. The patented tips, joints and strike plates are brass plated.

Have you a copy of our Tool Catalogue R 120 If so, you will find Stanley Rules on pages 14 to 21. If you haven't a copy of this book, we will be pleased to send you one.

There Are Many Good Points to DOMSTEEL

Galvanized Barbed Wire

Two and four point, sharp, clean-cut and repellant. The wire used is of high breaking strain. It is made from heavily zinc-coated wire, galvanized by the "hot-dip" process. The barbs are firmly secured, absolutely immovable, and evenly spaced.

This wire, manufactured by Canadians in Canada is made to withstand the severe requirements of Canada's climate, and will give entire satisfaction under the most rigorous conditions.

Dominion Iron & Steel Company, Limited

SUBSIDIARY OF

British Empire Steel Corporation

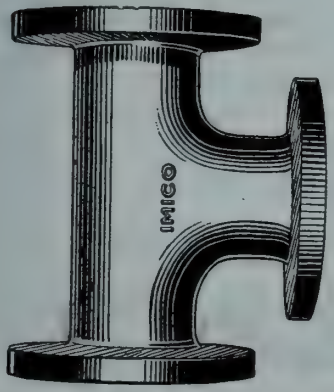
General Sales Office: 120 St. James Street, Montreal
STOCKS: Sydney, St. John and Montreal

They're 'On The Map'

The Brand that has the Quality

IM Brand Pipe Fittings

We are also equipped to make the general run of malleable and grey iron castings for manufacturers of machinery, agricultural implements, automobiles and specialties.



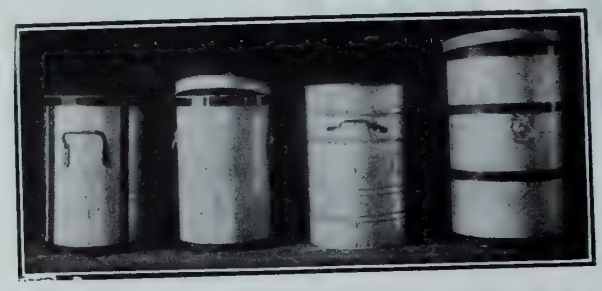
Our cast iron fittings are made with iron of high tensile strength, properly proportioned, and correctly tapped. Our malleable fittings are made of Air Furnace Refined Iron, reamed and tapped to gauge, with perfect threads. We can supply both screwed and flange fittings, either black or galvanized.

International Malleable Iron Co., Limited

Guelph, Ontario, Canada.

If interested tear out this page and place with letters to be answered.

"Super-Service" Garbage & Ash Cans



DEALERS!

Save money on duty and exchange by purchasing your heavy weight Garbage and Ash Cans in Canada.

REED'S "SUPER-SERVICE" line is a winner.

These cans are made of 22 to 18-gauge galvanized steel (depending on size and style).

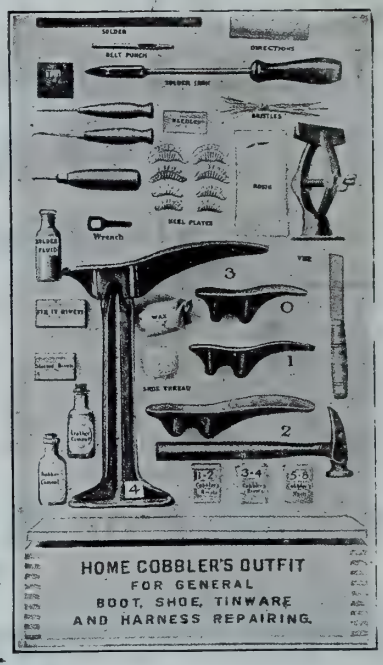
Every can is hand rivetted and stoutly reinforced. All joints are hand soldered — NOT galvanized HOT.

The "ECONOMY" Rotary Ash Sifter was created to meet the demand for a sifter of this type which would LAST. It's built on the same lines as the "Super-Service" Cans. Fits any can or barrel 16 to 18 inches in diameter.

There's a good margin of profit on these lines. Write or wire us for prices.

Geo. W. Reed & Co.
LIMITED
MONTREAL

"ECONOMIZERS"



There are always some lines that sell better in quiet times. Analyze what these products are, and you'll invariably find they come under the category of "Economizers."

The line illustrated is particularly adaptable to the conditions of to-day. You will find a lively demand for this Outfit, because it means such a saving in footwear and footwear repairs — tinware and harness repairing. "Preferred Position" for this set in your Store and a "punch" from yourself will prove a fine investment.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

Sharp vs. Blunt Burner Needles

A Gasoline Torch or Fire Pot can be quickly ruined by forcing the needle, if it has a sharp point such as is in common use, as the orifice is made larger, causing an imperfect gas mixture. Over sixty per cent. of all burner troubles are overcome by using the C. & L. DOUBLE BLUNT NEEDLE TORCHES and FIRE POTS as the burners have blunt needles. They are the HOTTEST and BEST TORCHES and FIRE POTS made and save time and fuel. Jobbers supply at factory price. Send for catalog.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

"That's What They All Say!"

At a big Electric Shop in one of our largest cities they sell a great many lines of appliances. Just as a test we asked them which was the most popular electric heater. "The Majestic," was the reply.

"Why?"

"Because it is a medium-priced heater, gives more heat to the spot where it is needed and is guaranteed for one year."

You'll find other retailers say the same.

Push the Majestic Heater. Now's the time. The frost is on the pumpkin. It's too early to keep the fires going night and day. Folks need Majestic Electric Heaters.

Make a display of Majestic Heaters in your window and in your store. Talk Majestically, think Majestically, plan Majestically. The chances are good for Majestic business.

The Majestic Heater

The most popular heater on the Canadian market.

Guaranteed for one year—well advertised throughout Canada.

Says Stove Prices Will Remain Stable

No Change Before End of this Year at Least, says E. H. Gurney —Frequent Ordering in Small Quantities Can be Carried Too Far—Closer Co-operation Between Retailer and Manufacturer Would Help Solve Current Problems—Much Repairing of Old Stoves and Furnaces Continues

Based on interview of H. L. Southall, of Hardware and Metal with E. H. Gurney, President The Gurney Foundry Co. Ltd., Toronto.

THE IMPORTANCE of the retail merchant as a factor in further aiding or retarding the business development which has already shown signs of improvement, was emphasized by E. H. Gurney, President The Gurney Foundry Company Ltd., Toronto, in discussing with Hardware and Metal various manufacturing and distributing problems particularly in so far as they affect the stove, furnace and general foundry lines in the manufacture of which this firm is engaged.

"Stove pipes will be stable for the balance of this year at least," said Mr. Gurney when questioned as to the possible effect of recent declines on materials entering into the manufacture of stoves, furnaces, etc., such as iron sheets and plates, tinplates, stove bolts, etc. It was pointed out that some stoves now in stock were manufactured partially on material purchased prior to these recent declines though prevailing prices have been taken into consideration in establishing present quotations on stoves to the trade.

Where Retailer Loses

Speaking generally of the stove business Mr. Gurney stated that orders from the trade continue to be forthcoming frequently but for small quantity. This to some extent is regarded as good buying policy under prevailing conditions and has been advocated by many retail authorities, but Mr. Gurney holds that this plan can be carried to excess and result in slowing up the machinery of business to an unnecessary extent. He points to the dangers of allowing retail stocks to dwindle to the point where satisfactory service cannot be given by the retailer to his customer nor by the manufacturer or wholesaler to the retailer. The opinion was expressed that in dealing with stove business retailers should make a study of local needs and prepare for anticipated requirements so as to be sure of getting the maximum amount of local trade.

Dealing with the probable result of the retailer failing to follow this plan, Mr. Gurney pointed out that a customer, if his enquiry for a stove at one hardware store is not taken care of, will invariably go to the competitive store, and if good service is given at the latter store much of the customer's trade is apt to be deflected, apart altogether from the stove trade. Then too many who would be customers for stoves if an adequate stock were kept on hand at all times to meet their requirements, would become buyers of repairs to patch up the old stove or furnace.

Undoubtedly many merchants have taken it for granted that the supposedly hard times in some districts is responsible for so many people desiring to buy repairs. To this merchant Mr. Gurney says, put in a stock and show that you do not think the same way as you imagine the customer thinks and you will soon find that your effort will result favorably. The difficulty is largely a psychological one and certainly the retail merchant should not be the one to initiate a trend of thought toward restriction of necessary purchases when conditions do not warrant it, rather he should be the leader of sentiment toward normal purchasing when he is provided with the supporting facts.

E. HOLT GURNEY

President The Gurney Foundry Co. Ltd., Toronto, who emphasizes the retailer's importance in aiding or restraining normal business conditions.

Ten Orders from Customer in a Week

The extent to which the frequent ordering plan has been carried in certain cases is evident from the fact that one customer of this firm placed ten orders within one week. There has been little ordering ahead of stoves this Fall, and the sorting business now coming in shows little improvement from the standpoint of frequent ordering in small quantities. On the whole Mr. Gurney anticipates an active fall stove trade quite up to the volume of previous seasons but he is of the opinion that an alteration of policy in ordering by the retail trade would greatly facilitate dering in small quantities when by the matters for all concerned. Frequent oranticipation of normal requirements for a short time ahead this troublesome plan could be eliminated, is the cause of greatly increasing costs in many ways, according to Mr. Gurney. For instance it takes more of the retailer's and manufacturer's time handling a number of small orders than one order, and the single order shipped out to a merchant will require higher freight charges than the proportionate charges against the one stove in a large shipment. This tendency to increase over-

Further Cutting of Oil Heater Prices

Other Stores Join Department Store in Toronto in Cutting Prices on Perfection Oil Heaters—Hardware Merchants Say They May Be Forced to Meet Competition Later Rather than Carry Stock Over the Season

A DEPARTMENT store in Toronto still continues to cut prices on Perfection Oil Stoves. An advertisement of this company showing the prices charged for stoves Nos. 525 and 530 was shown in last week's issue of Hardware and Metal. A week later the ad shown on this page appeared from the same firm, It will be noted in the latter case that no secret is made of the fact that retail prices are fixed at prices of $8.75 for No. 525, black finish, and $9.75 for No. 530, nickel plated finish, while the prices quoted are $5.75 and $6.75 respectively, with the wicks on carriers selling for 49 cents as against a regular price of 60 cents.

Another case has come to the attention of Hardware & Metal in which prices on these stoves are being cut. A furniture store located on Queen Street West, Toronto, this week had a window display of Perfection Oil Heaters marked down, according to a window card, from $9.50 to $6.95.

Discussing the matter with certain hardware merchants it was evident that in the cases dealt with no price cutting on these heaters had been attempted as yet, though no secret was made of the fact that the department store price was making it very difficult for them to make sales. One or two merchants stated that if this downtown price cutting continues they may find it necessary to meet the price a little later in the season if it becomes apparent that the stock would have to be carried over until another season.

One merchant interviewed on the subject pointed out that there was an understanding that this unfair condition of affairs would be adjusted but that up until now nothing definite in this direction had been accomplished.

Brenner Firm Kept Secret Account

Large List of Metal Firms in United States and Canada to Whom Defunct Firm of N. Brenner & Co., Toronto, was Indebted—Secret Account of $475,000 kept by Officials

PRELIMINARY evidence as to alleged errors in the books of N. Brenner & Co., Ltd., defunct metal firm of Toronto, Ont., has been adduced at the first Police Court sitting in the trial of Nathan and Meyer Brenner and Gordon I. Blackford, who face eighteen criminal charges involving charges of theft, receiving, conspiracy to defraud, and falsifying and concealing. All three pleaded not guilty.

The fact that the company had operated a secret bank account in which some $475,000 had been deposited and of which absolutely no record had been kept in any of the books of account, was a sensational disclosure.

K. Julian Rahlson, Manager the Nassau Smelting & Refining Co., New York, whose firm had had large dealings with Brenner & Co., denied that his company was indebted to the Brenner concern. On the contrary, he said, the Brenner people were indebted to his organization to the extent of $200,000.

Frederick M. Winter, New York, said the Brenners owed his firm $40,352.

"Then, if there is an entry of $8,183, does your firm owe that?" asked counsel. "No."

Mr. Winter said that, although not all the goods had been delivered, there had been no default.

Specific items detailed were: a cheque for $1,064 from H. P. Winter and Company; a cheque for $627 from H. P. Winter and Company; a cheque from the Pope Metal Company for $3,181.47; a cheque from Clendennan Brothers for $2,250; a cheque from Clendennan Brothers for $3,125; a primissory note for $3,125 with the signature of its maker torn off; a promissory note for $3,125, also with the signature of its maker missing; a cheque for $568.40 from the Columbia Smelter and Refining Company; a cheque for $20,000 from Frankel Brothers; a cheque for $699.92 from the Muller Metals Company; a cheque for $549.70 endorsed in favor of the Brenner Company by Charles Trench and Company; a cheque for $3,625 endorsed to the Brenner Company by Messrs. Spoburg and Conley; a cheque for $15,460 and another for $3,500 drawn in favor of the Brenner Company and endorsed respectively to N. Brenner and L. Rotenberg and Son.

For all these moneys, there was no entry in either the credit book or the bank journal. The folios 55 to 59 inclusive, were missing from the credit book, while the entries between March 10th and April 1st were missing from the bank journal.

The sums involved in the checking operations were but insignificant, however, in comparison with the transactions next described. In the course of events through one of the creditors, the liquidation learned of an account of the N. Brenner Company which was kept in the Imperial Bank, but of which absolutely no trace appeared in the concern's books of record. Upon investigation it was found that a total of $475,000 had been deposited to its credit, and from this sum the expenditure of $230,000 had not been traceable.

Following the recording of this testimony, the hearing was adjourned, to be resumed in a week.

WATCHING WORLD SERIES SCORE OUTSIDE W. H. THORNE & CO., ST. JOHN, N. B.

A very large crowd was attracted daily by the scores of the World Series baseball games, as given by W. H. Thorne & Co., Hardware Merchants of St. John, N. B. This service acts as an excellent advertisement for the store and particularly for its sporting department. Local sport enthusiasts are attracted and they appreciate this sign of interest in current sporting events. They like to deal at a store which reaches their interest in this manner.

Speeding Up the Hardware Turnover

Novel Plans Adopted by Canadian Hardware Merchants to Stimulate Trade this Fall—Value of the Cash Basis Under Prevailing Conditions—Handy Stock Records Reveal What Lines are Most In Demand—A "Half-fare" Week

DETAILS of a number of rather unique selling plans, as adopted by hardware merchants in various parts of Canada, have been secured by Hardware and Metal and are being outlined herewith as suggestions which others may wish to adopt in order to stimulate turnover of hardware at this season.

With the stove and furnace pipe season near at hand, a rather ingenious method of advertising pipes made up from galvanized sheets was employed by G. C. Hunter, Tinsmith of Hamilton, Ont., who constructed the name PIPES from the use of T's, elbows and straight lengths of galvanized pipe. The letters were about three feet in height and were placed on the sidewalk in front of the shop, resting against the show window. Many passers-by were impressed with the novel means employed to remind householders that it was time to have the pipes attended to in their homes.

Successful Change to Cash Basis

It is about four months since Carter Bros., Picton, Ont., went on the cash basis in their hardware business and they report the results exceed their ut-

Unique Opportunities for Fall Hunting Trade

In this seasonable Fall sporting goods display by F. V. Ryan of Dunlop and Co., Ltd., Pembroke, Ont., a den-like effect is given by the figure reclining on the Bruin's hide in the foreground. This was a very large black bear shot by an employee of this hardware firm. The window is said to have proved very effective. The fact that the Cougar (of which the mounted pelt is shown in the background) was shot by the store manager proved of considerable interest to onlookers and indicated the hunting possibilities of the district.

There is every indication of a splendid shooting season this Fall. Besides the rabbit, squirrel and other smaller game that furnish a regular demand, year after year, seasons are again opened for the different birds in provinces where they have been closed in recent years, and the period extended in other provinces. In Nova Scotia and New Brunswick the partridge season is open for a short period this year, also the quail and pheasant season in British Columbia. The chicken season in the prairie provinces has been increased, also of assistance to these provinces is that plenty of water lies in the sloughs which always brings the ducks in good numbers. In the Province of Ontario, two weeks are open shooting for partridge, while ducks are open in all provinces.

most expectations. As the weeks passed, following the introduction of this system, notes were run in the local newspaper to interest the public in the plan. Some of these "locals" were as follows:—

"As the weeks roll by greater and greater grows the success of Carter Bros. new cash system, as last week they waited on 988 customers, an increase of 72 customers over a week of a year ago. And the new customers this new system is constantly bringing to their doors are a source of great gratification to this firm."

"It's really wonderful the success Carter Bros. are meeting with their new cash system. Last Saturday they waited on 369 customers, an increase of 61 over the Saturday of a year ago, which goes to show that the public realize that this firm by selling for cash are able to give lower prices on goods, than firms who sell on a credit basis."

"Last week proved another good week for Carter Bros., for despite the loss of their gasoline trade through the street being closed, yet they waited on 740 customers, a gain of 41 customers over the week of a year ago. That's going some, and then some more."

A stock book of seasonable goods has been introduced to good advantage by J. H. Slater, hardware merchant of Ridgetown, Ont. He purchased a loose leaf book ruled for writing. A line was then ruled making a column for enumerating the goods. In taking the stock the entries were made in lead pencil and purchases entered in red pencil, entering at the head of stock column the date taken. Records are kept on the following; paints, wall finishes, shells (loaded), glass, wire cloth and poultry netting, screen doors and screens, bug destroyers. On paint it is said to be better to arrange items alphabetically. Mr. Slater said it was surprising how little difference there is on sales of each week each year. A year after the season is over Mr. Slater thus has a stock book which tells the tale of purchases, sales and stock on hand.

Four times each year the merchants of St. Catharines hold a "half-fare week." One of these special events is usually held early in the fall and another before Christmas. Each day for a week previous a motor parade is held covering town within a radius of twenty-five mi'es, a different route being taken each day. A kiltie band heads the parade and each is decorated with flags, signs and advertisements telling of the big event.

This campaign is conducted by the Chamber of Commerce and Committees are formed to look after the various plans being used.

All people who come to town during the week whether making a purchase or not, by showing the return stub for railway fare have the equivalent amount refunded to them in cash.

Two offices are to be used in making the fare refunds.

The cost of the campaign is borne by the merchants who are assessed according to the number of salespeople; viz, the man who has six salespeople will pay twice as much as one having only three.

A great increase in sales is claimed through this method and the merchants say it is the cheapest advertising ever used. When the last one was held in the Spring the cost per salesperson was four dollars. The previous one was only a fraction over three dollars per capita.

In addition to this special event the Chamber of Commerce have made arrangements for bus service between St. Catharines and Beamsville. Four trips each day are made and the fare is the same rate as the railroads. To assist in making the bus line a success the Chamber of Commerce gave a bonus of $1000.00 to the bus line owner.

At present the only connection between these two towns is the railway and merchants claim that the people in these towns when going to shop nearly always go the other way, to Hamilton. By the bus service it is hoped to divert most of the expenditures to St. Catharines.

Pow & Wilcox Hardware, Tillsonburg, have adopted the plan of issuing a booklet which folds four times into a size convenient for envelopes. This booklet contains an abstract of Ontario game laws giving the information which hunters desire to have convenient when planning a hunting trip. Advertising of guns, rifles, revolvers, shells, cartridges, hunting coats, gun cases, gun tools, powder and shot, gun oils, hunting knives, flashlights, etc., appear on the outer covers of the leaflet with an invitation for the reader to call and discuss hunting requirements before setting out on the trip in the Fall. This leaflet is sent out to a special list of prospects and otherwise distributed where it will be most effective.

A card system for taking stock every night is employed by W. Duffy, Wingham, Ont. A bill is given with every article sold in the store, a duplicate of this bill being retained and checked up at night with cards which show the exact standing of the stock. When shipments are received they are credited on the card and when stock is sold, the entry is taken from the duplicate bill and indicated on the card which is then balanced. With a little tabulation the exact standing of the stock can be ascertained at short notice. This system provides information which influences the purchasing when a salesman calls and has been found very helpful in this connection.

Preparing for Thanksgiving

The tinted leaves of Fall bring recollections of happy Thanksgiving gatherings of former years, and may be used to advantage in a display of carving sets, casseroles, silverware, kitchen utensils, etc., to be used in connection with the seasonal festivities. This display by the Bond Hardware Co., Guelph, Ont., offers some suggestion for a timely arrangement of such lines.

Show Cards for Fall Hardware Sales

Small, Neatly-lettered Show Cards for Both Store and Window Displays Effective in Aiding Fall Sales of Hardware—Kept Seasonable and Changed Quickly—Attractive Show Cards Improve Tone of Store and Window Displays

THE show card writer, whether he is a window trimmer or not, can do a great deal in encouraging the trimming of better merchandise displays by making showcards of such a dainty nature as to compel the trimmer to make better displays in order to be in keeping with the cards. In fact, better card writing in the interior, as well as the windows, encourages the better displaying of the merchandise on the counters.

It works vice versa. If the cards are inclined to be poorly made the window trimmer can make his displays show up the poor card so that it is absolutely necessary for better cards to be made.

Use Small Cards

The modern method of display demands small cards. Hardware can be displayed in a very neat and attractive manner in windows with small suitably worded cards. The small cards may be used in a prominent position in the display so that they may be easily read by the customer.

When you look at it in a common sense way it stands to reason that the small card is better than a larger one. The smaller card takes up less room in the display, therefore, you have more room to show the merchandise.

Is Easily Read

The smaller card when lettered neatly, can be as easily read when close up as the large card. Clerks never shout at the customer, so why should a heavily printed large card be used in a good display? The small show card was first introduced by the department stores on this continent and has become quite the rule. In fact, large cards for good displays are uncommon and are often looked upon as more or less cheap.

The large stores select a rather small card with a design suitable for the season of the year it is to be used, and carry that card all through their windows. Then when a change to another variety is made it is all done in a day. Uniformity is the idea and it can be done in hardware or other trades as well. The small card has a great advantage over the larger one because it can be carried out in the windows and interior of the store very quickly on account of so few cards being required.

Are Very Attractive

Small cards for Fall hardware lines should be in colorings for Fall hues. Designs should be of a conventional order, and illustrations of Fall flowers might be used to good advantage. The shades to use are red, orange, light brown, blue and white, all in opaque colors. These are only a few of the combinations which might be used to produce effective results.

The colors may be changed around so as to get a variety of effects but still have the same design. If the cards of one design are desired, make an outline drawing in pencil on a piece of tough paper first. This may be used with the aid of tracing paper to draw as many as desired very quickly. The placing of the opaque colors is a simple matter after the layout is marked out.

The purpose of this article is not to dwell upon the "whys and wherefores," or the reasons for the wide-spread use of the show card, but to present in as clear and simplified a manner as possible the methods and means employed by the present-day card-writer.

Persistent Practice Needed

Of course, it will readily be understood that the ability to make a snappy, clean-cut display card is not acquired overnight or in two or three weeks, but by careful and persistent practice of the alphabets presented with this article, the student will be able in a reasonably short time to turn out good sales-promoting cards.

Naturally, the first question asked by the beginner is "What kind of brushes, pens and colors shall I use?" Fortunately the materials needed for show cards are few and you should procure only the best and proper tools for this work. Although the brushes recommended may cost a little more than other cheaper varieties, you will find that, like everything else, the best is the cheapest in the end, producing better results in every way.

The following is a list of materials which will be found all that is required for the production of any every-day style of card needed.

Three (Devoe's or Bissell's) red sable show card brushes, Nos. 10, 12 and 16.

One set (5) of Style "B" Speedball Pens, assorted.

One (only) Esterbrook Lettering Pen (largest size.)

Three 2-ounce jars Devoe's Show Card Color (Black, white and Light Red.)

One small bottle Higgins' Black India Ink.

One Art-Gum.

One Straight Ruler.

It may surprise you to note that only three brushes are mentioned in the

News of Western Canada

Increased Hardware Turnover in B.C.

Some Hardware Merchants Report 25 Per Cent. Increased Turnover Despite Falling Prices—Improved Delivery from the East

VANCOUVER, B. C.—Hardware business is good and retailers say that collections are in a very satisfactory state. Building hardware is moving out steadily due to building activity in Point Grey, chiefly.

In anticipation of the duck and pheasant season merchants report a much heavier demand for shells, the prices of which are about ten cents a box cheaper that when the hunters took to the fields and dykes this time last year. There has also been a good outward movement of coats, waders and other shooting essentials. Guns, however, are moving slowly at usual prices.

In heavier hardware there is a distinct improvement in the sales of stoves and furnaces. Stocks are reported low in retailers' hands. Prices have dropped twice within the last nine months and quotations are today about fifteen to twenty per cent. less than this time last year. Okanagan and Crow's Nest districts are buying a little heavier than usual due to the advent of cooler weather and on the coast sales are reported to be on a very satisfactory basis. Deliveries are much more regular than was the case in 1920 and the quality of goods in most lines shows a steady improvement.

The closing down of the salmon canneries and the more or less spasmodic activity in logging and construction camps has caused a slowing up in demand for heavier hardware lines and repair parts; but an improvement is anticipated early in the year.

In the wholesale and jobbing trade, the situation is different. Inactivity in the logging and shingle camps is having its effect on the wholesalers who show declines up to a third over a year ago. Up-country trade is fair while in the Okanagan and along the main line of the C.P.R. as far as Revelstoke, a good volume of business is being done. Collections are being made in a very satisfactory manner but the credit departments are keeping a close watch on all accounts, the firms benefiting greatly by their experience of the boom days of 1910-11.

Due to the heavy building operations being carried on in Vancouver and particularly the surrounding district of Point Grey Municipality, building hardware is moving out well and at gradually lowering prices. Deliveries from the eastern factories are coming along in good time, being greatly improved over last year at this time.

Several price changes of consequence have been effected on the coast. Nails, have dropped ten cents a keg. Cotton goods such as sash cords, twines, etc., have been advanced ten cents in keeping with the stronger tone in the primary cotton market.

Sash weights are off 50 cents, a hundred pounds being now quoted at $3.50. All lines of drills are down ten per cent. Flat tableware, the product of the Oneida Community Co., of Niagara Falls, is off a range of from ten to twenty per cent.

There has been a distinct improvement of deliveries of Old Country cutlery and the grade is up to pre-war standard. Prices are being gradually lowered. German cutlery is also entering this market but jobbers are experiencing considerable difficulty in having their orders filled according to stipulation. The manufacturers send along all of one size before filling any part of the balance of an order which occasions much delay. The cost is said to be much higher than the pre-war figure.

BETTER SERVICE FOR WESTERN READERS

Western Canada readers, will be interested in the fact that Hardware and Metal has made arrangements for a complete weekly serviec of B. C. news of the hardware trade, comment of leading hardware authorities on current topics and regular market service giving price tendencies and changes. This service commences with this is ue and will be gradually enlarged in scope. The co-operation of Western hardware merchants is asked in making this section as interesting and complete each week as possible. Any news items or notes concerning business methods, enquiries on trade subjects etc. will be appreciated by The Editor. This is another extension of the Western Canada News service in Hardware and Metal, which, since its inception two years ago, has been much appreciated by Western readers.

ELECTRICAL DEVELOPMENT IN B. C.

Vancouver, B. C.—Hydro-electric power was the chief topic discussed at the first annual dinner of the British Columbia Electrical Co-operative Association. The principal speaker, Dean S. I. Miller of the Faculty of Commerce in the University of Washington and secretary-manager of the Northwest Electric Service League, stated that the Pacific Coast States and British Columbia possessed fifty per cent. of the hydro-electric power of North America and only about five per cent. of this power had been developed. With the petroleum supply of the United States at an end in ten years, electric power would increase a hundred fold.

HARDWARE MERCHANTS FAVORING BONUS METHODS

Vancouver, B. C.—Officials of the National Cash Register Company in the persons of F. B. Patterson, president, A. E. McLean, Canadian manager and C. E. Steffey, sales manager, were here this week in the course of a trip of inspection of American and Canadian branches winding up at Winnipeg where a national convention of agents has been called.

Mr. McLean stated that business in Canada was on a much more healthy basis than formerly as indicated by the manner in which payments were being met. He said merchants were showing a decided tendency to use the bonus and profit-sharing methods with their employees which resulted in greater volume of trade and profits.

B. C. MERCHANTS' REPRESENTATIVE TO MEET TIRE MANUFACTURERS

At a meeting of the Automotive Section of the Retail Merchants Association of Vancouver, it was decided to name a delegate to represent British Columbia upon the Dominion Committee which will shortly meet in the east with tire manufacturers in an endeavor to secure a more satisfactory method of distribution in Canada. H. B. Neilsen of the Auto Supply Co. was named as the representative from the coast. His name has been forwarded to the Dominion Executive Council of the R. M. A. at Ottawa.

P. J. Sutherland Honored by Banquet

Retiring Assistant General Manager of Winnipeg Retail Store of J. H. Ashdown Hardware Co., Honored by Colleagues on Leaving To Join His Brother in Brokerage Business

WINNIPEG, Man. — Percy J. Sutherland was given a farewell dinner at the Assiniboine club by the officials and his colleagues of the retail store of the J. H. Ashdown Co., Ltd., Hardware, upon the occasion of his retirement from the post of assistant-general manager of the store. Mr. Sutherland has held that position four years, having previously been a department manager for eight years; and he is now joining in a partnership in a wholesale hardware brokerage with his brother, Russell R. Sutherland, who, himself, was for eight years in the Ashdown service before going overseas.

The kindest sentiments were expressed at the dinner, voicing the deep regret felt at the departure of Mr. Sutherland from the service of the company, and the high esteem in which he has been held by all his colleagues. W. J. Illsey, general manager of the store, presided. He enlarged upon the prospects for young men in the west. They are, he believes, as good today for the capable young man branching out for himself as ever they have been. William G. Link-later was toastmaster for the occasion, the arrangements for which had been made by C. H. Smith, the company's advertising manager, now promoted to the assistant-general managership relinquished by Mr. Sutherland, also by H. W. Hancock, of the city sales department and Chester McClelland, manager the Contract Department. Mr. Sutherland made fitting reply to the various addresses.

PERCY J. SUTHERLAND

Who after four years as assistant general manager of the Winnipeg retail store of the J. H. Ashdown Hardware Co. has resigned to join his brother Russell in the wholesale hardware brokerage, in Winnipeg.

The eloquent terms in which the friendship engendered by officials and colleagues of the company for Mr. Sutherland received their tangible expression in the presentation of a perfectly fitted wardrobe trunk, so complete in its appointments that it even anticipated the golfer's requirements.

Conditions in Alberta Are Good

Mr. and Mrs. P. Gordon have returned to Vancouver from an extended automobile trip to Alberta. Mr. Gordon is president of Fletts Limited, hardware merchants, and spent his holiday in a combined business and pleasure trip to Alberta.

Mr. and Mrs. Flett motored to Seattle and Spokane, and then north to Cranbrook, B. C. From here they went east to Frank, Alberta, then to Fort Saskatchewan and the old Hudson Bay post of North Alberta. The motorists visited Edmonton, Red Deer and a large number of other Alberta cities, later proceeding into Washington and then back into B. C. through the Okanagan Valley to Penticton.

Mr. Gordon declared that conditions in Alberta were very fair. The crops were good, and the coal mines were working full time. He found much dissatisfaction among the people south of the border in regard to taxation burdens. The United States government has been increasing the tax burden rapidly during the past few years, and the people are begining to feel the pinch.

Mr. Gordon was charmed with the Okanagan. He reports that the fruit crops this year are excellent, and that record shipments are being made from all parts of the valley.

NEW ASSISTANT MANAGER OF J. H. ASHDOWN RETAIL STORE, WINNIPEG

Winnipeg.—Charles H. Smith, who has been with the J. H. Ashdown hardware Co., Ltd., for 9 years has been appointed assistant manager of the retail store at Winnipeg. Mr. Smith spent the last seven years in Winnipeg as advertising manager and he will still look after advertising besides attending to his new duties as assistant.

C. V. DAVIS WINNIPEG DISTRICT SALES MANAGER FOR SOLEX COMPANY

Winnipeg.—C. V. Davis, has been appointed district sales manager for the Solex Company, Ltd., Winnipeg. Mr. Davis was formerly with the McClary Manufacturing Company and had spent 15 years with that firm. He spent about 5 years in London, Ontario, and the last 10 years with a firm in Winnipeg. He was in charge of the Advertising and Publicity Department and is well known to the trade in Western Canada.

WESTERN CANADA NOTES

Minnedosa, Man.—S. B. Andrews, hardware merchant, has sold out.

Winnipeg, Man.:—Chas. Iodman, hardware, has sold out his Osborne street store and is continuing the Main Street store only.

Vancouver, B. C.—Application has been made to the court for permission to change the name of Cash Register and Sales Service, Ltd., to Sanders and Gibb, Ltd.

Vancouver, B. C.—W. A. Akhurst, local manager of Canadian Fairbanks Morse Co., has returned to the city after a two weeks business trip to the mining camps of Hyder, Alaska, Stewart and other points along the Portland Canal.

Winnipeg.—J. E. Pelletier, manager of the Solex Company Ltd., Montreal, was in Winnipeg last week on a business trip to the firm's branch office and has appointed C. V. Davis as district sales manager.

NEW MATCH COMPANY

The Maguire, Paterson and Palmer Company of Canada, which manufactures matches in England, Ireland and Canada, and the Diamond Match Company of the United States, together with Bryant and Mays, Limited, of Great Britain, and the British Colonies, have joined with prominent Canadian capitalists and matchmakers in the foundation of a new Canadian match company.

LARGE RAIL ORDER FOR ALGOMA STEEL

Algoma Steel Corporation is in receipt of an order for 32,000 tons of steel rails for the Canadian Pacific Railway. Some weeks ago the same corporation received an order for 25,000 tons from the C. P. R. With these orders the Algoma Steel plant at Sault Ste. Marie will be kept busy at capacity, probably until the end of the year or longer. The industrial outlook at Sault Ste. Marie is now considered much brighter.

PERSONAL

C. P. Knight formerly with Rowland and Campbell of Winnipeg known to the Western trade as distributors of wheeled goods has joined the staff of Meriden Brittania Co., Hamilton, as Western representative with headquarters at Winnipeg.

SATURDAY, OCTOBER 22, 1921

SOME MERCHANTS have been approached by salesmen to enter into contract for electric flashing signs for window and store display, the merchant to operate for certain periods each day the sign furnished by the company for which he receives one or two dollars a month for each sign. The merchant has been led to believe that sign display cards for any nationally advertised commodity could be secured, but investigation shows that few if any national advertisers have agreed to furnish such advertising material. Some difficulty has also been experienced with the electric signs. The Vigilance Committee, Associated Advertising Clubs of the World, suggest that merchants verify the existence of agreements between sign companies and national advertisers before entering into service contracts.

MANY accidents to commercial motor vehicles gives increased emphasis to a certain regulation about which many merchants handling auto accessories should be advised. There is a clause in the Ontario Motor Vehicles Act which states "Every motor vehicle used for commercial purposes shall be equipped with a mirror securely attached to it and placed in such a position as to afford the driver of such vehicle, while driving, or operating the vehicle, a clear view of the roadway in the rear or of any vehicle approaching from the rear." Merchants will find this is a point on which many owners of such vehicles are very ignorant.

INCREASED industrial activity has been reported from many centres recently, but perhaps the best indication of the extent of this activity is the considerable decrease in unemployment among the artisan class. The index number of the Department of Labor covering unemployment for the past two weeks was 89.6 compared with 108.1 at this time a year ago. The aggregate payroll of 5240 firms accounted for 669,000 persons for the past two weeks, compared with 660,274 for the previous two weeks. This is an encouraging sign.

May Be A Lesson To Learn

ON ANOTHER page of this issue will be found an article showing that in spite of the business depression of the past year, the volume of sales of the chain stores is likely to show an increase over that of 1920. Up until last month the figures for the two years are practically the same and the best part of the year is still to come.

This means that whereas retail business in general has suffered a decrease in receipts of, say, 25 per cent. and in some cases even more, the large chain stores mentioned have captured a considerable amount of trade which under ordinary circumstances would have gone elsewhere.

We will not at the present juncture venture to draw any deductions from these facts, but we commend them to the careful consideration of every retail merchant.

Not only chain stores, but many individual merchants in various parts of Canada are keeping up to, or improving upon their last year's figures. This is only done by keenly going after business and not being content to accept dull times as a disease for which there is no remedy. We would therefore urge every retail merchant to examine well his methods of doing business, to see if there is room for improvement and whether by vigorously seeking fresh outlets for his goods, he can take advantage of the facilities which enable chain stores to report an increase in volume of trade under prevailing conditions.

Industrial Conditions Abroad

WHILE more optimistic sentiment will reflect in improved business conditions in Canada, inasmuch as the prevailing condition is thought to be partially psychological, yet it is unlikely that fundamental improvement on a broad scale will take place before world conditions improve. For this reason industrial leaders in Canada are giving close attention to developments in the markets abroad, with a view to establishing what may subsequently develop here as a reflection of those conditions. In the hardware and allied trades there are some interesting developments in European and Asiatic countries at present which are worth a survey for the purpose indicated.

The tone in Belgian industry is recently optimistic owing to increased activity. Price of pig iron semi-finished products advanced 25 francs in September. This industry is somewhat handicapped with strikes at present. Window glass stocks cover only three weeks of normal demand and several plants are about to reopen. Construction work in Czecho-Slovakia has resulted in placing of considerable orders for oil and petroleum, flat iron and iron sheets. German industry in many lines is said to be active though there is some concern over the fact that the boom does not so much indicate economic recovery as it shows the result of the depreciation of the mark. Certain industries are hampered by inadequate deliveries of high grade coal and the lack of freight cars, but there has been a decrease in unemployment. Wage increases of from 10 to 30 per cent. in many industries indicate that even the German worker is not forever content with small wages. Britain's foreign trade for September shows a decrease of over five million dollars in imports and an increase of twenty million dollars in exports. This has been reflected in a rise in exchange. Iron and steel conditions in Britain encourage optimism; 70 blast furnaces are operating, the highest number since February. Coal output has speeded up. Unemployment conditions are not materially improved as yet. Italian industry shows little change. Government revenues increased over 1920, and there has been considerable new capital invested in industries during the first six months of 1921. In Japan the steel manufacturers anticipate a revival this month. Stocks of iron and steel in warehouses at the beginning of this year were very large and have now diminished considerably. Price concessions were necessary to move this stock. Japanese prices of steel commodities are thought to have reached bottom and will be influenced for a time by German quotations.

Events in the Trade

BUSINESS CHANGES

Montreal:—J. M. Daoust, Ltd., hardware, has dissolved.

Toronto, Ont.—Louis Wainer, hardware, has sold to Albert R. Hamilton.

FIRE LOSS

Preston, Ont.—The plant of E. B. Salyerds, hockey stick manufacturer, was destroyed by fire. The loss is estimated at about $30,000, partly covered by insurance. Five thousand dollars' worth of hockey sticks, almost finished, were destroyed.

Bridgeburg, Ont. — Fire completely destroyed the Buffalo Specialty Company's plant at Bridgeburg, Ont. The flames at one time menaced the entire town. The total loss is estimated at $75,000. The company manufactured liquid veneer for Canadian distribution. Many persons were thrown out of work because of the fire.

OBITUARY

Theophile L'Esperance, head shipper of Lewis Bros., Limited, Montreal, died at the General Hospital this week. Mr. L'Esperance joined the above firm nine years ago, and in this time has risen from a shipper to the head of his department.

PERSONAL

Col. Robert Starke has been recently added to the board of directors of Argonaut Gold, Limited.

S. White of the Joseph Gundry Co., Ltd., Bridgeport, England, and Thomas Tulley, American representative, called on the Montreal trade this week.

Among those calling on the Montreal wholesale houses this week were: H. M. Patterson and Jas. Preston of Stratford Brass Co., Ltd., and C. S. Lasher of American Ring Co., New York city.

B. A. Taylor, Sales Manager for Sumner Company, Limited, Moncton, N. B., has returned from a two weeks visit to the manufacturing centres of Upper Canada.

Archie Wright, who for the past 27 years has been an employee of Clare Bros. and Co., has gone to Toronto where he has secured a position as factory inspector under the Provincial Government. It is expected that Mr. Wright will first make an inspection of all polishing shops in Ontario to see that the working conditions are in accordance with the laws of the province.

RECEIVES HARDWARE CONTRACT

Hamilton, Ont. — Brown Hardware Ltd., received the hardware contract for separate school costing $55,000.

OPENS IN ANOTHER FACTORY

Preston, Ont.—The only idle manufacturing plant here, that of the Canadian Machinery Corporation, is to be occupied, E. B. Salyerds, whose hockey stick and brush factory was destroyed last week, having secured a lease of the building, in which to immediately resume operations.

IMPERIAL STEEL & WIRE PLANT COMMENCING

Collingwood, Ont.—Col. Currie stated this week that it was expected the Imperial Steel & Wire Company's mills would commence operations immediately. Citizens and friends from all over the country were invited to inspect the plant.

CONGRATULATIONS FOR SHOOTING PROWESS

Kingston, Ont.—Claude Bowman hardware merchant of Ogdensburg, is receiving congratulations on his having shot an Albino buck weighing 130 pounds, in the Star Lake region last Saturday. It will be mounted and placed on exhibition.

NEW FIRM FOR SHERBROOKE

Sherbrooke, Ont.—Before the end of another year another large industry is expected to be established in Sherbrooke. The Eastern Townships Smelting and Refining Co., which has been incorporated with a capitalization of $2,000,000, has obtained options on some desirable sites and operations are expected to be started in the near future. Arrangements have been made for the smelters to handle the output of several of the largest producing properties in the West, special attention being paid to copper and asbestos.

HARDWARE MERCHANT VICTIMIZED

Kingston, Ont.—Mr. Fawcett, hardware merchant, Tweed, Ont., was victimized to the extent of $26 by a cheque artist. The party gave his name as Mr. Robins, and purchased goods to the amount of $124, in payment or which he gave a cheque for $150, intimating that he desired the change to make some other purchases. He was given $26 in change. The cheque signed by R. J. Rawlins proved to be bogus.

BIG STEEL RAILS ORDER GOES TO SYDNEY MILLS

Sydney, N. S.—A contract for the manufacture of 20,000 tons of steel rails at the Sydney mills has been assigned by the Dominion Steel Corporation and the management of the Canadian National Railways, it is learned here. The order will keep the steel plant going for nearly two months.

MAKING ACE CHAINS IN HAMILTON

Ace Chain Limited manufacturers of auto chains and other automotive equipment are now located in Hamilton and will shortly manufacture and distribute the genuine Ace Non-Skid Auto Chain. The genuine Ace Chain has not been put on the Canadian Market heretofore but has been in use in the United States for the past three years. Ace Chain Limited, Hamilton, are affiliated with the Ace Chain Corp. New York. W. Q. Sigsbee is the Canadian Manager.

GURNEY FOUNDRY CO. NOT MOVING HEAD OFFICE TO MONTREAL

In conversation with Hardware and Metal, E. H. Gurney, President of The Gurney Foundry Co., Ltd., Toronto, denied reports which have appeared in the daily newspapers to the effect that the company had removed its headquarters to Montreal. Mr. Gurney explained that two-thirds of the activities of this company were being carried on in Toronto, though extensions had been made in the Montreal plant, and he gave assurance that the head office would continue to be in Toronto.

NO LOWER PRICES ON MOST ENGLISH FIRE ARMS

Montreal.—"From all indications at present, there is little likelihood of lower prices on our arms for next year," said F. E. Fraser of Fraser Company, Montreal, Canadian representatives of the B. S. A. Guns Ltd., Birmingham, England to Hardware & Metal.

Mr. Fraser stated that recent advices received from England went to show that the 12 gauge shot gun and the Canadian pattern sporting rifle were being turned out at the lowest possible price taking into consideration the present cost of labor and raw materials. The factory were, however, able to make a considerable reduction in the price of the air rifle and Martini target model for next year.

W. Walker & Son, Ltd. Entertain Visitors

W. Walker & Son Limited, Toronto, hardware wholesalers, this week held a pleasant evening for their many local distributors of Areo Products and Owl Roofing. The Assembly was held in the Alcorin street offices which were suitably decorated and provision made to entertain a generous turnout.

The main office was comfortably filled and the entertainment was most enjoyable.

Unlike similar gatherings where speeches are the order of the day the time flew on wings for the speeches were short and snappy. The music supplied by a local Hawaiian orchestra was splendid and the other local talent which was received with much applause was supplied by members of the Owl Club, the social end of the Walker organization, and other members of the hardware trade.

During the evening the following speakers addressed the meeting:

Mr. Todd of Stewart & Foster, Toronto, on Bonton Metal Polish;

Mr. Miller of Booth, Coulter Copper & Brass Co., Toronto, on Fire Extinguishers;

Mr. Coates of Henry Disston & Sons, Ltd., Toronto, on the saw situation;

Mr. Welch of Canadian National Carbon Co., Toronto, on Flashlight and Batteries;

E. A. Smith of Beaver Board Co., on merchandising and the Walker organiation;

Mr. Walsh, manager of the North Toronto branch of the Dominion Bank, on collections;

Mr. Maclaughlin, advertising manager of W. Walker & Son, on co-operation;

Mr. Manton of Manton Bros., Toronto, on Creosote Shingle Stains;

D. R. Fowler of Canada Foundries and Forgings Ltd., Brockville, on the making of a hammer and an axe;

Frederick Moore of Benjamin Moore Co., Toronto, on Areo Paint;

Bert Walker of W. Walker & Son Ltd., on dealer co-operation;

Mr. Potter of Consumers Cordage, on cordage.

J. J. Ryley of Flint Varnish Co., Toronto, on Paints and Varnishes;

The main theme throughout the speeches was "Buy Made in Canada Goods." The evening closed with Sing songs and refreshments.

BUSINESS GOOD IN BUILDERS' SUPPLIES

Moncton, N. B.—With the building permits for the year to September 30th, amounting to nearly $650,000.00 and more in prospect this season before the snow flies, business in the line of building material has been good in this city. Not only has this had a stimulating effect on the trade in such lines as cement, nails, building paper, roofing and builders hardware, but the sale of mason's and carpenter's tools has been good as a consequence of the number of workmen employed. This is the eighth consecutive year in which building operations have been carried on here on a large scale.

DISTRIBUTES ADVERTISING MATTER FROM THE AIR

Moncton, N. B.—On a recent afternoon hundreds of leaflets fluttered down from the sky and found their way into the hands of surprised citizens. They were advertisements for various well known lines of Household Labor Saving Devices sold by Sumner Co., Ltd., and were being thrown from an areoplane 1,000 ft. above. They told the good points of Ranges and Furnaces, Electric Sweepers, Washing Machines, etc. The plane did a double loop over the Company's Store on Main Street.

ONTARIO WILL NOT ENTER THE CEMENT BUSINESS

Headed by Mayor Patterson, a deputation of Owen Sound Aldermen and business men waited upon Hon. F. C. Biggs, Minister of Public Works and Highways, at the Parliament Buildings, Toronto, and received assurances which will result in the establishment of a $4,000,000 cement plant in Owen Sound.

The assurance they sought and received was that the Government had definitely abandoned the proposal of going into the cement manufacture, and would not set up a competitive Provincial industry so long as cement prices remained reasonable.

REDUCE WAGE SCALE OF METAL WORKERS

Another wage reduction said to be necessary to meet conditions confronting the industry, has been recommended by the Canadian Founders and Metal Trades Association, Continental Life Building, to members of the association in Toronto and the vicinity.

The circular to members of the association containing the decision of the meeting and the wage rates is as follows:

"It is understood that these recommendations are solely made for the purpose of establishing uniform conditions in the various plants, and their application to individual employees is left to the judgment of each employer, who will undoubtedly recognize the wisdom and the benefit to all of the adoption tion the exact standing of the stock of such a schedule.

SHOW CARDS FOR FALL HARDWARE SALES

Continued from page 37

above list of materials, but it has been found in actual experience that these brush sizes are quite sufficient when used in combination with the speed-ball pens, which are, by the way, the greatest little time-savers now in use for card lettering.

Always at Your Service

Devoe's or Bissel's brushes are, thought to be, best suited for general card purposes. They are made of the finest red sable and are numbered according to size or width of stroke, as previously mentioned. You will find that Nos. 10, 12 and 16 are the most suitable to start operations with. These brushes can be obtained from any artist's supply house.

Your outfit is not complete without a set of speed-ball pens; these pens are made in five sizes and are fitted with an ink retainer which permits a steady flow of ink to the lettering surface. They are very easy to manipulate and are used almost exclusively by professional card-writers for the smaller lettering; they work best when used with India ink. For price tickets and small cards it is advisable to use the speed-ball in preference to the brush. It will be found in most cases to work easier and faster than the brush and you will also require less practice to become proficient with the speed-ball pen by reason of the adaptable design of its lettering point, which automatically produces clean-cut strokes of even width with rounded terminals.

To be Continued

SOME SEASONABLE SHOW CARD SUGGESTIONS

Are you going hunting this Fall? We have everything you will need. Come in and let us supply you from our big stock.

One of these electric heaters will chase the chills and keep you comfortable these cool evenings.

Let us show you how our washing machines will save half your time and all the heavy, hard work.

Now is the time to finish up your painting. We carry a complete stock and will be glad to give you expert advice.

One of these stoves will give you years of real service and all-round satisfaction. Come in and let us tell you about them.

For a real bargain in enamel ware you can't beat this.

Our stock of auto accessories is complete and our experience is at your service.

Your wife would enjoy using one of these electric irons.

Our new steel ranges are beauties. Let us demonstrate how they will save you money.

Seeing is believing. Can you beat this aluminum ware for price or quality.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

BOTH advances and recessions again feature prices in the current hardware markets. Reductions are announced this week on numerous lines for spring booking, these revisions including hay knives; the Canadian make of grass hooks; scythes; and harvest tools. Further price reductions are given on compression goods, this change affecting the standard flat way stop and waste cocks; the round way type in those products, and also Webber gate valves. Another decline is noted on carpenter's wrecking bars; malleable clevises are reduced and new prices appear on ship spikes, and linseed oil.

The increased quotations are generally a direct reflection of the recent strength of the oil markets, and an upward trend is recorded in gasoline, coal oil, and fuel oil. Lubricating oils and greases, as yet, remain unchanged. Lamp wick quotations have also registered a rise of approximately 12½ per cent.

The primary steel markets are maintaining increased activity, with galvanized sheets continuing strong. Domestic quotations are firm and unchanged. The recent gains in ingot copper and copper products, have eased slightly; while the improvement in other metal markets has proved of a temporary nature. Scrap metals are slightly firmer, with a better outlook.

Industry in several lines has registered some improvement, this betterment being generally based on fundamentally sound principles of liquidated costs, coupled with a brisker demand. Iron and steel are among the industries to feel the impulse of brighter conditions.

MONTREAL MARKETS

MONTREAL, October 20.—The centre of attraction in the current markets this week is the lower prices announced on spring booking lines. Harvest tools and screen doors have been lowered in price. The discount on harvest tools has been changed to 60 per cent. off list prices, thus offering a reduction of approximately 10 per cent. Screen doors are recorded with a reduction of from 20 to 25 per cent. on the various lines. Malleable clevises and tape lines also show a decline in prices. The outstanding advance in quotations is on coal oil and gasoline, both showing a price increase of 1½ cents.

The situation in the copper market is a little changed this week. The recent rapid rise does not hold, and an easier tendency is reported. Sheets, rods and tubing prices remain unchanged, however, for the present. Locally, both sheets and bar iron continue at former prices, notwithstanding another increase at the mills of $5.00 per ton, and advances on other markets. The market is, however, very firm and changes are thought likely to take place within a very short time. Ingot metals do not show a continuance of the improvement of last week, although the market is by no means dull.

NEW PRICES ON SHIP SPIKES

Montreal.

New prices are given on ship or pressed spikes this week, following being present base prices: ⅝ dia. and larger, $5.00, ¼ and 5-16 in. dia., $5.50.

HARVEST TOOLS NOW 60 PER CENT. OFF

Montreal.

Harvest tools will now cost less, a reduction of approximately 10 per cent being announced. These are now quoted at 60 per cent off list prices, formerly being less 50 and 10 per cent. Scythes and grass hooks are also reduced, but snaths and scythe stones are practically unchanged.

REDUCTION IN TAPE LINES

Montreal

Both linen and steel tape lines will now cost less, a reduction of from 5 to 7½ per cent having been made in both lines.

NEW SCREEN DOOR PRICES ARE CONSIDERABLY LOWER

Montreal.

Of special interest to those placing booked orders for next season's screen doors is the announcement of a substantial reduction in prices from last year's quotations. The decline covering the various patterns and grades amounts to between 20 and 25 per cent.

COAL OIL ADVANCES 1½ CENTS PER GALLON

Montreal

Following a firmer tone in the oil market in general, coal oil is advanced 1½ cents per imperial gallon, and will now sell for 21 cents per gallon.

FEWER SALES OF CORRUGATED SHEETS

Montreal.

With the approach of the Fall weather, the movement of corrugated sheets is now stated to have fallen off somewhat in the past week or so. The sales of these sheets have been more or less irregular all season, and some dealers are of the opinion that much business is still to be had with the continuance of open weather. Quotations are held unchanged, but are somewhat firmer owing to the improvement in the plain sheet market. Following are list prices and discount:

Corrugated.—

No. 28 gauge	7 00
No. 26 gauge	7 50
No. 24 gauge	10 50
No. 22 gauge	12 50
No. 20 gauge	14 00
No. 18 gauge	18 50

Less 7 ½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

MALLEABLE CLEVISES ARE REDUCED IN PRICE

Montreal.

New lower prices are quoted on malleable clevises. The regular will now sell for 15 cents a pound, plow clevises 22 cents per pound.

OILS AND GREASES HOLD UNCHANGED IN PRICE

Montreal

Notwithstanding a flurry in the oil situation, with the resultant higher prices announced on coal oil and gasoline, lubricating oils and greases are as yet unchanged locally. There is undoubtedly a firm undertone in the market and higher prices would seem imminent, but to some dealers the future trend of these products is yet doubtful.

REACTION IN TONE ON PRIMARY COPPER MARKET

Montreal.

The recent heavier buying movement, followed by a stiffening in the general tone of the copper market, did not maintain the gains made in quotations through the week, and the tendency is not of the strong nature that prevailed last week. This reaction is not unexpected, the advance being so rapid that the health of the market was questionable. It is not anticipated, however, that the market will again recede to its former dullness and low quotations, but the present condition is considered only temporary and the market may again become in a much better situation, having benefited by the existing falling off. Quotations on sheets, bars and tubing are unchanged, holding at the revision of last week, as follows:

BRASS—	Base.
Sheets, base	0 25
Rods, base ½ to 1 in., round	0 23
Tubing, seamless, base	0 32
F. o. b. Montreal.	

COPPER—	
Rods, ½ to 2 in.	0 30
Soft sheets, plain, 16 oz. and heavier lb.	0 32
Plain tinned, 16 oz. and heavier, lb.	0 38
Polished and tinned, 16 oz. and heavier, lb.	0 43
Tubing, lb.	0 34

Above prices are full sheets and bars. Cut sheets and bars are 5c per lb. higher.

STEADY MARKET LOOKED FOR ON RANGE BOILERS

Montreal.

With the higher prices on range boilers now the selling basis, a steady market is expected to prevail on these for some time now. It was at first thought by some that the new quotations announced two weeks ago were somewhat higher than was warranted, when previous quotations were considered. However, with the recent firming in the sheet markets, those prices are considred well in line with productive costs. Also, former prices were the result of continued price-cutting among the various dealers. Sales of boilers at present are only fair, and almost entirely of the standard size. Present quotations are as follows:

RANGE BOILERS—	Standard.	Ex.Heavy
30 gallon	9 25	11 75
52 gallon	21 00	26 00
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00

SHEET PRICES STILL HOLD: HIGHER LEVELS IMMINENT

Montreal.

Although the undertone of the market on sheets continues very firm, prices locally remain unchanged. It is expected however, that a change to higher levels will be made within the next few days. This was anticipated last week, but local warehouses were awaiting the action of the mills, who announce another advance in sheet prices of $5.00 per ton.

With these higher quotations now ruling at the mills, it is noted that stocks are not heavy because of the attitude of buyers in their purchases all season. English sheets, tinplate and Canada plate are also now affected by the gains in Sterling exchange. While prices on the other side have been favorable for importing in competition with the American products this season, it is now felt the advance in exchange rates has added another deciding factor toward increased quotations. In this regard, importers state there will be little or no change until present stocks are exhausted, and it is necessary for them to import at the higher rates. Following are local prices for the present:

BLACK SHEETS

10 gauge	4 30 to	4 65
12 gauge	4 40	4 75
14 gauge	4 50	4 85
16 gauge	4 60	4 95
18-20 gauge	4 80	5 20
22-24 gauge	4 90	5 35
26 gauge	4 95	5 40
28 gauge	5 00	5 50

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS.

U. S. Standard.		
10¾ oz.	6 85	7 75
28 gauge	6 45	7 35
26 gauge	6 15	7 00
22-24 gauge	5 95	6 75
20 gauge	5 80	6 60
18 gauge	5 80	6 50
16 gauge	5 70	6 50
14 gauge	5 60	6 50
12 gauge	540	6 50
10 gauge	5 30	6 50

English Standard—	Queen's Head	Fleur-de-lis
28 gauge	8 50	7 75
26 gauge	8 25	7 50
24 gauge	7 65	7 10
22 gauge	7 80	6 65
18-20 gauge	6 60	6 50

NOTE.—These prices are full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. Extra for sheets 4 ft. wide. 50 cents per 100 pounds. Extra for sheets 3 ft. wide, 28 ga. and 10¾ oz. 25 cents per 100 lbs.

IRON AND STEEL PRICES STILL HOLD

Montreal

With all indications pointing to a firmer tone on iron and steel bars of the various grades, quotations locally are still holding at former levels. The announcement is made this week at the mills of another advance in sheet prices, and it is thought to be only the question of a very short time before bar quotations are also increased. The better feeling among the industry continues. Stocks locally are light owing to buyers being cautious in the past season, thus any change at the source should soon reflect on the various warehouses. Business shows little change in the past week, orders being small but fairly numerous. Following are existing quotations:

Common bar iron, 100 lbs.	3 00	3 25
Refined iron	4 00	4 30
Irish finish machinery steel	....	3 45
Mild steel	3 00	3 40
Single reeled machinery steel	5 00	5 25
Band steel	3 00	3 40
Spring steel	....	6 00
Sleighshoe steel	3 00	3 40
Tire steel	3 00	3 60
Toe calk steel	4 00	4 30
Harrow tooth steel. per lb.	....	3 55
Mining tool steel per lb.	....	0 22
Black Diamond tool and cast steel, per lb.	....	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

QUIETER MARKET FOR LEAD GOODS

Montreal

The season is apparently having its effect on the sale of the various lines of lead products, as these are reported as quieter this week. The movement on these lines has been rather irregular all season and a spurt in demand is still expected by dealers as there is usually a good amount of plumbing work to be done in the later months. The market is practically unchanged this week. although zinc sheets are firmer, and higher prices on these would not be surprising in the near future. Present prices are as follows:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10% off
Lead wool, lb.	0 13½

Do., broken lots	0 12

BOILER TUBES UNCHANGED IN PRICE

Montreal.

Current quotations on the various sizes of both seamless and lapweld boiler tubes are nominally unchanged, with a continued slight improvement in the general conditions of the market noted. During the quiet period of the past few months quotations were varied among the different jobbing houses and concessions were made to obtain orders, especially of fair size. In the later weeks, with the better tone in almost all iron and steel products, there is an improvement also in boiler tubes.

HIGHER PRICES ON GASOLINE

Montreal.

In accordance with all oil products, gasoline prices have recently shown a marked firmness and this week quotations are advanced 1½ cents per gallon. Present selling prices are 32½ and 35½ cents per imperial gallon.

FITTING PRICES REMAIN UNCHANGED

Montreal

The recent change in discounts on most lines of pipe fittings is the last revision recorded, and the market is now somewhat steadier. There continues a steady movement in the many lines, sales being quite satisfactory although of a smaller character than in other years. Following are prices and discounts:

FITTINGS—	Per Cent.
Cast iron fittings	25
Bushings, cast	27½
Do., malleable	25
Flanges	37½
Plugs	27½
Flange unions	22½
Malleable unions	42½
Dart unions, black	29
Do., galvanized	8
Nipples, ⅛ to 4 in., close and short	50
Do., long	60
Do., 4½ to 8 in., close and short	40
Do., long	50
Couplings, 4 in. and under	30
Do., 4 in. and longer	10

POUND GOODS—	Blk.	Galv.
Class A	0 53	0 65
Class B	0 21½	0 28¼
Class C	0 14	0 21½

SLACKENING IN RECENT INGOT METAL GAINS

Montreal

The metal market is somewhat quieter this week with prices running irregular, some showing a slightly easier tendency, others still quite firm. The variation in exchange has had some effects on price movements.

TIN.—There is a better tone to this metal in London, and the advance in Sterling is responsible for higher prices on this side. There is still no great improvement in buying, but there is no weakness in the market. Local market is firmer at 35½ cents.

COPPER.—The recent buying movement is through for the present, and prices have declined both in London and New York. The recent advance was so rapid that a re-action is not surprising. The unsettled condition in Germany is responsible for falling off of exports to that country. Local market is slightly easier at 17¼ cts. for electro, 17 cts. for casting.

LEAD.—This metal has been rather erratic in London, advancing sharply owing to German buying and re-acting later. The situation is firm, but there is not much likelihood of any great change for the present. Quotations are steady locally at 6¾ cents.

SPELTER. — London remains firm while East St. Louis continues its strong tone with spot quoted at $4.67½, this being the highest figure touched on this movement. The situation is quite firm and prices are still below cost of production. Locally the market is firm at 7½ cents.

ANTIMONY. — This metal is quieter in New York, but there is a good tone to the market. Local quotations are unchanged, Chinese being quoted at 7¼ cts., high grade English 8¼ cts.

ALUMINUM.—Aluminum holds at 28 cents locally, with the market continuing very dull.

TORONTO MARKETS

TORONTO, October 20.—Numerous price changes, comprising both increases and declines, appear on the hardware market reports this week. The recent gains in the primary oil markets have been reflected by corresponding gains in quotations on coal oil, gasoline, and fuel oil. All these oil products are advanced from 1½ to 2 cents per gallon. Lubricating oils and greases are as yet unchanged in price.

The downward revisions principally include hardware lines for spring bookings. A decline of approximately 20 per cent appears on hay knives; while lower prices are also given on grass hooks. Quotations on scythes likewise take a substantial drop; and new discounts are shown on harvest tools, thus averaging a 10 per cent. decrease.

Further price changes on compression goods include standard flat way stop and waste cocks, also the round way type of this product, as well as the Webber gate valves. Another decline of 50 cents per dozen is given on carpenters' wrecking bars. Among the advances recorded are lamp wick quotations which soar almost 15 per cent.

Sheet markets continue strong, with quotations firm and unchanged. Owing to the recent price gains at primary steel centres it is said that some higher prices on galvanized sheets are considered imminent. The low price levels hold on copper and brass products, such as sheets, tubing and rods, in spite of the gains recorded on primary copper markets. The scrap metals are now slightly firmer, with a brighter outlook.

LAMP WICK QUOTATIONS SOAR 12½ PER CENT

Toronto.

There has been an advance of approximately 12½ per cent. recorded in quotations on lamp wicks.

FUEL OIL NOW HIGHER TWO CENTS PER GALLON

Toronto.

Quotations on fuel oil show another increase of 2 cents per gallon this week, the current change reflecting the higher prices on the crude oil markets generally. The net barrel quotation on fuel oil is now 11 cents per gallon, while the tank car price is 9 cents. Reference as to the probable trend of these markets and the reflected price on oil products generally, was made in a recent issue of Hardware and Metal.

GASOLINE QUOTATIONS ADVANCE OIL MARKETS FIRM

Toronto.

As outlined in a previous market report contained in a recent issue of Hardware and Metal, the gains in the primary oil markets have been reflected by advanced prices on the refined products. Consequently, gasoline quotations are higher this week, the revision being 1½ cents per gallon. This change brings the current price to 32½ cents.

COAL OIL QUOTATIONS ARE AGAIN HIGHER

Toronto

Coal oil prices are again advanced this week, thus further reflecting the continued strength of the primary oil markets. The new prices are 1½ cents per gallon higher, this change affecting both Royalite and Palacine grades. The revised quotations are included in the current market pages.

DECLINE IN QUOTATIONS ON HAY KNIVES

Toronto.

Among the price changes to a lower level included in the current hardware market reports are hay knives. The average reduction is 20 per cent. The new quotations follow:

KNIVES, HAY—	
Spear Point	15 00
Lightning	14 00
Heath's	14 00

LOWER PRICES ALSO APPEAR ON GRASS HOOKS

Toronto.

New lower prices are announced this week on the Canadian make of grass hooks, the revised quotations showing a decline of approximately 20 per cent. Following are some of the new prices:

HOOKS, GRASS	Canadian.	English Fox.
No. 2, per doz.	3 90	7 50
No. 3, per doz.	4 00	8 00
No. 4, per doz.	4 10	8 50
No. 5, per doz.,	4 30	....
Little Giant	6 50	....
Barden Patent	6 50	....

ANOTHER DECLINE ON WRECKING BARS

Toronto

Carpenters' wrecking bars are again reduced this week, the decline averaging 50 cents per dozen.

QUOTATIONS ON SCYTHES TAKE SUBSTANTIAL DROP

Toronto.

Fairly substantial reductions have now been made in prices on scythes. The various makes show an average decline of approximately 23 per cent. Following are the new quotations:

SCYTHES—	Dozen.
Cast steel	15 00
Golden Clipper	16 00
Little Giant	11 00
Bush	16 00

NEW DISCOUNTS APPEAR ON HARVEST TOOLS

Toronto.

Next year's quotations on harvest tools are now announced, the change being an increase in the discount, thus bringing prices to a lower level. The new discount is 60 per cent off the same list as prevailed throughout the current season, compared with the previous figures of 50 and 10 per cent. In addition, a special 5 per cent is given on orders placed prior to December 1.

FURTHER PRICE CHANGES ON COMPRESSION GOODS

Toronto.

Further price changes have now developed in the quotations on compression goods. Through the increasing of discounts, the prices on standard flat way stop and waste cocks are brought to a lower level, and a similar revision is made on the round way type of this product. Changed quotations are also noted on Webber gate valves.

With a fair market in compression goods, sales are stated to be of a moderate nature. Current conditions show varying price developments in the efforts to stimulate business generally, and thus reduce stocks prior to the annual inventory period. Prevailing quotations follow:

VALVES—	
Compression work, standard	43%
Fuller work, standard	30%
Bath cocks, compression	32%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Round-way stop and waste cocks, standard	46%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	20%
J. M. T.	20%
J. M. T. C.	25%
J. M. T. Gate Valves	25%
Gate or straightway	10-10%
Jenkins Globe	10-10%
Radiator valves, standard	58%
do., removable disc	58%
Emco. Check Valves	20%
Webber gate valves	25%
Emco Globe valves, ¼" to 2",	30%
Do., Do., Do., 2½" to 3"	20%

BASIN COCKS—	
No. 0 and 1, Fuller pattern	30%
Quick opening No. 3633	43%

MAY BE REVISION IN WOOD HANDLE QUOTATIONS

Toronto

There has been a downward revision in some quarters, affecting certain lines of wood handles. The extent of the decline, and the new quotations are not yet available locally. It is anticipated that some further announcement will be forthcoming next week.

SLIGHT CHANGES IN LIST ON SHOEFINDERS TACKS

Toronto.

Following is the new list of shoefinders tacks, which was referred to among the changes noted in last week's issue of Hardware and Metal, but which was omitted on that occasion owing to lack of space:

HEEL OR SHOE NAILS

14 Ge. and Heavier 4|8 to 16½|8, in bulk, $14.50 per 100 lbs.; in 1-lb. papers, $15.25 per 100 lbs.

15 and 16 Ge. Add 65c to above price. In 100 lb. quantities. One size.

17 Ge., add $1.60 to above price. In 100 lb. quantities. One size.

Swedes Iron.

14 Ge. and heavier, 4|8 to 16½|8. In bulk, $15.25 per 100 lbs. In 1 lb. papers, $16.00 per 100 lbs.

15 and 16 Ge. Add 65c to above price. In 100 lb. quantities. One size.

17 Ge., add $1.60 to above price. In 100 lb. quantities. One size.

17|8 and longer add 65c per 100 lbs.

Sliver Point.

All sizes, in bulk, $15.25 per 100 lbs. In 1 lb. paper, $16.00 per 100 lbs.

Hard steel nails, $24.25 per 100 lbs.

Wood heel nails, $22.00 per 100 lbs.

Army heel plate nails, $17.00 per 100 lbs.

HOB AND HUNGARIAN NAILS

In 1-lb. papers.	Per 100 lbs.
11-12-13 Ge. and heavier, 3|8 and shorter	$21.50
Do., Do., 3½|8 and longer	21 00
14 Ge., 3|8 and shorter	22 50
Do., Do., 3½|8 and longer	22 00
15 Ge., 3|8 and shorter	23 25
Do., Do., 3½|8 and longer	22 75

If in bulk deduct 50c nett.

CHANNEL NAILS

In 1 lb. papers.	Per 100 lbs.
3|8	$24 25
3½|8	22 25
4|8	21 75
4½|8	21 25
5|8 and longer	20 75

SHOE RIVETS

In 1-lb. papers.

Steel Wire—

16 Ge. and Heavier—(per 100 lbs.)—3|8, $25; 3½|8 $21.50; 4-4½|8, $18.50; 5-5½|8, $17.75; 6-6½|8, $17.25; 7-7½|8, $16; 8-8½|8, $15.25; 9|8-11½|8, $14.25; 12|8-17|8, $13.50.

17 Ge., add $1.00.

18 Ge., add $2.00.

Clinch Point —

3|8, $26.25; 3½|8, $22.75; 4-4½|8, $19.75; 5-5½|8, $19; 6-6½|8, $18.50; 7-7½|8, $17.25; 8-8½|8, $16 50; 9|8-11½|8, $15.50; 12|8-17|8, $14.75.

17 Ge., add $1.00. 18 Ge., add $2.00.

Cobblers' Rivets—

3|8, $28; 3½|8, $24.75; 4-4½|8, $21; 5-5½|8, $20; 6-6½|8; 7-7½|8, $18.25; 8-8½, $17.25; 9|8-11½|8, $16.25; 12|8-17|8, $15.50.

17 Ge., add $1. 18 Ge., add $2.

Brass Wire—

3|8, $86.75; 3½-8, $74.50; 4-4½|8, $70.50; 5-5½|8, $69.25; 6-6½|8, $68.25; 7-7½|8, $67.50; 8-8½|8, $67; 9|8-11½|8,, $66.50; 12|8-17|8, $66.

17 Ge., add $1.50. 18 Ge., add $3.50.

Clinch Point—

3|8, $88.50; 3½|8, $76; 4-4½|8, $72; 5-5½|8, $70.75; 6-6½|8, $69.75; 7-7½|8, $69; 8-8½|8, $68.50; 9|8-11½|8, $68; 12|8-17|8, $67.50.

17 Ge., add $1.50; 18 Ge., add $3.50.

Cobblers' Rivets—

3|8, $99.50; 3½|8, $85.50; 4-4½|8, $81.45; 5-5½|8 $79.65; 6-6½|8, $78.40; 7-7½|8, $77.55; 8-8½|8, $77; 9|8-11½|8, $76.35; 12|8-17|8, $75.85.

17 Ge., add $1.50; 18 Ge., add $3.50.

Bulk Shipment—

Less 25c Net for quantities of 100 lbs. One size.

TACKS

All goods packed in less than ½ lb. papers, $4.00 per 100 lbs.

All goods packed in less than ¼ lb. papers, $5 per 100 lbs.

SHEET MARKETS STRONG WITH QUOTATIONS FIRM

Toronto

Activity is still reported on the increase in primary steel markets, and this degree of improvement has been specially marked in sheet products. There has been an improvement in the volume of steel orders, and in this direction also, sheets generally lead. Price declines have ceased, and some American mills have made a further advance in sheet quotations. However, prices on local markets remain unchanged, at present, the situation still being the same as described in previous market reports. Sheet distributors state, however, that some increases may develop at any time, owing to the present strength of these markets, and the recent price gains at the mills.

BLUE ANNEALED—		
10 gauge, base	4 00	4 50
12 gauge	4 05	4 55
14 gauge	4 10	4 60
16 gauge	4 15	4 65

BLACK—		
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 10
26 gauge	4 65	5 15
28 gauge	4 75	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Head	Fleur-de-lis
28 gauge	9 50	8 75
26 gauge	9 25	8 50
24 gauge	8 65	8 10
22 gauge	8 30	7 65
18 and 20 gauge	7 60	7 50
Premier and Apollo.		
10¾ oz	6 50	7 00
U. S. 28 base	6 10	6 60
U. S. 26	5 80	6 30
22 and 24	5 65	6 15
18 and 20	5 50	6 00
16	5 35	5 85
12 and 14	5 20	5 70

An extra 40c per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

PLATES, CANADA—	Per box
Dull 60 sheets	$5 65
Ordinary, 52 sheets	5 60

PLATES, COKE TIN—	
1X, 20 x 28, 112 sheets	20 50

PLATES, TERNE—	
1C, 14 x 20, 112 sheets	12 00

SCRAP METAL MARKETS ARE SLIGHTLY FIRMER

Toronto

Activity is a little more pronounced in scrap metals, and as a consequence the markets are firmer. Prices are generally unchanged, but it is noted that slight increases have recently developed on some American scrap markets.

The following averages of local dealers' buying prices, are nominal, and for fairly large quantities:

SCRAP MATERIALS—

No. 2 busheling	....	11 00
Heavy melting steel, gross ton	9 50	10 00
R. Rd. wrought iron, No. 1, gr. ton	10 25	11 25
Scrap pipe, gr. ton	6 00	7 00
Stove plate, net ton	11 00	12 00
No. 1 machinery cast, net ton	15 00	16 00
Heavy lead	3 75	4 00
Tea lead	2 00	2.50
Red brass	....	9 00
Yellow brass	5 00	6 00
Light brass	3 00	3 50
Heavy copper	9 25	10 00
Scrap zinc	3 00	3 50
Old rubbers, boots and shoes	2 00	2 50
Lumberman's rubber boots	1 25	1 75
Auto tires	0 50	1 00
Solid tires	0 75	1 25

LOW PRICE LEVELS HOLD ON COPPER AND BRASS

Toronto.

The new lower prices recently announced on copper sheets, tubing and rods, are still being quoted locally, in spite of higher levels on the primary copper markets, and some slight increases in other quarters. Quotations on brass goods of this nature are also holding unchanged, at present. There remains a firm tone in these products, and in view of recent market developments, quotations are undoubtedly being closely watched. Following are the local prices:

BRASS—	
Sheets, base, per lb.	$ 0 22
Rods, base, per lb.	0 20
Tubing, base, per lb.	0 25
COPPER—	
Rods, base per lb.	0 26
Soft sheets, plain, 16 oz. and heavier, lb	0 28
Do., plain tinned 16 oz. and heavier, lb	0 35
Do., polished and tinned 16 oz. and heavier, lb.	0 40
Tubing	0 27

RECENT REVISIONS HOLD ON PIPE FITTINGS

Toronto.

No changes have developed in prices on pipe fittings, and the recent revisions are still being maintained. No marked item of interest has been recorded, and the general market tone is unchanged. Following are the current quotations:

PIPE FITTINGS—

	Per cent.
Cast iron fittings	25%
Plugs, cast iron	28%
Do., solid	28%
Do., countersunk	28%
Bushings, mall	28%
Bushings cast	28%

Do., ⅛ in., 2 to 4 ins.	40%
Do., galvd., add to black	30%
Nipples, blk., and galvd. ⅛ to 4 in., close and short	50%
Do., 4½ in. and larger	40%
Do., long, ⅛ in. to 4 in.	60%
Do, 4½ inch and larger	50%
Do., running thread	30%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—

	Black	Galvanized
Class A	0 55	0 68
Class B	0 23	0 33
Class C	0 15	0 23

QUOTATIONS STEADIER ON BAR IRON AND STEEL

Toronto.

While there has recently been some improvement in the market tone on bar iron and steel, yet the average current demand cannot be compared with the recovery that has recently been apparent in the sheet markets. Quotations are, however, generally steady, and are unchanged at the following levels:

IRON and STEEL—

Mild Steel bars, base	3 25	3 50
Mild steel bands, 3-16 in. base	3 75	4 00
Bar iron, base	3 25	3 50
Angle iron, base	3 35	3 60
Horseshoe iron	....	4 10
Tire steel	4 70	5 95
Spring steel	9 50	11 50
Crucible cast sheet steel	30 00	35 00
Mining drill steel	.. ..	18 50
Cast tool steel, high grade	20 00	23 00
Cast tool steel, medium	20 00	23 00
Sleigh shoe steel	4 10	4 50
Hoop steel	4 50	4 75
Toe caulk iron	5 40	6 40
Norway iron	....	15 00

FIRMER UNDERTONE IN PIPE AND EAVESTROUGH

Toronto.

The stronger tone which has developed throughout the steel industry, coupled with price gains on certain products which have recently been recorded, tend to reflect a corresponding firmness in the market on conductor pipe and eavestrough. While local quotations remain at the recent lower revisions, and no changes have been announced either on outside or domestic markets, the opinion has been expressed that prices have now reached the bottom of the downward movement.

The current volume of business is said to be seasonably fair. Following are the prevailing prices and discounts:

TROUGH (Eave)—

O. G. Square Bead and half round. Size in girth:

	Per 100 ft.
8 in.	15 90
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50

Less 60—10 per cent.

PIPE (Conductor)

Plain, round or corrugated.

	Per 100 ft. in 10 ft. lengths.
2 in., in 10 ft. lengths, list	18 40
3 in. in 10 ft. lengths, list	22 30
4 in. in 10 ft. lengths, list	29 60
5 in. in 10 ft. lengths, list	40 00
6 in. in 10 ft. lengths, list	49 00

Less 60—10 per cent.

ELBOWS (Conductor)

2 inch, list	5 25
3 inch. list	6 00
4 inch. list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 55 per cent.

COTTON WASTE QUOTATIONS HOLD UNCHANGED

Toronto.

Dealers report that prices on cotton wastes remain unchanged, at present, but a tendency towards an advance in quotations is manifest among certain dealers. Based on the prevailing high price of raw cotton, and the corresponding higher levels on manufactured cotton goods generally, some increase on cotton wastes has even been predicted in one quarter; but this has not yet materialized; and the average local prices hold steady, at the levels which have prevailed since the last general revision in June. Current quotations are included in the list pages on market prices.

IMPROVEMENT IN SOME INGOT MARKETS

Toronto.

An improved tone is now generally apparent throughout the ingot metal markets, with copper, spelter and tin, attracting chief interest in the order named. The increase in inquiry is the principal feature which has served to partially restore confidence in these metals, and in view of the steady consumer interest, prices on British and American primary markets, have reflected this betterment in conditions by higher quotations. Whether the gains will materialize in permanent improvement, however, is primarily dependent upon the strength of the buying movement being sustained.

COPPER—Copper continues to head the list of active metals, with an extensive gain in the volume of inquiry. Export demand is said to be improving, and quotations have been generally advanced in U. S. primary centres. Local prices, however, have not yet generally reflected these gains, and the quotation of 17 cents still prevails.

TIN—The recent fluctuations in exchange have alternately affected tin quotations to both higher and lower levels. These changes render the market somewhat uncertain, but the sharp rise in exchange values early in the week, caused a corresponding strength in primary market quotations on tin. Local prices are holding at 35 cents.

LEAD—This market is stated as steady in some reports, but the current volume of business is only fair, and quotations are generally unchanged. Local prices vary from $6.50 to $6.75.

SPELTER—Some stiffening in the spelter markets, coupled with slightly advanced prices, has been noted in recent reports from southern markets. The increase in activity is attributed to brass manufacturers, and inquiries from other producers. No marked gains, however, can be recorded and local markets do not show any signs, at present, of either improvement or change. The price of $7.00 still generally remains.

ANTIMONY—This market is steady and unchanged at previous levels. Sales are by no means numerous, and there are no new features to report. Quotations remain locally from 8 to 10 cents.

ALUMINUM—Some inquiries are reported to have been received lately from automobile manufacturing interests, but the question of price is given as one of the drawbacks to the consummation of orders. The average local price prevailing is now 28 cents.

LONDON MARKETS

LONDON, October 19.—The list of price revisions on the hardware markets this week includes lower prices on harvest tools, scythes, grass hooks, hay knives, refrigerators, corn house brooms, shoe findings, and jack chain. Turpentine again attracts attention, this time with an advance of 5 cents per gallon.

Business throughout this district is now reported good. Merchants in this vicinity have been very busy durng the past week, and are stated as well satisfied with the volume of trade now prevailing. Wholesalers and factories also report larger orders and more business generally. Collections continue in a very healthy condition.

REVISED LIST EFFECTIVE ON SHOE FINDINGS

London, Ont.

Some revision has been made in the list on shoe findings, but the changes are only slight, affecting the larger sizes of shoe tacks. The newest is effective from October 10, 1921.

PRICES HOLD STEADY ON LINSEED OIL

London, Ont.

Quotations on linseed oil generally remain at the lower level recently in effect. This easy tendency is attributed to the current lack of demand. The prevailing price levels follow:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrels, per Imp. gal. ..	0 90	0 93
3 to 5 bbls., per Imp. gal.	0 89	0 92
6 to 9 bbls., per Imp. gal.	0 87	0 90

Less barrels add 15 cents gallon.

TURPENTINE PRICES AGAIN BACK AT HIGH LEVELS

London, Ont.

Local quotations on turpentine have again risen in sympathy with the higher quotations on the southern primary markets. This increase amounts to 5 cents per gallon, and places prices back at the peak recorded two weeks ago, namely $1.15, in one barrel lots. Following are the revisions:

TURPENTINE—	Imp. Gal.
1 barrel lots	1 15
2 and 4 barrel lots	1 14
5 gallon lots	1 30

ANNOUNCE NEW REFRIGERATOR PRICES FOR 1922

London, Ont.

A reduction of approximately 20 per cent. is announced by the Sanderson-Harold Co., on their line of refrigerators. for the 1922 season booking. This revision brings quotations on the Household line to list less than 40 per cent.: while other makes, such as butchers and grocers, are shown on list less 35 per cent.

LOWER QUOTATIONS GIVEN ON GRASS HOOKS

London, Ont.

Reapers or grass hooks are included in the list of hardware commodities showing lower quotations this week. Following are some of the new lower prices now in effect:

GRASS HOOKS—	
Canadian make, No. 2, doz.	3 90
Canadian make, No. 3, doz.	4 00
Canadian make, No. 4, doz.	4 10
Canadian make, No. 5, doz.	4 30
Little Giant, per doz.	6 50

NEW DISCOUNT SHOWN ON JACK CHAIN

London, Ont.

A new discount has been given covering prices on jack chain. This change is applicable to both the steel and brass chain, and the revised quotation is list less 10 per cent.

AUTO WHEEL COASTER WAGONS POPULAR

London, Ont.

A fair volume of Fall sales is now reported for coaster wagons and the auto-wheel coaster. Following are some of the new lower list prices recently effective.

COASTER WAGONS—	Off List
No. 00	60 00
No. 0	72 00
No. 01	91 00
No. 1	104 00
No. 2	116 00
No. 3	128 00
No. 4	146 00

Less 35 per cent.

HAY KNIVES ALSO HAVE NEW LOWER PRICES

London, Ont.

New lower prices are now in effect on hay knives. The extent of the reduction is practically 20 per cent. Following are the latest revisions in quotations on these products:

HAY KNIVES—	
Lightning, per doz.	14 00
Heaths, per doz.	14 00
T. Handle Spear Point, per doz.	15 00
L. Handle Spear Point, per doz.	15 00

REVISED DISCOUNT GIVEN ON HARVEST TOOLS

London, Ont.

Through an increase in the discount quotation, harvest tools are now lowered in price. The reduction is approximately 10 per cent., and applies to present and spring booking. The new quotation is list less 60 per cent.

SUBSTANTIAL DECLINE IN PRICES ON SCYTHES

London, Ont.

New lower prices for spring booking are now announced on scythes. The extent of the decline is approxima ely per cent. Following are some of the revised quotations:

SCYTHES—	
Cast steel, per doz.	15 00
Golden Clipper, per doz.	16 00
Double Beaded, per doz.	16 50
Cutlery steel, per doz.	17 00

SOME CORN HOUSE BROOMS HAVE REDUCED PRICES

London, Ont.

Several of the lesser known makes of corn house brooms, now show a reduction in price of 25 cents per dozen. The following are the new revised quotations on a local line:

CORN HOUSE BROOMS—	
Special hardwood handle, per doz.	5 00
XX Hardwood handle, per doz.	5 50
4 String hardwood handle, doz.	6 25
Parlor hardwood handle, doz.	7 50
No. 7 x 5 String hardwood hdle.., doz.	9 00
No. 8 x5 do.	10 00
Factory or mill	8 00

SOME WOOD HANDLES NOW LOWER IN PRICE

London, Ont.

New prices went into effect recently on some makes of wood handles, thus bringing about reduction of approximately 10 to 20 per cent. The new selling prices are net list.

MODERATE SALES FOR PUTTY

London, Ont.

The new quotations on putty have evidently brought forth an increase in demand at the lower price levels. Following are the prevailing quotations:

Standard, 100 lb. drums	6 30
Do., 25-lb. drums	6 55
Pure, 100-lb. drums	7 80
Do., 25-lb. drums	8 05

ELECTRIC HEATERS NOW SELLING

London, Ont.

With the advent of the chilly evenings, a noticeable increase has been recorded in the number of sales for electric heaters. Prices are unchanged as follows:

ELECTRIC HEATERS—	List
Majestic single coil, No. 7, each	$11 00
Do., double coil, No. 8, each	16 00

Less 27½ per cent.

SPADES AND DIGGERS STILL IN DEMAND

London, Ont.

Merchants report that there is now a seasonable sale for drain spades, post hole diggers, and shovels. There has been no change in prices, the quotations remaining at list less 45 per cent.

WINNIPEG MARKETS

WINNIPEG, October 29.—A great many lower prices have been made this week on hardware commodities. Some of the most important changes recorded are black and galvanized sheets, globe files, lamp and lantern globes, wrought iron couplings and nipples, and alligator wrenches. Business has been improving a little during the past few weeks owing to the demand for seasonable lines.

WROUGHT NIPPLE PRICES MARKED DOWN

Winnipeg

Prices have been reduced on wrought iron nipples and following are the latest discounts.

WROUGHT NIPPLES—(Close or Short)—
4 inch and smaller, 45 per cent. off.
4½ inch and larger, 35 per cent. off.
Long—
4 inch and smaller, 55 per cent. off.
4 inch and larger, 45 per cent. off.

REVISED DISCOUNTS ON WROUGHT COUPLINGS

Winnipeg

Lower prices are quoted this week on wrought iron couplings and the new discounts are as follows.

WROUGHT COUPLINGS—⅛-inch to 4-inch, 20 per cent. off; 4½-inch and larger, 5 per cent. off.

LOWER QUOTATIONS ON LANTERN GLOBES

Winnipeg

New prices are recorded this week on lantern globes and are somewhat lower. Following are the new prices:

LANTERN GLOBES—(Regular and short).—
In lots of 6 doz. to case, $1.45 per doz.
In lots of 3 doz. to case, $1.55 per doz.
In lots of 1 dozen to case, $1.65 per doz.

LAMP CHIMNEY PRICES ARE NOW REVISED

Winnipeg

Lower prices are quoted on lamp chimneys this week and are as follows:

LAMP CHIMNEYS—
Crimp Top, No. 1—
Case lots, per case ... $10 75
½ case lots, per ½ case ... 6 00
1 doz. lots, per doz. ... 1 50
No. 2—
Case lots ... $9 00
½ case lots ... 5 00
1 dozen lots, per doz. ... 1 65

REDUCED PRICES ARE GIVEN ON IRON SHEETS

Winnipeg

Prices have been reduced this week on black and galvanized sheets and business in this line is improving. Following are the new prices:—

SHEETS—

	Black. Per 100 lbs	Galvanized
10 gaugs.	5 70	.....
10 gauge	5 70	.....
14 gauge	5 80	.....
16 gauge	5 90	6 75
18 gauge	6 30	6 90
20 gauge	6 30	6 90
22 gauge	6 35	7 05
24 gauge	6 35	7 05
26 gauge	6 40	7 20
28 gauge	6 65	7 80
10¾ oz.	.....	8 20

ALLIGATOR WRENCHES NOW QUOTED LOWER

Winnipeg

A drop in price for alligator wrenches has been recorded this week; they are now quoted as follows:

ALLIGATOR WRENCHES—
No. 1, per dozen ... $2 00
No. 2, per dozen ... 7 20
No. 3, per dozen ... 14 40
No. 4, per dozen ... 22 00

CHANGE DISCOUNT ON GLOBE FILES

Winnipeg

The discount on globe files has been changed but does not affect the net prices to any great extent as the former discount was 37½% off the list and now it is 60 per cent.

PITTSBURGH MARKETS

PITTSBURGH, October 20.—The improvement in the iron and steel situation that has been practically continuous since the middle of July is not interrupted, but in some quarters there is disappointment that the gains in the past few weeks, since the midsummer period ended, have not been more rapid. The proportionate gains, however, have not been bad at all. The steel trade had a very long road to travel from the state of extreme depression, altogether unprecedented in extent, that prevailed last June and July, and the fact that the trade is still very far from a condition of reasonable activity is due to the distance to be covered being large, not to the rate of recovery being particularly low.

Production Rates

Demand for steel is measured by production rates, since with exceptions that are almost insignificant from the tonnage standpoint, buyers are ordering steel only against actual requirements and the steel is being produced and shipped practically as fast as ordered. One exception is that buyers of sheets were moved to stock up a little by last month's advance in price, buyers being permitted to cover at the old prices if they would furnish actual orders and specifications (not contracts) and accept deliveries as rapidly as the mills cared to make them.

Production of ingots thus far this month has been at above the September rate. Last week the Steel Corporation produced at the rate of about 40 per cent. and the week before that, the week ending October 8th, at over 45 per cent., but that was a particular bulge, the departments scheduled for operation producing considerably more tonnage than had been expected in the scheduling. Probably the independents did not operate nearly as well, but it seems safe to forecast that the October ingot production will prove to have been at above 35 per cent. of capacity, when the regular report is made early next month. That would represent a fair gain over the September rate, and would be nearly double the rate at the low point, in the fore part of July. Such a recovery is really rather rapid, and the disappointment felt in some quarters just now may properly be ascribed to unreasonable impatience.

An important point is that all the appearances indicate that whatever gains the steel industry makes at this time will be permanent. There is no overproduction or overstocking, and actual ultimate consumption is bound to increase rather than decrease, while production for several months past has obviously been at less than the rate of consumption, since there has been liquidation of stocks of steel in the hands of buyers, and of stocks of manufactures of steel in the hands of manufacturing consumers and distributors.

Price Conditions

On the whole, the structure of finished steel prices is tending to stiffen. This stiffening is not attributable to the usual influence, of demand exceeding supplies, for in every branch of the finished steel trade there is surplus capacity, but is due to the mills trying to get prices to a level with production costs. It may be asked why mills do this when they allowed prices to decline as they did, when costs were higher than they are now. The answer given in some well informed quarters is that the mills were endeavoring to find a level at which buyers would take hold freely. They considered losses as of secondary importance if by taking losses for a time they could produce a large increase in steel consumption and get things going again. It may have looked, in June and July, as if there was simply competition, perhaps unreasonable competition, but there was method in the price tactics after all. The whole country was calling for "liquidation" in prices, and early in the year the steel industry had been criticized in not a few quarters for standing in the way of progress, for refusing to deflate. Then the steel industry "came back" at its critics. There can be no argument about this, for price comparisons make a plain showing. The Department of Labor's index numbers of commodity prices at wholesale are generally accepted as indicative. The department takes average prices in 1913 as 100 and then finds that July prices stood at 148 while in August the index number came out at 152, showing a slight upward reaction and indicating that price liquidation, in general, had come to a halt. Now as to finished steel, a weighted average of the representative products, bars, shapes, plates, wire, pipe, sheets and tin plate, at the recent low point (before the September advances in wire and sheets) shows an index number, based on the 1913 average, of 135, which is well below 152 or 148.

This stiffening tendency in steel prices is most marked at present in bars, shapes and plates. Since early in August there have been sellers of all three products at about 1.60c, if the order were fairly attractive, but the number of sellers at this level has been decreasing. A fortnight or more ago the Carnegie Steel Company firmed up to 1.65c on bars and 1.75c on shapes and plates. Several independents are on that basis.

In sheets there is also what may be called a stiffening tendency. In fact, the majority of independents have already announced a $5 a ton advance, making their asking prices 2.50c on blue annealed, 3.25c on black and 4.25c on galvanized. The object, of course, was to drive in orders at former prices, which represented an advance of $5 a ton over prices prevailing in the fore part of September.

Some Arguments for Painting This Fall

Harvesting Earlier than Usual this Year Leaves Farmer Unusual Length of Time to Paint and Repair Property—Educating Farmer to Paint His Barns—Building Contracts Show Increase in Property Constructed—Value of Personal Contact with Customers

By H. E. MIHELL, Imperial Varnish & Color Co., Toronto.

TWO exceptional circumstances lend themselves to creating good fall painting business this year. Retail hardware merchants should recognize the opportunity that rests in these and arrange their plans accordingly.

Harvesting this year has been generally earlier than the average and is giving the farmer an unusual length of time to paint and repair his buildings.

The farmer's usual excuse that he never has the time to paint will prove no alibi to the aggressive paint man who goes after this business.

A recent canvass by an aggressive paint salesman over a wide range of farming community, readily showed that a great majority of farmers have come to realize the fact that the painting of barns ought to be carried out.

The aggressive advertising of the paint trade and the editorial service of most of the farm journals have done a great deal to bring the farmer to this point of conviction.

There is one big factor needed and that is the necessity of his local dealer getting personally in touch with him and bringing that conviction into buying action.

Barrels and Fives Rather Than Quarts

Paint dealers should keep in mind that this class of business can be done in barrels and fives rather than gallons and quarts and can be easily developed into a quantity business that would have no small volume at the end of the year.

The fall, besides being the logical time of the year for the farmer to paint, is likewise the best time of the year for paint to give maximum service.

Every stick of lumber in his property is bone dry and just in the right condition to receive paint.

The second circumstance exists with the decided increase in the number of construction contracts awarded during August, 1921, and which amounts to $36,307,200.00 throughout the Dominion. A recent comparison of contracts awarded during August of the past four years shows a decided increase this year. August 1920 was the next highest with a total of a little over twenty-three million.

August likewise shows an increase of over 100% above July, 1921.

This increase is very encouraging as it shows that despite the general idea of a depression, there is actually a very much increased activity in construction. This activity denotes a revival of interest in business, industrial, residential and government construction work.

This construction will not only absorb the attention of the building trade, but there is also an indication of an industrial revival that will absorb other classes of labor as well.

The paint and varnish trade is bound to benefit by whatever increased activity takes place in any of these directions.

The paint man who is alive to this gradually increasing chance for paint sales, will make fall painting a strong argument to have all such construction work coated before the hard winter days set in.

H. E. MIHELL

Imperial Varnish and Color Company, Toronto, who gives Hardware and Metal readers some timely hints which are of special value in stimulating paint and varnish trade this Fall.

More Personal Contact

But there is one important factor in distribution which the retail paint man must come to realize more and more if he is to continue to function in that position and that is the promotion of greater personal contact with the ultimate consuming public.

The paint trade has spent immense sums in printers' ink, which has lead the way to tremendous advances in distribution.

Scarcely a paint man has failed to grasp the significance of the "Save the Surface" campaign through the medium of printers' ink, but it needs the "personal contact" of an enthusiast to those who have not yet put conviction in regard to paint into actual buying.

Personal contact is an absolute essential in closing many deals. Nothing else will ever take its place entirely. The retail distributor has more opportunity for personal contact with the consuming public than any one else. It is his necessary function in selling. But if he fails to carry out his part he must look out, for there will be ways and means developed that will usurp his position. This statement is made

Jap-a-lac Prestige

Not alone because it was the original "Household Finish," but because true quality has been maintained. From the time the first package was sold, Jap-a-lac has held first place in its field.

Through all these years Jap-a-lac has gained prestige. It has found new ways of serving its users and has lengthened its term of usefulness. It is now standard in paint and hardware stores throughout the Dominion.

This prestige is an asset to every Jap-a-lac Dealer. It is "good will" that expresses itself by sure and steady profits in the cash drawer. If you are not now carrying Jap-a-lac let us tell you more about the opportunities it represents.

Remember, too, that the Glidden line has now been completed by the addition of house paint—Glidden Endurance Paint—and that the Glidden proposition is one with which every dealer should be familiar. **Write for literature to-day.**

"Save the surface and you save all" *Paint & Varnish*

THE GLIDDEN COMPANY, Limited
TORONTO, ONT.

BRANCHES: Montreal and Winnipeg

Danger of "The Glue-Size Menace"

"Technican" Points Out The Danger of the Use of Glue-Size as an Undercoating for Certain Kinds of Painting—A Point on Which All Salesmen Should Be Informed

WHAT shall I use as an undercoating for paint, is a question that is asked several times each day in almost every hardware store in Canada from coast to coast. In order to build up a successful paint and varnish department it is most important that the salesman should be well informed regarding the proper application of paints and varnishes.

A great amount of trouble has been caused to retail hardware merchants and also paint and varnish manufacturers through improper treatment of surfaces to be painted or varnished. A recent issue of "Stephens' Paint News", published by the G. F. Stephens Company Limited, Winnipeg, directs attention to one menace that should be carefully guarded against by the hardware trade throughout Canada. Hardware and Metal is re-printing the article in full for the benefit of all concerned, an article which gives some valuable information for hardware merchants and their salesmen:—

There is a danger of glue-size becoming little short of a menace to the paint trade. Not only in amateur circles, but amongst painting mechanics as well, there seems to be a lamentable ignorance as to what glue really is, what it should be used for, when it should be used and HOW it should be used. Here, in effect, is how the evil works out:—

Bill Brown, a supposedly competent paint mechanic, undertakes to paint the interior plaster work of a house, or a room. Either thorough ignorance of the fundamentals of his trade, or through the erroneous impression that he is going to save time, Bill marches to the scene of his future activities, takes a look around, cocks his head to one side, half closes one eye and drawls, "Well, I guess we'll slip on a coat of glue-size first." Fine business! Of course it is—for Bill. However, the job turns out all right, Bill gets his money, and everybody concerned is satisfied for the time being. But in the course of a few months—or it may be a year or two, the paint starts to peel off in spots (or rather the glue does) and the customer starts to howl.

Bill comes on the scene of his past depredations—all het up. He looks sorrowfully at the mess, shakes his wise old head and remarks, "It beats me how the PAINT could have gone like that."

Reader, note that word in black-face type—paint. Bill talks backways, forward and in circles about that Paint, but NEVER by any chance does his disquisition touch on the subject of GLUE-SIZE—not at all. Instead, either through ignorance, or a desire to save his own reputation, he tells his customer that it's the paint manufacturers' blame and threatens what he will make them do in the way of putting the job right. Meantime, before his trouble has come to a head, Mrs. Smith has heard (the plumber told her) that one can get good results with flat-wall paint by first coating the walls with glue-size, and so she slaps on a healthy coat of good thick glue-size—and in about six months the paint (?) loosens up in fair-sized chunks, curls up—and drops in her soup, her pies and other edibles, while an occasional flake nestles daintily on her coiffure. Then the trouble begins!

Mrs. S. now sits down at the old family escritoire and pens a letter to the paint manufacturer in which she threatens never to use his **PAINT** again and finishes up by saying that she certainly will never recommend Blank's Paint to any of her friends again. This wild form of blackmail usually works the trick and the manufacturer doles out the necessary solace in the shape of an extra gallon or two of paint.

Now let us see just what all this trouble and fuss is about—and if the manufacturer really is at fault. In the first place, what is glue? Avoiding all scientific or chemical terms, let us consider the common dictionary definition: "Glue—A hard, brittle, brownish gelatin, obtained by boiling to a jelly the skins, hoofs, etc., of animals; when gently heated with WATER, it becomes viscid, and tenacious, and is used as a cement for uniting substances."

There, right in that definition, if we examine it closely, is the explanation not only of WHY glue is sometimes used as a size (and used rightly at times,) but also why paint will readily peel under certain conditions. The fact that it is viscid and tenacious renders it a good first coater—under certain conditions. The fact that it is soluble in water (not in oil) makes possible its use under paints composed of oil and turpentine—because it will not "work up" under the brushing necessary to the proper spreading of paint. But mark this well—the fact that glue is soluble in water is the one good and sufficient reason why it should never be used on plaster walls—because there is ALWAYS a certain amount of moisture in plaster—sometimes more sometimes less—and just as soon as the moisture hits the dried glue, it starts to curl up and fall from the surface—bringing the paint along with it, of course.

The question then arises—WHEN should glue-size be used as an undercoating for paint. I will attempt to answer that only in a general way, because the multitude of uses which glue-size can be put to precludes the possibility of handling the subject fully within the scope of a brief article.

Glue-size, first of all, should be made up in a weak solution and can be used with a certain degree of safety on the following surfaces: On picture frames or mouldings which have been surfaced with plaster of paris. On porus earthenware pots, vases or objects of art cast in plaster and which require to be decorated. On thoroughly seasoned lumber for use as furniture—but never on exterior doors. It can also be used with safety, in fact, it is the only size to use on top of old dyed burlap that requires painting. For this class of work oil size of any kind is no good as it will not stop the tremendous suction on the bare plastered walls, under paint—NEVER.

ARGUMENTS FOR PAINTING THIS FALL

Continued from page 50

with due consideration of developments that are shaping themselves all over. It applies to many other lines as well as the paint trade.

The fall painting arguments being advanced in the "Save the Surface" advertising and the "clean-up and paint-up" campaigns have created one of the grandest opportunities that has ever been presented to the retail paint and varnish merchant. It is up to him to cash in on the present psychological condition created by these two campaigns, and the local economic conditions mentioned at the beginning of this article.

If he will take advantage of these, he will do his full share in paving the way towards making 1922 the greatest paint and varnish year.

CANADA'S IMPORTS AND EXPORTS OF PAINT, VARNISH, COLORS, ETC.

U. S. imports from Canada of zinc oxide, sulphide and lithopone, in August 1921, amounted to 204 lbs. while other paints to the value of $8,598 were imported. Linseed oil to the amount of 82 gallons was imported. U. S. exports of dry colors to Canada in that month amounted to $16,134 while other colors were imported by Canada from the U. S. to the value of $21,163. Red lead amounting to 18,427 lbs. valued at $1,452 was imported and white lead, 4,683 lbs. valued at $318. Linseed oil to the amount of 102 gals. valued at $92 was imported. U. S. exports of ready mixed paints in that month to Canada totalled 6,322 gals. valued at $7,070. Varnish to the amount of 5,945 gals. valued at $7,926 was imported by Canada. Zinc oxide to the amount of 280,946 lbs. valued at $21,793. All other paints valued at $54,472 were imported from the U. S. in August.

NEW FACTORY FOR BRIDGEBURG

Bridgeburg, Ont.—The Canadian Tool Company is arranging for temporary factory space, but plans to construct its own plant later.

HILLCREST
A GUARANTEE OF QUALITY

HILLCREST

Varnish Stain

This is an article for which a steady market exists. This handy preparation stains and varnishes at one operation, dries hard in twelve hours with a durable gloss and gives a handsome imitation of the natural wood.

In these days housewives are handy with the paint brush. The salvaging and renovation of old chairs, tables, and other furniture has become a recognized part of house cleaning. Make the most of this with good displays and tactful suggestions of uses for Hillcrest Varnish Stain. The Hillcrest Salesman has good tips on this.

We also Manufacture

Hillcrest Colors in Oil, Hillcrest Colors in Distemper, Hillcrest Colors in Japan, Hillcrest Porcelain White Enamel, Hillcrest Ebony Black, Spanish Enamel, Hillcrest Bath Enamel, Hillcrest Motor Car Enamel, Hillcrest Paste Filler, Hillcrest Crack Filler, Pearcy's Pure Prepared Paints, Hillcrest Barn Red Paint, Hillcrest Outside Gloss White, Hillcrest Inside Flat White, Hillcrest Aluminum Paint, Hillcrest Carriage Paint, Hillcrest California Gold Paint, Hillcrest Graphite, Machine Paint Liquid, Hillcrest Orange Shellac, Hillcrest White Shellac, Hillcrest Oil Stain, Hillcrest Varnish Stain, Hillcrest Shingle Stain, Cottage Shingle Stain, Hillcrest Varnishes—all kinds, Hillcrest Pure Lead, Hillcrest Bronzing Liquid.

Hillcrest Paint Products

Watch For Our Semi-Monthly Bulletin Next Saturday

Weekly Paint Markets

MONTREAL

MONTREAL, October 20. — Linseed oil, with quotations 2 cents higher, occupies the feature attraction in paint circles this week insofar as price changes are concerned. Other products, while remaining unchanged, are without exception firmer in their undertone.

The advance in prices on linseed oil is the result of a slightly improved condition in the market, but is accepted by many as only the result of fluctuations which have featured the oil market for some weeks past. Although a slight reaction may be looked for it is not expected to be of any great extent and present levels will in all probability hold fairly well during the following weeks at least. Turpentine has made slight advances in the South, but locally it is holding firm. There are a few expectations of much higher prices than those now ruling, but from present indications there is little likelihood of a recession. Shellac remains unchanged with previous quotations holding and the market also firm. Stocks are not heavy and if dealers are forced to purchase for replenishing stocks, an advance in quotations is likely, as outside markets are very firm with price increases recorded in some quarters. Putty and white lead show no alteration from the previous weeks either in prices or market tendencies.

Immediate requirements and bookings are still causing activity among the paint houses, both factors contributing to a satisfactory volume of business. Prices on all paint, varnishes and specialties remain at the recent revision with a firmer tone in most lines owing to an increase in the cost of many raw materials. Importers of window glass now report a shortage of supplies, due mainly to many Belgian manufacturers closing down recently. Prices are therefore somewhat strengthened and held firmer to the Montreal net list.

LINSEED OIL QUOTED 2 CENTS HIGHER

Montreal.

With a slight improvement noticed in the linseed oil market, prices are advanced 2 cents per gallon, bringing the quotations to 88 cents for raw and 90 cents for boiled oil in one barrel lots. The higher standing of the market at present is accepted as more or less of a temporary nature and the future is still held uncertain. Fluctuations continue, and much of course, depends on the demand, as this usually holds very well until the close of the year, commencing again in the very early spring. Outside markets also report a slight advance this week, crediting the cause to the Argentine and a rise in exchange value. Current local quotations are the following:

LINSEED OIL—

	Raw.	Boiled.
1 to 2 barrel lots, per gal.	0 88	0 90
3 to 5 barrel lots, per gal.	0 86	0 88

Less barrels, add 10 cents per gallon.

FIRM TONE CONTINUES IN SHELLAC

Montreal.

The general situation on shellac remains unchanged this week, quotations holding firm at previous levels. Business continues seasonably light, the firm tendency offered by the strength of gum shellac. With the scarcity of demand on the local market, stocks are in fair shape, this being the factor in holding present prices. It is stated that if new supplies had to be bought at the present time, prices would have to show a slight increase as the conditions on the outside market are defined as "stocks light and business picking up." Quotations for the present locally are:

SHELLAC—

Orange shellac, in barels	$4 15
Do., in one gal. jugs	4 50
White, in barrels, or 5 gal. jugs	4 65
Do., in one gal. jugs	5 00

TURPENTINE FIRMER: NO PRICE CHANGE

Montreal.

The current local quotations on turpentine still hold at $1.07 per gallon in one barrel lots, with the undertone a little firmer than last week. A slight advance is recorded on the Southern market, following the easier tone in the past week when the market receded from the previous gain and spurt in quotations. Locally dealers are still of the opinion that turpentine cannot be sold with prices much in advance of present figures, as when it was selling at $1.15 the demand immediately fell off. The demand is fair, and although paint manufacturers are cautious in their buying, their requirements will still offer a fair amount of business. Stocks also are by no means heavy, and although ample for present needs, any spurt in demand would add further to the now unsettled outlook. It is stated in some quarters that present prices are fair buying figures, but it is likely that purchasers will still hold off and await future developments. Following are existing quotations.

TURPENTINE—	Imp. gal.
1 barrel lots	$1 07
2 to 4 barrel lots	1 05
Broken lots	1 17

ACTIVE SEASONABLE DEMAND FOR PUTTY

Montreal.

The anticipated increase in demand for putty is now being realized, and with the season now well on hand sales are being forwarded in satisfactory numbers and volume. To the latter it might be said that quantities are not as heavy as in past years, but this offers no discouragement as it is felt the buying movement will continue to greater length than in past seasons. Prices are steady to firm at the following levels:

PUTTY—

Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk barrels, 800 lbs.	4 00	4 50	4 75
Bulk drums, 100 lbs.	5 00	5 50	5 75
Do., or tins, loose, 25 lbs.	5 25	5 75	6 00
Drums or tins, cased, 25 lb.	6 00	6 50	6 75
1-lb. tins	8 75	9 25	9 50

Pure Linseed Oil Putty, $1.50 per 100 lbs. ad-

SATISFACTORY VOLUME OF PAINT SELLING

Montreal.

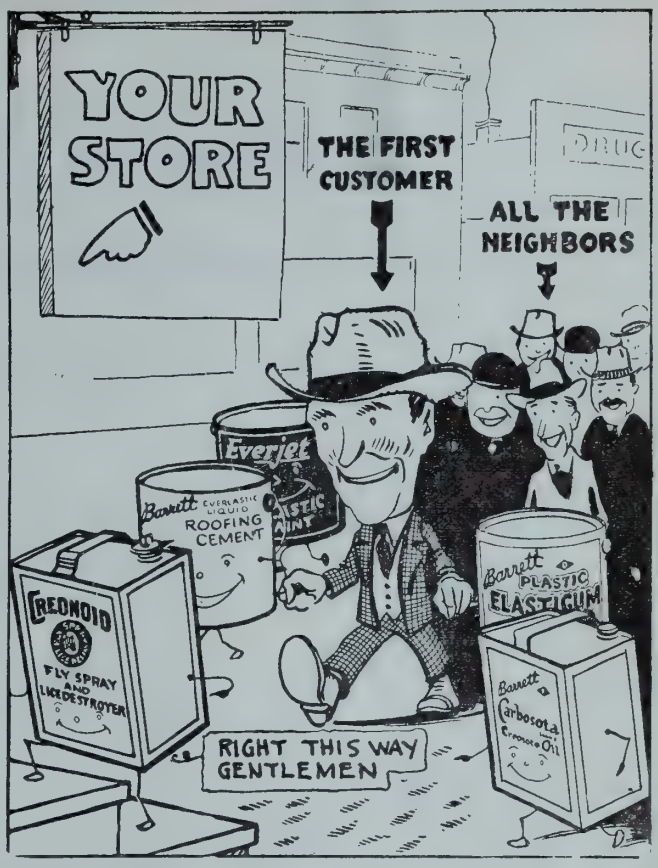
Activity continues the key-note of reports from paint manufacturers on present business. Immediate requirements of dealers throughout the outside territories are still coming to hand in satisfactory volume. The present fall has offered ideal weather so far, for outside painting and there are yet a number of weeks before a cessation will be necessary. Bookings are also lending encouragement for next year. These, while not as numerous up to the present, as other years, are in many cases of greater volume. Shipments for future are only being forwarded to the outlying districts, those closer to the manufacturing centres being held for winter and early spring months. Prices on all paints, varnishes and specialities are holding at latest revision with the undertone firming in most cases during the past few weeks when the cost of many raw materials have shown slight advances. A steady situation, however, is looked for in the paint industry for the coming months.

SHORTAGE OF WINDOW GLASS CAUSES FIRMER TONE IN MARKET

Montreal.

During the past two weeks local stocks of window glass have become lighter, until at present, dealers are more than a little concerned over the situation. Imports from Belgium have not been arriving, and now comes the report from that field that many manufacturers are closed down and shipments will not be made. Reasons for the cessation of glass manufacturing

Continued on page 56



You make the first sale—then the Barrett Specialties bring in the customers and sell themselves

Big nation-wide advertising and a reputation for dependable products have made the name "Barrett" a tremendous selling force. It's like a magnet drawing trade into your store. And when a customer buys the famous Barrett Specialties, he'll find them so far ahead of competitive brands that he'll be sure to tell his friends about them—and come back for more himself.

Our records show that the popularity of these high grade Barrett Specialties is increasing by leaps and bounds. Lay in a sufficient supply of them—and **your** sales will soon show profits piling up at a rate that will do your heart good.

There is Creonoid, the ever popular fly-oil, lice-destroyer and cow-spray, which makes the farmers' profits greater by ridding livestock and poultry of troublesome flies and lice.

There is Everjet Elastic Carbon Paint—a glossy, black, durable paint, which prevents rust on all outdoor metal work, and prevents corrosion in metal exposed to the action of steam, acids, and alkalies. A proven protective paint for every purpose.

And Plastic Elastigum — a "plastic cement of a hundred uses." It repairs leaks in roofs and flashings, re-lines gutters, stuffs cornices—and does a multitude of other things. It is waterproof, plastic and extremely durable.

Old prepared and "rubber" roofs can be made as good as new with Everlastic Liquid Roofing Cement. Easy to apply and dries quickly, closing up the small holes, making the roof waterproof and weather-proof.

Carbosota is a liquid creosote oil used for the preservative treatment of structural timber, by means of Open Tank process or surface treatments. It offers a practical means of reducing losses from wood decay and may be employed by anyone.

MONTREAL PAINT MARKETS

(Continued from page 54)

to quite an extent are indefinite at present, reports stating the recent quiet market and prevailing prices are the chief causes. Whatever the cause, it is unfortunate that a scarcity should prevail at this time, and some importers are now anxious regarding their future business.

This has caused a firmer tone in the market, and while prices remain at Montreal net list, the extra 10 per cent is not offered to such an extent as formerly. The opinion is expressed in some quarters that prices will advance if there is no relief in the near future. This is not taken seriously as yet, however, and for the present the market is much firmer at previous quotations, found on current market pages.

TORONTO

TORONTO, October 30. — Linseed oil supplies the chief price development on the paint markets this week, a further decline of 3 cents per gallon in one and two barrel lots; and in boiled to 90 cents per gallon. The downward revision is attributed to the recent easier prices on flax seed markets, and the movement to an easier price tendency has been accentuated locally through reported lower quotations appearing on the current markets. Reports recently received from other primary markets show that business is of a light nature, and generally spasmodic. No large sales have been recorded for some time. English oil has also been a factor in the easier price levels on southern markets, as this can be purchased, duty paid, at a figure below that offered by domestic producers. The bulk of the present activity is said to be against previously placed contracts.

Turpentine markets have been quite during the week, with prices holding firm and unchanged. There has been little new business, the prevailing buying movement being for immediate requirements. It is inferred that consumers are in the southern primary turpentine markets, but at present are content with smaller quantity purchasing, pending future price developments. Prices on Savanah markets are reported as unchanged, with the export demand having fallen off considerably.

Shellac gum has recently been advancing in price, and this strength is reflected with a much firmer tone in shellac quotations. Current sales for white lead in oil have shown signs of slackening, but there continues a fair movement in paints and the allied products. Window glass and putty are commencing to develop normal Fall activity, with prices on window glass being firm, owing to a temporary shortage in some sizes.

LINSEED OIL QUOTATIONS ARE AGAIN LOWERED

Toronto.

A further decline of 3 cents per gallon is announced this week on both raw and boiled linseed oil. This change brings quotations to 87 cents per gallon on raw in 1 and 2 barrel lots, and 90 cents for boiled. The weakening of oil prices is attributed to the easier quotations on flax seed, coupled with the lower price levels that have developed locally. As reported in a recent issue of Hardware and Metal, the current demand for linseed oil has fallen off considerably, with buyers adopting a waiting attitude. Following are the revised quotations:

LINSEED OIL—		
1 to 2 barrel lots, per gal.	0 87	0 90
3 to 4 barrel lots, per gal.	0 86	0 89
6 to 9 barrel lots, per gal. ...	0 84	0 87

Less barrels, add 15 cents per gallon.

TURPENTINE PRICES HOLD WITH STOCKS LOW

Toronto.

While the price on turpentine is practically unchanged this week, stocks are stated as being fairly low, and the firm undertone generally prevails. The recent higher price levels at southern primary markets are still holding, principally due to the fact that large distributors are not in possesion of very much turpentine at present, and Japan and South American consumers have manifested increased interest in market offerings. There is comparatively little turpentine being exported to Europe, but orders for immediate requirements supply the chief activity. At the advanced quotations ,there have been no sales of consequence reported. The following prices are generally in effect locally:

TURPENTINE	Imp. gal.
1 barrel lots, ...	$1 15
2 to 4 barrel lots	1 14
5 gallon lots	1 30

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton London, Brantford, Collingwood, Guelph, Windsor, or Montreal, but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots, 15 cents per gallon additional.

LOOK FOR SEASONABLE SALES IN PUTTY

Toronto.

The general situation in putty is quoted as fairly satisfactory, with the current sales steadily increasing in volume. The recent price reductions, coupled with the usual brisk seasonable activity, supply grounds for optimistic expectations for a fair proportion of trading during the fall season. Prevailing quotations follow:

PUTTY— Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk bbls ... .$	4 45	$4 95	$5 25
100-lb. drums	5 45	5 95	6 20
25-lb. irons	5 70	6 20	6 45
Bladders in bbls.	6 70	7 20	7 45
Do., less quantities . ..	6 95	7 45	7 70

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices for similar quantities

FIRM TONE IS EVIDENT IN SHELLAC MARKETS

Toronto.

The current demand for shellac on the primary markets is stated as good, and price levels are very firm. Shellac gum quotations have recently advanced, and the general market tendency in shellac points toward higher price levels at present. Whether any marked development in this direction will materialize, is dependent upon the duration and force of the present trend. The range in quotations previously in evidence on the local markets has now been evened up to some extent.

STOVE PRICES STABLE

(Continued from page 33)

head costs is not in keeping with the tendency toward economy and efficiency which is recommended to the trade today.

Retailers Hesitating

Discussing the various tendencies of certain classes of trade Mr. Gurney pointed out that the conditions outlined apply equally to rural and city trade. Merchants in both cases are restricting buying and in many cases to the point where actual loss of possible business is resulting. Considerable repair business has been done on stoves and furnaces by these merchants' customers during the past two years but Mr. Gurney is of the opinion that the time has come when the merchant should take steps to point out the false economy of carrying this plan too far with the resultant effect of having a repair business permanently take the place of much of his former stove business.

In some cases the hesitancy of some merchants to base prices on replacement values is said to be holding up a return of normal stove activity. Particularly in the rural districts where the farmer has had to take reduced profits on his products, is this tendency exerting the greatest effect, for farmer customers hesitate to buy when they fail to see any reduction in prices from those of the high price level period. Mr. Gurney's advice to these retail merchants is to base prices on replacement values, as manufacturers and others have been forced to do, in the interests of a more rapid movement of merchandise and the encouragement of confidence on the part of buyers. Such a plan it was pointed out will help to stimulate turnover and the merchant who follows this plan will benefit as much as anyone. Credit and collection conditions were said to be in very good condition.

A point emphasized by Mr. Gurney was that while orders are forthcoming in small quantities yet the total business for the season will probably be found to compare very favorably with the past. Meanwhile he points to the dangers of salesmen and others unconsciously spreading depressing propaganda by classing trade of this nature as "poor business" because "business is not poor, it is good."

2 Kinds of Advertising

The first kind of advertising is what we ***say.***

The second kind is what the brushes ***do.***

Both kinds are good—but the second kind is best.

Through the pages of newspapers, magazines, farm journals, by signs and posters, we say to the public: "Rubberset Brushes defy destruction---the bristles are gripped everlastingly in hard vulcanized rubber---Rubberset brushes must make good---or *we will!*"

These are the claims we make.

These are the claims we substantiate. That is the advertising which sends people into your store to buy Rubberset Brushes.

The second kind of advertising is done by Rubberset Brushes themselves.

They do hold their bristles!
They do defy destruction!
They make good!

Do you handle the original and genuine Rubberset Brushes?

"There is a *Rubberset* Brush for every use to which a bristle brush is put."

Rubberset Brushes are a profitable, satisfactory and clean-cut line to handle.

Write your jobber re Rubberset, or drop us a line.

Are You Ready For A Big *SKATE Season?*

You may have noticed that a "soft" winter is almost always followed by a "hard" winter. Therefore if "Nature" runs true to form a hard, cold season is coming.

Why not go over your stock now and check up your different models of C. C. M. Automobile Skates?

Is there a danger of running short of certain models and sizes and losing sales?

Sorting orders can *now* be filled complete.

C·C·M· *Automobile Skates*

Made-in-Canada By
Canada Cycle & Motor Co., Limited
WESTON, ONT.

Montreal, Toronto, Winnipeg, Vancouver.

Also Makers of

C.C.M. "Bob" Skates and C.C.M. "Perfection" Ankle Supports.

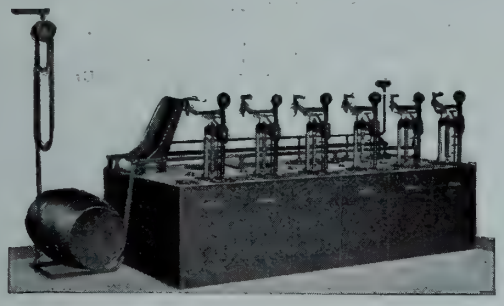
Absolute Safety in Handling Paint Oils

Dealers are assured of a minimum fire hazard when they handle their paint and lubricating oils with Bowser Equipment.

Bowser Equipment has never started or contributed to a fire.

Bowser also combines Great Economy with this Safety. The all-metal, evaporation-proof Tanks prevent leakage and gumming. The Piston-Type Measuring Pumps deliver exactly the amount of oil required directly into the container.

There can be no waste—and the oil is kept *clean*.



Write for Illustrated Booklet C-16

These same Bowser Features also enable you to give better service. This increases your patronage and profits.

Bowser Equipment is MADE IN CANADA by
S. F. BOWSER CO., LTD.
66-68 Fraser Avenue, Toronto, Ontario

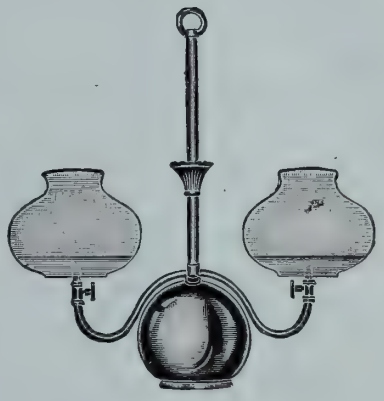
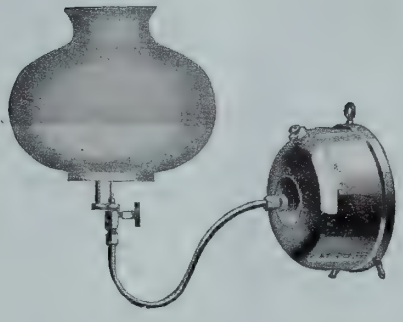
COLEMAN
Church and Store Lighting Fixtures

Right NOW is the time to get your share of the worthwhile and steady profits that come to dealers who handle the Coleman QUICK-LITE Line of Lighting Systems. Everybody wants good light at the lowest possible cost. And that's what you can give them with QUICK-LITE Lighting Fixtures, Lamps and Lanterns.

Right in your locality there are many Stores, Churches, Schools and Public Buildings where QUICK-LITE Chandeliers can be installed to advantage. Nothing like them for good light and plenty of it—at low cost. Get after the business!





Coleman Quick-Lite

Complete Lighting Systems
MADE IN CANADA

Sell themselves by the wonderful pure white light they give. 300 candle-power brilliance from each fixture, lamp or lantern. Make and burn own gas from common motor gasoline. Clean, Safe, Economical.

Put some QUICK-LITE Fixtures, Lamps and Lanterns in your store and windows. Light them. Then watch your sales grow!

Our advertising throughout the Dominion and our many sales helps aid you in selling this nationally known line. Write to your jobber, or direct, for particulars.

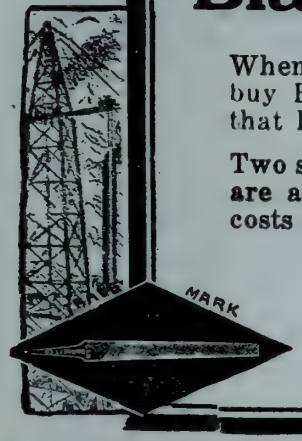
Hobbs Manufacturing Company, Limited.

MONTREAL TORONTO LONDON WINNIPEG

Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Wa-Ko-Ver Stain
Beautifies All Woodwork

Not only does it beautify, but it wears like iron. You will find it pays in future sales always to recommend Wa-Ko-Ver Stain whenever your customers have worn floors or scratched woodwork to renovate. It restores the freshness of the floors or woodwork, pleases your customers, and makes permanent business for you. The established reputation of this effective, serviceable stain makes it a pleasure to sell. Good displays in your windows, on your counters, or other conspicuous places, remind visitors to your store, and people that would otherwise be "passers-by," of their need for Wa-Ko-Ver stain. This sales-maker will handsomely reward a little sales-effort on your part.

At Toronto Exhibition Boy and Slate Value Strikingly Demonstrated

OUR exhibit at this Exhibition easily drew the most attention of any place on "oil row."

Yet there was nothing very striking or very different about it—except the Boy and Slate signs. Three or four of these were placed in advantageous locations outside the exhibit. New epigrams were put on the slates every other day.

These Boy and Slate Signs Did It

They stopped the multitudes. They drew the comments. They got the people interested. The En-ar-co display was *the* oil display of the Canadian National Exhibition.

Just as this Boy and Slate Sign turned the trick in this particular case, so it is doing for dealers in gasoline and oil all over the country.

If there is not a dealer handling our scientifically Refined Gasoline and Lubricants in your territory, you can secure this profitable representation and this powerful Boy and Slate and Epigram Service.

Write us for free particulars. Send the coupon at once to one of our branches convenient to you. This is worth doing—right now. Forward the free coupon to us to-day.

CANADIAN OIL COMPANIES LIMITED

Branches: Toronto, London, Montreal, Quebec, St. John, Halifax, Winnipeg, Regina, Saskatoon, Edmonton, Calgary.

WAYAGAMACK PURE KRAFT

The Word *"KRAFT"* used in connection with

Wayagamack Kraft Papers

means

Strength and Security

THESE, however, are not the only Characteristics of this well-known paper. Another, and perhaps the most important of all, is that owing to its strength a much lighter sheet can be used than is the case with inferior qualities of wrapping paper. As wrapping paper and bags are sold by weight it can easily be seen that this lessens the cost per sheet or bag.

Ask your wholesaler to explain and illustrate this.

Wayagamack Pure Kraft

glazed and unglazed is equalled by few and excelled by none therefore when ordering wrapping paper, bags, envelopes or notion bags,

ask for and insist on being supplied with

Wayagamack Pure Kraft

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

FOR SALE

FOR SALE—FIVE ONE HUNDRED DOLLAR shares in the Canadian Supply Co., Limited, Saskatoon, Sask. What offers? The Hodson Hardware Co., Limited, Maple Creek, Sask.

In reply give full particulars as to ground covered, number of representatives employed and state Commission required. Box 100—Hardware & Metal, 88 Fleet Street, London, England.

If you have anything to sell to the Trade, you should advertise it in this paper.

Practically all big buyers of hardware in Canada are readers of HARDWARE AND METAL.

COLLECTIONS

Our ability to collect accounts has been highly praised by merchants all over Canada. We collect anywhere in Canada and the United States on a strictly commission basis. You are under no obligation to us if we do not collect. We guarantee you a thoroughly honest service. Prompt remittances. Give us a trial. We collect where others fail. Established 1909.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Metal Stamping and Press Work to Order

Also name plates, embossed trade checks, time checks, badges, steel stamps and stencils or anything in steel or brass lettered or embossed to order.

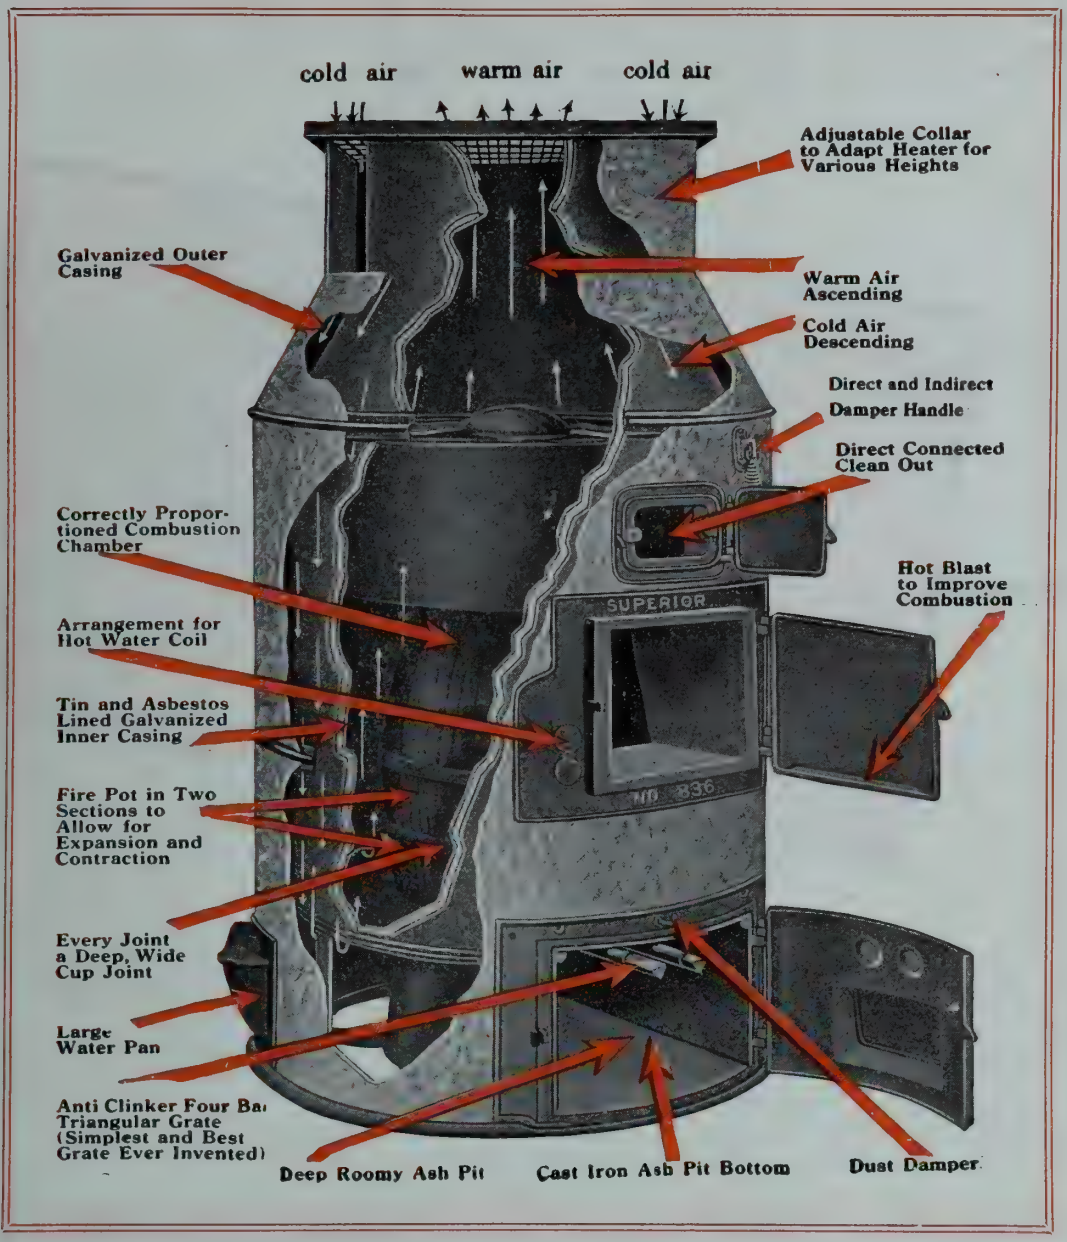
PILOT SUPERIOR PIPELESS FURNACE

The Leader in the Pipeless Furnace Field



It is easy to sell the Pilot Pipeless Furnace. Show your customers the adjustable collar for various heights of cellars; the two-section fire-pot to allow for expansion and contraction; point out the deep, wide cup joints; the deep, roomy ash-pit: the cast iron ash-pit bottom: the dust damper, the direct and indirect dampers; the direct-connected clean out; the anti-clinker, four-bar, triangular grate (the simplest and best grate ever invented.) Customers quickly recognize these superior features when you point them out.

Write today for Literature. This Furnace definitely makes money for Hardware Merchants.

DAYTON

International Business Machines — SPEED ACCURACY ECONOMY

YOUR BANKER can't afford to throw away fractions of pennies - CAN YOU?

Did you ever know a banker who would ignore fractions when computing interest? You have probably, however, time after time, seen a hardware merchant fail to figure fractions when weighing goods in his store.

Bankruptcy has been called "a disease of fractions"—the deadly drain on profits through false money computations, false weights or false measures. It is such "little things" that kill the most businesses.

Old-fashioned scales or unreliable scales will take a merciless daily toll in money and alienate uncountable customers.

DAYTON HARDWARE SCALES

insure to the merchant his just profit on everything he sells—to the fraction of an ounce and the fraction of a cent. Automatic price computations leave nothing to chance or guesswork. No other investment you can make in hardware store equipment can equal in its earning power the cost of a Dayton. A few months' use and it has paid for itself. We shall be glad to explain our plan of easy payments without interest. Write to us today.

You Sell Quality When You Sell These

After all it pays to sell Quality with its larger sales and increased profits.

* * *

Particularly when, as in the case of Canada Paint and Varnishes, Quality is backed by a big campaign of Consumer Publicity and intelligent all round selling co-operation.

* * *

This is the combination we offer you in the C. P. Agency proposition. Paints, Varnishes, Stains, Enamels—a complete line to meet each and every requirement of your trade—complete in quality and in customer satisfaction.

* * *

"Save the surface and you save all" Paint & Varnish

Copy of our interesting booklet "Paint and Varnish as a Profitable Investment" will be mailed you free on request together with detailed particulars of this most attractive agency offer.

Millers Falls Hand Drills

No. 7. A large size drill for shanks up to ⅜, has our favorite star chuck, frame is of solid steel with a 4 in. cut gear and steel pinions including idler to equalize bearings.

No. 343. An all metal drill with hollow handle to hold drills. Has an all steel frame with idler gear. Three jaw springless chuck for round shanks up to 3/16.

No. 5. The old standby to every mechanic and every tool merchant. It has an ever increasing demand with those who know.

No. 1. Has been a standard for many years and by constant improvements has been kept right up to date. The frame is malleable, and it has cut gears and steel pinion. Handle is hollow and contains eight drills. Three jaw chuck for round shanks.

No. 2. Our first and still the favorite of the larger type of drills. It is of a high grade construction with single speed. Has a hollow handle and a three jaw chuck for round shanks up to ⅜.

A SELECTION of six favorites. Have you these in stock? Millers Falls Tools have been standard for over fifty years. Our long experience is your sure guarantee.

MILLERS FALLS COMPANY
MILLERS FALLS, MASS.

Makers of "Millers Falls" and "Universal" Hacksaw Blades

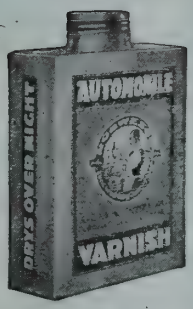
'RICE LEWIS' NEWS



Winter Driving and the Winter Overhaul Bring Many Winter Needs

Tire Chains
Weed and Rid-O-Skid chains in all sizes. Cross pieces for repairs.

Motor Heater
The Mayall Motor heater for use in the garage equipped with electric lights.

All-Wool Robes
Genuine all-wool robes in attractive colorings and patterns.

Foot Warmers
The Hughes charcoal foot-warmers are good sellers for winter driving.

Porcupine Boots
Add many miles to tires with weak spots. They stay put.

Radiator Cleaner
Removes scale and rust; overcomes heating.

Radiator Cement
Stops up the small leaks in the radiator.

Anti-Freeze
Johnson's and Mitchell's. The latter is in liquid form, low evaporation.

Carbon Remover
Johnsons and Norwesco, both reliable makes.

Schroeder's Valve Parts
Winter always brings its valve trouble. Be ready.

Headlight Lenses
Sills and Shalers, both Government approved.

BatteryTe ster
The "Break-Not"—best hydrometer syringe on the market.

Prepared Wax
Johnson's and Norwesco, liquid or paste form.

Top Dressing
Johnson's and Norwesco dressing stands winter wear.

Auto Varnish
The winter overhaul calls for a good varnish. We supply the Norwesco.

Valve Grinding Compound
Norwesco valve grinding compound in handy box.

Iron Cement
Mends cracks, blemishes, etc. in iron and steel castings, radiators, etc.

Engine Enamel
Will not burn off, makes engine clean as new.

Storage Jack
For jacking up car as it stands in garage, saves tires.

"Canada"

Flexible Steel Door Hanger

The real test of a hanger is performance "on the job." The "Canada" runs smoothly and easily on anti-friction steel-roller bearings. It uses the same track as our famous "National" Hanger.

The Braced Rail, shown above at the left, is 1¼ x 3-16 inches and is furnished in lengths of 4, 6, 8 and 10 feet; 8 lengths to the bundle.

The farmer was never more prosperous than to-day and probably was never more inclined to build and repair and generally to improve his buildings than now. 1921 will see a particularly active season in this way. The hardware merchant may expect unusual sales of builders' and garage hardware this year. It brings new customers and nothing holds them like Canada Steel Goods Co. products.

The "Canada" comes neatly and conveniently packed, one pair in a box complete with bolts. Be sure to include "Canada" in your order.

Railroads— Big and Little

THE electrification of the New York, New Haven and Hartford Railroad is no greater achievement, in the mind of the American boy, than the surmounting of his own little difficulties encountered every day with his "American Flyer" Toy Trains.

To him, the lay-out of additional track, the placing of a miniature tunnel, the building of a bridge, are colossal tasks that tax his youthful energies—and incidentally furnish a training that is both recreative and educational.

"American Flyer" Trains are the choice of the majority of parents and children. In miniature, they furnish to the child, every thrill, every problem confronting your high-salaried, highly trained railroad executive.

What real live wire of a boy can deny the irresistible appeal of railroad ownership? Particularly when we cultivate the desire through his own best-loved magazines.

For the holiday season, or toys the whole year 'round, "American Flyer" Trains are a profitable line.

Catalog and Dealer Co-operation.

Why Hardware Merchants Should Handle Decorative Wall Burlaps

1. Burlap prices have declined materially; they will sell more readily.
2. Easy to handle—do not take up large space.
3. A big stock not necessary—they come in three shades only.
4. Now that building materials are coming down in price—building will increase and Burlaps will consequently be in greater demand.
5. Burlaps allow the merchant good margin of profit.
6. They help "round out" the Builders' Supplies Stock.

Write us for selling helps and complete information as to prices, etc.

Dominion Oilcloth & Linoleum Co. Limited

MONTREAL

THE Quality of a mechanic's work is a matter of pride as well as his livelihood. When a mechanic enters your store show him your line of the world's finest tools.—

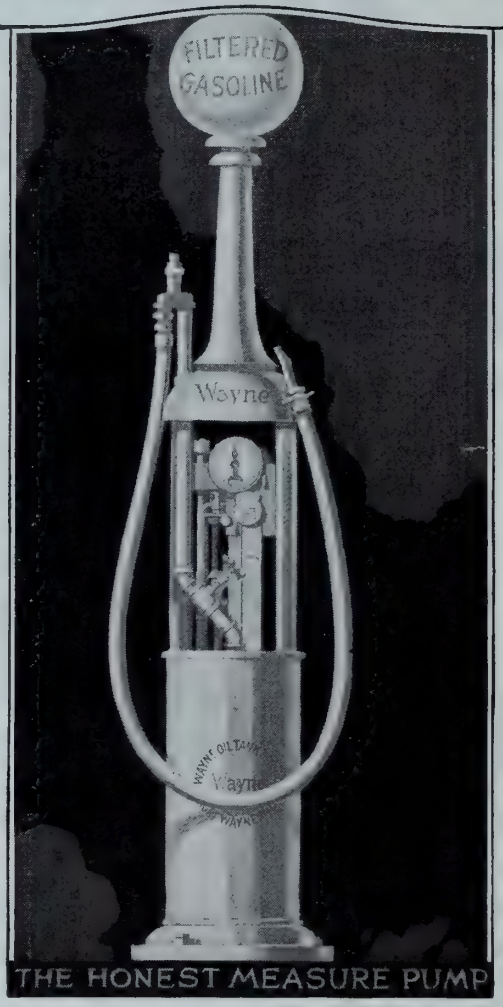
Between Yourselves—

Isn't this the Pump that gives you Greatest Satisfaction?



Why the Dealer Prefers It

Piston pump measure assures accuracy.

Hand operation eliminates expense, fire and explosive dangers.

A positive filter and four screens assure pure gasoline.

Million-gallon gear-driven meter accurately records all gasoline dispensed.

Speedy service, easy operation, lack of complicated parts.

It is the Honest Measure Pump.

Why the Motorist Prefers It

Wayne Dial registers each gallon after delivery — not before.

Overhead drain automatically gives the motorist all the gasoline in the hose.

A positive filter and four screens assure pure gasoline.

The vacuum bottle principle in construction keeps the gasoline cool and full of pep.

Graduated scale is the third check of Wayne accuracy. It shows fractional parts of gallon.

It is the Honest Measure Pump.

All of these features are exclusive with Wayne Honest Measure Gasoline Pumps. You'll find Bulletin 276 HM interesting. It's free.

Sales That Make Sales

Cheerful Home

The influence of HAPPY THOUGHT owners is a power for good that makes sales. Their confidence in the HAPPY THOUGHT line is a big asset to the Happy Thought dealer. These satisfied users circulate in every community. They not only buy themselves but influence others to buy also, thus assisting the Happy Thought dealer and doubling his potential prospects.

The establishment of this satisfied clientele is the result of seventy years' honest manufacturing and straight forward merchandising. The Happy Thought user knows that her Range or Heater or Furnace has given her value, in some cases, far beyond the price paid.

Here are four splendid examples of how we are catering to present day demand.

The Cosy Home

Not a heavy, massive piece of furniture. Just an attractive, efficient heater and cook stove that will appeal to the prospect who desires appearance and efficiency and whose space is limited. For the apartment house, bungalow or small cottage. In one size only, with or without oven.

The Cheerful Home

Nothing so pleasing as the cosy glow from the large mica windows of a Cheerful Home. Your prospect would respond immediately to its inviting appearance and moderate price. In one size only, with or without oven. 14 inch firepot.

Cosy Home

Three-In-One

The Happy Thought Quebec

This is the type of Heater selling today. The Happy Thought QUEBEC is an advanced design. Not only an effective heater but extremely attractive in appearance. In two sizes, with or without water jacket.

The Three-In-One

Variable climate or fuel conditions is what the THREE-IN-ONE is built for. It burns three fuels, hard or soft coal or wood. A large oval shaped firepot of cast-iron, corrugated, adaptable for cooking. In two sizes, 20 inch and 23 inch firepot.

True Economy

Stack Heater

The Stack Gas Water Heater will heat water in one minute.

The almost perpendicular copper pipes in the Stack Heater offer no hindrance to the natural tendency of water to rise when heated.

Take notice of the small size and large number of coils; this means quick heat. The numerous small pipes will naturally heat water quicker than one big pipe because of the greater heating surface offered.

More hot water with smaller consumption of gas—that's true economy.

Send for a Stack Heater Display Card

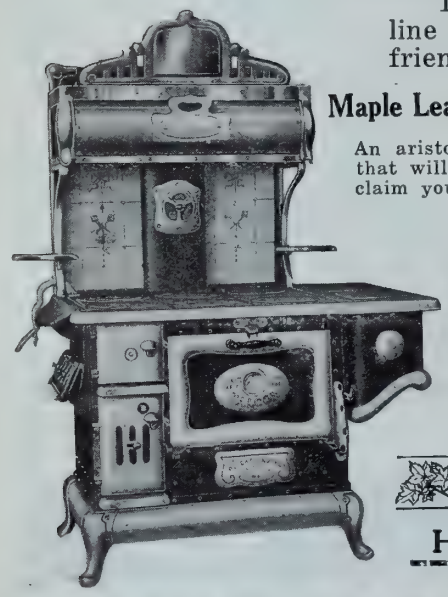
Quality is Essential

THE dealer who wants to hold his trade—to keep his customers always happy—must always be sure that the goods he sells possess "quality."

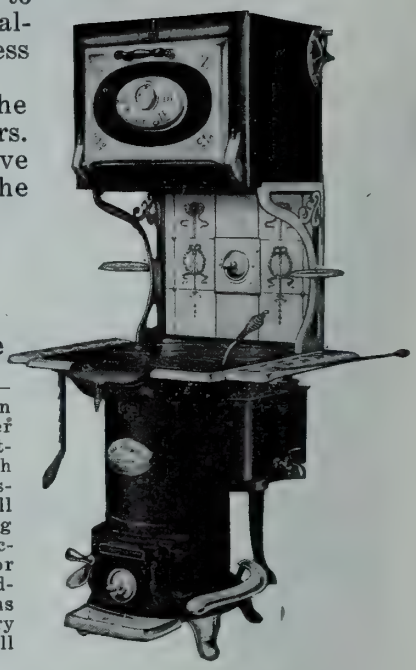
"Quality" is the outstanding feature in the Maple Leaf line of stoves, ranges and heaters. "Quality" is the principal watchword and motive in our factory—and, therefore, "quality" is the outstanding feature of our entire product.

The dealer who handles the Maple Leaf line is absolutely sure of creating customer friends who will stick by him always.



Maple Leaf Falcon Range

An aristocratic steel range that will back up every claim you can make for it. It is made in several handsome designs which makes it an ornament in any kitchen. It gives perfect satisfaction at all times. The Falcon is both a money-maker and a friend-maker for the dealer.



Maple Leaf Composite

This range is unique—there is nothing like it on the market. There never will be, because of its patented flue system which makes the high oven possible. It is the peer of all "Quebec" heating, cooking and baking ranges. It occupies only a small floor space. It has all the modern attachments. It burns all kinds of fuel and every woman who buys one will help you sell others.

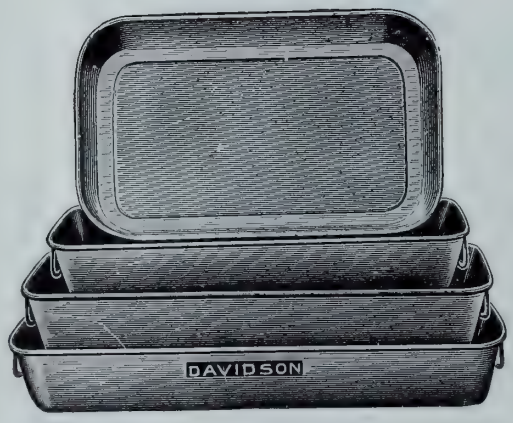
BEACH FOUNDRY LIMITED

Head Office and Factory, Ottawa, Can.

Branches in Winnipeg and Vancouver.

Special Notice

If you are not acquainted with the Maple Leaf line—get in touch with us today. Ask for price list and latest quotations.



Davidson's Covered Roasters

Best quality workmanship—quick heating and easy to keep clean. Our No. 200 "Sterling" oval shape and our Nos. 0 to 20 "Crown" in round and oval shape come in blued steel and seamless throughout. Can also be supplied in Colonial Grey Enamel.

Our "Empire" self-basting roaster has indented top and bottom, which allows the steam to circulate and condense. This ensures an even and regular basting of joint while cooking.

The "Perfect" self baster is admirable for game, fish, bread, etc.

Seamless Roast Pans

In sizes 6 to 9. Carefully made in best blued steel. Can also be supplied in Colonial and Premier Brands of Enamelled Ware.

Send for special circular illustrating above lines.
